Thus, in granting this waiver for the consideration of S. 650, the Committee nonetheless views as out of order any amendments to that bill which if offered separately, would be out of order under section 303(a).

COMMITTEE RECOMMENDATION

Under these circumstances the committee believes that Senate consideration of S. 650 is not so inconsistent with the Congressional budget process as to be inappropriate and recommends that the resolution be adopted.

WAIVER OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO CONSIDERATION OF AN AMENDMENT TO S. 650

The resolution (S. Res. 115) waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of an amendment intended to be proposed to S. 650, was considered and agreed to, as follows:

Resolved, That pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act are waived with respect to the consideration of an amendment intended to be proposed to S. 650. Such waiver is necessary to permit consideration of an amendment which would provide statutory authority for new entitlements for wheat producers with respect to wheat planted after January 1, 1977, to become effective in a fiscal year for which the first concurrent resolution on the budget has not yet been adopted. The special program authorized by S. 650 is of an emergency nature, and it is necessary that all producers affected receive the earliest possible assurance that they may use their wheat crop in the manner provided for in the bill.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–55), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE RESOLUTION

Section 303(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House or the Senate to consider any bill or resolution or any amendment thereto providing new budget authority, new spending authority, or changes in

revenues or public debt for a fiscal year until the first concurrent resolution on the budget for such fiscal year has been adopted.

Since the amendment to S. 650 provides for spending authority for fiscal year 1978, a resolution waiving section 303(a) of the Budget Act with respect to consideration of the amendment to S. 650 must be adopted before the amendment can be considered by the Senate. In reporting favorably on the resolution waiving application of section 303(a) of the Budget Act to the amendment to S. 650, the Budget Committee is recommending that the Senate proceed to full consideration of the amendment, but is not prejudging the merits of it.

PURPOSE OF THE AMENDMENT

The proposed amendment to S. 650 would include in the new wheat emergency program all 1977 wheat and not just that planted prior to January 1, 1977, as proposed in S. 650 as reported by the Committee on Agriculture, Nutrition and Forestry. The effective date of the amendment, as in the reported version of S. 650, will be October 1, 1977, with provisions retroactive to cover payments for the 1977 crop of winter and spring wheat.

COMMITTEE CRITERIA

The Budget Committee is extremely reluctant to recommend the adoption of resolutions waiving section 303(a) of the Budget Act. One of the major purposes of the Congressional Budget Act was to bring the Federal budget under better control. Through the adoption each year of the first and second concurrent resolutions on the budget, Congress sets fiscal policy and national priorities for the fiscal year.

If legislation affecting spending or revenues for a future fiscal year is considered prior to the adoption of a first concurrent resolution on the budget for that year, to that extent Congress loses control of the spending and priority decisions for that year prior to adoption of a congressional budget for that year. However, the Budget Act recognized that in some situations it may be appropriate to consider such legislation before the adoption of the first concurrent resolution.

The Budget Committee has concluded that it is appropriate to waive section 303(a) in the case of this amendment to S. 650 because it addresses the same subject as S. 650, namely, the emergency crop conditions which cannot await the adoption of the first budget resolution for fiscal year 1978. Specifically, the amendment will perfect S. 650, for which a waiver, Senate Resolution 107, has been favorably reported, by extending the provisions to cover spring as well as winter wheat.

The committee, in recommending the adoption of the resolution waiving the application of section 303(a) to this amendment to S. 650, considered the additional estimated cost of the amendment of $25 million, limited to fiscal year 1978, to be relatively small although this additional cost raises the total cost of S. 650 to an estimated $125 million. It should be noted that the favorable recommendation on the resolution does not necessarily endorse the amendment or its funding level.

AMENDMENTS TO S. 650

The committee does not intend that this waiver resolution should be interpreted in any fashion as waiving the clear prohibition of section 303(a) against any amendment to S. 650 other than this amendment to which Senate Resolution 115 applies. Under section 303(a), any other amendment to S. 650 will be out of order if it provides:

(1) New budget authority for a fiscal year;

(2) An increase or decrease in revenues to become effective during a fiscal year;

(3) An increase or decrease in the public debt limit to become effective during a fiscal year; or

(4) New spending authority described in section 401(c)(2)(C) to become effective during a fiscal year;

before the first concurrent resolution on the budget for such year has been agreed to pursuant to section 301 of the Budget Act.

Thus, any other amendment to S. 650 which is not germane to the bill or which will increase budget authority or spending authority or increase or decrease revenues or the public debt in fiscal year 1978, or any fiscal year thereafter, is not in order.

The purpose of the prohibition against such amendments to legislation upon which a waiver has been granted is to assure that, in adopting such waivers, the Senate does not open the door to amendments which would increase the levels of budget authority or new spending authority beyond those levels contained in the bill upon which a waiver was granted, nor permit the use of that legislation as a vehicle for amendments to increase or decrease revenues or the public debt other than as provided in the bill upon which the waiver is granted.

Thus, in granting this waiver for the consideration of this amendment to S. 650, the committee nonetheless views as out of order any other amendments to that bill which, if offered separately, would be out of order under section 303(a).

COMMITTEE RECOMMENDATION

Under these circumstances, the committee believes that Senate consideration of this amendment to S. 650 is not so inconsistent with the congressional budget process as to be inappropriate and recommends that the resolution be adopted.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time under the order.

The PRESIDING OFFICER. Does the Senator from Tennessee seek recognition?

Mr. BAKER. Mr. President, I do.

For a moment, I ask the Chair to withhold recognition.

Mr. President, I yield 5 minutes of my time under the standing order to the distinguished junior Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. I thank the Senator for yielding.

S. RES 116—COMMEMORATION OF ST. PATRICK'S PARISH IN POTTSVILLE, PA.

Mr. HEINZ. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, may I say that this resolution has been cleared and I have no objection.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

Whereas Saint Patrick's Parish in Pottsville, Pennsylvania, is celebrating this year the one hundred and fiftieth anniversary of its founding; and

Whereas Saint Patrick's Parish is the oldest disocese in Schuykill County; and

Whereas the people of this parish characterize the spirit of the early immigrants who came to this great country: Now, therefore, be it

Resolved, That the Senate recognize and commemorate the people of Saint Patricks Parish upon this special occasion.

SEC. 2. The Secretary of the Senate is hereby directed to transmit a copy of this resolution to Saint Patrick's Church.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. HEINZ. Mr. President, I think the resolution speaks for itself. Many of us are wearing the green today.

I ask my colleagues to join me in recognizing the 150th anniversary of St. Patrick's Parish in Pottsville.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 116) was agreed to.

Mr. BAKER. Mr. President, I commend the distinguished Senator from Pennsylvania for bringing this resolution to prompt and appropriate passage in the Senate today.

As I look around at our colleagues—those who were here previously and those who are here now—I notice that among those cast in the greenish hues are the distinguished senior Senator from Arizona, who is in Kelly green from top to bottom, I am sure in deference and respect to the extensive population of the distinguished Irishmen in Arizona.

I am also happy to see that there is general support for this resolution today. We all join the Senator from Pennsylvania in paying tribute to St. Patrick, to the wearing of the green.

Mr. GOLDWATER. Mr. President, it may seem peculiar for a fellow named Goldwater to be wearing green, but my mother was Irish and my father was Jewish, and that is a hell of a combination. [Laughter.]

Mr. BAKER. A fact that we have always known.

THE PROPOSED SACCHARIN BAN

Mr. BAKER. Mr. President, the Food and Drug Administration's recent announcement that it will propose a ban on the use of saccharin in food and beverages has created a furor which raises serious questions about the capacity of the Government to protect the public from potentially dangerous substances which increasingly sophisticated methods of scientific research bring to light.

Although saccharin has been used as an artificial sweetener in this country for almost 80 years, it has never been shown to be harmful to people; and the Canadian test results on which FDA is basing its proposal point to the development of cancerous tumors in rats who had been fed a dosage of saccharin equivalent in a human to the drinking of 800 12-ounce diet sodas daily for a lifetime.

Whether these tests, in turn, indicate the probability, or even the possibility, that humans could develop cancer from ingesting small amounts of saccharin is questionable, as is the severity of the possible cancer risk when weighed against the clearly defined health hazards of overconsumption of sugar.

But the FDA has been precluded from weighing relative risks and benefits of a

saccharin ban by the language of the Delaney clause of the Food, Drug and Cosmetic Act. That language requires the prohibition of any food additive:

If it is found to induce cancer when ingested by man or animal or if it is found, after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animal.

It is clear, therefore, that the FDA's hands are tied and that the ban on saccharin as a food additive is required by the law as Congress drafted it.

Some have proposed that the FDA regulate saccharin as a drug, rather than a food additive, to which the Delaney clause would not apply. Since saccharin is listed in official drug compendia, this alternative is possible and it would make saccharin available in tablet or packet form, if not in soft drinks and other prepared foods.

This suggestion, however, does not address the major public policy questions raised by the application of the unequivocal language of the Delaney clause to a popular food additive, 5 million pounds of which is consumed by millions of Americans each year. Saccharin is not only a convenience for weight-watchers; it has become a major factor in the diet of diabetics and others for whom a reduction in sugar intake is a life-and-death matter. In addition, now that cyclamates have also been banned, saccharin is the only sugar substitute which has been approved for marketing in the United States.

Obviously, then, the FDA's action will have a major impact. I hope that it will encourage the Congress to review the Delaney clause and the differing standards which have been applied to the control of various substances which may be harmful to human health. Is it good public policy to apply so rigid a standard for food additives and a totally different one for tobacco, alcoholic beverages, pesticides, chemicals, and birth control pills?

During the last few years, as a member of the Senate Committee on Commerce, I had the opportunity to participate in the development of Public Law 94–469, the Toxic Substances Control Act. This measure, which is designed to provide an effective means of controlling chemicals with the potential for causing unreasonable risks to human health and the environment, recognizes the risks posed by carcinogenic substances and the need for preventing or minimizing those risks. It does so, however, in a manner which permits some flexibility on the part of those administering the law to weigh all relevant factors and to consider a wide range of regulatory actions, including but not limited to a ban on use, to control those substances.

It seems to me that Congress would do well to consider adopting a similar approach to food additives—one that would permit FDA to consider the benefits as well as the possible hazards of saccharin and similar substances.

Such an approach would, in my view, be more deserving of public confidence than the inflexible requirements of existing law. While the Federal Government unquestionably has a vital role in discovering health hazards and making the public aware of them, we must also be aware of the rational limits beyond which Government should not go in preventing Americans from making decisions for themselves. Our action several years ago to repeal Federal auto safety standards requiring a seat-belt-ignition-interlock system is a good example of this. The saccharin issue gives us an opportunity to reexamine a legislative policy which has far-reaching effects on every American. I hope that we will make the most of that opportunity in the weeks ahead.

Mr. President, saccharin may sound like a small issue, but saccharin is a big issue, judging by the amount of mail I am receiving in my office and the number of comments I have received from around the country.

I do not know what the role of the Government will finally be determined to be in the years just ahead, but I have a strong feeling that Government's role will be not to intrude so thoroughly into the lives of individuals in their daily endeavors that we are entirely protected against ourselves.

I think of the interlock provisions of the seatbelt law, which I am sure had good logic, but I am also sure the country simply would not stand still for it.

Mr. President, I think something fundamental has to be done about this saccharin dilemma. If not, I am afraid that many of us may, in fact, contract terminal fat instead of some other dread illness.

So I hope that the remarks I have just made will be taken seriously and that my colleagues will turn their attention to the question of the future fate and destiny of the so-called Delaney amendment.

I hope the FDA will give us their advice as to how we can get out of this dilemma, before the people start marching on Jenkins Hill.

AIRBORNE WARNING AND CONTROL SYSTEM

Mr. BARTLETT. Mr. President, I am disappointed in the decision by the new administration to cut the procurement of the E–3A airborne warning and control system—AWACS—aircraft in fiscal year 1978 from six aircraft to three. While this cut permits a small reduction in the size of this year's defense budget, in the long run this action will save little if any money. In the short run, this decision will undermine greater cooperation, preparedness, and standardization in the North Atlantic community. No easy solutions exist for the many problems our Armed Forces in Europe. But as Gen. Richard H. Ellis, commander of Allied Air Forces Central Europe stressed to me recently, the E–3A AWACS will greatly reduce the dangers from increased Soviet tactical air power, reduced warning of impending attack, and weak coordination and communications among our NATO allies.

In the AWACS aircraft, advanced electronics, computers, and "downward looking" radar have turned the basic Boeing 707 commercial jetliner into an airborne command post capable of surveying land, sea, and air for hundreds of miles in all directions and of locating aircraft, ships, and electronic emmiters such as radios and radars, both friendly and enemy. Secure communications and data links permit the AWACS crew to direct friendly forces in combat, and an amazing television link provides ground commanders with both the friendly and enemy order of battle, even as it changes.

With the "look down" capability of its doppler radar, the AWACS can detect low-flying aircraft hiding in the "ground clutter" of the Earth's radar reflection. Thus, AWACS is a far more effective surveillance system than our present ground-based radars. It is also more survivable. Flying at high speed and changing its location constantly while distant from any threat, each AWACS aircraft can direct interceptors and surface-to-air missiles in its own defense while continuing its warning and control mission. Flare and chaff dispensers are available should the plane come under direct attack, but studies including airborne exercises have shown that attacking an AWACS aircraft would be extremely costly to any enemy. Furthermore, such an attack would force that enemy to reveal his intentions and divert many valuable resources from the battlefield.

Whether protecting the continental United States against the Backfire bomber, providing the Navy with control of the air over the seas, or preventing a surprise attack against Western Europe, AWACS enhances our ability to deter and to defend. Inflight refueling and on-board maintenance permit the AWACS to be deployed anywhere in the world on short notice. Thus, AWACS can be used to help project American military power, or it can be used to "show the flag" in a manner suitable to the electronic age. Launching additional AWACS aircraft can serve to signal our readiness during heightened international tension and is less provocative than launching our bombers. Also, AWACS can provide assistance to friends and allies without committing American combat forces. Even in crises where the United States is not involved, the presence of an American AWACS can serve to promote peace since AWACS would deprive a potential aggressor of both surprise and propaganda. AWACS brings "real-time" facts to international debate. However, AWACS should not be viewed only as a military and geopolitical tool, since the E–3A aircraft can also provide air traffic control and navigational assistance to civilian aircraft and could, for example, coordinate international relief efforts in remote regions which have suffered natural disasters such as hurricanes and earthquakes.

The E–3A airborne warning and control system is a flexible aircraft with a tremendous potential for growth. It is not a wonder weapon of the future, nor is it a gold-plated laboratory device awaiting some painful decision to be produced. On the contrary, it is a proven system already in production. The 552d

Airborne Warning and Control Wing at Tinker Air Force Base, Okla., will accept the Air Force's first E-3A AWACS aircraft on the 24th of this month and will be fully operational with five aircraft in the fall. Tinker AFB will also have the training and maintenance support function for the entire Air Force AWACS program. In fiscal year 1982, the U.S. Air Force hopes to have a force of 34 AWACS aircraft.

In our report to the Senate Armed Services Committee entitled "NATO and the New Soviet Threat," Senator SAM NUNN, Democrat of Georgia, and I concluded:

> The Alliance's present command, control, and communications capability must be substantially enhanced to accommodate the demands of the modern battlefield. There is an impressive consensus within NATO that procurement of the Airborne Warning and Control System (AWACS) is essential to realization of this objective.

Just yesterday, Aviation Week called AWACS "one of NATO's most urgent requirements," and the Carter administration has stated that it is still committed to the NATO use of AWACS. However, the decision by the new Secretary of Defense to cut this year's AWACS procurement from six to three aircraft delays this vital program, raises the unit cost, and sends the wrong message to European leaders considering joint funding. When leaders of the Congress and the administration met with the West German Defense Minister this week, I hope that they took every step to reassure him that the United States understands the importance of AWACS to NATO and is committed to further standardization.

As a result of conversations that Senator NUNN and I had in Germany with the Minister of Defense, I know that the minister is very concerned about the conventional weapon capability of the NATO forces. The effect of the recent decision to cut AWACS procurement may well be seen next month when the NATO ministers meet to consider procurement of the E–3A AWACS.

It is my hope and strong conviction that we should and must place AWACS back as it was originally, for a procurement of six rather than three aircraft. I believe this is vital to the future security in Europe and for the strength of the military of the United States.

Mr. GOLDWATER. Mr. President, before commencing the remarks for which I asked time this morning, I compliment my friend, the Senator from Oklahoma, on the remarks he has made about AWACS.

I have kept abreast of this development since it was barely on the drawing boards. I have flown the simulator and have flown the contemporary, the E–4. It is an aircraft that I think will revolutionize warfare, particularly in Europe, and will afford the best opportunities that we and our allies have ever had to comprehend what the enemy will be doing and are doing, and it will save our side many, many lives. I hope Congress will allow this equipment to be built.

Mr. NUNN. Mr. President, will the Senator from Oklahoma or the Senator from Arizona yield?

Mr. GOLDWATER. I will yield just so it will not come out of my time.

Mr. NUNN. Mr. President, I commend the Senators from Arizona and Oklahoma on their remarks and statements on AWACS. I share their opinion as to the importance of this system, and I also think it should be emphasized that one of the most critical problems we have in NATO is the diminishing warning time that has come about in the past few years because of dramatic improvements in the Warsaw Pact capabilities.

NATO needs additional warning time. AWACS will give additional warning time.

I commend the Senator from Oklahoma and the Senator from Arizona, and I share their views. I congratulate them on their perceptive remarks.

Mr. BARTLETT. Mr. President, if the Senator will yield, I appreciate very much the remarks of the Senator from Arizona and the Senator from Georgia. I obviously share their feelings, and I think what they have expressed is extremely important regarding AWACS.

I would remind the Senator from Georgia that General Ellis told us when we were in Europe that his No. 1 priority was AWACS, and I think this comes from one of the top people in not only the Air Force but in our whole military system, a very impressive man, so I think we should certainly pay attention to his words.

I thank the Senator from Arizona.

I would like to yield the remainder of my time that I had allotted to me to the Senator from Arizona.

Mr. GOLDWATER. I thank my friend from Oklahoma. I am sure I do not need it, but in the event I do I will have it there. I thank the Senator.

SENATE CODE OF OFFICIAL CONDUCT

Mr. GOLDWATER. Mr. President, today sometime we are going to take up Senate Resolution 110, which is a resolution to propose amending the Senate rules to include a code of conduct, and I want to address myself to this important piece of legislation.

Mr. President, Mark Twain once suggested that—

> It could probably be shown by facts and figures that there is no distinctly native American criminal class except Congress.

Today, about a hundred years later, in the wake of a series of scandals, many of our contemporaries seem to share Mark Twain's opinion on the subject. What is most distressing to me is that the very people who ought to know best that it is not so, the Members themselves, seem the most eager to believe it.

And we in the Senate are so preoccupied with the charge that we stand ready to rise up, fix the Nation with a firm stare, and proclaim to the American people—through legislative enactment, as the House has already done—that "your Congress is not a crook."

Watching the scene we have set in this Chamber, I would not be surprised if the American people in response did not rise up themselves, wondering if perhaps their Congress is not protesting just a little too much.

For a great variety of reasons, not the least of which are some of our own failures, we have gotten to the point where membership in the House or Senate is less and less a position of honor—and more and more a presumption of guilt.

And what is worse, my colleagues are on the verge of pleading no contest to the charges.

Mr. President, the charges are unfair and this proposed response to them is inappropriate.

Of course, there have been some problems, which have given rise to the recent scandals. You have to go no further than some recent headlines to know that a problem does exist. But in terms of the allegations that some Members took money from representatives of a foreign government—the so-called Korean money scandals—the problem is not that we have too few laws on the books to prohibit such transactions.

The problem is that Congress has a few Members who do not pay any attention to the law.

If we limit outside income, for example, one of the major provisions of the Code of Conduct adopted by the other body, we will certainly impose a hardship on those persons who have been both honest and successful in the past and who may choose, or may have already chosen, public service through elective office.

There are Members, after all, whose very success in the business world has afforded them such financial independence that their livelihood need not be dependent upon their voting record. I do not suggest that Members with no other source of income but their Senate salaries cannot be good, conscientious, and principled Senators. I only deny that Senators who have such outside resources must necessarily be unconscientious, unprincipled, and bad. I deny it, though it seems to be the underlying premise of this bill.

Let us not lose sight of the simple fact that the current scandal has to do with Members who apparently took bribes. Preventing those Members—and all others—from earning honest money if they choose to try, is no reform at all.

Mr. President, I am tempted to say, as I have said before in other contexts, that what we are considering here is an effort to legislate morality. Usually when we do so, we try to impose it on the whole country, excluding ourselves, of course. This time we are trying to impose on ourselves a standard none of us would ask our constituents to meet.

I am not sure morality is the right word, though. Certainly there can be nothing immoral in making money honestly and nothing particularly moral about prohibiting it.

What we are doing, instead, is trying to legislate for ourselves a standard of honor, however wide of the mark this standard may be. And at this low point of national esteem for the Congress by the people as a whole, the point cannot be lost on Americans that if the Congress

must force itself and its Members to be honorable, then their lack of confidence in us is justified.

If the people have to accept that their elected representatives cannot tell right conduct from wrong unless they have a formula devised for them, then they would be right to despair.

If these so-called reforms pass—and they seem likely to—I have little doubt that passage will be due to solely political considerations. How many of my colleagues will willingly vote against anything which is called reform? The debate on this subject has been so cast that a vote against this proposal will be perceived as a vote against reform, as a vote against morality, as a vote for continued corruption.

When I vote "nay," though, Mr. President, as I intend to, my vote will be a vote against hypocrisy, a vote against the denial to myself and to my colleagues of our right to earn a living in the manner we choose, and, perhaps most importantly, my vote will be a vote for continued accountability of myself and my colleagues to our own constituents.

Parenthetically, Mr. President, I might say I had promised a group in my State called Common Cause that I would vote for the passage of this bill, but since I have seen the bill passed by the House, and seen the bill suggested by the committee in the Senate, I have informed those people constituting Common Cause in my State that I cannot vote for it unless it receives rather drastic amending.

So my opinion at this time is to vote against it. The voters can and should be the judges of both our effectiveness and our integrity. Pass this so-called reform bill, and in large measure the seat of that judgment will shift from the voters to some arbitrary formula.

A good Senator is one who honestly represents both his own constituents and his conscience when he casts his votes in this Chamber. He may be rich or poor. He may have earned income or unearned income or no income at all apart from his salary. It is the former test, how he casts his vote, and not the latter test of how he makes his money that determines how he should be judged as a Senator.

That is the simple truth, and we are not going to make it untrue by passing this "reform" bill.

We may accomplish one thing, however, we may discourage a lot of good men and women from considering public office. We may even lose some that we now have. If a limit on outside income is adopted along with anything like the full financial disclosure requirements passed in the other body, then a lot of talented but perhaps independent-minded persons are going to exclude themselves from elective office.

It may not be going too far to say that we will be taking away the right to run for office from those who might believe, as is not untraditional in this country, that how much a person makes and what he owns and what he owes, may not be anyone else's business. That happens to be a view I hold. It does not entitle me to win if I choose to run, but it ought not to prevent me from running.

In recent elections, it seems undeniable that some men, some of our own colleagues, have lost because an issue was made of their personal financial situation. The subject does seem of interest to the voters. It certainly seems to fascinate the media.

I have no quarrel with that public interest. If the voters want full disclosure by their representatives, then representatives will either have to give it to them, or suffer the consequences at the polls. In this context, the man who believes such personal information is nobody's business but his own, is at a disadvantage. But he will be at a disadvantage because of what voters demand of him and because of his own free choice, not because some arbitrary ethical formula has labeled him corrupt.

Mr. President, the major issue which this bill seeks to address is the need for restoring public confidence in the Congress, House, and Senate. I believe that need is urgent and compelling.

But we can pass this bill and a dozen more like it and not have come close at all to meeting the real challenge.

We are not solving the people's problems with this legislation. We are salving our own conscience and, in some cases, trying to save our political skins. Nothing in this bill will prevent any Member who wishes to take money illicitly or illegally from whatever source, from doing so.

Taking bribes is illegal under current law. Requiring that Members who do it, then report it, will not stop them from doing it. Recall that the impetus for a new code of congressional ethics arose from the pay raise controversy. We were justifiably criticized for our unwillingness to take a public stand on whether the pay raise was necessary while at the same time we showed no unwillingness at all to accept the raise when it came to pass.

Now, in response to pressure which we could withstand if we took ourselves seriously enough, we are about to pass an inappropriate and very possibly unconstitutional set of restrictions on our own individual economic freedoms.

Have things really come to such a pass in the Senate of the United States, Mr. President, that we can look to our constituents and to the people as a whole and say to them—without any shame whatsoever—that a raise in our pay is the best, if not the only way, to insure we will be honest?

Are we really going to have more integrity at $57,500 a year than we did at $44,500? If the American people were fools enough to believe that, they might have welcomed the raise, or even increased it.

But they are not such fools. They know what many of my colleagues seem to have forgotten. Our integrity can neither be purchased with a pay raise nor diminished by denying it. Our integrity cannot be guaranteed by codes of conduct nor jeopardized by their absence.

Our integrity is ourselves. If we the elected lawmakers for this country do not know that taking a bribe is wrong—and illegal—unless it is written down in some code of conduct, then who are we to pass the laws that govern the rest of our citizens, some 215 million of them who by and large, lead honorable lives?

And who are they to put up with such moral bankruptcy in their representatives?

They will not do it, Mr. President, I can assure you of that. They will not put up with this charade much longer.

And why should they?

Mr. President, having outlined in a broad, general way my objections to the pending ethics bill, let me announce that I will offer at the end of my remarks a breakdown of my financial and property holdings to the best of my ability, and I will, when my income tax is filed in the middle of April, offer that for the public record. I can see only one advantage to me: it will remove the idea that I am a millionaire, which is one of the most expensive reputations that I have. Now, I do not think for one moment that this is going to make me more honest than I am today. In fact, I do not think the passage of this so-called ethics bill is going to change the honesty of this Congress one way or the other. If anyone in this body thinks I am not going to have lunch with whom I want to or go to dinner with whom I want to, or play golf with whom I want to, then he has another thought coming. I would remind my colleagues that this job is now worth in the neighborhood of $345,000 for a 6-year period, and if anyone thinks so lightly of the honesty of any of us to believe that for the price of a cocktail, green fees, or a steak dinner we are going to suddenly become dishonest and untrustworthy people, again, he has another thought coming. I repeat what I have said before, laws do not create morality, laws do not create honesty, and with that I will cast my vote against this bill as it is currently written.

Mr. President, I ask unanimous consent that a statement of the assets of Senator and Mrs. Barry Goldwater of Arizona be printed in the RECORD at this point, and I yield the floor.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Assets of Senator and Mrs. Barry Goldwater

BANK ACCOUNTS

Valley National Bank, joint account	$14,500
Valley National Bank, Margaret	22,000
Trust accounts	36,700

SECURITIES

400 shares Exxon Corp., capital stock	20,700
350 shares General Electric Co., common stock	17,762
57 shares ITT Consumers Service Corp., convertible preferred series A	4,560
200 shares General Motors Corp., common stock	14,200

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. ALLEN). At this time, in accordance with the previous order, there will be a period for the transaction of routine morning business of not to exceed 30 minutes, with speeches by Senators limited to not more than 10 minutes each. Is there morning business to be transacted at this time?

THE FUTURE OF THE NAVY

Mr. HART. Mr. President, on February 10, I addressed the Senate on the subject of the Soviet naval challenge. At that time I stated that I would offer some further thoughts on the naval situation once President Carter had submitted his naval ship construction budget. The Carter budget has now been submitted to the Congress, and I believe it is time we all began to think about the naval program for fiscal year 1978, and for future years.

As I noted on February 10, the United States faces a serious naval challenge from the Soviet Union. The Soviets have developed substantial naval capabilities in certain areas. While their heavy investment in strategic antisubmarine warfare systems has not yet brought them any real capability against our strategic missile submarine force, we should be concerned by the major research and development effort they are making in this area. The Soviet Navy has successfully developed a new naval concept, anticarrier warfare, and they have put to sea significant numbers of surface ships and submarines, supported by land-based naval aircraft, to serve that concept. Their anticarrier capability gives them a significant ability to confront the U.S. Navy in various crisis scenarios.

In both NATO and non-NATO situations the Soviets large and capable fleet of attack submarines is a serious challenge to the West. It is not clear that these submarines would be used, at least in the initial stages of a NATO war, to disrupt the Atlantic sea lanes; the Soviet expectation of a short war in Europe makes that task somewhat irrelevant. But possible U.S. plans to project ground forces into Europe's northern and southern flanks may be unrealistic in view of the capability of the Soviet submarine force in the Norwegian Sea and the Mediterranean: preventing such operations would be a logical element in a Soviet "short war" plan.

Today's Soviet Navy has a substantial capability to use naval forces as tools of crisis management and for political influence around the world. It is not difficult to foresee the Soviet fleet being used to block U.S. attempts to reinforce friendly states in local crises, or to support friendly elements within a Third World state. Areas in which Soviet naval forces could be used in this role include the eastern Mediterranean, an area where the United States has major commitments.

In sum, these Soviet naval capabilities add up to a new dimension of Soviet military capability, a dimension not present even 20 years ago.

As I also noted in my earlier remarks, the United States cannot afford to ignore the Soviet naval challenge. Unlike the Soviet Union, we are a nation dependent on the sea in fundamental economic and military terms. The Soviet Union is self-sufficient in most resources; we are not. The allies of the Soviet Union lie overland; our allies lie overseas. We cannot permit a potentially hostile power to dominate the sea, any more than the Soviet Union would permit a potentially hostile power to dominate the European land mass.

The question facing us is, what is to be done? At present, the Senate finds itself facing two proposed answers to that question. The first is the Navy shipbuilding plans for fiscal year 1978 and for the 5-year period of 1978–82. The second is the plan offered by the Seapower Subcommittee of the House of Representatives in its February 24 markup, a plan for the fiscal year 1978.

Most observers have found these plans to be significantly different. However, I would suggest that in conceptual terms these plans have more uniting than dividing them. Both plans are evolutionary, even traditionalist, in their thinking. Both plans have as their objective maintaining what might be called a minimum balance, seeking not to reverse the trend of the relative growth of Soviet naval power through bold moves on our part, but rather to prevent that growth from proceeding too rapidly, or at best stabilizing the situation.

Both plans are what might be called old technology plans. The Navy plan puts it main emphasis on frigates, a classic type of ship which has been with us, in much its present roles, since the early 1940's. The House subcommittee plan emphasizes the technology of the 1950's, when some believed that nuclear propulsion would give not only submarines but also surface ships some decisive military advantages. It has since been shown, not surprisingly, that weapons, sensors, and overall ship performance are more important than whether a surface ship generates steam with oil or with atoms. From a technological standpoint, both plans consist of a "more of the same" approach. Neither reflects the realization that the rapid technological change which characterizes our era permits and even requires major changes in military concepts and force structure.

If we look at the Navy program, we see that both the fiscal year 1978 budget and the 5-year defense plan emphasize frigates. Despite the Chief of Naval Operation's emphasis in testimony on a "balanced fleet," the past, present, and future programs of the Navy are heavily tilted in favor of this type of ship. The Navy now has 64 frigates in service. As the overall size of the Navy has dropped from almost 1,000 ships in the late 1960's to fewer than 500 today, only one class of ships has gone up in total numbers: frigates. Only one class of ship in the Navy is completely modern, less than 15 years old: frigates. Despite this existing force of modern frigates, the emphasis in the Navy's future is also on frigates. The fiscal year 1978 program calls for 9 ships of this type; the Navy hopes to build a total of 58 over the next 5 years.

Unfortunatley, the frigate is not an emblem of either conceptual or technological progress. Its main tasks are antisubmarine warfare and air defense; yet aircraft, not classic surface ships, are shown by numerous studies to be more effective platforms for both of these tasks. While maximum submarine speed has increased since World War II by 3 to 4 times and sustained speed by 10 times, frigate speed has not increased at all. Frigate sensors and weapons have improved since World War II, but so have those of submarines, and the latter by a greater margin.

Most importantly, the frigate is not a type of ship which is readily adaptable to changes in weapons/sensors technology. The FFG–7 design, which is the basis of the frigate building program, has little space or weight margin for incorporating new weapon or sensor systems. Whereas a platform for carrying aircraft can be adapted to technological changes by changing the aircraft carried, with comparatively little modifications to the ship, the frigate type ship must undergo substantial and expensive rebuilding.

This is not to say that frigates have no utility, or that we should not build any ships of this type. Frigates retain utility against conventional submarines, and the antiair capability of the FFG–7 would be sufficient against many third world and some Soviet threats. But the Navy is already equipped with many modern ships of this type. It is difficult to see the rationale for continuing a massive building program in this category, at least until alternatives embodying new technology and reflecting new concepts of how to perform the assigned missions are thoroughly investigated.

In terms of aircraft carriers, the Navy 5-year defense plan proposes funding in fiscal year 1979 of the first of a new class. While the exact characteristics of this ship are not yet determined, it is apparently to be about 58,000 tons and have conventional propulsion. Cost is projected at $1 to 1.2 billion, compared to about $2 billion for the 90,000 ton, nuclear propelled *Nimitz* class.

This proposed CVV class of aircraft carrier will be individually less capable than the *Nimitz* class. Naturally, the total number of aircraft carried will be less. Comparing on a 1-for-1 basis, it will not be as cost effective as the *Nimitz*, or as a *Nimitz*-size carrier with conventional propulsion; cost per ton inevitably

drops as a ship gets larger, so that, ton-for-ton, the *Nimitz*-size would be cheaper.

Why then have many people supported smaller aircraft carriers? The reason is that the change in weapons technology has raised the vulnerability of any individual surface ship markedly over the last two decades. Thus, the more we concentrate our naval air power into a small number of large, individually capable ships, the greater our overall vulnerability. Dispersion is required to meet the threat, and assure that some aircraft platforms will still be functioning in most tactical situations even after a hostile attack has been absorbed.

However, it is not clear that the CVV program as proposed to date will result in any significant increase in the number of aircraft platforms by 1990, or even by the year 2000. The 5-year defense plan contains only two CVV's, one in 1979 and one in 1981. Given the need to retire some of our oldest carriers and undertake a major rebuidling of others, it appears that the CVV program will not bring any increase in the number of carriers before 1987, and only a slight increase by the year 2000. Thus, it appears that we may have achieved the classic results of a compromise: The disadvantages of the small and the large carrier combined, with the advantages of neither, Whether this is the case or not will depend on whether the CVV program is projected so as to bring about a significant increase in the total number of aircraft platforms.

Meeting this challenge of technology—the increasing vulnerability of any single surface warship—depends not only on the structure of the CVV program. It also depends on whether the Navy's attitude toward VSTOL aircraft changes. The Navy's current attitude, as reflected in the testimony to the Armed Services Committee, is that a major commitment to building VSTOL carriers must wait until VSTOL aircraft can be developed with performance comparable to catapult-launched aircraft. In my view, this attitude does not take into account three fundamental realities.

First. It underestimates the need for the rapidity of change on our part if we are to meet the Soviet challenge. It is difficult to foresee how we can reverse the trend in the naval balance, which is beginning to favor the Soviet Union, if we expand the number of our aircraft platforms only gradually. Gradual action on our part permits the Soviets to counter our action within a comparable time frame, so that our net position is not improved. In turn, it is difficult to see how we can quickly introduce more aircraft platforms into the fleet unless we move quickly toward building significant numbers of less expensive VSTOL carriers.

Second. It underestimates the utility of aircraft platforms in roles other than those now performed by our carriers. The CVV is an alternative for the large *Nimitz*-class carrier; but this does not mean that aircraft platforms can only be alternatives to large carriers. They can also be alternatives to frigates, destroyers, and cruisers. They can offer projection capabilities which, while not equal to those of large carriers, may nonetheless be adequate for many situations. VSTOL carriers of 6,000 to 10,000 tons could prove extremely useful additions to the fleet, and they could be built in significant numbers within the current 5-year defense plan, possibly as alternatives to some of the projected frigates.

Third. It does not give sufficient weight to the performance requirements for aircraft. It is true that the VSTOL aircraft of today or tomorrow will not be comparable in performance to catapult-launched aircraft. But technology suggests that it may be neither necessary nor desirable to have such high performance aircraft. Increasingly, the sophisticated capability of the weapons and sensors carried by an aircraft can substitute for capability in the aircraft itself. Systems such as the Navy's Phoenix antiair and antimissile system do not require an aircraft capable of dogfighting.

While it is the great advantage of an aircraft carrier that it can meet changes in technology by changing the aircraft carried, new aircraft are quite expensive; the future might be better served by lower performance multipurpose aircraft which can be adapted to a variety of missions through changes in the sensors and weapons carried. With the "smart" weaponry offered to us by today's technology, this is by no means a farfetched concept, and aircraft platforms carrying even today's Harrier VSTOL arcraft, the aircraft equipped with sophisticated standoff weapons, could have significantly greater utility than the Navy seems to accept.

In terms of submarines, the Navy proposes to continue a fairly low building rate of our present class of attack submarines: the 688-class. This submarine, although considerably larger and more expensive than its predecessor 637-class, has only marginally improved capabilities. The 688-class submarine is the equivalent of the *Nimitz*-class carrier in that its high cost prohibits its acquisition in large numbers. Yet our submarine force has been tasked with several new missions over the last few years, and we may need to increase both the planned force level of attack submarines and the building rate.

Another major Navy program is the Aegis system. This is a shipboard anti-aircraft/antimissile system designed to deal with the threat of the 1990's. It has been the subject of extensive debate in terms of the proposed platforms; the nuclear propelled platform, the strike cruiser, has wisely been deleted from the Navy program. There is one conventicnal platform, the DDG–47, in the fiscal year 1978 budget, with a total of 10 in the 5-year defense plan.

Unfortunately, while the Aegis platform issue has been hotly debated, the Aegis system itself has not. Yet here again the pace of technological change must raise some questions. Can a system designed in the early 1970's have a reasonable chance of defeating the antiship missile threat of the 1990's? The 25 years intervening would seem to provide time for the Soviets to go through several complete generations of new antiship missiles, with different speeds, trajectories, and homing characteristics. We have already seen evidence of Soviet efforts to develop a ballistic antiship missile, against which the capability of Aegis would be in doubt. If the Soviets see us making a major commitment to Aegis, will they not make a major commitment to systems designed to render Aegis obsolete before it can be put into service in substantial numbers? These questions should be faced before a major commitment is made to Aegis, regardless of the platform.

Neither the fiscal year 1978 Navy budget nor the Navy 5-year defense plan reflect any serious commitment to the most promising new concepts for hulls. The fiscal year 1978 budget deleted the proposed funds for a tender for the patrol missile hydrofoil, and the Secretary of Defense has indicated he may seek to cancel previous funding for this extremely promising program. It appears no attempt is being made to explore the potential ASW and electronic countermeasures functions of the PHM platform, despite studies and tests which indicate it could have great capability in these roles. The Secretary of Defense has also reduced the surface effect ship program by directing that the 3,000 ton prototype not have the sensors and weapons necessary to prove its operational effectiveness. Work on the larger hydrofoil, the hydrofoil ocean combatant, is proceeding at snail's pace. Little attempt is being made to investigate the very promising SWATH haul concept, despite its potentially great utility in a time when ships should be designed at highly adaptable platforms on which new generations of sensors and weapons can be installed. All of these new hulls have great promise compared to the traditional frigate design, and the reallocation of funds from only a few of the projected frigates into these programs would produce rapid progress. But again, old technology and old concepts seem to dominate, and the new technology approaches are put on the back burner.

Finally, the fiscal year 1978 budget allocates precious naval ship construction funds for four fleet oilers—AO's. Tests have shown that merchant marine tankers can perform this service for the Navy, and a decision to rely on the merchant marine for this service would free funds for construction of needed warships. But the Navy seems to pay little but lip service to the concept of making more use of merchant marine assets.

So much for the Navy program; it seems there that the advocates of new concepts and new technology have been overruled in favor of those who advocate traditional approaches which do not guarantee reversal of the trend toward Soviet naval supremacy.

What of the program proposed by the Seapower Subcommittee of the House of Representatives? Many of the elements are identical with the Navy program. Frigates are authorized at the same level proposed in the program submitted by President Carter: nine for fiscal year 1978. AEGIS is debated only in terms of

the platform. Fleet oilers are authorized, although at a lower level, and no mention is made of using merchant marine assets. No small platforms for VSTOL aircraft are proposed, and no new technology systems have been added by the subcommittee.

In submarines, the subcommittee does show an appreciation for the need for greater numbers. However, they do this by adding one 688 class attack submarine, which apparently cannot be built because of the backlog of orders in the shipyards. No attempt is made to explore alternatives to the 688 class which might enable us to make a truly significant increase in the total number of attack submarines.

The major differences between the subcommittee's program and that of the Navy is in relation to aircraft carriers and platforms for the Aegis system. The subcommittee proposed an additional *Nimitz*-class carrier, the CVN–71. While the utility of nuclear propulsion for any type of surface ship is highly questionable, there is no doubt that a carrier of the size of the *Nimitz* class is more capable and more cost effective, on an individual ship basis, than the CVV proposed by the Navy. Unfortunately, the subcommittee ignores the problem of vulnerability. Unless it is proposed to acquire *Nimitz*-class carriers in large numbers, the *Nimitz* class is no answer to the vulnerability problem. Only numbers offer a chance to disperse aircraft onto a larger number of platforms, and the House subcommittee makes no mention of what number of *Nimitz*-class carriers they see forming the eventually total fleet. By any conceivable measurement, it is difficult to see how carriers of the cost of the *Nimitz* could be procured in substantial numbers.

The subcommittee also proposed to build a strike cruiser as an Aegis platform. This ship, which was well described during last year's debate as a resurrection of the *Bismarck*, would combine extremely high cost—about $1.4 billion for the lead ship—with escort capabilities no greater than those of a much less expensive DDG–747. It would have little projection capability, which is the essence of the independent mission, and would be highly vulnerable to hostile submarines, with no more antisubmarine warfare capability than a destroyer. This ship is an example of the concept that military effectiveness is primarily a function of type of powerplant, rather than sensors and weapons. The strike cruiser was wisely deleted from the Navy's program.

Thus, both the Navy program and the House program are old technology approaches. Both continue to build ships which are called into question by advances in technology. Neither places significant emphasis on new concepts and new technology, and on building a Navy which can adapt rapidly enough to new technological possibilities so as to seize the naval initiate from the Soviets.

Technology is not a threat; it is a promise. It is an area in which the United States has a general advantage over the Soviet Union, so that a technological race can well result in a U.S. victory, provided we structure our forces to run that race. Unfortunately, this does not appear to be the view of the Navy or of the subcommittee. The Navy particularly does not give sufficient weight to the importance of changing our technology, concepts, and force structure rapidly; it is the rapidity of change, the rapidity with which we can transition from one approach to another inside the Soviet's cycle of observation-decision-action, which is the key for seizing the initiate and reversing the naval trend.

The Senate faces a task of considerable importance and difficulty as it confronts these two naval programs.

It is not impossible to visualize changes in the shipbuilding program proposed by the Navy which would bring that program more into line with the technological trends. Last year Senator Robert Taft proposed, in his white paper on defense, a 10-year advanced technology shipbuilding program which offered answers to many of the questions raised by the Navy's proposed program. The Taft program proposed low-mix attack submarines, both nuclear and conventional, to give us greater numbers of submarines; small aircraft carriers for VSTOL aircraft, to be procured in large numbers; surface effect ships; hydrofoils; and greater reliance on the merchant marine for some of our support requirements.

Both the Navy's proposed program for fiscal year 1978 and its 5-year defense plan could be modified so as to reflect an advanced technology approach. Some concrete actions could be:

First. Comprehensive, objective studies could be undertaken of the potentials for new submarine designs, emphasizing lighter weight reactors, less overall complexity, and greater affordability.

Second. The Senate could make clear its understanding of the carrier issue, and insist that the CVV program be justified in terms of significantly increasing the overall number of aircraft platforms within the foreseeable future. Measures could, and, in my view, should be taken to increase our commitment to VSTOL aircraft, not as something potentially interesting for the 1990's, but as something possessing real capability today. Perhaps the F–18 program should be reevaluated in this light.

Third. While the Senate should not deny the Navy all the proposed new frigates, serious questions could be asked as to whether the frigate is the decisive warship of the future, as the Navy's current building program implies. Other types of ships, such as VSTOL aircraft platforms of less than 10,000 tons, could be authorized to supplement the existing frigate force, offering new capabilities in many areas.

Fourth. The Senate could take action to accelerate development of advanced technology hulls, such as surface effect ships, hydrofoils, and SWATH ships.

Fifth. Finally, we could demand that the Navy fully address the potential use of merchant marine assets wherever possible, so as to free naval ship construction funds for needed warships.

Actions such as these would trade resources planned to be allocated for old technology, old concept systems for investment in the future, in new technology and new naval concepts. They would permit the United States to strike at the conceptual heart of the Soviet fleet, by diversifying our naval aircraft onto a significantly larger number of platforms. They would give us greater ability to adapt to changes in technology, and to induce technological and conceptual changes so as to cut inside the Soviet observation-decision-action cycle and render any new investment on their part counterproductive. Through this capability, they would enable us to get away from our current game of "catch up" with the Soviets, and seize the naval initiative from them.

I hope that the Senate will keep these possibilities in mind as it considers both the fiscal year 1978 naval ship construction program and the Navy's proposed 5-year defense plan. We tend to debate the naval program in the terms in which it is presented to us; but the real terms of the debate may be quite different. We live in an era characterized by rapid technological change. In many ways, it is comparable from the naval standpoint to the period from about 1860 to 1890, when effective rifled cannon, breechloading guns, steel hulls, armor plate, and efficient steam engines all came into the world's fleets. The great problem faced by the navies of that period was the rapidity of obsolescence; it was difficult to design, build, launch, and commission a ship before it became obsolete. Navies became disparate collections of types and classes of ships in various states of obsolescence, most of little effectiveness, but all dear to the hearts of one or another groups of admirals. In Great Britain, it took the genius and drive of Lord Fisher to clean out the naval refuse of 30 years when he began the dreadnought program in the early 1900's. In other navies, the reformers, those who saw the implications of modern technology for fleets built over time to traditional concepts, were less successful, and fleets such as the Spanish in 1898 and the Russian in 1904 found most of their supposed assets to be liabilities.

If we are not in the foreseeable future to find the same of the fleet we are building today, we must overcome the intraservice interests and general traditionalism which seem still to guide our proposed naval programs. We must realize that the true requirement is not dictated by the current number of Soviet ship days in the Indian Ocean, or by the characteristics of the latest Soviet antiship missile, but by the need to be adaptable to changes in technology, and resultant changes in concepts and force structures.

We must realize that the true debate is not about whether to build 9 frigates this year and 11 next year or the opposite, but about what conceptual alternatives we have to meet each overall naval requirement, what technological alternatives we have to serve each con-

cept, and by what ideas we orient our approach to shipbuilding so as to find technological change our friend rather than our enemy.

None of these issues is simple, nor can we expect to address them effectively with our usual approach. But I believe the Senate is better qualified to address them than some might think. Senator Taft demonstrated with his white paper that a Senator cannot only evaluate complex defense issues, but also offer innovative proposals in the defense area. The Senate Armed Services Committee has strongly supported some of the important elements of an advanced technology Navy, such as the surface effect ships and the hydrofoil program. Perhaps most importantly, the Senate stands above the intraservice interests which, according to Admiral Zumwalt, offer significant impediments to change within the services.

I believe we can do the job; and I hope that my colleagues will give the necessary time and thought to this crucial area of concern so that we take the necessary initiatives and consider the relevant points in the debate, and move toward a truly modern Navy for the 1980's.

ORDER FOR RECESS UNTIL TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

APPROVAL OF BILL

A message from the President of the United States stated that on March 15, 1977, he approved and signed the bill (S. 776) to dedicate the canal and towpath of the Chesapeake and Ohio Canal National Historical Park to Justice William O. Douglas, and for other purposes.

OPERATION OF THE AUTOMOTIVE PRODUCTS TRADE ACT—MESSAGE FROM THE PRESIDENT—PM 50

On March 16, 1977, under authority of the order of March 15, 1977, the following message from the President of the United States was received and referred to the Committee on Finance:

To the Congress of the United States:

I hereby transmit the Tenth Annual Report on the Operation of the Automotive Products Trade Act of 1965, relating to developments under that act during 1975. This report was prepared prior to the beginning of my term in office.

JIMMY CARTER.

THE WHITE HOUSE, *March 16, 1977.*

APPROACH OF THE ADMINISTRATION TO FOREIGN ASSISTANCE—MESSAGE FROM THE PRESIDENT—PM 51

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

In the years since World War II, the United States has encouraged economic development throughout the world through a variety of economic assistance programs.

Most of our efforts have succeeded. Some have failed. Now we have the opportunity, as with many of our domestic programs, to learn from our experience, and to improve our policies in the future.

Members of my Administration are now testifying in support of our approach to foreign assistance. I am sending you this message to explain some of the principles behind our program—especially, to outline the lessons we have learned about foreign assistance and the goals we now hope to achieve.

The future of the United States will be affected by the ability of developing nations to overcome poverty, achieve healthy growth and provide more secure lives for their people. We wish to join with other nations in combining our efforts, knowledge, and resources to help poorer countries overcome the problems of hunger, disease, and illiteracy. We are seeking important improvements in our program, some of which reflect changes in emphasis and approach:

—We will ensure that lending agencies attach adequate self-help conditions to their loans so that borrowing nations will make effective use of the funds they receive.

—We will make certain that the Congress is able to exercise its legitimate responsibility to monitor the effectiveness of our aid programs.

—We will encourage other wealthy nations to contribute a greater share to the multilateral aid effort, and we will reduce our own share where it has been too high.

—In close cooperation with the Congress we have made sure that our concessional aid goes to those who need it most; we will continue this approach.

—We are now reforming the policies which have, on occasion, awarded liberal grants and loans to repressive regimes which violate human rights.

—We will root out mismanagement and inefficiency where they exist in our foreign assistance programs in order to guarantee that benefits will always be delivered to those for whom the programs were designed.

—We recognize that salaries and living styles of some employees have been too lavish, and we will insist that the international programs we support do more to control their administrative overhead.

—I will work closely with the Congress to see that our aid efforts are more closely correlated to international economic and political circumstances and talk frankly to American citizens about the economic, political, and security benefits we receive from our foreign assistance programs.

Close cooperation and support from the Congress is essential to the effectiveness of our efforts. In a few areas the program I have submitted requires a significant increase in funding—but I have asked for this only where I am sure that the increase will be worthwhile.

To achieve our goals of helping the people of the world toward economic self-sufficiency, relieving the victims of disasters, investing in a healthy world economy, and supporting the security of friendly nations, I ask your favorable consideration for the following:

—Multilateral Development Assistance. International financial institutions such as the World Bank group—in particular the International Development Association—and the Inter-American and Asian Development Banks are major sources of assistance loans to the world's poor nations. These institutions have been highly professional in their work. They help remove political considerations from development efforts, and they encourage developing countries to pursue sound domestic policies. They enable many donors to pool their efforts—including some of the oil-exporting nations. An initial, modest U.S. contribution to the African Development Bank will provide our encouragement to this promising regional effort.

We are asking $540 million in supplemental appropriations for fiscal year 1977 to fulfill past pledges to the international financial institutions, and $2.7 billion in new appropriations for fiscal year 1978. This is an increase (of approximately one-third) for an effort which has proved to be very effective. The largest single expenditure is for U.S. participation in the 5th replenishment of the International Development Association, which makes loans on favorable terms to the world's poorest nations.

The United Nations Development Program, which provides important technical assistance to the developing world, has also proven its effectiveness and worth. We are seeking an appropriation of $130 million for fiscal year 1978, a 30% increase over last year.

—Bilateral Development Assistance. Congress has played a major role in developing our bilateral programs, which provide direct American support for development programs in the poorer countries. Through these programs we have shared our expertise and our resources with other countries. Our bilateral programs are directed at the poorest people in these countries' populations; they emphasize food and nutrition, population and health, education and

human resource development, and science and technology, including energy development.

We have certain expectations of the countries which we help. We have no intention of running their governments or their economies, but we expect them to mobilize their own resources in the effort to develop, to ensure that the poor share in the benefits, and to respect basic human rights.

I am asking the Congress to provide $1.3 billion for the bilateral development assistance program for fiscal year 1978. This is a 20% increase over the amount provided for fiscal year 1977, which I believe is clearly worthwhile.

Last year, the Congress, on its own initiative, appropriated $5 million to help develop a comprehensive long-term recovery plan for the Sahel region, which had undergone a disastrous drought. As the first major U.S. contribution to this program, I am requesting $50 million for fiscal year 1978. We will cooperate with other interested nations in making further contributions to the Sahel development effort in the future.

—The PL–480 Program. The enormous vitality of U.S. agricultural production permits us to share a portion of our bounty in the form of food aid. Our PL–480 programs should not only help the poorer countries improve the quantity and quality of their nutrition, but also encourage self-help programs that will improve their capacity to feed their people in the future. And these programs let us offer relief from famine and privation in the wake of natural and man-made disasters. In fiscal year 1978, our food aid programs will distribute $1.4 billion in agricultural commodities.

—Security Assistance Program. Only where peace and security are assured can free nations devote their full energies to development. Our security assistance programs are keyed to these goals, and to advancing the security interests of the United States in cooperation with our friends and allies. Nearly two-thirds of the funds requested for security assistance will be for economic supporting programs. I have increased the amounts proposed by the previous Administration for the Middle East; this will strengthen the economic underpinnings so essential to achievement of our goal of peace and stability in this vital region.

For FY–1978 the major elements of my program on security assistance are:

Grant military aid—$284.6 million to eight countries, in most of which we also have U.S. military facilities essential to our global interests. This includes $224 million in programs plus $60.6 million in general and administrative costs, most of which will be reimbursed from other sources.

Grant military education—$35.7 million to train future military leaders.

Financing for foreign military sales—$708 million, which will finance $2.2 billion in loans to help foreign governments eventually to meet their essential security needs by themselves, instead of depending on U.S. handouts.

Security supporting assistance—$1.9 billion to finance programs for countries whose economic condition is a factor in our efforts to assure international security. The two areas where most of these funds will be used—Middle East, and depending on events, Southern Africa—testify to the significance of these programs.

These proposals are fully consistent with my wish to limit budget increases to essentials. My assistance program is part of an effort to combine support of our country's economic interests and security with compassion for the impoverished millions of fellow human beings who share the world with us.

I hope that the economic assistance program now before you will receive your careful, prompt, and sympathetic attention. It represents a vital step toward partnership in a peaceful and equitable world order.

JIMMY CARTER.

THE WHITE HOUSE, *March 17, 1977.*

MARINE TRANSPORTATION OF OIL—MESSAGE FROM THE PRESIDENT—PM 52

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States:

To the Congress of the United States:

The recent series of oil tanker accidents in and near American waters is a grave reminder of the risks associated with marine transportation of oil. Though we can never entirely eliminate these risks, we can reduce them. Today I am announcing a diverse but interrelated group of measures designed to do so.

These measures are both international and domestic. Pollution of the oceans by oil is a global problem requiring global solutions. I intend to communicate directly with the leaders of a number of major maritime nations to solicit their support for international action. Oil pollution is also a serious domestic problem requiring prompt and effective action by the federal government to reduce the danger to American lives, the American economy, and American beaches and shorelines, and the steps I am taking will do this.

The following measures are designed to achieve three objectives: First, to reduce oil pollution caused by tanker accidents and by routine operational discharges from all vessels; Second, to improve our ability to deal swiftly and effectively with oil spills when they do occur; and Third, to provide full and dependable compensation to victims of oil pollution damage.

These are the measures I recommend:

Ratification of the International Convention for the Prevention of Pollution from Ships. I am transmitting this far-reaching and comprehensive treaty to the Senate for its advice and consent. This Convention, by imposing segregated ballast requirements for new large oil tankers and placing stringent controls on all oil discharges from ships, represents an important multilateral step toward reducing the risk of marine oil pollution. In the near future, I will submit implementing legislation to the Congress.

Reform of ship construction and equipment standards. I am instructing the Secretary of Transportation to develop new rules for oil tanker standards within 60 days. These regulations will apply to all oil tankers over 20,000 deadweight tons, U.S. and foreign, which call at American ports. These regulations will include:

Double bottoms on all new tankers;

Segregated ballast on all tankers;

Inert gas systems on all tankers;

Backup radar systems, including collision avoidance equipment, on all tankers; and

Improved emergency steering standards for all tankers.

These requirements will be fully effective within five years. Where technological improvements and alternatives can be shown to achieve the same degree of protection against pollution, the rules will allow their use.

Experience has shown that ship construction and equipment standards are effective only if backed by a strong enforcement program. Because the quality of inspections by some nations falls short of U.S. practice, I have instructed the Department of State and the Coast Guard to begin diplomatic efforts to improve the present international system of inspection and certification. In addition, I recommend the immediate scheduling of a special international conference for late 1977 to consider these construction and inspection measures.

Improvement of crew standards and training. I am instructing the Secretary of Transportation to take immediate steps to raise the licensing and qualification standards for American crews.

The international requirements for crew qualifications, which are far from strict, will be dealt with by a major international conference we will participate in next year.

I am instructing the Secretary of Transportation to identify additional requirements which should be discussed, and if not included, may be imposed by the United States after 1978 on the crews of all ships calling at American ports.

Development of Tanker Boarding Program and U.S. Marine Safety Information System. Starting immediately, the Coast Guard will board and examine each foreign flag tanker calling at American ports at least once a year and more often if necessary. This examination will insure that the ship meets all safety and environmental protection regulations. Those ships which fail to do so may be denied access to U.S. ports or, in some cases, denied the right to leave until the deficiencies have been corrected. The information gathered by this boarding program will permit the Coast Guard to identify individual tankers having histories of poor maintenance, accidents, and pollution violations. We will also require that the names of tanker owners, major stockholders, and changes in vessel names be disclosed and included in this Marine Safety Information System.

Approval of Comprehensive Oil Pollution Liability and Compensation Legislation. I am transmitting appropriate legislation to establish a single, national standard of strict liability for oil spills. This legislation is designed to replace the present fragmented, overlapping systems of federal and state liability laws and compensation funds. It will also create a $200 million fund to clean up oil spills and compensate victims for oil pollution damages.

Improvement of federal ability to respond to oil pollution emergencies. I have directed the appropriate federal agencies, particularly the Coast Guard and the Environmental Protection Agency, in cooperation with state and local governments to improve our ability to contain and minimize the damaging effects of oil spills. The goal is an ability to respond within six hours to a spill of 100,000 tons.

Oil pollution of the oceans is a serious problem that calls for concentrated, energetic, and prompt attention. I believe these measures constitute an effective program to control it. My Administration pledges its best efforts, in cooperation with the international community, the Congress, and the public, to preserve the earth's oceans and their resources.

JIMMY CARTER.

THE WHITE HOUSE, *March 17, 1977.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the message from the President on oil spills be referred jointly to the Committee on Foreign Relations, the Committee on Commerce, Science, and Transportation, and the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

Under authority of the order of March 15, 1977, on March 16 a message from the House of Representatives was received stating that the House has agreed to the concurrent resolution (H. Con. Res. 157) authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford, in which it requests the concurrence of the Senate.

The message also stated that the House has passed the bill (H.R. 4876) making economic stimulus appropriations for the fiscal year ending September 30, 1977, and for other purposes, in which it requests the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further stated that the Speaker has signed the following enrolled bills:

H.R. 1746. An act to amend the United Nations Participation Act of 1945 to halt the importation of Rhodesian chrome.

H.R. 3839. An act to rescind certain budget authority recommended in the message of the President of January 17, 1977 (H. Doc. 95-48), transmitted pursuant to the Impoundment Control Act of 1974.

The enrolled bills were also signed by the Acting President pro tempore (Mr. METCALF) on March 16, 1977.

At 12:21 p.m., today, a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, in which it requests the concurrence of the Senate.

The message also announced that the House has agreed to, without amendment, the concurrent resolution (S. Con. Res. 12) to assist the people of Romania.

HOUSE BILLS AND CONCURRENT RESOLUTION REFERRED

The following bills were each read twice by their titles and referred to the Committee on Appropriations:

H.R. 4876. An act making economic stimulus appropriations for the fiscal year ending September 30, 1977, and for other purposes; and

H.R. 4877. An act making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

The concurrent resolution (H. Con. Res. 157) authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford was referred to the Committee on Rules and Administration.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-916. A letter from the President of the Delta Phi Delta requesting that the Senate take public note of the commenoration of the 150th anniversary of the Black Press as an American institution (with accompanying papers); ordered to lie on the table.

EC-917. A letter from the General Counsel of the U.S. General Accounting Office transmitting, pursuant to law, a report of the release of $6,000,000 of budget authority required to be made available for obligation pursuant to section 1012(b) of the Impoundment Control Act of 1974; jointly pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Environment and Public Works, and Energy and Natural Resources, and ordered to be printed.

EC-918. A letter from the Acting Assistant Secretary of Defense, Installations and Logistics, transmitting, pursuant to law, (1) contractor I.R. & D. and B. & P. advance agreements negotiations completed during Government fiscal year 1976, and (2) independent research and development and bid and proposal costs incurred by major defense contractors in the years 1975 and 1976 (with accompanying reports); to the Committee on Armed Services.

EC-919. A letter from the Administrator of the Federal Energy Administration, transmitting, pursuant to law, the FEA's interim report on electric utility rate design proposals (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-920. A letter from the Secretary of the Interior transmitting a draft of proposed legislation to provide for the relief of certain residents of the Trust Territory of the Pacific Islands (with accompanying papers); to the Committee on Energy and Natural Resources.

EC-921. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "Reserve Officer Training Corps: Management Deficiencies Still to be Corrected" (with an accompanying report); to the Committee on Governmental Affairs.

EC-922. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "War on Organized Crime Faltering—Federal Strike Forces not Getting the Job Done" (with an accompanying report); to the Committee on Governmental Affairs.

EC-923. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "Domestic Energy Resource and Reserve Estimates—Uses, Limitations, and Needed Data" (with an accompanying report); to the Committee on Governmental Affairs.

EC-924. A letter from the President of the Girl Scouts of America transmitting, pursuant to law, the twenty-seventh annual report of the Girl Scouts of the United States of America for the fiscal year ended September 30, 1976 (with an accompanying report); to the Committee on Human Resources.

EC-925. A letter from the Chairman of the Consumer Product Safety Commission transmitting corrections to their previously transmitted report on the administration of the Freedom of Information Act for the calendar year 1976 (with accompanying papers); to the Committee on the Judiciary.

EC-926. A letter from the Secretary of Transportation transmitting, pursuant to law, a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC-927. A letter from the Public Printer of the United States Government Printing Office transmitting, pursuant to law, the annual report of the Public Printer for the fifteen-month period ended September 30, 1976 (with an accompanying report); to the Committee on Rules and Administration.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-89. House Concurrent Resolution No. 9 adopted by the General Assembly of the State of Arkansas urging the Arkansas congressional delegation to consider legislation enabling totally disabled veterans to fly free of charge on commercial airliners where there is unsold space available; to the Committee on Commerce, Science, and Transportation:

"HOUSE CONCURRENT RESOLUTION 9 URGING THE ARKANSAS CONGRESSIONAL DELEGATION TO CONSIDER LEGISLATION ENABLING TOTALLY DISABLED VETERANS TO FLY FREE OF CHARGE ON COMMERCIAL AIRLINES WHERE THERE IS UNSOLD SPACE AVAILABLE

"Whereas, there are many thousands of totally disabled veterans in the United States whose disabilities are service-connected and permanent; and

"Whereas, these same disabled veterans can trace their present disabilities directly to the variant service of their country; and

"Whereas, totally disabled veterans have limited abilities to travel, the most significant being the inability in many cases to drive a car or to endure long journeys on a bus, train or passenger car; and

"Whereas, these same veterans face many economic hardships, especially the financial limitations caused by their inability to earn a living and to supplement their disability income; and

"Whereas, many seats on commercial airliners are unsold and unfilled on many flights, and there are many empty seats on government and military aircraft,

"Now therefore, be it resolved by the House of Representatives of the Seventy-First General Assembly of the State of Arkansas, the Senate concurring therein:

"That the Congressional Delegation from

the State of Arkansas be urged to consider legislation requiring domestically-owned commercial airlines to provide veterans with total and permanent service-connected disabilities air travel tickets on a space-available basis free of charge where there are unsold seats in the economy class sections of a flight, and that government and military aircraft make seats available to these veterans where feasible.

"Be it further resolved that upon adoption of this Resolution, the Secretary of State of Arkansas shall cause copies hereof to be mailed to the President of the United States, the Speaker of the House of Representatives, the President of the Senate of the Congress of the United States, and to each member of the Arkansas Congressional Delegation."

POM-90. Senate Concurrent Resolution No. 5 adopted by the Legislature of the State of Utah relating to proposed surface management regulations of the Bureau of Land Management on Public Lands; to the Committee on Energy and Natural Resources:

"SENATE CONCURRENT RESOLUTION No. 5

"Be it resolved by the Legislature of the State of Utah, the Governor concurring therein:

"Whereas, a viable mining industry is essential to the economic and physical well being of the State of Utah and the Nation and independent prospectors and miners are significantly contributing to the discovery and development of mineral resources on public lands;

* * * * *

management rules which do not adversely affect important mining development in this State and Nation and the right of the individual to enter upon public lands for purposes of discovery, exploration and mining of mineral resources; request that the Congress recognize that this State has established an orderly plan for development and reclamation of mining properties, and that the State must be allowed to enforce its reclamation laws; and request that the Congress of the United States immediately evaluate the potential adverse effect of the proposed regulations and pass such legislation as will better serve the public interest and the rights of individuals in the development of mineral resources on public lands.

"Be it further resolved, that a copy of this Resolution be forwarded to all members of the congressional delegation of the State of Utah, to the President of the United States Senate, to the Speaker of the United States House of Representatives, and to the Department of the Interior."

POM-91. Senate Concurrent Resolution No. 6 adopted by the Legislature of the State of Utah relating to the recent order of President Carter deleting funds for the Bonneville Unit of the Central Utah Project from his fiscal 1978 budget requests; to the Committee on Energy and Natural Resources:

"SENATE CONCURRENT RESOLUTION No. 6

"Be it resolved by the Legislature of the State of Utah, the Governor concurring therein:

"Whereas, the Central Utah Project was instituted by the Colorado River Storage Project Act with the Bonneville Unit having a cost of approximately $773 million and which would include 10 new reservoirs together with the enlargement of two more reservoirs, 140 miles of aquaducts, tunnels and canals, three power plants, nine pumping plants and 200 miles of pipe drains; and

"Whereas, the adequacy of these Environmental Studies and findings portraying tradeoffs and consequences of development were recently confirmed and upheld by the Federal District and Appellate Courts, and

"Whereas, since 1956, approximately $200 million have already been expended toward the completion of this unit; and

"Whereas, $32 million in federal funding was required for the fiscal year 1978 to maintain the completion schedule of this unit; and

"Whereas, the importance of the Bonneville Unit of the Central Utah Project was particularly evident this year when a recent meeting of the governors of the western and midwestern states in Denver, Colorado, together with the Secretary of the Interior, Cecil Andrus, concluded that the western and midwestern states are facing the worst drought in the history of the United States; and

"Whereas, the drought is expected to be devastating this year and to continue to cause severe water shortages for several years to come; and

"Whereas, this country is currently in the midst of an energy shortage which even the President has indicated will not change in the forseeable future; and

"Whereas, since 1956 the construction and development in Salt Lake County has been established on the basis of the compeltion date set for the Bonneville unit and, absent such construction, the persons living therein would face a severe water shortage even in good water years; and

"Whereas, the termination of funds for this unit at this time, and in view of all of the foregoing, can serve only to extend the devastating impact which Utah and its surrounding states are presently facing and enhance the energy and food shortage facing the United States; and

"Whereas, if any steps changing this funding should be made, the funding should be increased at this time to speed up the completion of the unit in view of the energy shortage and drought facing this country.

"Now, therefore be it resolved, that the 42nd Legislature of the State of Utah, the Governor concurring therein, memorializes the President of the United States to reconsider his deletion of funding for the Bonneville Unit of the Central Utah Project for the fiscal year 1978 and, if he feels further study on the unit is requred, that the study be undertaken while the unit continues.

"Be it further resolved that the Legislature urges Congress to pass a budget which will allow the usage of funds for the continuation of the Bonneville unit, and that the construction of all units of the Central Utah Project should be expedited so that they can meet the existing and rapidly growing water requirements for both Indians and non-Indians within the State of Utah.

"Be is further resolved, that copies of this Resolution be forwarded to the President of the United States, the Speaker of the House, the President of the Senate, and the Congressional Delegations of Utah and the other western and midwestern states, as an expression of the strong feelings of the people of the state in relation to this project."

POM-92. Senate Resolution No. 115 adopted by the Senate of the State of Hawaii requesting the U.S. Congress to amend the revenue sharing program; to the Committee on Finance:

"SENATE RESOLUTION No. 115

"Whereas, the State and Local Fiscal Assistance Act of 1972 commonly known as the Revenue Sharing Act, which was to have expired at the end of 1976, was extended by the 94th Congress for forty-five months; and

"Whereas, the funds appropriated were increased and will total approximately $25.5 billion to be distributed among the state and local governments of the country; and

"Whereas, other amendments have immensely improved aspects of the Act, for example: funds entitled to local entities may now be used to match federal grants; mechanisms have been provided for better public understanding, awareness, and control of the utilization of entitled funds; and the anti-discrimination provisions now include aged and the handicapped; and the priority categories which limited the type of programs for which funds were allowed to be expended have been eliminated; thus Congress, in essence, lessened the spending restrictions of the local entities; and

"Whereas, one provision remains which, because of Hawaii's highly centralized government and small physical size, may prove deleterious; section 107 of the Act provides that the State retain one-third of the entitlement, which the counties dividing the remainder according to a predetermined ratio; and

"Whereas, while the Legislature recognizes the necessity and desirability of the county home rule concept, Hawaii consists of only four counties; and health, education, and welfare services provided by the government sector are primarily the responsibility of, and centralized at, the state level; for example, Hawaii has a statewide system of public school education and the counties have no responsibility in this area; and funds provided by the revenue sharing could be better and judiciously expended for services in the health, education, and welfare area if the state government were allowed to retain a greater proportion of the entitlement; and

"Whereas, Hawaii is entitled to $11.3 million for fiscal year 1977-78; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1977, that the 95th Congress is requested to amend the State and Local Fiscal Assistance Act of 1972 to endow the individual states with greater discretion as to the distribution of the entitlements provided; and

"Be it further resolved that certified copies of this Resolution be transmitted to the Honorable Jimmy Carter, President of the United States, the Secretary of the Treasury, the Speaker, Majority and Minority Leaders of the U.S. House of Representatives, the President Pro Tempore, Majority and Minority Leaders of the U.S. Senate, and the members of Hawaii's Congressional delegation."

POM-93. Senate Resolution No. 3 adopted by the Senate of the State of South Dakota memorializing the United States Congress that amendments to the McCarran-Ferguson Act be rejected; to the Committee on the Judiciary:

"SENATE RESOLUTION No. 3

"Whereas, in 1945 the McCarran-Ferguson Act (Title 15, United States Code, Sections 1011-1015) was enacted into law; and

"Whereas, in that Act it was stated that 'Congress declares that the continued regulation and taxation by the several states of the busines of insurance is in the public interest'; and

"Whereas, in the course of such regulation, the several states have encouraged and required continued improvements in insurance coverage and the provision of insurance at reasonable rates; and

"Whereas, the several states have continually reviewed, experimented with, and altered various approaches to regulation in an effort to assure the public of the availability of insurance at the lowest practicable cost; and

"Whereas, the business of insurance has developed a competitive structure; and

"Whereas, the public has benefited from the competitive structure of the insurance industry, including at the retail level a wide variety of organizations, often small businesses, intensely competing, and from regulation of the industry by the several states; and

"Whereas, federal regulation has repeatedly been shown not to be a panacea; and

"Whereas, it is becoming increasingly clear that the establishment of federal regulation increases the cost of government, often increases the cost of products and services to the consumer, and often without providing offsetting benefits to the public; and

"Whereas, federal regulation often adds confusion and delay; and

"Whereas, there has been no showing that

the several states cannot continue to regulate the insurance industry; and

"Whereas, there has been no showing that federal regulation of the insurance industry by limiting state regulation and permitting the application of the federal anti-trust laws will have a salutory effect upon the industry or otherwise benefit the public; and

"Whereas, it is often necesary, subject to state regulations, to pool the resources of several insurance companies in order to provide for coordinated actions to provide effective insurance coverage of certain risks and to provide the public with reasonable prices, efficiency in which the services are rendered at reasonable cost, and innovation in which new products and services are made available; and

"Whereas, officials of the federal government have publicly, although unofficially, recommended amending the McCarran-Ferguson Act so as to limit state regulation of the business of insurance;

"Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the state of South Dakota, to memorialize the Congress of the United States to reject any legislation amending the McCarran-Ferguson Act (15 U.S.C. Sections 1011–1015, 59 Stat. 33 (1945)); and

"Be it further resolved, that copies of this resolution be forwarded to the Secretary of the United States Senate, the Clerk of the United States House of Representatives, and to each member of Congress from this State."

POM–94. A concurrent resolution adopted by the Legislature of the Commonwealth of Puerto Rico expressing the appreciation of the Legislature for the expressions of civic solidarity, friendship and respect addressed to the people of Puerto Rico by the Honorable Gerald R. Ford, former President and the Honorable James E. Carter, President of the United States, regarding our political status; to the Committee on Environment and Public Works.

"CONCURRENT RESOLUTION

"To express the appreciation of the Legislature for the expressions of civic solidarity, friendship and respect addressed to the people of Puerto Rico by the Honorable Gerald R. Ford, former President and the Honorable James E. Carter, President of the United States, regarding our political status

"STATEMENT OF MOTIVES

"Whereas: The preamble of the Constitution of the Commonwealth of Puerto Rico establishes among others, that: 'We, the people of Puerto Rico consider as determining factors in our life our citizenship of the United States of America and our aspiration continually to enrich our democratic heritage in the individual and collective enjoyment of its rights and privileges; our loyalty to the principles of the Federal Constitution; the coexistence in Puerto Rico of the two great cultures of the American Hemisphere; our fervor for education; our faith in justice; our devotion to the courageous, industrious, and peaceful way of life; our fidelity to individual human values above and beyond social position, racial differences, and economic interests; and our hope for a better world based on these principles.'

"Whereas: The right that the Puerto Ricans have as citizens of the United States, to participate effectively in the decisions affecting their present and future well-being is guaranteed by the Constitution of the United States of America and the Constitution of the Commonwealth of Puerto Rico.

"Whereas: Throughout the years and in our historical process there has existed between our people and the rest of the North American nation an absolute identification with the values of the representative democracy, with the individual liberties and with equal opportunities, all of it, within the exercise of the right to free expression and self-determination.

"Whereas: The people of Puerto Rico have freely expressed their wishes to assure and maintain the permanency and irrevocability of the union between the United States and Puerto Rico.

"Whereas: The people of Puerto Rico appraise, treasure and will maintain their cultural heritage, their language, their traditions and their customs deeply rooted in their collective conscience, the conservation of which is constitutionally guaranteed.

"Whereas: The former President of the United States, Honorable Gerald R. Ford, and the President, Honorable James E. Carter, have expressed their wishes of accepting the people of Puerto Rico into the great family of the States of the Union, through the constitutional proceedings which respect and guarantee the free expression of the Puerto Rican people and not by unilateral imposition; averring, further, our right to maintain our culture, our language and our traditions.

"Therefore, be it resolved by the legislature of Puerto Rico:

Section 1.—To express the appreciation of the Legislature for the expressions of civic solidarity, friendship and respect addressed to the people of Puerto Rico by the Honorable Gerald R. Ford, former President and the Honorable James E. Carter, President of the United States, regarding our political status, upon reaffirming their faith in our people by their disposition to welcome Puerto Rico as the 51st State of the American Nation, whenever the people of Puerto Rico express it through the established constitutional processes thus recognizing the feasibility of this political destiny for the people of Puerto Rico.

"Section 2.—To express, moreover, its deep satisfaction and earnest desire that Puerto Rico achieves full recognition of the rights and privileges and obligations inherent to the American citizenship, so as to participate effectively in the decisions affecting its well-being and future. Being in harmony with the platforms of the two great National Political Parties, Republican and Democratic, such expressions have gerater relevance and significance, wherefore, the Legislature, in representation of the People of Puerto Rico, welcomes with pride and with a sense of patriotic responsibility these historic expressions and accepts them for what they are: a token of true affection, respect and adhesion, as well as of faith in the people of Puerto Rico.

"Section 3.—Copies of this resolution, as well as its translation into English, shall be transmitted to the Governor of Puerto Rico, the former President and the President of the United States, to the President of the Senate and to the Speaker of the House of Representatives of the United States, to all members of Congress, to the Resident Commissioner of Puerto Rico in the United States, and to all news media.

POM–95. House Joint Memorial No. 1 adopted by the Legislature of the State of Washington requesting relief from certain federal regulations on pesticides; to the Committee on Agriculture, Nutrition, and Forestry:

"HOUSE JOINT MEMORIAL NO. 1

"To the Honorable Jimmy Carter, President of the United States, and to the President of the Senate and the Speaker of the House of Representatives, and to the Senate and House of Representatives of the United States, in Congress assembled:

"We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

"Whereas, The Federal Insecticide, Fungicide, and Rodenticide Act is a general pesticide control act composed for compliance by the entire United States, and the intent of Congress was to promote public health and to safeguard the environment without inhibiting agricultural production; and

"Whereas, The Environmental Protection Agency has promulgated regulations which do violate the intent of Congress; and

"Whereas, The removal of certain pesticide uses from Environmental Protection Agency registered labels is detrimental to Washington State Agriculture; and

"Whereas, The tenth amendment to the United States Constitution indicates that powers not specifically delegated to the federal government by the Constitution are served to the states or the people; and

"Whereas, The State of Washington has carried out pesticide registration since 1941, and pesticide applicator licensing since 1945, and is currently revising its state laws to comply with the federal legislation; and

"Whereas, The State of Washington is committed to a safe and healthy environment;

"Now, therefore, Your Memorialists respectfully pray that the Administration and Congress order that the Environmental Protection Agency not promulgate rules and regulations which exceed the legislation enacted by the Congress and the United States Constitution and that individual states be provided more leeway to make pesticide regulation more responsive to characteristics of a particular region;

"And be it further resolved, That copies of this Memorial be immediately transmitted to the Honorable Jimmy Carter, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. WILLIAMS, from the Committee on Banking, Housing and Urban Affairs:

S. 1025. An original bill to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977 (together with supplemental views) (rept. No. 95–56).

A report of the Committee on Human Resources pursuant to Section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 95–57).

By Mr. McCLELLAN, from the Committee on Appropriations:

With amendments:

H.R. 4876. An act making economic stimulus appropriations for the fiscal year ending September 30, 1977, and for other purposes (together with additional views) (Rept. No. 95–58).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following reports of committees were submitted:

By Mr. WILLIAMS, from the Committee on Human Resources:

Alexis M. Herman, of Georgia, to be Director of the Women's Bureau, Department of Labor.

Francis X. Burkhardt, of Maryland, to be an Assistant Secretary of Labor.

Arnold H. Packer, of Maryland, to be an Assistant Secretary of Labor.

Eula Bingham, of Ohio, to be an Assistant Secretary of Labor.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' committment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROBERT C. BYRD (for Mr. SPARKMAN), from the Committee on Foreign Relations:

Gale W. McGee, of Wyoming, to be the permanent representative of the United States of America to the Organization of American States, with the rank of Ambassador.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Gale W. McGee.

Post: Ambassador/USOAS.

Nominated: March 14, 1977.

Contributions, amount, date, donee:

1. Self: $25.00 given to George McGovern* on July 25, 1974, Sept. 18, 1974, Oct. 16, 1974, and Oct. 23, 1974. Also $25.00 given to Frank Church* on same dates as above to make a total contribution of $100.00 each.
2. Spouse: None.
3. Children and Spouses: None.
4. Parents: None.
5. Grandparents: None.
6. Brothers and Spouses: None.
7. Sisters and Spouses: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

GALE W. MCGEE.

*Note: A Total of $100 was given to George McGovern and a total of $100 was given to Frank Church. They were given in $25 installments on the dates indicated above (dates applicable to both individuals).

ORDER FOR STAR PRINT—S. 138 AND S. 139

Mr. DOMENICI. Mr. President, I ask unanimous consent for a Star print of S. 138 and S. 139, two private relief bills previously introduced by me. Upon original introduction the names of the individuals for which relief is sought were misspelled. A Star print will correct those previous errors.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. ROTH:

S. 1011. A bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation; to the Committee on the Judiciary.

By Mr. PELL:

S. 1012. A bill to require the establishment of a National Snowmobile Safety Program, and for other purposes; to the Committee on Environment and Natural Resources.

By Mr. CHURCH:

S. 1013. A bill to amend the Internal Revenue Code of 1954 to terminate the operation of those provisions permitting the deferral of income tax with respect to foreign source income; to the Committee on Finance.

S. 1034. A bill to provide for a study of the effects of saccharin and for other purposes; to the Committee on Human Resources.

STATEMENT ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ROTH:

S. 1011. A bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation; to the Committee on the Judiciary.

CHILD ABUSE PREVENTION ACT

Mr. ROTH, Mr. President, I am sending to the desk a measure which hopefully will help stop the outrageous practice of selling and distributing pornography exhibiting children.

The sexual exploitation of children through the filming and subsequent distribution of pornographic material is disgusting. Recent public awareness of this immoral activity has brought shock and indignation.

The sexual abuse of children for profit is so despicable that it almost defies words. I am told that in many instances parents are paid to allow their children to be photographed performing some perverted act. Often money received by the parent goes to support a drug habit. Mr. President, I was shocked to learn that some of these children are as young as 3 and 4 years old. The psychological effect these experiences have on a child are devastating. Children who are subject to this type of physical and mental abuse may have a difficult time leading a normal healthy adult life.

The legislation I send to the desk today seeks to prevent the use of children in pornographic films and photographs and to prevent interstate traffic in pornography featuring children.

The bill makes it a felony to cause or knowingly permit a child under age 16 to engage in specified sexual acts if the person has reason to know that the child's sexual conduct could be photographed and transported in interstate commerce. The bill also makes it a felony for any person who knowingly transports or ships child pornography through interstate commerce or receives

for the purpose of selling or sells any photograph or film depicting a child engaging in a prohibited act.

Consistent with my past position, my bill embodies my conviction that the creation of mandatory minimum sentences will be an effective tool to combat this tragic situation. I am convinced that mandatory minimum sentences serve as deterrents to crime. The unscrupulous pornographer or the procurer of innocent children may think twice if he knows punishment will be quick and certain.

For too long, the law has centered its attention on the rights of the criminal defendants. I want all of those who take advantage of children to know that if convicted, there is no judicial discretion. Accordingly my bill, unlike a similar version introduced in the House, calls for both mandatory criminal sentences or fines.

There are those, Mr. President, who would camouflage this type of demented conduct behind the first amendment right of guaranteed speech, I, for one, am confident that an overwhelming majority of Americans cannot find any artistic or social redeeming value in illicit sexual activity by children. We in the Congress can not allow this country's children to be subject to abuse. It is an intolerable and horrible state of affairs.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1011

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Child Abuse Prevention Act".

SEC. 2. The Congress enacts the provisions of this Act pursuant to the power of the Congress to regulate interstate commerce and foreign commerce.

SEC. 3. (a) Title 18, United States Code, is amended by inserting immediately after section 2236 the following new chapter:

"Chapter 110.—SEXUAL EXPLOITATION OF CHILDREN

"Sec.
"2251. Sexual abuse of children.
"2252. Transportation of certain photographs and films.
"2253. Definitions.

"§2251. Sexual abuse of children.

"(a) Any individual who causes or knowingly permits a child to engage in a prohibited sexual act or in the simulation of such an act shall be punished as provided under subsection (c) if such individual knows, has reason to know, or intends—

"(1) that such act may be photographed or filmed; and

"(2) that any photograph or film depicting such act may be transported, shipped, or mailed through interstate commerce or foreign commerce or may affect interstate commerce or foreign commerce.

"(b) Any individual who photographs or films a child engaging in a prohibited sexual act or in the simulation of such an act shall be punished as provided under subsection (c) if such individual knows, has reason to know, or intends that any photograph or film made by such individual depicting such act may be transported, shipped, or mailed through interstate commerce or foreign commerce or may affect interstate commerce or foreign commerce.

"(c) Any individual who violates subsection (a) or (b) shall be fined not less than $10,000 nor more than $50,000 or imprisoned not less than 4 yrs. nor more than twenty years, or both.

"§ 2252. Transportation of certain photographs and firms

"(a) Any individual who—

"(1) knowingly transports, ships, or mails through, or in such a manner as to affect, interestate commerce or foreign commerce any photograph or film depicting a child engaging in a prohibited sexual act or in the simulation of such an act; or

"(2) receives for the purpose of selling or sells any photograph or film which has been transported, shipped, or mailed through, or in such a manner as to affect, interstate commerce or foreign commerce and which depicts a child engaging in a prohibited sexual act or in the simulation of such an act,

shall be punished as provided under subsection (b).

"(b) Any individual who violates subsection (a) shall be fined not less than $5,000 nor more than $25,000 or imprisoned not less than 2 years nor more than fifteen years, or both.

"§ 2253. Definitions

"For purposes of this chapter:

"(1) The term 'child' means any individual who has not attained age sixteen.

"(2) The term 'prohibited sexual act' means—

"(A) sexual intercourse;
"(B) anal intercourse;
"(C) masturbation;
"(D) bestiality;
"(E) sadism;
"(F) masochism;
"(G) fellatio;
"(H) cunnilingus;
"(I) any other sexual activity; or
"(J) nudity; if such nudity is to be depicted for the purpose of sexual stimulation or gratification of any individual who may view such depiction.".

(b)(1) The table of chapters for title 18, United States Code, is amended by inserting immediately after the item relating to chapter 109 the following new item:

"110. Sexual exploitation of children___2251".

(2) The table of chapters for part I of title 18, United States Code, is amended by inserting immedately after the item relating to chapter 109 the following new item:

"110. Sexual exploitation of children___2251".

SEC. 4. The amendments made by this Act shall apply to acts or omissions occurring after the date of enactment of this Act.

By Mr. PELL:

S. 1012. A bill to require the establishment of a national snowmobile safety program, and for other purposes; to the Committee on Environment and Natural Resources.

NATIONAL SNOWMOBILE SAFETY PROGRAM

Mr. PELL. Mr. President, I am today introducing legislation that would establish a national snowmobile safety program.

My bill, Mr. President, would provide up to $2 million from the highway trust fund for the establishment of a snowmobile safety program. This effort would include, but not be limited to, a voluntary snowmobile safety training program, especially for individuals 18 years of age and younger; a voluntary inspection program for snowmobiles, similar to that sponsored by the U.S. Coast Guard for boat safety; and technical assistance to States for establishment or enhancement of existing snowmobile training programs and the development of environmentally safe snowmobile trails.

This snowmobile safety program would be developed through the National Park Service in consultation with other Federal agencies, as well as parties such as States or the International Snowmobile Industry Association, which presently have extensive programs underway. In this regard, it is of interest to note that at least 10 States have some form of snowmobile grant-in-aid program for trail development, and that since 1970, more than 500,000 young people in the United States have received formal snowmobile operator safety training in 13 States offering such programs.

In regard to the $2 million proposal for the snowmobile safety program, I have proposed an appropriation from the highway trust fund because I believe it an appropriate source of funding. According to State and industry sources, an estimated $6 million in Federal gasoline tax is paid annually on fuel consumed by snowmobile operations. In addition, it should be noted that six States including California, Idaho, Maine, Minnesota, Oregon, and Washington currently transfer a portion of their State fuel taxes attributed to snowmobile operation for improved snowmobile use and safety. Similar transfers are also under consideration by nine other States.

Finally, Mr. President, because of my concern over the National Safety Council data which indicates that head injuries account for 25 percent of the total injuries reported, I also request in my legislation that the Consumer Product Safety Commission review concerns associated with snowmobile helmet use and establish, as soon as practicable, standards for such helmets.

Mr. President, by way of background, in 1973, and again during the 94th Congress, I was especially concerned over alarming reports from the Consumer Product Safety Commission and the National Safety Council regarding snowmobile accidents and fatalities. Statistics reported by the Consumer Product Safety Commission during the period beginning with the 1972–73 season estimated emergency room injuries related to snowmobile use as high as 18,900. This figure rose sharply to more than 26,000 for the 1974–75 season. Fatalities for the same period reported by the National Safety Council rose from 156 in 1972–73 to 170 in 1974–75.

In response to these alarming snowmobile accident trends, I introduced legislation during the 93d Congress to provide for improved safety in the manufacture, operation, and use of snowmobiles. Most importantly, that legislation called for the establishment of mandatory safety standards for snowmobiles. In addition, recognizing that many snowmobile accidents and fatalities were the result of unsafe operation by snowmobile drivers, especially by individuals under the age of 21 years, I added a new provision to my legislation in 1975 to provide funding from the highway trust fund for a national snowmobile safety program.

Mr. President, because of several encouraging developments in the last few years relating to the establishment of snowmobile safety standards for manufacturers and the declining snowmobile fatality rate. I am introducing only that section of my 1975 bill, S. 2827, which would establish the safety program.

In regard to these developments, during the past several years the snowmobile industry, especially through the International Snowmobile Industry Association, has established minimum snowmobile safety standards that for the most part meet or exceed the standards I proposed in my 1973 and 1975 measures.

Furthermore, in several areas of special concern to me relating to sound levels, the throttle control system, and windshields, I understand that new standards based upon current testing and collection of data will be approved and implemented by the International Snowmobile Industry Association by June 30, 1977.

This program, Mr. President, is most encouraging in view of the fact that it has been accomplished on a voluntary basis. I commend the industry for its efforts to respond to the alarming accident trend. I hope that those snowmobile manufacturers not part of the ISIA safety program will make every effort to meet the same minimum safety standards.

Second, I am encouraged by the latest statistics from the National Safety Council on snowmobile fatalities for the 1975–76 season. This data shows a substantial reduction in fatalities from the high of 170 in 1974–75 to 121 during the past season. The National Safety Council has attributed this downward trend primarily to safety education efforts by State officials and club members, expansion and maintenance of snowmobile trails, and improvements in the manufacture of snowmobiles.

Therefore, based upon these industry trends and the National Safety Council statistics, I am focusing my attention on that area where I believe a coordinated national effort relating to the proper operation and use of snowmobiles would further reduce the accident and fatality rate in this important area.

Mr. President, snowmobiles have a capacity to contribute substantially to the work and recreational life in our country. No more clearly was this demonstrated than by the performance of snowmobiles in cities like Buffalo in January and February, and the actions this past winter of snowmobilers across the Nation who rescued many individuals stranded along our highways and in rural areas due to the extraordinary weather conditions.

Recognizing these contributions as well as the reduction in fatalities due to the importance of safety education and trail maintenance programs, it is essential, in my view, that there be strong Federal support for the establishment of a uniform national snowmobile safety program. I hope my colleagues and the snowmobile industry will support my efforts to achieve this important goal.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1012

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Snowmobile Safety Program Act of 1977".

DEFINITIONS

SEC. 2. For the purposes of this Act the term—

(1) "snowmobiles" means a self-propelled vehicle, having a weight or not more than one thousand pounds, intended for off-road travel, primarily on show, and which is driven by a track or tracks in contact with the snow;

(2) "Commission" means the Consumer Product Safety Commission established pursuant to section 4 of the Consumer Product Safety Act (15 U.S.C. 2053); and

(3) "helmet" means a snowmobile protective helmet meeting or exceeding the consumer product safety standards established by the Commission pursuant to section 3 of this Act.

HELMET SAFETY STANDARDS

SEC. 3. The Commission shall establish, as soon as practicable, consumer product safety standards for the performance, design, and construction of snowmobile helmets pursuant to its authority under section 7 of the Consumer Product Safety Act (15 U.S.C. 2056). Such standards may include requirements addressing the risks of injury from collision or other harmful contact, cold weather environment, and harmful sound levels for both brief and prolonged periods of exposure to such sounds.

SNOWMOBILE SAFETY PROGRAM

SEC. 4. (a) The Secretary of the Interior through the National Park Service, in consultation with the Bureau of Outdoor Recreation, the United States Forest Service, the Bureau of Land Management, and other interested parties, shall establish a National Snowmobile Safety Program. Such program shall include, but not be limited to—

(1) voluntary instruction of snowmobile operators especially for those individuals eighteen years of age or younger;

(2) technical assistance in the establishment of snowmobile safety programs, or for the enhancement of existing snowmobile safety programs, in the several States of the United States;

(3) technical assistance in the design and maintenance of environmentally safe snowmobile trails;

(4) a voluntary snowmobile safety inspection program; and

(5) such other technical assistance as the Secretary of the Interior may direct.

(b) Assistance may not be provided under this Act to any State that does not impose and enforce a requirement that any individual who operates or is a passenger in a snowmobile or who is being towed or otherwise propelled by a snowmobile on public lands wear a helmet, except that, no such assistance may be withheld until the expiration of one year after the Commission establishes the standards for helmets required under section 3.

(c) There are authorized to be appropriated out of the Highway Trust fund such sums, not to exceed $2,000,000 in any one fiscal year, as may be necessary to operate the National Snowmobile Safety Program established by subsection (a).

(d) Notwithstanding section 209(f)(1) of the Highway Revenue Act of 1956, the Highway Trust Fund shall be available for making expenditures to meet obligations resulting from assistance provided under the National Snowmobile Safety Program established by subsection (a).

By Mr. CHURCH:

S. 1013. A bill to amend the Internal Revenue Code of 1954 to terminate the operation of those provisions permitting the deferral of income tax with respect to foreign source income; to the Committee on Finance.

TAX DEFERRAL OF FOREIGN EARNED INCOME

Mr. CHURCH. Mr. President, I wish to introduce a bill to terminate our practice of deferring taxation of profits earned abroad by U.S.-based companies. This provision encourages corporations to invest in foreign countries instead of in the United States, costing America jobs, tax revenues, and balance-of-payments gains.

President Carter himself declared his intent to remove incentives for investment abroad and referred to deferral as a tax loophole that should be eliminated. In May of 1976, he stated:

We need to remove the tax incentives that encourage multinational corporations to manufacture products in foreign countries when their own employees in this country are out of work. This would save lost tax revenues for the United States.

Then in his first nationally televised debate with then President Ford, Carter said:

. . . we now have a deferral system so that the multinational corporations who invest overseas, if they make a million dollars in profits overseas, don't have to pay any of their taxes unless they bring the money back into this country. When they don't pay their taxes, the average American pays their taxes for them. Not only that, but it robs this country of jobs because instead of coming back with that million dollars and creating a shoe factory, say in New Hampsire or Vermont, if the company takes its money down to Italy and builds a shoe factory, they don't have to pay any taxes on the money.

. . . what I want to do is not to raise taxes but to eliminate loopholes . . . (including) tax deferrals for overseas (income).

Presently, the earnings of U.S.-based corporations are taxed by the United States only when they are brought back home. Until those earnings are repatriated, deferral acts like an interest free loan of cash from the U.S. Government. But even this is not the whole story; the earnings may never be brought back and deferral becomes tantamount to an exemption from U.S. tax.

Complementing our generosity are the incentives granted by many developing countries which insure that there is no tax at all, United States or otherwise, on the earnings abroad of multinational corporations. The Ford Motor Co. for example, in Taiwan, was granted a 5-year tax holiday to locate a Philco electronic facility in that country, along with accelerated depreciation, duty-free import of machinery and exemption from import taxes. In Korea, hearings I held in the Senate Foreign Relations Committee Subcommittee on Multinational Corporations—now the Foreign Economic Policy Subcommittee—showed that Motorola's investment in that country was 100 percent tax free for 8 years. So, of course, U.S.-based companies will have an incentive to locate there, never bring their earnings back home and pay no taxes at all.

Generally less than half of the earnings from the foreign operations of American multinationals are repatriated—and deferral allows those earnings to be brought back whenever the corporation thinks best, thereby minimizing their U.S. tax. Most of the earnings repatriated are from foreign countries that had already assessed high foreign taxes

on them—taxes which then are used as foreign tax credits to directly offset, dollar for dollar, U.S. income tax liability. The revenue loss estimate because of deferral has ranged from over $300 million to as much $1 billion per year.

But the crux of the problem should not focus entirely on the dollar amount lost to the Treasury. By encouraging the exportation of capital and the formation of plant and equipment abroad, deferral costs jobs and labor income here at home. In a study done for the Subcommittee on Multinational Corporations of the Senate Foreign Relations Committee, Professor of Economics Peggy Musgrave concluded that—

[F]oreign investment, as it were, establishes an alliance between U.S. capital and foreign labor both of whom stand to gain, while it is not surprising that U.S. labor and foreign capital should be less than enthusiastic.

In the bluntest terms, American money that builds a factory in Taiwan employs Taiwanese, not Americans. Peggy Musgrave is not alone in her conclusion. Last year, the State Department hired two economists to study the effects of deferral, confident that they would once again bolster their position—and the position of the multinationals—namely that large foreign investments are helpful to our economy. Despite State's expectations, Messrs. Frank and Freeman found that from 1966 to 1973, over 1 million U.S. jobs were lost because of investment abroad instead of at home. In testimony before the Subcommittee on Multinational Corporations they flatly stated that this tremendous foreign investment is undermining employment for our own people.

Particularly at a time when 7.3 percent of our work force is unemployed our tax laws should not "sweeten the pot" abroad and encourage more unemployment at home.

A further irony of deferral is that it, in effect, subsidizes the operations of the foreign subsidiary of a U.S.-based corporation so that it has an extra edge when it competes with our domestic companies. The domestic corporation cannot avoid U.S. taxes; the foreign subsidiary can. That "interest free loan" the U.S. Government is providing to foreign subsidiaries will rebound on the United States as our domestic industries fail or get taken over by worldwide giants. The effects of tax deferral of foreign income are detrimental to the United States.

As Professor Musgrave concluded:

Deferral clearly introduces a non-neutral incentive to invest abroad and is difficult to defend on both equity and efficiency grounds.

John Nolan, formerly Deputy Assistant Secretary of the Treasury for Tax Policy, told the President's Commission on International Trade and Investment:

There is a clear-cut bias in our existing tax structure favoring the manufacturer of goods abroad through foreign subsidiaries as opposed to exporting, in order to benefit from the deferral of U.S. taxes.

Establishing plants in Taiwan or Korea does not help reduce our unemployment at home.

A revenue loss of $300 million to $1 billion does not help reduce our budget deficit.

Products from the industries the American taxpayer helped establish abroad and helped maintain profitable does not provide equity to domestic enterprises bearing their full tax burden.

Deferral offers tremendous advantages to U.S. corporations which invest abroad, nothing to those which invest at home and costs to our economy in unemployment, loss of exports and taxes.

I agree with President Carter. Deferral should be eliminated.

By Mr. DOMENICI:

S. 1014. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit or deduction to individuals who maintain within their homes a dependent aged 65 or older; to the Committee on Finance.

TAX CREDIT/DEDUCTION FOR THE HOUSING OF OLDER AMERICANS

Mr. DOMENICI. Mr. President, I am sending to the desk a bill to amend the Internal Revenue Code to provide a $250 tax credit or a $1,000 tax deduction to individuals who maintain within their homes a dependent aged 65 or older. This legislation would, if enacted, help us to meet the critical shortage of decent housing for our older citizens and expand their options of where to live.

Throughout most of our history, people continued to live and work in their home communities for as long as they were physically and mentally able to do so. There was no compulsory retirement, no concept that one's usefulness to society automatically ended upon reaching a fixed chronological age, and few if any institutions designed specifically for retired persons. Our family structure was multigenerational and the care of the frail elderly rested almost solely upon the younger members of the family.

In recent decades we have encouraged the development of housing for senior citizens, congregate living facilities, retirement homes under HUD's section 202 program, and various types of long-term care facilities—23,000 nursing homes now house over 1 million elderly individuals. In addition, we have established specialized social services, nutrition programs, special medical services—medicare—and so forth, for the needy elderly. I am certainly not leveling criticism at any of these programs, many of which have been established or extended with my active support, but I am aware of the fact that these specialized—categorical programs have sometimes served to separate and isolate older Americans from the rest of our society. America is a youth-oriented society which tragically seems to have no room for its senior citizens.

Some older persons are forced from their apartments by rising rents, while others are driven from their homes of a lifetime by escalating taxes. Many of those who live alone dwell in fear of crime, which all too often victimizes the defenseless elderly.

To date, there has been an unfortunate tendency to deal with these problems by segregating the elderly into separate institutions. In many cases, when an individual needs special care, these residential facilities are necessary. In this regard, the homes for the aged and the nursing homes of this country have done outstanding work; and the abuses in a few should not diminish our appreciation for the great majority of them, which have given dignity and hope to many thousands of the elderly infirm.

But only a small percentage of the elderly belong in institutional settings. All too often, however, no alternatives are available to them or to their families. Financial pressures have combined with the extraordinary mobility of contemporary society to erode our traditional sense of family responsibility.

Let us begin to redress those mistakes. The legislation I am proposing today would be particularly helpful to those who want to keep their elderly relatives with them in one household.

It would provide a significant financial incentive to bring older Americans into private homes. It would encourage children to invite their parents to live with them, as was once the custom in our Nation. Specifically, I am proposing to give a taxpayer a $250 tax credit or a $1,000 tax reduction for each senior citizen, related or not, for whom the tapayer provides housing, free of charge, in his or her own residence. This would be above and beyond any deduction or exemption presently allowed in the case of dependents. I would note, Mr. President, that such a tax benefit would be especially helpful to the family, with limited means, who really want to keep their older relatives with them. Thus it would significantly expand the options of both the family and the older person involved.

This approach to the housing problems of the elderly offers several major advantages. It would be far less costly to the taxpayer than would the construction, with Federal funds of specialized housing projects for senior citizens. And it would provide them with a more personal, home-like, and supportive atmosphere. As we seek realistic ways to strengthen our social fabric we must see to it that older Americans are not treated as second-class citizens.

Mr. President, there are some things we must simply refuse to accept, and the dishonoring of age is one of them. Civilized societies have always valued the wisdom of the aged; but contemporary society too often discounts their usefulness: Throughout history, the young have learned from their elders the lessons of the past and the values that can be distilled only from practical experience.

But many of today's young Americans reach maturity without exposure to the insights and fortitude of age. As one astute scholar of human development has put it, our children are the first generation in history to grow up without grandparents. It should not be surprising, therefore, that our society seems fragmented and disjointed.

The legislation I am introducing today will not solve all of those problems. But it does reaffirm the principles by which we must be guided if we are ever to formulate enduring solutions. We must encourage the exercise of our individual responsibility toward the elderly. We

must allow Government to assist, but never to entirely supplant, the efforts of private citizens in caring for their families. And we must begin to examine all of the present programs of the Federal Government to see that our public policies strengthen, rather than weaken, the basic family structure which is so important to the overall health of our society. The rebuilding of a true multigenerational society would help to reverse the growing trend of isolating the aged.

S. 1014 would harness the constructive aspects of our Federal tax system to achieve a socially desirable objective. Over the years, the Congress has shaped the tax system to achieve various socioeconomic objectives. We encourage home ownership, industrial modernization, day care services, and so forth, through tax incentives and I believe that the same approach would help us to find a meaningful solution to the pressing problem of providing adequate housing for our elderly.

As the ranking minority member on the Senate Special Committee on Aging, I have become convinced that we must reach out to find new solutions—new approaches to meeting the needs of older Americans. There is a popular saying which expresses my concern which goes, "if you are not part of the solution you are not part of the problem." Many of our existing domestic programs were enacted and are administered with the best of intentions. But they have now become part of the problem and it is incumbent upon all of us to seek new and better ways of meeting the needs of our retired citizens.

Mr. President, the enactment of S. 1014 would result in a loss of tax revenue but I believe the cost of this "tax expenditure" would be more than offset by savings in a dozen or more major Federal programs. In the process, we would be improving the quality of life for millions of older Americans, strengthening the family unit, and contributing to the vigor and vitality of our society.

Mr. President, I ask unanimous consent that the text of S. 1014 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1014

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44B. ELDERLY DEPENDENTS.

"(a) GENERAL RULE.—In the case of an individual who maintains a household which includes as a member a dependent (as defined in section 152 (a)) who is 65 years of age or older, there shall be allowed against the tax imposed by this chapter for the taxable year a credit of $250.

"(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under—

"(1) section 33 (relating to foreign tax credit),

"(2) section 37 (relating to credit for the elderly),

"(3) section 38 (relating to investment and certain depreciable property),

"(4) section 40 (relating to expenses of work incentive programs),

"(5) section 41 (relating to contributions to candidates for public office),

"(6) section 42 (relating to general tax credit),

"(7) section 44 (relating to purchase of new principal residence), and

"(8) section 44A (relating to expenses for household and dependent care services necessary for gainful employment).

"(c) SPECIAL RULES.—The rules set forth in section 44A (f) apply to this section. For the purpose of applying those rules to this section, the term 'qualifying individual' shall be considered to refer to a dependent of the taxpayer aged 65 or older.".

(b) (1) Section 6096(b) of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(2) The table of sections for such subpart is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44B. Elderly dependents.".

SEC. 2. (a) Part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as 222 and by inserting after section 220 the following new section:

"SEC. 221. ELDERLY DEPENDENTS.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual who maintains a household which includes as a member a dependent (as defined in section 153(a)), there shall be allowed a deduction of $1,000.

"(b) RULES.—The rules set forth in section 44A(f) apply to this section. For the purpose of applying those rules to this section, the term 'deduction' shall be substituted for the term 'credit' each place it appears, and the term 'qualifying individual' shall be considered to refer to a dependent of the taxpayer aged 65 or older.

"(c) ELECTION TO TAKE CREDIT IN LIEU OF DEDUCTION.—This section shall not apply in the case of any taxpayer who, for the taxable year, elects to take the credit against tax provided by section 44B (relating to elderly dependents). The election shall be made in such manner and at such time as the Secretary shall prescribe.".

(b) The table of sections for such part is amended by striking out the last item and inserting in lieu thereof the following new items:

"Sec. 221. Elderly dependents.
"Sec. 222. Cross references.".

SEC. 3. The amendments made by this Act apply with respect to taxable years beginning after December 31, 1976.

By Mr. NELSON (for himself, Mr. ANDERSON, Mr. PROXMIRE, Mr. HART, and Mr. RIEGLE):

S. 1015. A bill to provide for the regulation of certain detergents in the Great Lakes region of the United States; to the Committee on Environment and Public Works.

Mr. NELSON. Mr. President, today I am introducing legislation that establishes a stringent limitation on the amount of phosphorus contained in detergents sold within the Great Lakes Basin States—the States of Wisconsin, Minnesota, Illinois, Indiana, Michigan, Ohio, Pennsylvania, and New York.

One of the most serious environmental problems facing all the Great Lakes is eutrophication, the premature aging of lakes due to excessive nutrient fertilization. New scientific research developed by the International Joint Commission—IJC and the U.S. Environmental Protection Agency—EPA, clearly demonstrates that the policies and programs the Congress enacted into law in 1972 to prevent the premature aging of the Great Lakes has failed to adequately solve the problem. The solution of requiring advanced phosphorus removal technology to be installed at secondary sewage treatment plants that discharge effluent into the lakes will not protect the lakes.

In fact, scientific evidence clearly concludes that there is no "technological fix" to this problem. The only way of preventing the eutrophication of this important natural resource is to establish a strict basinwide limitation on the amount of phosphorus contained in detergents.

Scientists from the United States and Canada have determined that the lakes are dying. They have determined that the so-called "limiting factor," the major cause in the acceleration of the aging process is phosphorus. The scientists have determined that at least 40 percent of the phosphorus comes from detergents. And they have determined that even advanced technology will not remove enough of this chemical from the effluent to prevent the lakes from accelerated aging.

For example, the 1972 International Agreement on the Great Lakes signed by this country and Canada established a ceiling of 1 milligram per liter of phosphorus in the effluent from major sewage systems emitting discharges into the Lakes. Current secondary treatment with regular detergents reduces phosphorus content to between 8 to 10 parts per million. The same technology using nonphosphate detergents reduces phosphorus loading in the effluent to between 4 to 6 parts per million, a 45- to 50-percent reduction. Secondary treatment plus advanced phosphorus removal, regardless of the type of detergent used, reduces the loading to the established ceiling of 1 part per million, 1 milligram per liter. However, new research concludes that the 1972 standard is too high. Instead of 1 part per million, the standard should be one one-hundredth part per million to protect the lakes. The only way to obtain this factor is to institute a uniform stringent phosphorus limitation.

Detergents are the major manmade controllable source of phosphorus. Implementing such a limitation for the Great Lakes Basin is the single most important step that can be taken to protect and enhance the environmental quality these five magnificent bodies of water.

Studies by the city of Chicago, the States of Indiana and Minnesota, and further analysis by the EPA, show that such a product limitation will have other positive economic and environmental impacts, at little or no additional cost to the consumer and taxpayer. The amount of sludge produced in sewage treatment plants will be reduced. The amount of chemicals needed to remove the impurities from the effluent will be reduced, saving cities hundreds of thousands of dollars in operating costs. The amount of particulates released in the air during the disposal of sludge will be significantly reduced. Less energy will be used

to operate the plants. And the cost to consumers, depending on the hardness of the water, will be approximately the same.

Former EPA Administrator Russell Train, in a December 3, 1976, memorandum to the EPA's Region V administrator, said:

I was very concerned that our effort thus far, under PL 92-500, to carry out the terms of the Great Lakes Water Quality Agreement of 1972 had fallen so short of the need in respect to eutrophication. . . . I believe that it (a strict detergent limitation) is an effective method of achieving immediate improvements and should be considered the Great Lakes Basin just as recommended by the International Joint Commission.

There is precedent in the Great Lakes basin for such a ban. Indiana, Minnesota, New York, Michigan, and the cities of Chicago and Akron have already believed that the scientific evidence was conclusive enough to warrant implementation of a ban similar to my bill. In every case consumer acceptance has been widespread, and the resulting lowering of the phosphorus loading at the sewage plant has borne out the scientific projections.

My bill would provide a uniform standard of allowable levels of phosphorus in detergent used in the Great Lakes basin. The bill would set an allowable standard not to exceed five-tenths percent phosphorus by weight in laundry detergents and household cleaning agents, set 11 percent phosphorus by weight for household and commercial detergents for automatic dishwashers, and sets chemical water conditioners for machine laundry not to exceed 20 percent by weight.

The policies adopted in 1972 have failed. The scientific evidence, in my judgement, supporting the enactment of a strict limitation on the amount of phosphorus contained in detergents sold in the Great Lakes basin, is conclusive. Immedidate action is needed if we are to save the Great Lakes from premature aging.

I ask unanimous consent that the text of my legislation be printed in the RECORD. More detailed information on this subject may be found at S. 3077 in February 25, 1977's RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1015

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title III of the Federal Water Pollution Control Act is amended by inserting at the end thereof the following:

REGION

"SEC. 319. (a) In recognition of the particular danger to the Great Lakes and the residents of the Great Lakes Region represented by the use of nutrients in cleaning agents and water conditioning agents it is the purpose of this section to regulate such use in such region and to provide for a study to determine whether such regulation should be made nation-wide.

"(b) As used in this section the term—

"(1) 'Great Lakes Region' means the States of New York, Pennsylvania, Ohio, Indiana, Michigan, Illinois, Wisconsin, and Minnesota;

"(2) 'cleaning agent' means a heavy duty laundry detergent, laundry additive, dishwashing compound, household cleaner, industrial cleaner, phosphate compound, or other substance intended to be used for cleaning purposes;

"(3) 'nutrient' means a substance or combination of substances which, if added to waters in sufficient quantities, provide nourishment that promotes growth of aquatic vegetation in densities which—

"(A) interfere with use of the waters by man or by any animal, fish or plant useful to man, or

"(B) contribute to deregulation or alteration of the quality of the waters to an extent detrimental to their use by man or by any animal, fish or plant that is useful to man.

"(4) 'chemical water conditioner' means a water softening chemical, anti-scale chemical, corrosion inhibitor or other substance intended to be used to treat water;

"(5) 'dishwashing machine' means equipment manufactured for the purpose of cleaning dishes, glassware and other utensils involved in food preparation, consumption or use, using a combination of water agitation and high temperature; and

"(6) 'phosphorus' means elemental phosphorus as further defined by the Administrator for the purpose of this section.

"(c) The Administrator shall prescribe regulations to be effective after 180 days following the date of enactment of this section prohibiting the sale, offering for sale, or distribution, for use within the Great Lakes Region of cleaning agents or chemical water conditioners containing nutrients in excess of maximum permissible concentrations prescribed by the Administrator for the purpose of this section. Such regulations shall take into consideration—

"(1) The availability of safe, non-polluting and effective substitutes.

"(2) The difference in the mineral content of water in various parts of the region.

"(3) The differing needs of industrial, commercial and household users of cleaning agents and chemical water conditioners.

The maximum amount of phosphorus allowed in the following cleaning agents or chemical water conditioners shall be as follows:

"(A) laundry detergents and built soaps for machine laundry excluding chemical water conditioners, not to exceed 0.5% phosphorus, by weight;

"(B) household and commercial detergents for machine dishwashing, not to exceed 11% phosphorus, by weight;

"(C) all household cleaning agents except those listed in clauses (1) and (2) intended to be used in the home, not to exceed 0.5% phosphorus, by weight; and

"(D) chemical water conditioners for machine laundry use, not to exceed 20% phosphorus, by weight.

The concentration by weight of prescribed nutrients in any cleaning agent or chemical water conditioner shall be determined by the current applicable method prescribed by the American Society for Testing and Materials.

"(d) In any case where, upon application, the Administrator finds that by reason of exceptional circumstances the strict enforcement of any provision of such regulations would cause undue hardship; that the use of cleaning or water conditioning agents containing phosphorus in excess of the permissible levels set forth herein is necessary for the public health, safety or welfare; or that strict conformities with these limits would be unreasonable, impractical or not feasible under the circumstances, the Administrator may permit a variance therefrom upon such conditions as he may prescribe for prevention, control or abatement of pollution in harmony with the general purpose of such regulations and the intent of this section.

"(e)(1) It shall be unlawful after the effective date of such regulations for any person to sell, offer for sale, or distribute, for use in the Great Lakes Region any cleaning agent or chemical water conditioner, unless such agent or conditioner conforms with regulations prescribed with respect to such agent or conditioner pursuant to this section.

"(2) Any person who violates paragraph (1) of this subsection shall be subject to a civil penalty of not to exceed $10,000 for each such violation.

"(3) Any agent or conditioner which does not conform with regulations prescribed pursuant to this section shall be liable to be proceeded against on libel of information and condemned in any district court in the United States within the jurisdiction of which such agent or conditioner is found in violation of paragraph (1).

"(4) Such agent or conditioner shall be liable to seizure by process pursuant to the libel, and the procedure in cases under this subsection shall conform, as nearly as may be, to the procedure in admiralty; except that on demand of either party any issue of fact joined in such case shall be tried by jury. When libel for condemnation proceedings under this subsection, involving the same claimant and the same issues, are pending in two or more jurisdictions, such pending proceedings, upon application of the United States or the claimant reasonably made to the court of one such jurisdiction, shall be consolidated for trial by order of such court, and tried in (A) any district selected by the applicant where one of such proceedings is pending; or (B) a district agreed upon by stipulation between the parties. If no order for consolidation is so made within a reasonable time, the United States or the claimant may apply to the court of one such jurisdiction, and such court (after giving the other party, the claimant, or the United States attorney for such district, reasonable notice and opportunity to be heard) shall by order, unless good cause to the contrary is shown, specify a district of reasonable proximity to the claimant's principal place of business, in which all such pending proceedings shall be consolidated for trial and tried. Such order of consolidation shall not apply so as to require the removal of any case the date for trial of which has been fixed. The court granting such order shall give prompt notification thereof to the other courts having jurisdiction of the cases covered thereby.

"(5) Any agent or conditioner condemned under this subsection shall, after entry of the decree, be disposed of by destruction or sale as the court may, in accordance with the provisions of this subsection, direct and the proceeds thereof, if sold, less the legal costs and charges shall be paid into the Treasury of the United States; but such agent or conditioner shall not be sold under such decree for a use which would result in the pollution of the navigable waters of the United States contrary to the purpose of this section; except that after entry of the decree and upon the payment of the costs of such proceedings and the execution of a good and sufficient bond conditioned that such agent or conditioner shall not be used contrary to the provisions of this section, the court may by order direct that such agent or conditioner be delivered to the owner thereof to be destroyed or brought into compliance with the provisions of this section under the supervision of an officer or employee duly designated by the Administrator, and the expenses of such supervision shall be paid by the person obtaining release of the agent or conditioner under bond.

"(6) When a decree of condemnation is entered against the agent or conditioner, court costs and fees, and storage and other proper expenses, shall be awarded against the person, if any, intervening as claimant thereof.

"(7) In the case of removal for trial of any case as provided by paragraph (3) of this subsection—

"(A) the clerk of the court from which removal is made shall promptly transmit to the court in which the case is to be tried all records in the case necessary in order that such court may exercise jurisdiction;

"(B) the court to which such case is removed shall have the powers and be subject to the duties, for purposes of such case, which the court from which removal was made would have had, or to which such court would have been subject, if such case had not been removed.

"(8) The United States district courts shall have jurisdiction, for cause shown and subject to the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this subsection.

"(9) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this subsection, trial shall be by the court or, upon demand of the accused, by a jury. Such trial shall be conducted in accordance with the practice and procedure applicable in the case of proceedings subject to the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

"(10) All libel or injunction proceedings for the enforcement, or to restrain violations, of this subsection shall be by and in the name of the United States. Subpenas for witnesses who are required to attend a court of the United States in any district may run into any other district in any such proceeding.

"(f)(1) The Administrator is authorized to conduct examinations, inspections, and investigations for the purposes of this section through officers and employees of the Agency or through any officer or employee of any State, or political subdivision thereof, duly commissioned by the Secretary.

"(2) For purposes of enforcement of this section, officers or employees duly designated by the Administrator, upon presenting appropriate credentials and a written notice to the owner, operator, or agent in charge, are authorized (A) to enter, at reasonable times, any factory, warehouse, or establishment in which a product subject to this section is manufactured, processed, packed, held, or sold, or to enter any vehicle being used to transport or hold such a product; (B) to inspect, at reasonable times and within reasonable limits and in a reasonable manner, such factory, warehouse, establishment, or vehicle, and all pertinent equipment, finished and unfinished materials; and (C) to obtain samples of such materials. A separate notice shall be given for each such inspection, but a notice shall not be required for each entry made during the period covered by the inspection. Each such inspection shall be commenced and completed with reasonable promptness.

"(3) If the officer or employee obtains any sample, prior to leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the samples obtained. If an analysis is made of such sample, a copy of the results of such analysis shall be furnished promptly to the owner, operator or agent in charge.

"(g) The Administrator shall carry out a full and complete investigation and study in order to determine whether the regulations prescribed for the Great Lakes Region pursuant to this section should be applied nation-wide. Such investigation and study shall consider the cost to the consumer, cost to industry, benefits to be gained, and other appropriate factors. The results of such investigation and study shall be submitted to the President and the Congress, together with any legislation necessary to carry out the recommendations, not later than 180 days after the date of enactment of this section.".

Mr. ANDERSON. Mr. President, it is an honor for me to join my colleague, Mr. NELSON, in sponsoring S. 1015, to provide for the regulation of certain detergents in the Great Lakes region of the United States.

In 1971, the Minnesota Legislature, acting upon my recommendation as Governor, enacted a statute authorizing the Minnesota Pollution Control Agency—MPCA—to adopt standards limiting the amounts of nutrients in various cleaning and water conditioning agents. In so doing, the legislature reflected a nationwide concern that the nutrients contained in many of these products overstimulate the growth of aquatic life and lead to an acceleration of the natural eutrophication process in recreational waters. On April 27, 1976, after extensive analysis of the issue and lengthy public hearings the MPCA adopted Regulation WPC–37, limiting as of January 1, 1977, the phosphorus content of laundry detergents and certain other cleaning agents.

Accelerated eutrophication and the excessive fertility of lakes can, in a vast majority of cases, be traced to a single essential element, phosphorus. It is widely recognized that phosphorus plays a key role in limiting the growth of algae in the unpolluted freshwater environment and that sources of excess phosphorus, unlike other algal nutrients, are largely related to the activities of man. Because of this relationship numerous agencies responsible for water quality have instituted programs to control phosphorus inflow. With this objective, several jurisdictions, as Mr. NELSON has indicated, including the States of Indiana, New York and Minnesota, the city of Chicago, and most recently the State of Michigan, have enacted strict detergent phosphorus control measures. While enforcement of the Minnesota regulation has been temporarily enjoined, pending the outcome of litigation in Ramsey County District Court, the MPCA is confident the regulation will be upheld.

In Minnesota, it is currently estimated that 40 to 50 percent of the phosphorus in domestic wastewater, or about 3 to 4 million pounds annually, can be attributed to the phosphorus ingredients of laundry detergents. Eliminating detergent phosphorus in certain areas of the United States and Canada has reduced the phosphorus load to receiving waters, dramatically illustrating the effectiveness of a legislative approach to phosphorus control.

In terms of controlling lake eutrophication, or aging, the elimination of phosphorus from detergents will be helpful, although to a varying degree. It will clearly not help lakes that receive all of their excess phosphorus from storm or agricultural drainage. But detergent controls will help lakes or reservoirs that have sewage effluents or septic tank wastes entering them, either directly or via tributaries. In Minnesota, for example, results from water and wastewater sampling at 50 sewage-impacted lakes studied by the EPA national eutrophication survey indicate that total phosphorus loading to these lakes will be reduced by an average of 27 percent, following implementation of detergent phosphorus control. Twenty-one of these lakes were either partially or fully phosphorus-limited during the summer months and are expected to respond rapidly to the elimination of phosphate detergents. Many of the remaining nitrogen-limited lakes, some of which receive over 80 percent of their annual supply of phosphorus from sewage effluents, can be made phosphorus-limited and are expected to benefit significantly from a lessening of the phosphorus influx from detergents.

In Minnesota, the MPCA considers detergent phosphorus control regulations an integral part of an overall program to limit phosphorus inflow. First and foremost, it would result in approximately 50 percent removal of phosphorus from the entire municipal wastewater stream, without any additional construction. Thus, substantial phosphorus control is exerted over otherwise uncontrolled sources, such as municipal treatment systems where the addition of phosphorus removal technology has not been completed or is not feasible.

Second, treatment plants already removing phosphorus can benefit significantly from the lower level of phosphorus present in incoming sewage. This will reduce chemical costs by 20 to 40 percent for those plants adding chemicals such as alum or ferric chloride. Lowering the chemical dosage will also lessen the sludge handling and disposal problems which frequently accompany chemical addition. The lowered level of sewage phosphorus is also of special importance when operational problems, equipment breakdown and repair, inadequate supervision, cleaning and adjustment of chemical feed equipment, or other factors interfere with the efficient operation of a phosphorus removal facility.

Of course, limitations on the phosphorus content of cleaning products cannot be imposed unless safe, nonpolluting and effective phosphate-free substitutes are available. To eliminate phosphates, detergent manufacturers have developed a variety of viable phosphate-free products capable of achieving consumer acceptance. Advertising claims for these products variously state that they are "powerful" laundry detergents which provide "total cleaning power" at an "economical" and "everyday low price." It is clear that phosphate-free products are effective cleaning agents and are available at prices comparable to phosphated products. Proof of their acceptability comes from the fact that a variety of nonphosphate detergents have become established on supermarket shelves in direct competition with phosphate brands in States where controls are now in place. While phosphates do have the edge in overall cleaning, they are frequently equaled or outperformed by the nonphosphates as soil types, fabric types, and washing conditions vary.

S. 1015 is also an important legislative initiative, because of the necessity to protect and preserve all of the Great Lakes, and the inland waters of the Great Lakes States. The pressures on the Great Lakes and our inland lakes will continue to increase as a result of population increases and the growing demand for quality recreational opportunities. Drastic reductions in nutrient inputs to these waters are needed now and controlling phosphorus in cleaning products is an eminently practical method to help accomplish this goal.

Consumers in areas where phosphate bans are in effect have shown uniformly strong support for such measures. There is little doubt that citizens in those States affected by this legislation will display an equal willingness to forgo the use of phosphorus-containing cleaning products for the sake of environmental improvement.

Mr. President, it is a privilege for me to join my colleague, Mr. NELSON, in sponsoring this important legislation for the reasons stated above and to assist in attaining one of the objectives of the 1972 Great Lakes Water Quality Agreement between the United States and Canada.

By Mr. PROXMIRE (by request):

S. 1017. A bill to extend the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Housing, and Urban Affairs.

Mr. PROXMIRE. Mr. President, at the request of the administration, I am introducing legislation to amend the Export-Import Bank Act of 1945 (12 U.S.C. 635f) to extend the lending authority of the Bank from its present expiration date of June 30, 1978, to September 30, 1978. The proposed expiration date would thus coincide with the end of fiscal year 1978.

Mr. McINTYRE:

S. 1018. A bill to amend title II of the Social Security Act to increase the amount which individuals may earn without suffering deductions from benefits due to excess earnings; to the Committee on Finance.

Mr. McINTYRE. Mr. President, today I am introducing a bill to amend title II of the Social Security Act by increasing the amount an individual may earn without suffering a reduction in his social security benefits.

I understand that a number of measures have been introduced this session calling for a change in the present system. These proposals range from a slight increase to total elimination. While I deeply sympathize with any attempt by my colleagues to help alleviate this unjustifiable burden, I believe that the cost estimates of total elimination make the prospects for such action slim.

My bill would increase the limitation from the present $3,000 to $4,800 as well as reduce the penalty for earnings above this amount from 1 out of every 2 to 1 out of 3 dollars from $4,800 to $9,600. I believe that is a realistic and achievable goal which would reach those individuals who are most adversely affected by the present law.

The problems and hardships of senior citizens are many and varied and the burden imposed by restricting income through this test most severely affects those least able to afford it. Inflation has had a crippling effect on the lives of the elderly and to compound this by removing the incentive to work in effect penalizes an individual for growing old. This is an injustice that is keenly felt and I have received numerous letters from my constituents in New Hampshire calling for a liberalization in the present law.

I am hopeful that we can unite in an effort to eliminate this burden from the lives of older Americans.

By Mr. MAGNUSON (by request):

S. 1019. A bill to authorize appropriations for the fiscal years 1978 and 1979 for certain maritime programs of the Department of Commerce, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. MAGNUSON. Mr. President, I introduce, by request of the Department of Commerce, a bill to authorize appropriations for the fiscal years 1978 and 1979 for certain maritime programs of the Department of Commerce, and for other purposes.

I ask unanimous consent that the text of the bill and the statement of purpose and need, prepared by the Department, be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1019

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Maritime Appropriation Authorization Act for Fiscal Years 1978 and 1979".

SEC. 2. Funds are authorized to be appropriated without fiscal year limitation as the appropriation Act may provide for the use of the Department of Commerce, for the fiscal years 1978 and 1979, as follows:

(1) For acquisition, construction, or reconstruction of vessels and construction-differential subsidy and cost of national defense features incident to the construction, reconstruction, or reconditioning of ships $135,000,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979;

(2) For payment of obligations incurred for operating-differential subsidy, not to exceed $372,109,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979;

(3) For expenses necessary for research and development activities, not to exceed $18,325,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979;

(4) For reserve fleet expenses, not to exceed $5,137,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979;

(5) For maritime training at the Merchant Marine Academy at Kings Point, New York, not to exceed $14,633,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979; and

(6) For financial assistance to State marine schools, not to exceed $4,020,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979.

SEC. 3. There are authorized to be appropriated for the fiscal years 1978 and 1979, in addition to the amounts authorized by section 2 of this Act, such additional supplemental amounts for the activities for which appropriations are authorized under section 2 of this Act, as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law, and for increased costs for public utilities, food service, and other expenses of the Merchant Marine Academy at Kings Point, New York.

STATEMENT OF PURPOSE AND NEED OF THE BILL

To authorize appropriations for the fiscal years 1978 and 1979 for certain maritime programs of the Department of Commerce, and for other purposes

Section 209 of the Merchant Marine Act, 1936, provides that after December 31, 1967, there are authorized to be appropriated for certain maritime activities of the Department of Commerce only such sums as the Congress may specifically authorize by law. This draft bill authorizes appropriations for those activities listed in section 209 for which the Department of Commerce proposes to seek appropriations for fiscal years 1978 and 1979.

"(1) For acquisition, construction, or reconstruction of vessels and construction-differential subsidy and cost of national defense features incident to the construction, reconstruction, or reconditioning of ships $135,000,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

Construction subsidies are based on the difference between United States and foreign shipbuilding prices. These sums are paid to shipyards so that U.S. operators can purchase American-built vessels at prices equivalent to prices for similar foreign-built vessels.

The request for construction subsidies for fiscal 1978 is $135,000,000. This together with $98,000,000 of carry over funds, totaling $233,000,000, will fund seven ships: 1 LASH, 3 LNG's, 2 breakbulk/containerships, and 1 containership.

"(2) For payment of obligations incurred for operating-differential subsidy, not to exceed $372,109,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

Operating subsidies are based upon the difference between United States and foreign vessel operating costs and are paid to promote the maintenance of a U.S.-flag merchant fleet capable of providing essential shipping services. Essential services are defined as those ocean services, routes and lines, and bulk carrying services essential for the promotion, development, expansion, and maintenance of the foreign commerce of the United States. Operators receiving subsidies for the provision of such services must operate American-built vessels manned by American crews. The fiscal year 1978 and 1979 authorization request will finance operating subsidies to U.S.-flag operators in order to support the continuation of essential American merchant marine services.

An estimated $295,986,000 in subsidy will be paid in 1978 for 202.4 ship years of operation, including $15,161,000 for passenger and combination passenger/cargo ships, $236,396,000 for general cargo ships, and $44,429,000 for bulk carrier ships. An additional $76,123,000 will be paid toward balances estimated to be due for operations in 1974 through 1977. Funds requested for fiscal year 1978 includes $19,276,000 for U.S.-flag carriage of grain purchased under the long-term U.S./U.S.S.R. grain purchase agreement. The requested funding for the 1978 program reflects U.S. and foreign costs escalation, full year costs of ships delivered in 1977, reductions in subsidy resulting primarily from the projected termination of subsidy for two passenger ships, and lower levels of U.S.-flag operations in the carriage of grain purchases to the U.S.S.R.

"(3) For expenses necessary for research and development activities, $18,325,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

The purpose of the research and development program is to advance technological development to enable U.S. shipyards and ship operators to become more competitive.

The program level for 1978 includes projects for the development of new and advanced shipboard machinery, improved ship design and construction methods, and the improvement of shipboard operations and shipping systems. These activities will assist U.S. shipping and shipbuilding companies in competing in world trade. Cost-sharing and participation by industry in research and development projects assure the practicality and acceptance of the projects and enhances the research effort by obtaining a larger return for the Federal investment.

"(4) For reserve fleet expenses, not to exceed $5,173,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

The Maritime Administration maintains the National Defense Reserve Fleet to supplement our active merchant fleet in time of war or national emergency.

The 1978 reserve fleet program provides for the preservation and security of retention ships, including those retained for the U.S. Navy, which are distributed among three fleet sites. Funding is also requested for the MarAd portion of the joint Navy-MarAd program to improve the activation response time of selected ships in the reserve fleet. Normal preservation maintenance of hulls, machinery, and electrical components, including dehumidification of portions of ship interiors and cathodic protection to bottoms, comprise the workload of maintaining the remaining retention ships.

"(5) For maritime training at the Merchant Marine Academy at Kings Point, New York, not to exceed $14,633,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

The 1978 maritime training program provides for the operation of the U.S. Merchant Marine Academy at Kings Point, New York, in accordance with the Merchant Marine Act, 1936. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the U.S. merchant marine.

The 1978 program level is a continuation of the prior year program, with funding increases related primarily to increased operating costs and to the facilities modernization program. The modernization program continues systematic renovation and upgrading of academic buildings and other facilities in accordance with recommendations set forth in the Facilities Master Plan (a multi-year modernization plan).

"(6) For financial assistance to State marine schools, not to exceed $4,020,000 for fiscal year 1978, and such sums as may be necessary for fiscal year 1979."

The 1978 State maritime training program implements the Maritime Academy Act of 1958 by providing assistance to States in the operation and maintenance of maritime academies for the training of merchant marine officers. Assistance is provided to participating States (California, Michigan, New York, Maine, Massachusetts and Texas) in the form of annual grants, allowances to cadets to partially defray costs of uniforms, textbooks and subsistence, and maintenance of ships on loan from the National Defense Reserve Fleet for use as training vessels.

Section 3 of the draft bill would authorize to be appropriated for 1978 and 1979 additional supplemental amounts for the activities for which appropriations are authorized under section 2 of the bill, to the extent necessary for increases in salary, pay, retirement, or other employee benefits authorized by law. The purpose of this section is to provide authorization for supplemental appropriations for these purposes.

Also requested is necessary authority for supplemental appropriations, should they be needed, for uncontrollable cost increases in public utilities, food services and other expenses at the Merchant Marine Academy at Kings Point, New York.

By Mr. LAXALT:

S. 1020. A bill to amend title II of the Social Security Act to provide for a phasing out of the earnings limitation for workers of 65 years of age and over; to the Committee on Finance.

Mr. LAXALT. Mr. President, some 30 Senators have cosponsored S. 146, a proposal to repeal completely the social security retirement test. Although I am included in that number and I wish that legislation every success, I am today introducing legislation to provide an alternative approach which would phase out the retirement test over a 7-year period.

At present, a social security retirement or survivor beneficiary can earn up to $3,000 with no loss of benefits. After $3,000, however, $1 in income is lost for every $2 in earned income. But significantly no benefits are lost for income derived from savings and investments.

In my judgment, the retirement test is deplorable. It is inequitable in that it imposes an oppressive tax on the earnings of elderly workers least able to bear such a heavy financial burden. But, perhaps most seriously, it unjustly deprives those among our elderly who wish to continue in a productive role of benefits to which they and their employers have contributed and to which they are fully entitled.

Unfortunately, although there is a clear need to do away with the retirement test, abolishing it at this time would prove to be a rather expensive undertaking, estimated by the Social Security Administration's Actuary Office at $2.9 billion. In view of the financial difficulty which the social security trust funds currently find themselves, I can understand how some Senators might have difficulty conceiving of incurring such a substantial cost at this time.

My proposal would have a budgetary impact limited to $200 million in fiscal 1978. It would phase out the retirement test by reducing the exempt age 1 year at a time from its present level of 72 down to 65 in 1984 by which time the test would be abolished entirely:

ANNUALIZED COST FIGURES—LAXALT PROPOSAL

Year:	Cost	Age lowered from
1978	$200 million	72–71
1979	$400 million	71–70
1980	$700 million	70–69
1981	$1.1 billion	69–68
1982	$1.5 billion	68–67
1983	$2.0 billion	67–66
1984	$2.9 billion	66–65

SOURCE.—Social Security Administration—Office of Chief Actuary.

Mr. President, it is all too easy to argue that virtues of frugality and the need for individuals to make their own provisions for retirement as a theoretical justification for penalizing those who must work to make ends meet, because they simply cannot make it on their meager social security allowances. But, that argument ignores the suffering which these individuals must endure because of the retirement test while others with substantial investment and alternative pension income utilize full social security benefits for pin money.

Personally, I believe that any citizen who wishes to make a productive contribution should not be discouraged from doing so. As the ranking Republican on the Social Security Subcommittee of the Finance Committee, I recognize the need for a comprehensive look at the financial status of the social security trust funds which the administration has promised. But, within the context of an overall strengthening of the trust funds, we need to gradually do away with the inequitable and counterproductive retirement test.

I ask unanimous consent that the text of my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1020

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 203 (j) of the Social Security Act is amended to read as follows:

"EXEMPT AGE FOR DEDUCTIONS FROM BENEFITS ON ACCOUNT OF WORK

"(j)(1) The exempt age at which deductions from benefits on account of work shall cease to be made under this section shall be—

"(A) age 72 for taxable years ending in 1977,

"(B) age 71 for taxable years ending in 1978,

"(C) age 70 for taxable years ending in 1979,

"(D) age 69 for taxable years ending in 1980,

"(E) age 68 for taxable years ending in 1981,

"(F) age 67 for taxable years ending in 1982,

"(G) age 66 for taxable years ending in 1983, and

"(H) age 65 for taxable years ending in 1984 and thereafter.

"(2) For purposes of this section an individual shall be considered to have attained the exempt age during the entire month in which he attains such age.".

(b) Sections 203 (c)(1) and 203 (d)(1) of such Act are each amended by striking out "under the age of seventy-two" and inserting in lieu thereof "under the exempt age (as defined in subsection (j))".

(c) Section 203 (f)(1)(B) of such Act is amended by striking out "was age seventy-two or over" and inserting in lieu thereof "was the exempt age (as defined in subsection (j)) or over".

(d) Section 203 (f)(3) of such Act is amended by striking out "attains age 72" and inserting in lieu thereof "attains the exempt age (as defined in subsection (j))".

(e) Section 203 (h)(1)(A) of such Act is amended by striking out "attained the age of 72" and inserting in lieu thereof "attained the exempt age (as defined in subsection (j))".

SEC. 2. The amendments made by this Act shall be effective on January 1, 1978.

By Mr. BAYH:

S. 1021. A bill to amend the Juvenile Justice and Delinquency Prevention Act of 1974, and for other purposes; to the Committee on the Judiciary.

STABILITY AND REVITALIZATION OF JUVENILE CRIME PROGRAM—GOAL OF BAYH REAUTHORIZATION BILL

Mr. BAYH. Mr. President, today I am introducing the Juvenile Justice Amendments Act of 1977 which is designed to strengthen, implement, and stabilize the congressional commitment of the Juvenile Justice and Delinquency Prevention Act of 1974, which established juvenile crime prevention as the Federal crime priority. The 1974 act was the product of a 4-year effort, which I was privileged to lead, to improve the quality of juvenile justice in the United States and to overhaul the Federal response to juvenile delinquency. The bipartisan nature of its support is reflected by its 1974 cosponsorship in this body—Mr. HRUSKA, Mr. MATHIAS, Mr. COOK, Mr. MCCLELLAN, Mr. FONG, Mr. HART, Mr. HUGH SCOTT, Mr. KENNEDY, Mr. THURMOND, Mr. BURDICK, Mr. GURNEY, Mr. ABOUREZK, Mr. BIBLE, Mr. BROCK, Mr. CASE, Mr. CHURCH, Mr. CLARK, Mr. CRANSTON, Mr. GRAVEL, Mr.

HUMPHREY, Mr. McGee, Mr. Montoya, Mr. Moss, Mr. Pastore, Mr. RANDOLPH, Mr. RIBICOFF, Mr. MONDALE, Mr. CANNON, and Mr. EASTLAND.

I originally introduced this measure as S. 3148 during the 92d Congress when it received strong support from youth-serving organizations and juvenile delinquency experts around the country. I reintroduced S. 821 on February 8, 1973. The Senate Subcommittee To Investigate Juvenile Delinquency of which I am chairman, held extensive hearings that demonstrated the desperate need for this legislation. Expert witnesses, including State and local officials, representatives of private agencies, social workers, sociologists, criminologists, judges, and criminal justice planners testified on the bankruptcy of the current juvenile justice system which provides neither individualized justice nor effective help to juveniles or protection for our communities. In particular, they repeatedly emphasized that large custodial institutions such as reformatories and training schools are nothing more than schools of crime, where juveniles learn the skills of the experienced criminal.

A clear consensus emerged supporting strong incentives for State and local governments to develop community-based programs and services as alternatives to training schools for many youngsters. This consensus was further expressed by the National Advisory Commission on Criminal Justice Standards and Goals, recommendation that no new major institutions for juveniles should be built under any circumstances. The Commission provided additional support for the philosophy of the legislation that many delinquents, but especially noncriminal status offenders and neglected or dependent children, who have previously been institutionalized can be helped successfully in community settings.

State officials testifying before the subcommittee in 1972 stressed the need for effective, coordinated Federal funding to assist the States in carrying out their efforts to treat juveniles in the community. The Governor of Massachusetts, the Honorable Francis Sargent and the Governor of Ohio, the Honorable John Gilligan, were eloquent in describing the urgent need for this legislation. The deputy director of the Kentucky Department of Child Welfare, confirmed the feeling of many State administrators in urging passage of this bill:

> Quite frankly, when I first read the bill and Senator Bayh's comments in the Congressional Record, I wanted to shout "Alleluia," somebody has finally developed a comprehensive piece of legislation that makes sense. It should provide a real opportunity for all of us if we want to be serious about resolving problems facing youthful offenders. I was shocked by the flagrant maltreatment of offenders, by the brutal incarceration of non-criminal runaways and by the bureaucratic ineffectiveness which had marked the grossly inadequate Federal approach to the prevention of delinquency.

These 6 years of hearings and investigations in Washington and throughout the country by my Subcommittee To Investigate Juvenile Delinquency have led me to two important conclusions.

The first is that our present system of juvenile justice is geared primarily to react to youthful offenders rather than to prevent the youthful offense.

Second, the evidence is overwhelming that the system fails at the crucial point when a youngster first gets into trouble. The juvenile who takes a car for a joy ride, or vandalizes school property, or views shoplifting as a lark, is confronted by a system of justice often completely incapable of responding in a constructive manner.

We are all too aware of the limited alternatives available to juvenile court judges when confronted with the decision of what to do with a case involving an initial, relatively minor offense. In many instances the judge has but two choices—send the juvenile back to the environment which helped create the problems in the first place with nothing more than a stern lecture, or incarcerate the juvenile in a system structured for serious, multiple offenders where the youth will invariably emerge only to escalate the level of violations into more serious criminal behavior.

The most eloquent evidence of the scope of the problem is the fact that although youngsters from ages 10 to 17 account for only 16 percent of our population, they, likewise, account for fully 45 percent of all persons arrested for serious crimes. More than 60 percent of all criminal arrests are of people 22 years of age or younger.

The seriousness of the present situation was dramatically underscored in recent testimony submitted at our Subcommittee to Investigate Juvenile Delinquency's inquiry into juvenile delinquency in our elementary and secondary schools. It was estimated at that hearing that vandalism in our schools is costing the American taxpayer over $600 million per year. Moreover, a survey of 757 school districts across the country conducted by the subcommittee staff found that teachers and students are being murdered, assaulted, and robbed in the hallways, playgrounds, and classrooms of American schools at an ever-escalating rate.

These figures are indeed alarming, but what is perhaps more frightening is that the system of juvenile justice which we have devised to meet this problem has not only failed, but has in many instances succeeded only in making first offenders into hardened criminals. Recidivism among youthful offenders under 20 is the highest among all age groups and has been estimated, in testimony before our subcommittee at between 75 and 85 percent.

Yet, you and I are familiar with these miserable statistics. They represent a true picture of our failure to come to grips with crime and delinquency. They represent a failure that can no longer be tolerated.

It is one thing to lament and criticize the failure of our systems of criminal and juvenile justice. But, it is altogether another thing to use the knowledge we have to correct these failures.

I have had the pleasure of working with you to find some solutions to the frequency of delinquency and criminal conduct and recidivism. And one fact is very clear.

Traditional, time worn, antiquated, and unimaginative approaches to the problem of crime and delinquency must be rigorously reexamined and restructured. We do not have to throw out the baby with the bath water while we are cleaning it up. We should build on the past as we look to our future, but, I firmly believe that it is about time that we decide what to hold onto and what to throw away.

While theoreticians, practitioners, correctional authorities, law enforcement officials, rehabilitation specialists, politicians, and others argue about solutions, the intensity of the problems grows, in some communities to epidemic proportions. But, the arguments continue, the beat goes on, and the lives and potential of millions of Americans fall between the cracks of our justice system.

We can trace at least part of this unequal distribution of crime to the idleness of so many of our children.

The rate of unemployment among teenagers is at a record high and among minority teenagers it is an incredible 50 percent. Teenagers are at the bottom rung of the employment ladder, in hard times they are the most expendable.

We are living in a period in which street crime has become a surrogate for employment and vandalism a release from boredom. This is not a city problem or a regional problem. Teenage crime in rural areas has reached scandalous levels. It takes an unusual boy or girl to resist all the temptations of getting into trouble when there is no constructive alternative.

But it is not solely the unemployment of teenagers that has contributed to social turmoil. The unemployment of parents deprives a family not only of income but contributes to serious instability in American households which, in turn has serious implications for the juvenile justice system. Defiance of parental authority, truancy, and the problem of runaways are made materially worse by national economic problems. And it is here that we must confront the dismal fact that almost 40 percent of all the children caught up in the juvenile justice system today fall into the category known as the "status offender"—young people who have not violated the criminal law.

Yet these children—70 percent of them young women—often end up in institutions with both juvenile offenders and hardened adult criminals. In addition, more juveniles adjudicated as status offenders are sent to juvenile institutions than youths convicted of criminal offenses. Twenty-five percent are incarcerated for status offenses; 18 percent for minor offenses and 23 percent for serious crime. Once incarcerated, status offenders spend more time in institutions than their juvenile delinquent counterparts who have been institutionalized for criminal offenses.

James Q. Wilson, the distinguished Harvard criminologist, in his provocative compilation of articles entitled "Thinking About Crime" elaborates persuasively on the policy thrust reflected in the Juvenile Justice and Delinquency Prevention Act when he comments:

> We have a limited (and declining) supply of detention facilities, and many of those that exist are decrepit, unsafe, and over-

crowded. But as important as expanding the supply and improving the decency of the facilities is the need to think seriously about how we wish to allocate those spaces that exist. At present, that allocation is hit or miss. A 1966 survey of over fifteen juvenile correctional institutions revealed that about 30 per cent of the inmates were young persons who had been committed for conduct that would not have been judged criminal were it committed by adults. They were runaways, "stubborn children," or chronic truants—problem children, to be sure, but scarcely major threats to society. Using scarce detention space for them when in Los Angeles over 90 per cent of burglars with a major prior record receive no state prison sentence seems, to put it mildly, anomalous.

Thus, each year scandalous numbers of juveniles are unnecessarily incarcerated in crowded juvenile or adult institutions simply because of the lack of a workable alternative.

The hard facts indicate that juvenile crime has reached crisis proportions. To respond to this crisis with half measures would be worse than doing nothing at all, for it might well give us a false sense of accomplishment. We must face this crisis of delinquency in all its severity, and recognize that our approach must be completely restructured.

A juvenile justice system that resorts to incarceration masquerading as rehabilitation serves only to increase our already critical crime rate by providing new students for what have become institutionalized schools of crime. What is needed is an approach that concentrates on producing productive citizens.

When juvenile crime costs our society billions of dollars each year, such an approach makes good sense not only from a humanitarian point of view, but from an economic point of view as well. So long as we tolerate a system of juvenile justice that turns delinquents, status offenders, and dependent and neglected children into hardened criminals, our crime rate will continue its upward spiral.

The need for alternatives to provide an intermediate step when necessary between essentially ignoring a youth's problems or adopting a course which can only make them worse, was evident.

Some youthful offenders must be removed from their communities for society's sake as well as their own. But the incarceration of youthful offenders should be reserved for those youth, usually the few violent offenders, who cannot be handled by other alternatives.

But today, because the juvenile justice system often fails to differentiate between serious criminal and minor delinquent or noncriminal conduct, many youngsters are wrongly introduced to our penal schools of crime, while others remain free to terrorize our citizens.

Once overloaded as the result of such indiscriminate policies, the juvenile justice system, which is presently under fire for not being able to stem the tidal wave of violent crimes for which only a few predatory law breakers are responsible, is doomed to failure. Each year scandalous numbers of juveniles are unnecessarily incarcerated in crowded juvenile or adult institutions simply because of the lack of a workable alternative. There should be little doubt as to why young people have the highest recidivism rate of any age group. The need for such alternatives to provide an intermediate step between essentially ignoring a youth's problems or adopting a course which can only make them worse, is evident. The tragic impact of these archaic policies is graphically documented in my subcommittee's volume, "The Detention and Jailing of Juveniles."

Our former distinguished colleague, Roman Hruska with whom I worked closely for many years characterized the impact of such "shot gun" or indiscriminate policy when the 1974 Act was introduced in the following way:

. . . in many instances, the criminal justice system is viewed as a catchall for those children too difficult to be dealt with by normal community facilities. Nearly 40 percent—one-half million per year—of the juveniles incarcerated today in institutions, jails, and detention facilities have committed acts which are not classified as crimes when committed by adults. This figure is staggering when viewed with recognition of the detrimental effects that incarceration has been shown to produce with first offenders and juveniles. These children and youth should be channeled to those social service agencies which are more competent to deal with the substantive human and social issues involved in these areas.

Since the traditional juvenile procedures and criminal justice system are ineffective and inappropriate in many instances, there is a strong need to provide a viable diversion mechanism for dealing with these youths. Alternative programs utilizing resources other than the police, courts, and corrections can provide necessary rehabilitation without the harmful stigmatization that sometimes accompanies contact with the criminal juvenile justice system. Efforts must be directed at preventing delinquency but there is an equal need to deliver services and attention in such a way and at such a time as to prevent the development of criminal careers. While involvement with the juvenile justice system is to be minimized, its sanctions are necessary for the control of some juveniles. The quality of this system must be improved so that the youthful offender is helped to become a responsible, law abiding citizen.

He concluded in part by citing the recommendation of the National Advisory Commission on Criminal Justice Standards aind Goals, after its exhaustive study of crime in America, in its report, "A National Strategy To Reduce Crime" that—

The highest attention must be given to preventing juvenile delinquency, to minimizing the involvement of young offenders in the juvenile and criminal justice system and to reintegrating delinquent, and young offenders into the community.

The current overreach of the juvenile justice system and its reliance on detention and incarceration has other shocking ramifications. Senator CLAUDE PEPPER drawing on his decades of commitment to focus Federal dollars on the priority of delinquency prevention and his special experience as the chairman of the House Select Committee on Crime, testified last year before the Judiciary Committee as follows:

For what it costs to keep a youngster in a training school, you can send him to the Phillips Exeter Academy, have him in individual analytical psychotherapy, give him a weekly allowance of between $25 and $50, plus a full clothing allowance. You could send him to Europe in the summer, and when you bring him back, still have a fair amount of money left over.

He continued by emphasizing that—

. . . there is much that remains to be discovered about both the causes and the correction of crime. Like a cancer, its source is not always readily known, but, nevertheless, the symptoms of its existence are highly visible and obviously destructive.

Let me now address myself to something which is known about crime. We do know that juveniles under the age of 18 presently account for 45 percent, or almost one-half, of all serious crime committed in the United States today. Of all serious crimes in the United States, 75 percent, or three-fourths, are committed by youths under the age of 25, and 23 percent of all violent crimes are committed by youths under the age of 18. . . .

Furthermore, 10 years ago President Johnson's Commission on Law Enforcement and the Administration of Justice concluded that "America's best hope for reducing crime is to reduce juvenile delinquency and youth crime." It was true, then, but it is painfully true now.

He concluded his opening remarks on the following note:

With the passage of the Juvenile Justice and Delinquency Prevention Act of 1974, Congress in its findings stated in section 101(b) that:

"The high incidence of delinquency in the United States today results in enormous annual cost and immeasurable loss of human life, personal security, and wasted human resources and that juvenile delinquency constitutes a growing threat to the national welfare requiring immediate and comprehensive action by the Federal government to reduce and prevent delinquency."

I strongly concur with these findings. Quite obviously youth crime poses an ever-increasing threat to the national welfare, and we must visualize juvenile crime prevention as a national priority.

In 1974, we attempted precisely what he recommended. To assist State and local governments, private and public organizations in an effort to fill these critical gaps by providing adequate alternatives, the Congress overwhelmingly approved by overwhelming bipartisan majorities in both the Senate, 88 to 1 and the House of Representatives, 329 to 20, and President Ford signed into law the Juvenile Justice and Delinquency Prevention Act of 1974, Public Law 93–415.

The act was designed to prevent appropriate young people from entering our failing juvenile justice system. It is designed to assist communities in developing more sensible and economic approaches for youngsters already in the juvenile justice system. Its cornerstone is the acknowledgment of the vital role private nonprofit organizations must play in the fight against crime. Involvement of the millions of citizens represented by such groups will help assure that we avoid the wasteful duplication inherent in past Federal crime policy. Under its provisions the Office of Juvenile Justice and Delinquency Prevention of the Department of Justice, must assist those public and private agencies who use prevention methods in dealing with juvenile offenders to help assure that those youth who should be incarcerated are jailed and that the thousands of youth who have committed no criminal act—status offenders, such as runaways—are not jailed, but dealt with

in a healthy and more appropriate manner.

Federal efforts in the past have been inadequate and have not recognized that the best way to combat juvenile delinquency is to prevent it. This legislation is based on the age-old conviction that an ounce of prevention is worth more than a pound of cure. The act represents a Federal commitment to provide leadership, coordination, and a framework for using the Nation's resources to deal with all aspects of the delinquency problem.

To do this:

The act created an Office of Juvenile Justice and Delinquency Prevention in the Law Enforcement Assistance Administration of the Department of Justice to provide leadership and to coordinate all Federal juvenile justice programs which are now scattered throughout the Federal Government. This will be the one place in the Federal Government where citizens or representatives of States, localities, or public or private agencies can go to find answers and solutions to delinquency problems.

It establishes a National Advisory Committee on Juvenile Justice and Delinquency Prevention to advise the LEAA on Federal juvenile delinquency programs and broadens the representation on State and regional LEAA boards. This vehicle will help to assure vital input from knowledgeable and experienced persons regarding delinquency prevention and control policy, including representatives of private agencies.

It provides for block grant to State and local governments and grants to public and private agencies, including courts, of course, to develop juvenile justice programs with special emphasis on the prevention of delinquency, diversion from the juvenile justice system and community-based alternatives to traditional incarceration, all of which are fashioned to stem the high incidence of juvenile crime and recidivism. Similarly, it provides that status offenders shall not be placed in detention or correctional facilities and that juveniles shall not be detained or confined with adults. The purpose is not to provide a Federal solution to juvenile justice problems, but rather to encourage local initiatives and provide some of the resources necessary for local leaders to do the job.

The act assures that fair and equitable arrangements must be made to protect the interests of employees affected by assassistance under its provisions.

It creates a National Institute for Juvenile Justice and Delinquency Prevention to serve as a clearinghouse for delinquency information and to conduct training, research demonstrations, and evaluations of juvenile justice programs. Its clearinghouse will help to proliferate information on successful prevention techniques and programs.

It incorporates the Runaway Youth Act, a proposal of mine, introduced in 1971 and passed by the Senate in 1972 and 1973, which permits local communities to establish temporary shelter care facilities for the estimated 1 million youngsters who run away each year. It is likely that the availability of these alternatives will help to reduce detention facilities' population problems.

It was the product of reconciliation and compromise that is necessary to obtain passage of any significant piece of legislation. The distinguished former Senator from Nebraska (Mr. Hruska), who was the ranking minority member of the Committee on the Judiciary, played an important role in reaching the compromise which is now law. The Senator from Nebraska and I did not agree on all the features of the bills that I had introduced (S. 3148 and S. 821) but I must say that I thought the way that he and I and our collective staffs worked together was as fine an example as I have seen of what can happen when men and women of good faith are determined to use the legislative processes to try to reconcile differences of opinion and yet move toward making juvenile crime prevention a national priority of importance to all of our citizens.

The distinguished Senator from Arkansas (Mr. McClellan) as the ranking member of the Committee on the Judiciary as well as chairman of the Criminal Laws and Procedure Subcommittee and the distinguished Senator from Maryland (Mr. Mathias) as the ranking minority member of our subcommittee, played important roles in the effort which resulted in the enactment of this landmark legislation.

What we said was that juvenile crime is a critical national problem. Everybody is against it, nobody is for it, but we have not been able effectively to bring adequate forces of Government and human concern to bear on this problem. Juvenile crime continues to escalate. No one has a magic formula for solving the problem of juvenile crime and delinquency. No one can pass a bill or make a speech and make crime disappear. But it was rather obvious that what we had been doing had failed and, hopefully, the new focus mandated in 1974 would be helpful in alleviating some of the problems. I think it is essential that we recognize past mistakes and avoid them.

One basic mistake in this area was the total lack of proper coordination and management. We found that there were several dozen separate and independent Federal agencies and bureaus supposedly dealing with the problems of young people in trouble and juvenile crime. If a sheriff or chief of police or mayor or youth services director sought help from a Congressperson's or Senator's office as to where they could go for assistance to fight juvenile crime in their communities, they needed a road map of the Washington bureaucracy. Thus, the new Office was established to help cut the bureaucratic redtape that, in the past, strangled local community initiatives to prevent delinquency and juvenile crime.

Mr. President, our former distinguished colleague Senator Hruska addressed this very concern when the 1974 bill was introduced by stressing the telltale duplication of earlier Federal delinquency efforts when he said:

> . . . this legislation addresses one of the most pressing national problems of today—juvenile crime. In my view, the Federal Government must make a substantial effort to help prevent and control juvenile delinquency and to offer treatment alternatives to the traditional juvenile justice system.
>
> To date, Federal leadership and coordination have been lacking with various Federal delinquency programs spread among many agencies. The result has been overlapping and duplication. Viewing the juvenile justice system as an entity, the appropriate Federal role must be to provide a comprehensive and coordinated approach to solving this serious problem.

One of the major steps taken in the Juvenile Justice Act was to establish one place in the Federal Government to meet these needs. We established a separate assistant administrator position in LEAA and, for the first time, placed authority in this one Office for mobilizing the forces of Government to develop a new juvenile crime prevention program and to coordinate all other Federal juvenile crime efforts. That responsibility now rests in one clearly identified office, headed by a Presidential appointment, with advice and consent of this body.

In the management area, we made progress by eliminating wasteful duplication and directing that all Federal resources be harnessed to deal more effectively with juvenile crime. We provided that no Federal programs undermine or complete with the efforts of private agencies helping youths in trouble and their families.

An essential aspect of the 1974 act was the "maintenance of effort" provision—section 261(b) and section 544. It requires LEAA to continue at least the fiscal year 1972 level—$112 million—of support for a wide range of juvenile programs. This provision assured that the 1974 act's primary aim, to focus the new Office efforts on prevention, would not be the victim of a "shell game" whereby LEAA merely shifted traditional juvenile programs to the new Office. Thus, it guaranteed that juvenile crime prevention was the priority.

The subcommittee had worked for years to persuade LEAA to make an effort in the delinquency field commensurate with the fact that youths under the age of 20 are responsible for half the crime in this country. In fiscal year 1970, LEAA spent an unimpressive 12 percent; in fiscal year 1971, 14 percent; and in fiscal year 1972, 20 percent of its funds in this vital area. In 1973 the Senate approved the Bayh-Cook amendment to the LEAA extension bill which required LEAA to allocate 30 percent of its dollars to juvenile crime prevention. Some who had not objected to its Senate passage opposed it in the House-Senate Conference where it was deleted.

Fiscal year 1972 was selected only because it was the most recent year for which current and reportedly accurate data were available. Witnesses from LEAA represented to the Subcommittee to Investigate Juvenile Delinquency in June 1973 that nearly $140 million had been awarded by the agency during that year obstensibly to programs for the improvement of the traditional juvenile justice system. It was these provisions when coupled with the new prevention thrust of the substantive program authorized by the 1974 act, which represented a commitment by the Congress to make the prevention of juvenile crime a national priority—not one of several competing programs administered by LEAA, but the national crime-fighting priority.

Unfortunately, in its zealousness to defeat both the 1973 Bayh-Cook-Mathias amendment for the improvement of the juvenile justice system and the bill which eventually became the 1974 act, the administration and its representatives grossly misrepresented their efforts in this area.

In hearings before my subcommittee last year, OMB Deputy Director Paul O'Neill, and other representatives of the administration finally admitted that the actual expenditure for fiscal year 1972 was $111,851,054 or $28 million less than we had contemplated would be required to be spent each year under the maintenance of effort provision of the 1974 act.

The legislative history of the Juvenile Justice Act is replete with reference to the significance of this provision. The Judiciary Committee report, the explanations of the bill, both when introduced and debated by myself and Senator Hruska, as well as our joint explanations to this body of the action taken by the Senate-House conference on the measure each cite the $140 million figure and stress the requirement of this expenditure as integral to the impact contemplated by Congress through the passage of the Juvenile Justice and Delinquency Prevention Act of 1974.

Thus, the passage of the 1974 act, which was opposed by the Nixon-Ford administrations—LEAA, HEW, and OMB—was truly a turning point in Federal crime prevention policy. It was unmistakably clear that we had finally responded to the reality that juveniles commit more than half the serious crime.

Once law, the Ford administration, as if on cue from its predecessor, steadfastly opposed appropriations for the act and hampered the implementation of its provisions.

Despite continued stifled Ford administration opposition to this congressional crime prevention program, $25 million was obtained in the fiscal year 1975 supplemental. The act authorized $125 million for fiscal year 1976; the President requested zero funding; the Senate appropriated $75 million; and the Congress approved $40 million. In January, President Ford proposed to defer $15 million from fiscal year 1976 to fiscal year 1977 and requested a paltry $10 million of the $150 million authorized for fiscal year 1977, or a $30 million reduction from fiscal year 1976. On March 4, 1976, the House, on a voice vote, rejected the Ford deferral and the Congress provided $75 million for the new prevention program.

Mr. President, when we had obtained, over strong administration opposition, 50 percent of the funding Congress authorized for the new prevention program under the 1974 act, the administration renewed its efforts to prevent its full implementation. In fact, the Ford Crime Control Act of 1976, S. 2212, would have repealed the vital maintenance of effort provision of the 1974 act.

It is interesting to note that the primary reason stated for the Ford administration's opposition to funding of the 1974 act prevention program was the availability of the very "maintenance of effort" provision which the administration sought to repeal in their original version of S. 2212.

Mr. President, the same forked-tongue approach was articulated by Deputy Attorney General Harold Tyler before the Senate Appropriations Subcommittee. He again cited the availability of the maintenance of effort requirement in urging the Appropriations Committee to reduce by 75 percent, to $10 million, current funding for the new prevention program or in other words, kill it.

The Ford administration was unable to persuade the Judiciary Committee to fully repeal this key section of the 1974 act, but they were able to persuade a close majority to accept a substitute percentage formula for the present law, the effect of which would substantially reduce the total Federal effort for juvenile crime prevention. But, what President Ford sought and what his supporters diligently pursued was the full emasculation of the program. This intent was clearly evidenced in the original version of S. 2212 and even more importantly in the Ford proposal to extend the 1974 act, for 1 year, which was submitted to Congress on May 15, after the compromise version was reported from the Judiciary Committee. This new Ford proposal again incorporates sections repealing the key maintenance of effort provision. My subcommittee heard testimony on this measure on May 20 and it was clear to me that rather than an extension bill, it is an extinction bill.

It was this type of doubletalk for the better part of a decade which was in part responsible for the annual recordbreaking double-digit escalation of serious crime in this country.

The President repeatedly opposed its implementation and funding and worked first to repeal its significant provisions and to dilute this bipartisan crime program. This dismal record of performance is graphically documented in the subcommittee's two-volume chronicle entitled "Ford Administration Stifles Juvenile Justice Program."

The failure of President Ford, like his predecessor, to deal with juvenile crime and his insistent stifling of an act designed to curb this escalating phenomenon was the Achilles' heel of the administration's approach to crime.

Last summer the Congress rejected, this body by a vote of 61 to 27, the Ford—OMB–LEAA—proposal and a compromise proposal designed to repeal or dilute the key maintenance of effort sections of the 1974 act. Instead the Congress voted overwhelmingly to reaffirm our bipartisan congressional commitment to retaining juvenile crime prevention as the Federal crime priority. I was especially pleased by the dedicated effort of our distinguished subcommittee ranking minority member, Senator MATHIAS, who during the floor debate persuasively supported the amendment, in part, by drawing on the hearings he conducted regarding the need to implement the act in Maryland, and the advocacy of Senator MCCLELLAN of the Senate position as well as our other colleagues, including Senators Hruska and KENNEDY, who collectively labored along with Chairman RODINO and the House conferees. Not only was the concerted effort to modify the maintenance level rejected, but in fact, even with a declining LEAA budget, namely, from $895 million in fiscal year 1975 to $753 million in fiscal year 1977, the Congress increased the level for juvenile crime by $17 million—2 percent of the total fiscal year 1977 budget for LEAA over the original level of $111 million.

Coincidentally, the current level of maintenance of effort for juvenile justice is nearly identical with that set by the 1973 Bayh-Mathias-Cook amendment to the LEAA extension bill, supported by this body without objection, which would have required that 30 percent of LEAA part C and E funds be allocated for improvement of the juvenile justice system.

I was proud that my colleagues in the Congress saw through the inconsistent obstructive rhetoric and strategy of the Ford administration on juvenile crime. Yet Mr. President, if I were not a realist, I would be ashamed to invest only 20 percent of the LEAA Crime Control Act dollars in this area when we know nearly 50 percent of serious crimes are attributable to young people. Last year, however, with strident White House, OMB, and departmental opposition, the best we were able to require was that each LEAA Crime Control Act budget allocate at least one-fifth of its appropriation for juvenile crime prevention programs.

Likewise, I am proud that this bipartisan congressional initiative was strongly endorsed in my party's national platform in the following unequivocable manner:

> A Democratic Congress in 1974 passed the Juvenile Justice and Delinquency Prevention Act to come to grips with the fact that juveniles account for almost half of the serious crimes in the United States, and to remedy the fact that federal programs thus far have not met the crisis of juvenile delinquency. We pledge funding and implementation of this Act, which has been ignored by the Republican Administration.

The measure I introduce today is designed to carry on our congressional commitment and to fulfill my party's commitment to the program by providing the continuity and strengthened features so vital to the full implementation of the Juvenile Justice and Delinquency Prevention Act of 1974.

Never have we had a more opportune setting to fulfill these commitments.

I was especially heartened and gratified by President Carter's February 22, 1977, message to the Congress on the revisions to the fiscal year 1978 budget. The President noted that there were important goals that the revision did not reflect and then, relative to the changes made to date, Jimmy Carter said:

> The 1978 budget is essentially still President Ford's budget, with only such limited revisions as my administration has had time to make. But these revisions do reflect our careful choices among many possible options; they are important first steps toward a Federal Government that is more effective and responsive to our people's needs.

Among those "careful choices" and "important first steps—more responsive to our people's needs" is the first clear presidential endorsement of the Juvenile Justice and Delinquency Prevention Act of 1974.

Mr. President, the Carter administration has requested "additional funds for juvenile justice and delinquency prevention programs that have a high potential

for reducing crime and delinquency" specifically the requested amount for fiscal year 1978 restores the 1977 level of $75 million.

Although I am very pleased by this particular change in White House policy I was not surprised. When Candidate Jimmy Carter was asked last October by the American Bar Association whether he favored an increased share of LEAA and other Federal funds for juvenile justice and delinquency prevention he responded in the affirmative and added:

> Both the commentators and the statistical evidence now point to the fact that court reform, corrections, and juvenile justice are the critical elements in improving crime control.

For one who has struggled to establish such Federal priorities these words and the budget revisions reflecting a commitment to them are indeed sweet music.

Similarly, Attorney General Griffin Bell made a strong commitment to such priorities and to the full implementation of the Juvenile Justice and Delinquency Prevention Act during the Senate Judiciary Committee's confirmation hearings. In response to my inquiries as to whether, if confirmed as Attorney General, he would provide juvenile justice and juvenile crime prevention the priority it deserves and that the 1974 law and the 1976 amendment require, Judge Griffin Bell said that he would and then continued by noting:

> If we are going to do anything about crime in America, we have to start with the juvenile.

He also added the following observation:

> I have never known that our country on a national level had a criminal justice policy. I plan to establish one. If you do have a criminal justice policy, the most important part of it would be juvenile justice—how to prevent juvenile crime—I have a deep interest in that.

The measure that I introduce today will extend and strengthen the Office of Juvenile Justice. It will strengthen and revitalize the program designed to accomplish the very priority on juvenile justice and juvenile crime prevention underscored by President Jimmy Carter and Attorney General Griffin Bell.

PART A: THE OFFICE OF JUVENILE JUSTICE AND DELINQUENCY PREVENTION

The amendments in my bill relating to the role of the Office and its executive head, the Assistant Administrator, are designed to assure that the promise of the 1974 act is fulfilled, that its mandated provisions are effectively implemented and administered. We intended in 1974 that LEAA administer this program through the new office and that its head be delegated all the administrative, managerial, operational, and policy responsibilities relative to all LEAA delinquent programs. We intended that as chief executive officer that the Office head appoint or select the deputies in the Office and other staff. These objectives are facilitated and reaffirmed. These particular amendments have been strongly endorsed by the Presidential Advisory Committee for Juvenile Justice and its Chairman, Mr. J. D. Anderson. Additionally, another deputy position is provided and additional positions are authorized to permit the Office to obtain at least the 51 positions approved for it by the Appropriations Committee for fiscal year 1976.

Consistent with the Ford administration opposition to its passage and funding of the program the LEAA Administrator did not delegate the authority necessary for the Assistant Administrator to fully implement the program. Additionally, this situation was exacerbated by the designation of the Office head as Assistant Administrator. Other Assistant Administrators within LEAA have less authority and are subjected to more levels of review than the Congress had contemplated for the head of the office responsible for all the delinquency programs. It was for this reason that the rank of Assistant Administrator was combined with the status of a Presidential appointment and senatorial approval in order to underscore the importance of the office and to provide the appropriate status and identity required for the national focus on delinquency prevention and the authority and necessary clout to carry out the act's mandates, unfettered by intermediate review or ratification. My bill ameliorates these problems, most of which would not have developed had the administration supported the full implementation contemplated by Congress and now supported by the Carter administration.

The implementation, in part, has been conducted as a mere extension of the crime control and safe streets program—rather than with appropriate rules, guidelines and regulation for the distinct purposes and objectives of this very different act. Rather than a fresh assessment and expected response to Congress' new direction, LEAA inappropriately adopted crime control procedures, policies, and regulations to the new act rather than provide the new focus and identity for the office warranted.

Furthermore, regarding important aspects of the 1974 act the office and its Assistant Administrator, and I believe it is important to stress—who is one of four LEAA officials appointed by the President with the advice and consent of this body—were relegated only marginal or indirect responsibilities. These areas include the responsiiblity relative to the membership of State planning agencies boards and the regional units; the expenditures under the maintenance of effort provisions; the compliance with section 223(a)(12)(13) and (14); the allocation of funds redirected to special emphasis; the eligibility for continuous funding under section 228(a); and the administration and policy direction of all LEAA programs concerned with juvenile delinquency. My bill reaffirms and facilitates the direct role contemplated for the office in these matters and includes a provision to encourage a closer liaison with regional juvenile justice staff.

It is unlikely that the cavalier and frequently obstructive actions pursued under the former administration—for example, the insistence on hard match in spite of clear statutory language indicating a preference for in-kind match or the aggregation of the maintenance of effort requirement rather than the State-by-State and category or program focus required by the act—will characterize the performance of those in the decision-making process that now affect the Office. However, a reiteration of the act's mandates and reaffirmation of the role contemplated for the Office, as provided in my bill, will assist all involved as we put past conflicts behind us and actually implement the act.

My amendments repeal unnecessary reporting requirements, combine others, and require all reports to be concise. It is expected that the report required under section 204(b) will focus more specifically on Federal delinquency dollars than the total Federal youth dollars.

The National Advisory Committee is strengthened by my bill in several respects, including a requirement that several Members have actual experience within the juvenile system. Further, this citizens' committee is authorized to assist State advisory groups and other citizen groups, including the private sector, to become more involved with the juvenile system in each of the States. Thus, my bill expands the cornerstone of the 1974 act which is the integral role of nonprofit agencies and essential citizen involvement and participation in this landmark Federal program. This objective is assisted by providing 1 percent of the appropriation for such purposes.

PART B: FEDERAL ASSISTANCE FOR STATE AND LOCAL PROGRAMS. I—FORMULA GRANTS

The formula grant program is improved by eliminating the burdensome recordskeeping associated with in-kind match for nonprofit groups. My bill provides a waiver of match for these groups. Such a provision was in the Senate passed version of the 1974 act. The approach should eliminate any of the past pressures that eroded, by regulatory sleight of hand, the clear preference for in-kind match under these circumstances. Other important provisions of my bill strengthen the State advisory groups by requiring their involvement in policy formulation and the implementation of the act in their own States, by expanding their membership, especially to include the private sector, and by assuring that they keep legislatures informed regarding activities relevant to the act in their State.

Other clarifying changes are made in the formula grant program. Advance technique programs would include programs designed to assure that youths and their families are provided all available services to which they are entitled. The requirement that status offenders be deinstitutionalized within 2 years is clarified with regard to the permissive, rather than mandatory, placement of such offenders and nonoffenders in shelter facilities. It is provided that States' eligibility for delinquency shall only be terminated if compliance is not forthcoming within a reasonable period of time and that funding for an additional 3 years is possible for those States which have achieved substantial compliance. Lastly, a preference is States for the allocation of unused

formula grant funds for special emphasis grants in the State.

SUBPART II: SPECIAL EMPHASIS PROGRAMS

My bill provides that special emphasis school programs will be more closely coordinated with the Office of Education. New categories of youth advocacy, due process and programs to encourage the development of neighborhood courts are emphasized in order to focus upon means of bringing related improvements to the juvenile justice system. These additional sections will help provide what Attorney General Bell has characterized as the need for "fresh emphasis on alternatives to resolution of conflicts in the traditional court settings." Through the encouragement of arbitration, mediation, conciliation by the use of paralegals, ombudspersons, advocates, community participants, and others, while assisting victims, we can encourage the development of more rational and economical responses to minor delinquent conduct. Additionally, there is clarification of the authority of the Office to direct, operate and manage these programs.

Furthermore, authorization is provided to permit up to 100 percent of a State's formula grant funds to be utilized as match for other Federal juvenile delinquency program grants. This will increase flexibility and permit maximum use of these funds in States which have been unable to fully utilize available Federal fund sources. Authority is further provided to waive match for Indian tribes and other aboriginal groups where match funds are not available and to waive State liability where a State lacks jurisdiction to enforce grant agreements with Indian tribes.

THE INSTITUTE: PART C

My bill clarifies the authority of the institute to provide for the preparation of studies in areas which the subcommittee has found to be of national significance and lacking in comprehensive understanding, reaffirms the role of the Office relative to that of the institute as well as the importance of the development of adoptable juvenile justice standards.

TITLE III: THE RUNAWAY YOUTH ACT

This program is amended to provide closer coordination with the Office and to clarify programmatic focus on homeless youth, many of whom had either no home from which to run or the few who are so abused or neglected that leaving was a rational alternative. Additionally, my bill provides renewed focus on the funding of local programs, the need for short-term training and a slight increase, reflective of increased expenses, in the maximum size of grants.

AUTHORIZATION AND FUNDING

My bill authorizes $1 billion for Juvenile Justice Act programs through 1982. Although the amounts authorized are very modest relative to the task of each of the participating States, such additional resources provided in a stable continuous fashion will do wonders to achieve the mandate of the 1974 act. The Ford effort to stifle the program's development and its attendant lack of continuity dissuaded many States from enthusiastically participating in the effort and, in fact, was the basis for the decision of several States to avoid the program entirely. The Ford-OMB 1-year bill which was the subject of our subcommittee hearings last May was almost the final blow. It was, in fact, an extinction bill. LEAA program managers supported a 4-year extension. There is no need for more model programs or further studies. There is an overriding need, however, for a lasting Federal commitment to provide the leadership, knowledge, and resources necessary for a desperately and long overdue fully operational program. I am confident that the Carter administration will support us in this vital commitment.

The dedicated staff of the office and the States participating in the program have worked in a diligent manner, under difficult circumstances these past several years. It is the objective of the bill I introduce today to ease their collective burdens and to facilitate the partnership of public and private interest contemplated by the 1974 act. In the main these amendments are perfecting, technical, or reaffirming existing provisions. Others, including the National Association of Counties, strong supporters of the Act, have made suggestions for additional changes including a special program for probation subsidy and a national conference on learning disabilities. Perhaps the hearings will provide further basis to support these changes this year. Yet, especially in view of the delay in scheduling associated with Senate Resolution 4 and the Budget Act requirement that the Judiciary Committee must report a reauthorization bill, by May 15, I have cautiously limited substantive alterations.

Additionally, my proposal to establish an Office of Children's Justice, within the Department of Justice, will be introduced later this year and will be the subject of hearings either this summer or next fall after the subject of today's legislation is reauthorized.

The overloaded juvenile justice system is under fire for not stemming the tide of youthful criminal violence. We are, however, often and understandably blinded by the lurid publicity given a relative small handful of violent juveniles and we lose sight of the fact that the net of the juvenile system is very wide; that many noncriminal acts and minor delinquencies subject youth to unwarranted and unjust detention and incarceration, grossly disproportionate to the harm, if any, done by the behavior involved. Our collective errors in this regard are compounded by the fact that these indiscriminate incarceration policies which overloaded the juvenile correctional system permit the punishment of ever fewer serious violent youthful offenders.

When we discuss juvenile crime we should address the policies of a State and its respective communities rather than focusing solely on the individual juveniles and the case-by-case emphasis on the needs of individuals which often permits those intimately involved with the implementation of policy to overlook the cumulative impact of their practices.

The Juvenile Justice Act has been a catalyst which has spawned this type of healthy assessment and programmatic development in our States and local communities. Additionally, its mandates regarding the incarceration of noncriminal youth have stimulated the development of State criteria or standards as to whether to impose a term of incarceration on a child and has helped to revitalize the element of certainty of punishment for serious offenders which, when the message of the juvenile system is garbled, as is often the case, has been lost.

Thus, the type of long overdue sentencing reform envisioned by Senator KENNEDY'S S. 181 proposal, which I cosponsored, is being generated by the implementation of the act within the juvenile justice system. Similarly, the development of model standards by the institute will assist the States in their struggle to deliver justice to our citizens.

The act is not a panacea, in fact, there are no Federal answers to the problems of juvenile crime and delinquency, but as Attorney General Bell stated, in his address before the Mexican-American Legal Defense and Education Fund:

> The Department must be the catalyst for development of a national policy on the delivery of justice. We must be the national leader.

I am proud of the leadership provided by this program and of the strong bipartisan support of my colleagues and of their dedication to the conviction that juvenile crime prevention must be the priority of the Federal crime program. The GAO has identified the Juvenile Justice Act as the most cost effective crime prevention program. It is supported by a myriad of groups interested in both the safety of our citizens and the quality of juvenile justice in the Nation.

Our former distinguished colleague and comanager of the 1974 act, Senator Hruska aptly hit the nail on the head when in urging its passage he told us:

> This bill represents a culmination of years of hard work and the expertise and dedication of a great many individuals. The importance of this piece of legislation cannot be overstated. While we in government are attempting to achieve a balanced budget, certain crisis problems such as juvenile delinquency demand an immediate mobilization of Federal resources. The crisis of juvenile delinqency must be met.

I urge my colleagues to support this extension and I look forward to working with you and those in the House of Representatives. This measure will provide the stability so vital to the continuation of this congressional initiative. The 5-year extension, with the adequate funding provided, when coupled with the full implementation of the provisions of the 1974 act will help assure that we have begun to address crime's cornerstone in this country—juvenile crime and violence.

Mr. President, I ask unanimous consent that the bill and accompanying explanatory materials be printed, along with a partial list of those who support the program, at this point in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1021

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Juvenile Justice Amendments of 1977".

SEC. 2. Title II, Part A of the Juvenile Justice and Delinquency Prevention Act of 1974 is amended as follows:

(1) Section 201(a) is amended by inserting the following sentence, "The Administrator shall administer the provisions of this Act through the Office." at the end thereof and Section 201(b) is amended to read as follows:

"(b) The programs authorized pursuant to this Act and those affected by § 527 of the Omnibus Crime Control and Safe Streets Act of 1968 shall be administered by the Office."

(2) Section 201(d) is amended to read as follows:

"(d) The Assistant Administrator shall be the chief executive of the Office and shall exercise all necessary powers, subject to the general policy direction of the Law Enforcement Assistance Administration. The Assistant Administrator shall report directly to the Administrator."

(3) Section 201 is amended by redesignating subsection (g) as subsection (h) and by inserting immediately after subsection (f) the following new Subsection:

"(g) There shall be in the Office a Deputy Assistant Administrator who shall be appointed by the Assistant Administrator whose function shall be to supervise and direct Part B program operations under this Title.".

(4) Redesignated Section 201(h) is amended by deleting the word "first" and inserting the word "second" in lieu thereof and by deleting the word "twenty-five" and inserting the word "twenty-six" in lieu thereof.

(5) Immediately after redesignated Section 201(h) insert the following new subsections:

"(i) To assure that the delegation of authority to the Assistant Administrator mandated by this Act, including Section 545, is accomplished, Sections 201 (e) and (f), 202 (a) and (d), 204 (b)(d)(e) and (l)(1) (second appearance), 208(b)(c) and (e), 223 (a) (5) (14) (20) and (21), 224, 225 (except (c)(3)), 243(4), 246, 249, 250 and 251 are amended by inserting the word "Assistant" prior to the word "Administrator" wherever it appears.

"(j) Section 5315 of Title 5, United States Code, is amended by adding at the end thereof the following:

"(105) Assistant Administrator, Office of Juvenile Justice and Delinquency Prevention, of the Law Enforcement Assistance Administration.".

(6) Section 202(a) is amended by inserting after the second word "functions" the words "including such fiscal control and fund accounting procedures as may be necessary to assure prudent use, proper disbursement, and accurate accounting of funds within the responsibility of the Office."

(7) Section 202(b) is amended by deleting the words "The Administrator" through the words "fix their" and inserting in lieu thereof the following words "No more than ten of such officers selected, appointed and employed pursuant to Section 202(a) shall receive" and by deleting the word "not", and (c) is amended by inserting the words "with his concurrence and approval" immediately after the words "Assistant Administrator".

(9) Section 202 is further amended by inserting after subsection (d) the following subsections:

"(e) The Administrator of the LEAA shall place at the disposal of the Office of Juvenile Justice and Delinquency Prevention, all of the available resources of the Administration that are necessary for the Office of Juvenile Justice and Delinquency Prevention to perform the duties enumerated in this Act.

"(f) The Assistant Administrator is granted the authority to allocate funds, issue appropriate directives; administer, modify, extend, terminate, monitor and evaluate all juvenile delinquency grants including authority to reject or deny grant applications submitted to the Administration but not to the Office.".

(10) Section 204(a) is amended by inserting after the word "priorities" the words ", consistent with Section 545,".

(11) Section 204(b) is amended by redesignating paragraph (7) as paragraph "(6)" and by deleting paragraphs (5) and (6) and substituting in lieu thereof the following paragraph:

"(5) develop annually with the assistance of the Advisory Committee and submit to the President and the Congress, after the first year the legislation is enacted, prior to December 31, a concise analysis and evaluation of Federal juvenile delinquency programs conducted and assisted by Federal departments and agencies, the expenditures made, the results achieved, the plans developed, and problems in the operations and coordination of such programs and a brief but precise comprehensive plan for Federal juvenile delinquency programs, with particular emphasis on the prevention of juvenile delinquency and the development of programs and services which will encourage increased diversion of juveniles from the traditional juvenile justice system. The report shall include recommendations for modifications in organization, management, personnel, standards, budget requests, and implementation plans necessary to increase the effectiveness of these programs and a status report on the degree of compliance with Sections 223(a) (12), (13) and (14), 261(b), 542, 544 and 545; and".

(12) Section 204(e) is amended by deleting the words "(6)" and inserting in lieu thereof the word "(5)".

(13) Section 204(g) is amended by deleting the word "part" and inserting the word "title" in lieu thereof, and by deleting all words after the words "this part" and before the words "to any officer".

(14) Section 204(j) is amended by inserting after the word "agency," the word "organization,".

(15) Section 204(k) is amended by deleting the words "the Juvenile Delinquency Prevention Act (42 U.S.C. 3801 et seq.)" and inserting the words "Title III of this Act" in lieu thereof and Section 205 is amended by inserting after the word "advanced" the following words "whenever the Assistant Administrator finds the program or activity to be exceptionally effective or for which the Assistant Administrator finds there exists exceptional needs".

(16) Section 206(a)(1) is amended by inserting after the word "Labor" and before the words "the Secretary of Housing" the following words:

"the Director of the Office of Drug Abuse Policy, the Director of the Office of Management and Budget, the Commissioner of the Office of Education,".

(17) Section 206(c) is amended by inserting the word "concise" immediately after the words "shall make".

(18) Section 206(d) is amended by deleting the word "six" and inserting the word "four" in lieu thereof.

(19) Section 206(e) is amended by deleting all of (1) and (2) and by striking the words "(3) the Executive Secretary" and inserting the words "The Assistant Administrator" and by inserting the words "or staff support" after the word "personnel".

(20) Section 207(c) is amended by inserting after the words "community-based programs" the words "including youth workers involved with alternative youth programs".

(21) Section 207(c) is further amended by deleting all following the word "twenty" and substituting in lieu thereof the following words:

"-two years of age on the date of the appointment of whom at least three shall have been under the jurisdiction of the juvenile justice system.".

(22) Section 207(d) is amended by inserting at the end thereof the following new sentence: "Eleven members of the Committee shall constitute a quorum, but a lesser number may conduct hearings.".

(23) Section 208(c) is amended by inserting the word "concise" before the word "recommendations" and by inserting after the word "Administrator" the words "Congress and President".

(24) Section 208(c) is amended to read as follows:

"(c) The Chairman shall designate a subcommittee of members of the Advisory Committee to advise the Assistant Administrator on particular functions or aspects of the work of the Office, including those mandated by Sections 261(h), 542 and 545.".

(25) Section 208(d) is amended by inserting after the words "subcommittee of" and before the word "five" the words "no less than" and by deleting the words after the word "serve" and before the words "as members".

(26) Section 208(e) is amended by inserting after the words "subcommittee of" and before the word "five" the words "no less than;" and by deleting the words "to the Administrator.".

(27) Section 208(f) is amended to read as follows:

"The Chairman, with the approval of the Committee, shall request of the Assistant Administrator such staff and other support as may be necessary to carry out the duties of the Advisory Committee.".

(28) Section 208 is amended by inserting the following new subsections after the subsection (f):

"(g) In addition to other powers express and implied the Advisory Committee shall have authority—

"(1) to devise and conduct, in various geographical locations, meetings, seminars, workshops, conferences and training programs (including the use of technical teams to aid in the development of same) to assist the advisory groups established pursuant to section 223(a)(3) or comparable public or private citizen groups in non-participating states in the accomplishment of their objectives, including efforts to assure compliance with Sections 223(a)(12)(13) and (14), 261(b), 542, 544 and 545; and

"(2) to make grants and enter into contracts with public or private agencies, organizations, or individuals, for the performance of any of the functions of the Advisory Committee.

"(h) Not less than one per centum of the funds appropriated annually for the purposes of the Act pursuant to Section 261(a) shall be used for the purposes of the Advisory Committee. The Assistant Administrator shall provide with these funds such staff and other support as may be necessary to perform the duties of the Advisory Committee.".

PART B—FEDERAL ASSISTANCE FOR STATE AND LOCAL PROGRAMS

SEC. 3. Title II, Part B of such Act is amended as follows:

(1) Section 221 is amended by inserting the words "the concurrence of the Assistant Administrator" immediately after the word "Administrator" and by inserting after the word "through" the words "grants and".

(2) The third sentence of Section 222(c) is amended by deleting the words "local governments" and inserting the words "units of general local government or combinations thereof" in lieu thereof.

(3) Section 222(d) is amended by deleting the words "not exceed" and inserting the word "be" in lieu thereof and by adding the following sentence at the end thereof: "The Assistant Administrator shall waive this requirement in the case of private nonprofit organizations.".

(4) Section 222 is amended by inserting the following new subsection at the end thereof:

"(e) In accordance with regulations promulgated under this part, a portion of an allotment to any State under this part shall be available to assist the advisory groups. At least 10 per centum of the minimum annual allotment of such State shall be available for such purposes.".

(5) Section 223(a)(3) is amended by deleting all words before "(A)" and inserting in lieu thereof the following: "provide for an advisory group appointed by the chief executive of the State to participate in the development and review of the plan prior to submission to the supervisory board for final action and to participate in the supervision of juvenile delinquency programs funded by the Administration in the State,"

(6) Section 223(a)(3)(C) is amended by inserting after the words "treatment programs" the words ", business groups and businesses employing youth,".

(7) Section 223(a)(3)(E) is amended by striking all after the word "twenty" and adding the words "two years of age on the date of appointment of whom at least three shall have been under the jurisdiction of the juvenile justice system.".

(8) Section 223(a)(3) is amended by inserting the following at the end thereof:

"(F) The advisory group shall advise the State planning agency and its supervisory board, the Governor and the Legislature and shall assist in the activities mandated by paragraph (14) in this Section and by Sections 261(b), 542, 544 and 545. To fulfill these responsibilities the advisory group shall have authority to make grants and enter into contracts with public or private agencies, organizations or individuals.".

(9) Section 223(a)(4) is amended by deleting the words "local governments" the first time they occur and inserting the words "units of general local government or combinations thereof" in lieu thereof and by adding the following at the end thereof: "Provided that nothing in the plan or regulation promulgated thereunder shall be construed as to prohibit or impede the state government for making contracts with or grants to local private agencies or the advistory group.".

(10) Section 223(a)(5) is amended by inserting after the words "local government" the words "or combinations thereof and/or in conjunction with local private agencies or the advisory group.".

(11) Section 223(a)(5) is further amended by deleting all words after the words "for delinquent" and inserting the following words "or other youth are organized primarily on a statewide basis or if the Administrator determines that it will contribute to the purposes of this part.".

(12) Section 223(a)(6) is amended by deleting the words "local government" and inserting the words "unit of general local government" in lieu thereof.

(13) Section 223(a)(6) is further amended by inserting after the words "local government's structure" and before the words "(hereinafter in this part" the words "or to a regional planning agency".

(14) The first sentence of Section 223(a)(10) is amended by inserting after the words "or through" the words "grants and".

(15) The first sentence of Section 223(a)(10) is further amended by inserting the words "and to encourage a diversity of alternatives within the juvenile justice system" after the words "correctional facilities".

(16) Section 223(a)(10)(A) is amended by inserting after the words "health services" the words "twenty-four hour in-take screening, volunteer and crisis home programs, day treatment, home probation,".

(17) Section 223(a)(10) is further amended by deleting all of subparagraph (D) and inserting in lieu thereof the following:

"(D) projects designed to develop and implement programs stressing advocacy activities aimed at improving services for and protecting the rights of youth impacted by the juvenile justice system;".

(18) Section 223(a)(10)(G) is amended by inserting before the word "assistance" but after the word "by" the words "traditional youth".

(19) Section 223(a)(10)(H) is amended by deleting all after the word "that" but before the words "(i) reduce" and insert in lieu thereof the words "are designed to".

(20) Section 223(a)(12) is amended by inserting the words "or such nonoffenders as dependent or neglected children" immediately after the word "adult".

(21) Section 223(a)(12) is further amended by deleting the word "must" and inserting the word "may" in lieu thereof.

(22) Section 223(a)(13) is amended by inserting the words "and youths within the purview of 223(a)(12)" immediately after the word "delinquent".

(23) Section 223(a)(14) is amended by deleting the word "and" before the word "correctional" and by inserting the words "and nonsecure facilities" after the second word "facilities" and before the words "to insure".

(24) Section 223(a)(15) is amended by deleting the word "all".

(25) Section 223(a)(19) is amended by deleting the words ", to the extent feasible and practical,".

(26) Section 223(b) is amended by deleting the word "consultation" and by inserting the words "receiving the directives and recommendations of" in lieu thereof.

(27) Section 223(c) is amended by inserting the words ", consistent with section 545 and section 261(b)," after the word "approve".

(28) Section 223(c) is further amended by inserting the following sentences at the end thereof: "Failure to achieve compliance with the section 223(a)(12) requirement within the two year time limitation shall terminate any State's eligibility for funding under this subpart and shall make such State ineligible for the maintenance of effort portion allocated pursuant to sections 261(b) and 544, unless the Administrator with the concurrence of the Assistant Administrator determines that the State is in substantial compliance with the requirement and has made, through appropriate executive or legislative action, an unequivocal commitment to achieving full compliance within a reasonable time. For purposes of this subsection the term substantial compliance shall mean that 75 percentum deinstitutionalization has been achieved and that a reasonable time shall be construed as to be no longer than three years beyond that indicated by section 223(a)(12).".

(29) Section 223(d) is amended by inserting after the first word "State" the words "chooses not to submit a plan.".

(30) Section 223(d) is further amended by inserting the words "with the concurrence of the Assistant Administrator" after the second word "Administrator" and by inserting the words "preferably in that State" after the words "private agencies" and by inserting the words "especially programs funded under section 224(a)(7)" at the end thereof.

(31) Section 223(e) is deleted.

SUBPART II—SPECIAL EMPHASIS PREVENTION AND TREATMENT PROGRAMS

(32) Section 224(a)(3) is amended by inserting after the word "system" the following words, ", including restitution projects which test and validate selected arbitration models, such as neighborhood courts or panels, and increase victim satisfaction while providing alternatives to incarceration for detained or adjudicated delinquents".

(33) Section 224(a)(4) is amended by striking all after the words "and youth" and inserting in lieu thereof the words "and other youth to help prevent delinquency".

(34) Section 224(a)(5) is amended by deleting the words "on Standards for Juvenile Justice".

(35) Section 224(a)(5) is amended by deleting the word "and" the last time it occurs.

(36) Section 224(a)(6) is amended by placing a comma after the words "develop and implement" and inserting thereafter the words "in coordination with the United States Office of Education, Department of Health, Education, and Welfare,".

(37) Section 224(a)(6) is further amended by deleting the period at the end thereof and inserting in lieu thereof a semicolon.

(38) Immediately after paragraph (6) of section 224(a) insert the following new paragraphs:

"(7) develop and support programs stressing advocacy activities aimed at improving services for and protecting the rights of youth impacted by the juvenile justice system;

"(8) develop, implement, and support, in conjunction with the United States Department of Labor, other public and private agencies and organizations and business and industry programs for youth employment; and

"(9) improve the juvenile justice system to conform to standards of due process.".

(39) Section 225(c)(4) is amended by striking all after the words "or youths" and inserting in lieu thereof the words "and other youth to help prevent delinquency;".

(40) Section 225(c)(6) is amended by deleting the words "or Standards for Juvenile Justice".

(41) Sections 226, 227, and 228 are amended by inserting the words "with the concurrence of the Assistant Administrator" after the word "Administrator" whenever it appears.

(42) Section 227(a) is amended by inserting the word "organization" after the words "private agency".

(43) Sections 227(b) is amended by inserting the word "organization" after the words "private agency".

(44) Section 228(b) is amended by deleting the words "under this part" and inserting the words "by the Law Enforcement Assistance Administration with the concurrence of the Assistant Administrator" in lieu thereof and by deleting the words "25 percentum of."

(45) Section 228(c) is amended by deleting the word "part" and inserting the word "title" in lieu thereof.

(46) Immediately after Section 228(d) insert the following new subsection:

"(e) In the case of a grant under this part to an Indian tribe or other aboriginal group, if the Administrator determines that the tribe or group does not have sufficient funds available to meet the local share of the cost of any program or project to be funded under the grant, the Administrator with the concurrence of the Assistant Administrator, may increase the Federal share of the cost thereof to the extent he deems necessary. Where a State does not have an adequate forum to enforce grant provisions imposing liability on Indian tribes, the Administrator is authorized to waive State liability and may pursue such legal remedies as are necessary.

"(f) If the Administrator with the concurrence of the Assistant Administrator, determines, on the basis of information available to him during any fiscal year, that a portion of the funds granted to an applicant under this part for that fiscal year will not be required by the applicant or will become available by virtue of the application of the provisions of Section 509 of Title I of the Omnibus Crime Control and Safe Streets Act of 1968, that portion shall be available

for reallocation under Section 224 of this Title.".

(47) Section 228(c) is amended by deleting the word "money."

PART C—NATIONAL INSTITUTE FOR JUVENILE JUSTICE AND DELINQUENCY PREVENTION

SEC. 4. Title II, Part C of such Act is amended as follows:

(1) Section 241 is amended by deleting subsections (d) and (e) and by redesignating subsections (f) and (g) as subsections (d) and (e) respectively.

(2) Redesignated Section 241(e) is amended by inserting after "(4)" and before the words "enter into contracts" the words "make grants and."

(3) The subsection letter "(b)" immediately following redesignated Section 241(e) is redesignated subsection "(f)."

(4) Redesignated Section 241(f) is amended by deleting "(g)(1)" which appears immediately after the word "subsection" and inserting "(e)(1)" in lieu thereof.

(5) Section 243(5) is amended by inserting at the end thereof the following words ", such as assessments regarding the role of family violence, sexual abuse or exploitation and media violence in delinquency, the improper handling of youth placed in one State by another State, the possible ameliorating roles of recreation and the arts, and the extent to which youth in the juvenile system are treated differently on the basis of sex and the ramifications of such practices.".

(6) Section 245 is amended to read as follows:

"The Advisory Committee shall advise, consult with, and make recommendations to the Assistant Administrator concerning the overall policy and operations of the Institute.".

(7) Section 247(a) is amended by deleting the words "on Standards for Juvenile Justice established in section 208(e)".

(8) Section 247 is amended by inserting the following new subsection at the end thereof:

"(d) following the submission of its report under subsection (b) the Advisory Committee shall direct its efforts toward refinement of the recommended standards and shall assist State and local governments and private agencies and organizations in the adoption of appropriate standards at State and local levels.".

(9) Sections 241(f), 244(3) and 249(b) are amended by inserting after the words "lay personnel" the words ", including persons associated with law related education programs, youth workers and representatives of private youth agencies and organizations,".

PART D—AUTHORIZATION OF APPROPRIATIONS

SEC. 5. Title II, Part D of such Act is amended by redesignating the title of Part D "Administrative Provisions" and as follows:

(1) Section 261 is amended by deleting subsection (a) and inserting in lieu thereof the following:

"To carry out the purposes of this title there is authorized to be appropriated $150,000,000 for the fiscal year ending September 30, 1978, $175,000,000 for the fiscal year ending September 30, 1979, $200,000,000 for the fiscal year ending September 30, 1980, $225,000,000 for the fiscal year ending September 30, 1981, and $250,000,000 for the fiscal year ending September 30, 1982. Funds appropriated for any fiscal year may remain available for obligation until expended.".

(2) Section 262 is amended by deleting all of subsections (a) and (b) and inserting in lieu thereof the following:

"The Administrative provisions of Title I of the Omnibus Crime Control and Safe Streets Act of 1968, designated as Sections 501, 503,, 504, 507, 509, 510, 511, 516, 518(c), 521 and 524(a) and (c) of such Act, are incorporated herein as administrative provisions applicable to this Act.".

(3) Section 263 is amended by deleting the words "subsection (b)" in subsection (a) and inserting the words "subsections (b) and (c)" in lieu thereof.

(4) Section 263 is further amended by ading after subsection (b) a new subsection (c) as follows:

"(c) The amendments made by the Juvenile Justice Amendments of 1977 shall take effect on October 1, 1977.".

TITLE III—RUNAWAY YOUTH

SEC. 6. Title III of such Act is amended as follows:

(1) Section 311 is amended to read by inserting in the first sentence after the words "technical assistance" the words "and short-term training" and by inserting the words "and coordinated networks of such agencies" after the word "agencies".

(2) Section 311 is further amended by inserting the words "or otherwise homeless youth" immediately after the words "runaway youth" where it first appears and by deleting the words "runaway youth" in the third and fourth sentence and inserting the words "such youth" in lieu thereof.

(3) Section 312(b)(5) is amended by deleting the word "aftercase" and inserting the word "aftercare" in lieu thereof.

(4) Section 312(b)(6) is amended by deleting the words between the words "without" and "to anyone" and inserting the words "the consent of the individual youth and parent or legal guardian" in lieu thereof.

(5) Section 313 is amended by deleting the word "State" therein.

(6) Section 313 is further amended by deleting the sums "$75,000" and "$100,000" and inserting "$100,000" and "$150,000" respectively in lieu thereof.

(7) Part B of such Act is amended by redesignating the title of part B "Records" and by deleting section 321 and redesignating section 322 as section 321 and to read as follows:

"Records containing the identity of individual youths pursuant to this Act may under no circumstances be disclosed or transferred to any individual or to any public or private agency.".

(8) Section 331(a) is amended by deleting all after the word "ending" and inserting the words "September 30, 1978, 1979, 1980, 1981, and 1982, the sum of $25,000,000.".

(9) Section 331 is further amended by deleting all of subsection (b) and inserting in lieu thereof the following:

"(b) The Secretary (through the Office of Youth Development which shall administer this Act) shall consult with the Attorney General (through the Assistant Administrator of the Office of Juvenile Justice and Delinquency Prevention) for the purpose of coordinating the development and implementation of programs and activities funded under this Act with those related programs and activities funded under the Juvenile Justice and Delinquency Prevention Act of 1974 and under the Omnibus Crime Control and Safe Streets Act of 1968, as amended.".

TITLE IV—EXTENSION AND AMENDMENT OF THE JUVENILE DELINQUENCY PREVENTION ACT

SEC. 7. Title IV of such Act is deleted.

TITLE V—MISCELLANEOUS AND CONFORMING AMENDMENTS

SEC. 8. Title V, part B of such Act is amended as follows:

(1) Section 521 is amended by deleting the word "Deputy" and the words "for the National Institute" in chapter 319, section 4351(b).

(2) Section 545 is amended by adding at the end of section 527 the following:

"The Office shall have responsibility for assuring that the renewal of the plan under section 222(d) of the Juvenile Justice and Delinquency Prevention Act of 1974, is carried out consistent with the mandate of this section.".

COMMITTEE ON THE JUDICIARY—SUBCOMMITTEE TO INVESTIGATE JUVENILE DELINQUENCY: SECTION-BY-SECTION ANALYSIS OF THE PROVISIONS OF THE JUVENILE JUSTICE AMENDMENTS ACT OF 1977

Section 1 provides that the Act may be cited as the "Juvenile Justice Amendments of 1977".

Section 2 amends Title II, Part A of the Juvenile Justice and Delinquency Prevention Act of 1974 in the following ways:

1. Section 201(a) and (b) are amended to clarify and reaffirm the scope of the Office of Juvenile Justice responsibilities mandated by the 1974 Act.

2. Section 201(d) is amended to clarify the Assistant Administrator's responsibility to report directly to the Administrator.

3. Section 201 is amended to provide a Deputy to supervise Part B program operations.

4. Section 201 is the subject of a technical amendment.

5. Section 201 is amended by adding two new subsections: (a) subsection (i) also to clarify and to reaffirm the responsibilities of the Assistant Administrator mandated by the 1974 Act; and (b) subsection (j) to appropriately reflect the executive stature of the Office.

6. Section 202(a) is amended to clarify the fiscal responsibilities of the Assistant Administrator.

7. Section 202(b) is amended to permit staffing of the Office consistent with that approved by the Appropriation Committee.

8. Section 545 is the subject of a technical amendment.

9. Section 202 is further amended by adding two new subsections: (a) subsection (e) to remove any ambiguity regarding the Administrative support intended for the Office; and (b) subsection (f) to remove any doubt regarding the nature of delegation to the Assistant Administrator necessary to meet the mandates of Sections 201(a), 201(d), 261 (b) and 245.

10. Section 204(a) is amended to clarify the significant role contemplated in the 1974 Act for the Assistant Administrator regarding the area of concentration of federal efforts.

11. Section 204(b) is amended to delete duplicative counter-productive reporting requirements and to assure that future reports are adequate but concise.

12. Section 204(e) is the subject of a technical amendment.

13. Section 204(g) is amended to authorize the Administrator to delegate any functions under all of Title II to any officer or employee of the Administration.

14. Section 204(j) is amended to authorize the Administrator to utilize grants and contracts for private organizations.

15. Sections 204(k) and 205 are amended to require appropriate coordination between LEAA activities funded under Title II and Department of Health, Education and Welfare programs funded under the Runaway Youth Act and to clarify the role of the Office in joint funding proposals.

16. Section 206(a)(1) is amended by adding the Directors of OMB and the Office of Drug Abuse Policy and the Commissioner of the Office of Education to the Coordinating Council.

17. Section 206(c) is amended to assure that reports of the Council are adequate but concise.

18. Section 206(d) is amended to require a minimum of four annual meetings of the Coordinating Council.

19. Section 206(e) is amended to assure staff support consistent with the request of the Council.

20. Section 207(c) is amended to clarify the intent that alternative program youth workers participate as members of the National Advisory Committee.

21. Section 207(c) is further amended to define youths as persons under the age of twenty-two and to require that several selected for the Committee have had practical experience with the juvenile justice system.

22. Section 207(d) is amended to reflect a quorum as a simple majority of the Committee members and to permit hearings by a lesser number.

23. Section 208(b) is amended to assure that reports of the Committee are adequate but concise.

24. Section 208(c) is amended to clarify the intended role of the Committee relative to the Office.

25. Section 208(d) is amended to prevent a reduction in the membership of the Institute subcommittee and to clarify its role.

26. Section 208(e) is amended to prevent a reduction in the membership of the Standards subcommittee and to clarify its title.

27. Section 208(f) is amended to assure staff support consistent with the request of Committee.

28. Section 208 is further amended by adding two new subsections: (a) subsection (g) to authorize the Committee to assist State advisory groups in helping to assure compliance with key mandates of the 1974 Act; and (b) subsection (h) to require that at least one per centum of the appropriation for each fiscal year be allocated to these essential citizen involvement provisions of the Act.

Section 3 amends Title II, Part B of the Act through provisions related to Federal assistance programs:

1. Section 221 is amended to clarify that States have authority to make formula grant funds available to both public and private agencies through subgrants as well as contracts.

2. Section 22(c) is amended to conform with the definitions of "units of general local government" and "combination" set forth in Section 103(8) and (9) of the Act.

3. Section 222(d) is amended to provide a Federal share of ninety per centum and to require the Assistant Administrator to waive match for private non-profit organizations.

4. Section 222 is amended by adding a new subsection (e) to provide at least ten per centum of the State allotment for the purpose and use of the State citizens advisory group.

5. Section 223(a)(3) is amended to assure that the citizen advisory group participates in the development and review of the State plan and in the supervision of Federally funded delinquency programs.

6. Section 223(a)(3)(C) is amended to assure the fuller participation of the private business sector on the advisory groups.

7. Section 223(a)(3)(E) is amended by defining youth as persons under twenty-two and by assuring the participation of persons with practical experience in the juvenile justice system.

8. Section 223(a) is amended by adding a new paragraph (F) to assure that the Governors and Legislators are kept apprised of activities in their states and to permit the citizen advisory groups to help monitor compliance with key requirements of the 1974 Act.

9. Section 223(a)(4) is amended to conform with the definitions of "unit of general local government" and "combination" set forth in Section 103(8) and (9) of the Act and to assure that regulations are promulgated that will encourage citizen and private agencies participation in programs funded under the 1974 Act.

10. Section 223(a)(5) is amended to provide that funds expended through programs of local government include programs sponsored or administered by combination of local government or with citizen groups.

11. Section 223(a)(5) is further amended to prevent the funding of programs that improperly intrude into the lives of youth and to permit a flexible approach in the allocation of funds at the State level.

12. Section 223(a)(6) is amended to conform with the definition of "unit of general local government" set forth in Section 103(8) of the Act.

13. Section 223(a)(6) is further amended to clarify that regional planning bodies may be designated by local chief executives as the "local agency" to perform planning and administration functions on behalf of the unit of general local government.

14. Section 223(a)(10) is amended to again clarify that States have authority to make formula grant funds available to both public and private agencies through subgrants as well as contracts.

15. Section 223(a)(10) is further amended to encourage the support of diverse alternatives in the juvenile justice system.

16. Section 223(a)(10)(A) is amended to strengthen the range of frugal community-based alternatives to be encouraged through the Act.

17. Section 223(a)(10) is further amended to delete duplicative language regarding drug and alcohol programs and to substitute citizens youth advocacy programs on the list of advanced technique programs.

18. Section 223(a)(10)(G) is amended to reflect the encouragement of youth oriented programs.

19. Section 223(a)(10)(H) is amended to focus incentive programs funded by the States on the objectives of the key mandates of the Act.

20. Section 223(a)(12) is amended to clarify the intent to handle youths who have not been involved or charged with a violation of law no more restrictive than status offenders.

21. Section 223(a)(12) is amended to clarify that status offenders may, but need not, be placed in shelter facilities.

22. Section (a)(13) is amended to clarify the intent to handle youths who have not been involved in or charged with a violation of law no more restrictive than status offenders.

23. Section 223(a)(14) is amended to require that alternative non-secure placements are also monitored to assure compliance with the key mandates of the Act.

24. Section 223(a)(15) is amended to reflect a more realistic scope of contemplated activities regarding disadvantaged children.

25. Section 223(a)(19) is amended to prevent the use of Act funds in a manner that supplants State and local programs.

26. Section 223(b) is amended to reflect the strengthened role of citizen advisory groups regarding the approval of the State plan.

27. Section 223(c) is amended to reflect the important role of the Assistant Administrator in the decision-making process for State plan approval.

28. Section 223(c) is further amended to provide that State eligibility for delinquency funds shall be terminated unless unequivocal commitment to full compliance within a reasonable time is demonstrated.

29. Section 223(d) is the subject of a technical amendment.

30. Section 223(d) is further amended to stress the role of the Assistant Administrator in establishing noncompliance and expresses a preference that the State allotment be allocated in the same State for citizen and advocacy activities.

31. Section 223(e) is deleted consistent with the technical amendment to 223(d).

32. Section 224(a)(3) is amended to encourage the development of neighborhood courts or panels designed to assist victims of juvenile crime and provide more rational and economical responses to minor delinquent conduct.

33. Section 224(a)(4) is amended to prevent the funding of programs that improperly intrude into the lives of youths and their families.

34. Section 224(a)(5) is amended to eliminate an inconsistency in a title of the Section 247 subcommittee.

35. Section 224(a)(5) is the subject of a technical amendment.

36. Section 224(a)(6) is amended to mandate coordination with the United States Department of Education in the development of Special Emphasis School programs.

37. Section 224(a)(6) is the subject of a technical amendment.

38. Section 224 is amended by adding three new paragraphs: (a) paragraph (7) to authorize the use of Special Emphasis funds for youth advocacy programs: (b) paragraph (8) to authorize the use of Special Emphasis funds to work in conjunction with the Department of Labor and other organizations in the development of model employment programs designed to help reduce delinquency; and (c) paragraph (9) to authorize the use of Special Emphasis funds to encourage conformity with Constitutional due process in the juvenile justice system.

39. Section 225(c)(4) is amended to prevent the funding of programs that improperly intrude into the lives of youths.

40. Section 225(c)(6) is amended to provide consistency of titles.

41. Section 226, 227 and 228 are amended to clarify the authority of the Office regarding withholding, use of funds and payments.

42. Section 227(a) is amended to permit the use of funds by organizations as well as agencies.

43. Section 227(b) is also amended to permit the use of funds by organizations as well as agencies.

44. Section 228(b) is amended to permit up to 100 percent of a State's formula grant funds to be used as match for other Federal juvenile delinquency program grants.

45. Section 228(c) is amended to permit the Administrator to require a matching contribution from recipients of National Institute grants and contracts under Part C of the Act.

46. Section 228 is amended by adding two new subsections: (a) subsection (e) authorizes the Administrator to waive the non-Federal match for grants to Indian tribes or other aboriginal groups where they have insufficient funds. In addition, where a State lacks jurisdiction to enforce liability under State grant agreements with Indian tribes, the Administrator may waive the State's liability and proceed directly with the Indian tribe on settlement matters; and (b) subsection (f) provides for reallocation as Special Emphasis funds, or any funds not required by a State or which become available following administration action to terminate funding.

47. Section 228(c) is amended to provide that any permissive match must be in kind match.

Section 4 amends Title II, Part C of the Act in several amendments related to the National Institute for Juvenile Justice and Delinquency Prevention:

1. Section 241 is amended to delete the duplicative subsection (d) and (e) provisions for delegation of authority by the Administrator clearly provided for in Part A to employees of the Institute and to redesignate subsections (f) and (g) as sections (d) and (e).

2. Redesignated section 241(e) is amended to clarify the Institute's authority to make grants as well as enter into contracts for the partial performance of Institute functions.

3. Erroneously lettered subsection (b) is redesignated subsection (f).

4. Redesignated subsection (f) is the subject of a technical amendment.

5. Section 243(b) is amended to provide for the preparation of studies and recommendations for the prevention of delinquency in the areas of family violence, sexual abuse, media violence, the interstate placement practices of government agencies and the special manifestations of sex discrimination in the juvenile justice system, and the possible ameliorating roles of recreation and the arts.

6. Section 245 is amended to clarify the intent that the Advisory Committee advise the Assistant Administrator or designee.

7. Section 247(a) is the subject of a technical title amendment.

8. Section 247 is amended by adding a new subsection (d) to assure continuity for the important work regarding the development of juvenile justice standards and the provision of assistance to States and localities in the adoption of standards.

9. Sections 241(f), 244(3) and 249(b) are amended to assure that persons involved with law related education projects, youth workers and citizens groups are guaranteed participation in funded training activities.

Section 5 amends Title II, Part D of the Act by changing the title of Part D to "Administrative Provisions: and in the following respects:

1. Section 261 is amended by deleting subsection (a) relating to level of authorized funding and substituting a five year authorization at an appropriation level of $150,000,000, $175,000,000, $200,000,000, $225,000,000 and $250,000,000 for fiscal years 1978, 1979, 1980, 1981 and 1982 respectively. Funds appropriated are to remain available for obligation until expended.

2. Section 262 is deleted and language substituted that incorporates the administrative provisions of Sections 501, 504, 507, 509, 510, 511, 516, 518(c), 521 and 524(a) and (c) of the Omnibus Crime Control and Safe Streets Act into the Act as administrative provisions.

3. Section 263 is the subject of a technical amendment.

4. Section 263 is further amended to provide that the amendments made by this Act shall be effective on and after October 1, 1977.

Section 6 amends Title III, the Runaway Youth Act in the following respects:

1. Section 311 is amended to permit funding for short-term training or to encourage the coordination of relevant programs.

2. Section 311 is further amended to reflect the reality that many youths who need assistance are involuntarily homeless.

3. Section 312(b)(5) is the subject of a technical amendment.

4. Section 312(b)(6) is amended to assure that proper consent precedes the release of statistical records.

5. Section 313 is amended to encourage the funding of local community programs.

6. Section 313 is further amended by increasing the size of grants to be given priority so as to reflect increased program expenses.

7. Part B is amended by deleting section 321 which required a now completed report and by providing appropriate redesignations.

8. Section 331(a) is amended to authorize funding and to substitute a five year authorization at an appropriation level of $25,000,000 for each of fiscal years 1978, 1979, 1980, 1981 and 1982.

9. Section 331(b) is amended to require closer coordination between the Office of Youth Development and the Office of Juvenile Justice and Delinquency Prevention so as to avoid costly duplication of purpose.

Section 7 deletes expired Title IV.

Section 8 amends Title V, Part B of the Act in the following ways:

1. Section 521 is amended to place the Assistant Administrator or designee on the Advisory Board for the National Institute of Corrections, in lieu of the Deputy Assistant Administrator.

2. Section 545 is amended to clarify and reaffirm the clear responsibility of the Office regarding the approval of State plans and other features of the authority for subjecting all programs concerned with juvenile delinquency to its administration and policy direction.

By Mr. DURKIN:

S. 1023. A bill to eliminate restrictions on the use of funds appropriated to the Law Enforcement Assistance Agency for the carrying out of the provisions of the Public Safety Officers' Benefits Act of 1976; to the Committee on the Judiciary.

S. 1024. A bill to appropriate funds to carry out the provisions of the Public Safety Officers' Benefits Act of 1976; to the Committee on the Judiciary.

Mr. DURKIN. Mr. President, last session I, along with many others in this Chamber, cosponsored a bill authorizing a payment of $50,000 to the families of policemen, firefighters, corrections officers, game wardens, and other law enforcement officials killed in the line of duty. On September 29, 1976, the Public Safety Officers' Benefits Act became law.

Three days later, on October 2, Ralph W. Miller, a young patrolman with the Manchester, N.H., Police Department, was viciously murdered in the performance of his duties. Since then, 120 other law enforcement officials have been killed in action. No benefits have been paid to date to the widow and young children of Patrolman Miller or the other 120 families. Survivors submitted the proper forms and supporting materials necessary to receive the benefits due then only to watch the wheels of government grind slowly to a halt.

Public safety officers and firefighters risk their lives daily to protect the citizens of towns and cities throughout this country. The financial rewards and benefits are generally minimal and the economic burdens heavy. Too often young police officers and firefighters are murdered or mortally wounded, leaving families with small children and large financial obligations.

The public safety officers' benefits program recognizes the value of the services provided by the dedicated men and women involved in law enforcement and firefighting and is intended to help protect their families against financial disaster. The act provides the mechanism to award benefits but it did not provide the funds. No action has been taken as yet to assure that survivors expeditiously receive the money they have every right to expect.

The PSOB act did not provide for the use of previously appropriated LEAA funds to pay survivors benefits. I am submitting an amendment which will remove this restriction. It will free money already appropriated to grant the 121 families who have faced the loss of a family member the compensation provided by law.

Further, to insure that these families and families that are so stricken in the future receive the benefits they deserve, I am introducing legislation to appropriate LEAA funds to be used exclusively for this program. Adoption of these measures would fulfill the commitment made by Congress to the families which have suffered so much so that we may be safe in our homes and on our streets.

By Mr. BENTSEN:

S. 1026. A bill to prohibit the pretrial release of any person charged with an act of aggravated terrorism; to the Committee on the Judiciary.

Mr. BENTSEN. Mr. President, today I introduce legislation to prohibit bail for accused terrorists if the judge, looking at the facts of the case, determines that releasing the person in question would pose a danger to the community.

This legislation was prompted in part by the recent Hanafi murder case, where the leader of the crime was released without bail even before the funeral of the victim, even before the hostages were returned home. It would amend the Federal and District of Columbia bail laws.

I believe that the actions of these terrorists and others are reprehensible and ought to be met with the most strict and certain action that can be provided. There is a contagious attitude in this land, one that is accepted by a growing number of violent people. This attitude enables them to murder at will, kidnap at will, do violence at will, and to act in a manner that shows a disrespect for the fundamental principles of liberty that our Nation is founded on.

Why do criminals commit such wanton acts? Because their politics or their personal views demand such. Because they are alienated or angry, frustrated or fanatic. They believe that no one will listen unless they commit some act atrocious enough to make the evening news, heinous enough to cause fear among our people, bold enough to draw attention to themselves, even if it risks or costs the lives of others. This kind of activity must be met by strict punishment, long terms in prison, and in the most wanton cases involving the death of a victim, a possible death penalty.

Mr. President, in our country the views of all should and can be considered without resort to violence, without resort to hate. We listen to the pleas of our citizens, not because we stare down the barrel of a gun but because it is right that we listen. Our country has lasted so long because we do have open channels of communication, avenues of thought on which we may engage in the free trade of ideas. Bullets and bombs are not needed to force this Nation to challenge our problems. We do pursue the just society that we should relentlessly strive for.

At the same time, vigilante action and crimes of political passion impede this quest rather than aid it. The cause of freedom is not served by murder, it is not furthered by the mindless and self-indulgent violence of the bomb in the airport locker or torture or kidnaping.

It is indeed ironic that as we engage in the pursuit of human rights in many areas of the globe, there are some who would abuse it at home. Murder cannot be justified by the invocation of some higher cause. No person can become a law unto himself, serving as judge, jury, and executioner. No one has the right to rip apart the most sacred right of all, the right to live with freedom from fear, the right of individuals to weave for themselves the fabric of their own human existence.

Just as we must consider the pleas of our citizens, so must we protect and enforce those laws that protect our liberties. In "A Man for All Seasons," young Will Roper tells Sir Thomas More that he would cut down every law in England to get at the Devil. On hearing this More was outraged. Moving toward Roper, he said:

> And when the last law was down, and the Devil turned around on you—where would you hide, Roper, the laws all being flat?

Mr. President, we should work toward just laws and our laws should be obeyed and enforced. There can be no appeal above those laws to the rule of barbarism, not if our society is to survive, not if our freedom is to exist. We cannot have politics by machinegun or bullets in lieu of ballots. Just as we insure liberty and freedom to all, we must punish those who disobey the laws upon which those liberties are so delicately balanced.

I have introduced legislation to provide for mandatory sentences, without probation or parole, for those convicted of terrorist crimes, including the death penalty in the most aggravated cases. I have introduced legislation to bring about economic sanctions against countries that harbor terrorists. Today I introduce legislation that would prohibit bail in those terrorist cases in which the judge believes that such release would pose a danger to the community. Let the judge determine if such a threat exists, and let the conduct of the person in question serve as a guide.

I would also commend the police for their conduct in the recent Hanafi case, for the courage and wisdom they demonstrated in securing the safety of the victims. I also believe that the three ambassadors who risked their lives in pursuit of right performed a service to their country as well as our own, indeed a service to every concerned person on this Earth.

But one person's death is one too many. We have seen too much violence in recent years. Too many of our leaders have been murdered; too many lives have ended at the barrel of a gun. My legislation will only take one small step in the right direction: It will help to protect society from these highly dangerous criminals. Much more research needs to be done, and we must recognize frankly that perhaps there are no immediate answers at our command.

In the meantime, let us work toward the fairest laws that will be enforced impartially. Let us punish terrorists severely, for there is no other way. This Nation should not tolerate injustice by anyone, for any reason, in any way.

By Mr. JACKSON (for himself, Mr. PELL, and Mr. GOLDWATER) (by request):

S. 1029. A bill to authorize the Smithsonian Institution to construct museum support facilities; to the Committee on Rules and Administration.

S. 1030. A bill to make the film "Hirshhorn Museum and Sculpture Garden," produced by the U.S. Information Agency, available for use within the United States; to the Committee on Foreign Relations.

S. 1031. A bill to amend the act of July 2, 1940, to increase the amount authorized to be appropriated to the Smithsonian Institution for purposes of carrying out its functions under such act; to the Committee on Rules and Administration.

SMITHSONIAN INSTITUTION AUTHORITY

Mr. JACKSON. Mr. President, on behalf of Senator PELL, Senator GOLDWATER, and myself, I am today introducing three bills on behalf of and at the request of the Regents of the Smithsonian Institution. Senators PELL, GOLDWATER, and I serve as the Senate members of the Board of Regents. The legislation we are introducing today has been approved by the full Board of Regents to meet various needs of the Institution.

BARRO COLORADO ISLAND

The first bill would amend the act of July 2, 1940, which set aside Barro Colorado Island in the Canal Zone in order

to preserve and conserve its natural features for research purposes, and authorized the appropriation of $10,000 for necessary administrative and maintenance expenses related to the island. Subsequently, Public Law 89–280, approved October 20, 1965, amended the authorization to $350,000.

At its meeting on January 22, 1976, the Board of Regents requested its congressional members to introduce and support legislation eliminating the ceiling on appropriations. On February 6, Senator SCOTT introduced S. 2946 for this purpose, and on March 15, Mr. MAHON introduced, for himself and Mr. CEDERBERG, a companion measure, H.R. 12506. No action was taken in the House, but it was approved by the Senate on September 14 with an amendment raising the amount authorized to $600,000.

Although current obligations are within the statutory limit, increasing costs and needed improvements indicate that the limit will be reached in the near future, and legislation similar to that approved by the Senate last year is proposed.

HIRSHHORN FILM

Two years ago the U.S. Information Agency produced a color film entitled "Hirshhorn Museum and Sculpture Garden." The film, which is of excellent quality, has been shown extensively in foreign countries and reports indicate that it has been enthusiastically received by viewing audiences.

The law which established the U.S. Information Agency prohibits the distribution within the United States of materials the agency produces. However, from time to time legislation has been enacted exempting specific works and titles from the prohibition.

The Director of the Hirshhorn Museum and Sculpture Garden has requested that the Board of Regents consider and approve the introduction of legislation to exempt the Hirshhorn film and make it available for distribution in this country, by means of sale or rental, through the National Audiovisual Center of the National Archives, an agency of the General Services Administration.

The second bill would amend the existing law to permit the USIA to participate in the distribution of this film.

MUSEUM SUPPORT CENTER

The final bill which we are introducing would authorize appropriations of $21.5 million to prepare plans for and construct a Museum Support Center for the Smithsonian Institution. I ask unanimous consent that a brief statement describing the need for this Center be included in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MUSEUM SUPPORT CENTER

On September 19, 1975, the President signed into law P.L. 94–98 authorizing the Regents of the Smithsonian Institution to prepare plans for museum support facilities. These facilities are intended to restore a significant amount of Mall building space to public use; to provide adequately for the long-range care and use of the Institution's collections; to provide associated research and study space; and to incorporate areas for conservation of the collections, related training, and the dissemination of conservation information.

The Smithsonian's museum activities in the Washington area are concentrated around and near the Mall, an area dedicated to the use, education and enjoyment of the public. These activities, which encompass exhibits, education, collections, conservation, research and support, fully occupy and crowd available Mall space. Economies in the use of space are being pursued which entail the leasing of inexpensive, nearby space for office and workshop purposes and the examination and disposal of materials in various buildings to free up presently held space. Nevertheless, the continuation and expansion of direct public services and the necessary growth of collections require additional space in which to house the less visible services of collections management, conservation, documentation, research, and publication.

During the past eighteen months members of the Smithsonian staff and a consortium of consultants have carefully analyzed existing facilities and space requirements of the Institution, concentrating initially on the critical needs of the National Museum of Natural History. This assessment indicates that a project costing $21,500,000 with approximately 338,000 square feet of office, storage and laboratory space will meet the Institution's most pressing space needs as currently projected through the middle of the next decade. An amount of $325,000 is requested in the FY 1978 budget to initiate architectural and engineering planning for a Museum Support Center. The balance of the planning funds, estimated at $575,000, and construction and equipping funds, estimated at $20,600,000, will be sought by fiscal year 1980.

THE REASON FOR COLLECTIONS AND THEIR GROWTH

Collections of original objects in the fields of science, history, and art are required for use in the identification of similar or related objects, research, education, and exhibitions or simply for aesthetic enjoyment and patriotic inspiration. Their importance spans such activities as the application of collection-based entomological research for the control of insects, the study of human disease in ancient anthropological materials, the historical understanding of technological and engineering developments, and the pleasure a viewer experiences in the presence of a master work of art. In these contexts nothing can take the place of the original object or specimen.

Museums and museum collections must and should grow. Day-to-day history, the practice of the arts, and new technologies are relentless generators of objects to be preserved, exhibited, studied, and interpreted. Archeologists discover, collect, and preserve the evidence of new knowledge of the past. Ethnologists collect at an accelerating pace in order to preserve the material record of rapidly changing cultures. In science there is a spiraling and intensifying need to collect, study and describe the flora, fauna, rocks, and minerals of the earth in order to add to our understanding of the interlocking dependencies for survival. Collections are invaluable baseline records against which to measure and evaluate change.

The Smithsonian has had 130 years of concern for collections, their need, and their use. It has consistently resisted the acquisition of collections it has considered unjustified or inappropriate. At the same time, the Institution has accepted its responsibilities to develop and preserve for use collections required for research and for the scientific, cultural, and technological record.

COMPONENTS OF THE MUSEUM SUPPORT CENTER

Collections storage is the fundamental purpose of the support center and reflects a high priority need to reclaim Mall exhibits space, attics, hallways, basements, and work spaces now encumbered with poorly and hazardously housed and often inaccessible specimens and objects. The proposed Museum Support Center building will provide a major amount of new storage space for the proper housing and care of collections. Included will be 187,000 square feet for the National Museum of Natural History, 28,000 for the National Museum of History and Technology, and 24,000 for other museums and galleries for a total of 239,000 square feet. This storage space will be provided by a utilitarian, single story, double-decked structure.

The National Museum of Natural History tentatively has designated the following percentages of its departmental collections for transfer to the Center: anthropology 95, botany 25, entomology 60, invertebrate zoology 20, mineral sciences 50, paleobiology 20, and vertebrate zoology 20 percent. Relocation of these collections will clear approximately 40,000 square feet of prime exhibits space, thus adding approximately 19 percent to the Museum's capability to present exhibits to its growing number of visitors, now over 4.5 million a year. Other benefits include the freeing of space on the Mall for education and research activities and better care of all collections.

Second only to collection housing requirements is the need to provide a strong research and study program. This will be achieved by including in the proposed building approximately 31,000 square feet of offices and 28,000 square feet of laboratories for the professional and technical staff that will be associated directly with the collections. This space also will accommodate the Smithsonian Oceanographic Sorting Center which would be moved from its present expensive rental quarters to achieve a more efficient relationship to program elements of the Museum of Natural History.

A final principal component of this project proposal is an approximate 31,000 square feet facility for conservation. Included in this first space increment for conservation will be a collections' receiving and fumigation unit, a conservation information referral center, space for the treatment of objects and research on conservation techniques, and a major facility for training staff and visiting interns in scientific theory and practical conservation skills. The provisions for necessary increased activity in conservation research and training, by bringing together Anthropology's processing and conservation laboratories with those of the Oceanographic Sorting Center and the Conservation Analytical Laboratory, will open new opportunities for Smithsonian conservators and trainees.

SITE ACQUISITION

A site suitable for construction of support center facilities in which to house these services is being assembled adjacent to the Institution's current holdings of 21 acres at Silver Hill, Maryland. Sixty-one acres have been transferred to the Smithsonian in recent months by the General Services Administration, and negotiations are underway with respect to another twenty-one acre tract which would complete the assembly.

FUTURE PLANS

Studies on collections and their utilization will continue to assure effective collections policies and management and to provide the best analyses of growth projections and future space requirements.

By Mr. JACKSON (for himself and Mr. HANSEN) (by request):

S. 1032. A bill to authorize a program of grants to the Government of Guam for capital improvements of public facilities, and for other purposes; to the

Committee on Energy and Natural Resources.

Mr. JACKSON. Mr. President, by request, I send to the desk on behalf of myself and the Senator from Wyoming (Mr. HANSEN) a bill to authorize a program to the Government of Guam for capital improvements of public facilities and for other purposes.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the executive communication accompanying the proposal from the Secretary of the Interior be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1032

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "The Guam Assistance Act of 1977."

SECTION 1. (a) There is hereby authorized to be appropriated to the Secretary of the Interior (hereinafter referred to as the Secretary) for grants to the Government of Guam not to exceed $10,200,000 for construction and upgrading of public facilities.

(b) Funds provided under this Act will be considered to be local revenues of the Government of Guam when used as the local share required to obtain Federal programs and services.

(c) The Government of Guam in carrying out the purpose of this Act may utilize, to the extent practicable, the available services and facilities of agencies and instrumentalities of the Federal Government upon a reimbursable basis. Reimbursements may be credited to the appropriation or fund which provided the services and facilities or the appropriation or fund currently available for providing such services or facilities. Agencies and instrumentalities of the Federal Government shall make available to the Government of Guam upon request of the Secretary such services and facilities as they are equipped to render or furnish, and they may do so without reimbursement if otherwise authorized by law.

SEC. 2. There is authorized to be appropriated to the Secretary not to exceed $1,000,000 to be used to conduct a needs assessment study of the Government of Guam. These studies shall be undertaken under the direction of the Secretary, who shall report the results of these studies to Congress within twelve months of the effective date of this Act.

SEC. 3. Section 3.1.a. of the Organic Act of Guam (72 Stat. 68); 48 U.S.C. 1421i(a) is hereby amended by striking the period at the end thereof and inserting in lieu thereof the following language:

": *Provided further,* That, notwithstanding any other provision of law, the Legislature of Guam is authorized to levy a surtax on all taxpayers in an amount not to exceed 10 per centum of their annual income tax obligation to the Government of Guam."

SEC. 4. Funds appropriated pursuant to this Act shall remain available until expended, and the Secretary may place such stipulations as he deems appropriate on the use of these funds.

U.S. DEPARTMENT OF INTERIOR,
Washington, D.C., March 11, 1977.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft bill "To authorize a program of grants to the Government of Guam for capital improvement of public facilities, and for other purposes."

We recommend that the bill be referred to the appropriate Committee for consideration and that it be enacted.

This legislation is needed to provide Guam with the necessary funds for the construction and upgrading of certain public facilities which were damaged or destroyed by Super Typhoon Pamela which devastated Guam on May 21, 1976. Further, funds are also necessary for a study of Guam's social economic financial conditions, and assessment of Guam's short term and long range needs and the development of a program plan by which the Federal Government can help the Government of Guam meet those future economical and financial needs so as to provide for the well-being of the people of Guam. Finally, in light of Guam's need for additional revenues, legislation is necessary to authorize the Legislature of Guam to impose a surtax.

THE EFFECTS OF TYPHOON PAMELA

On May 21, 1976, Guam was devastated by Super Typhoon Pamela which wrought hundreds of millions of dollars of damage. The Federal Disaster Assistance Administration (FDAA) has compensated governmental entities, and to some extent individuals, for a substantial portion of the losses resulting from the disaster. The FDAA aid, however, is limited to reporting governmental facilities to predisaster conditions. Further, at the request of this Department, the 94th Congress also appropriated $20 million for emergency grants to the Government of Guam. These funds are to assist in providing governmental services jeopardized by the typhoon and to supplement FDAA aid in repairing those public facilities which were damaged.

While this aid has been extremely beneficial for Guam in the aftermath of facilities and services critical to the continued operation of the Government and to safety of life should be made typhoon-proof. Statistics indicate a probability of one typhoon every seven years significantly affecting the island. Since 1946, Guam has been affected by 27 tropical cyclones. Of these, 13 have produced typhoon force winds on the island and four have inflicted damage with winds over 115 mph. Prior to Pamela, the most intense storm to strike Guam occurred in 1962 when Typhoon Karen passed directly over the island with sustained winds in excess of 160 mph.

Guam was devastated then, as it was in Pamela, and an expenditure of $75 million over the past 12 years was required merely to restore damaged facilities and to construct some typhoon-proof buildings. The post-typhoon survey of the island after Pamela's passage attested to the soundness of the typhoon-proof construction program carried out during this interval. The condition of the typhoon-proof structures built after Typhoon Karen, and which withstood the force of Typhoon Pamela, proved that Federal money could be saved for the long-term by building certain structures and facilities to resist typhoon force winds and the accompanying wind-driven water. Section 1 of the attached legislative proposal would authorize $10.2 million for such typhoon upgrading work in the following areas:

Electrical Service—Typhoon Pamela 's destructive winds inflicted extensive damage to the Islandwide Power Primary Distribution System. About 1,000 existing wood poles were blown down and/or broken into sections by the force of the wind, disrupting power to the entire island. Continuous availability of reliable electrical power generated and distributed by the Guam Power Authority (GPA) is essential to the proper functioning of the civilian and military communities of Guam.

The restoration of electrical service is always a major post-typhoon problem. A full underground electrical system would be the most desirable for Guam, but is prohibitively expensive. However, experience has shown that concrete poles are capable of weathering the storm. At the present time we estimate that $9.8 million would be sufficient to make Guam's primary electrical system typhoon-proof by replacing all wooden poles in the primary system with concrete poles.

Water—We contemplate spending $400,000 to build permanent typhoon shelters for water pumping stations and related facilities. Such construction would insure a potable water supply during and after typhoons.

We would note that $104.5 million has been appropriated to the Department of the Navy and the Air Force for the reconstruction and upgrading of military facilities, excluding family housing, on Guam. In our judgment, simultaneous mobilization of the construction effort for upgrading both Government of Guam and military structures and facilities damaged by Super Typhoon Pamela, especially in the areas of power and water, would result in a significant cost savings.

Section 2 of the draft bill would provide the Secretary of the Interior with funds, which the Government of Guam does not have, to conduct a thorough analysis of conditions on Guam in the areas of: socio-economic trends; financial and revenue problems and trends, government management, and overall needs for planned, orderly growth and development. A program plan, based on the analysis will be developed which will be directed at assisting Guam to meet its short and long-term needs and at solving some of its major problems. This would be accomplished through the Department of the Interior.

The occurrence of Typhoon Pamela also exacerbated the existing fiscal problems confronting the territorial Government of Guam. Therefore, section 3 of the proposed bill would authorize the Legislature of Guam to impose a 10% surtax in order to increase revenues.

The Office of Management and Budget has advised that there is no objection to the presentation of this legislative proposal from the standpoint of the Administration's program.

Sincerely,

CECIL D. ANDRUS,
Secretary.

By Mr. JACKSON (by request):

S. 1033. A bill to amend section 2 of the act of June 30, 1954, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. JACKSON. Mr. President, I send to the desk, for appropriate reference, legislation to provide authorization for the continuance of civil government for the Trust Territory of the Pacific Islands. I am introducing this legislation at the request of the Congress of Micronesia in order to allow the Committee on Energy and Natural Resources to consider the needs of the trust territory for fiscal year 1978 and beyond.

Mr. President, I ask unanimous consent that the text of the legislation and the accompanying communication from the Congress of Micronesia be printed in the RECORD at the close of my remarks. Over the last week, administration witnesses have appeared before both the Senate and House Appropriations Committees to present the administration requests not only for the trust

territory authorization, but also for other matters such as rehabilitation of Eniwetok Atoll, compensation for the inhabitants of Rongelap, rehabilitation of Guam, and other measures, but, they have not transmitted the authorizations on which the appropriations request depend. I want to be sure that the people in the trust territory do not suffer because of the delay in the administration's submittal of draft authorization legislation.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1033

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is amended by amendment to draft bill by deleting the words "and such amounts as were authorized but not appropriated for fiscal year 1975," and inserting in lieu thereof the following language, "for fiscal year 1978, $108,862,000, of which amount $13,515,000 shall be appropriated for the Government of the Northern Mariana Islands until the provisions of the Covenant to establish a Commonwealth for the Northern Mariana Islands (90 Stat. 263) (hereinafter the "Covenant") have been met and approved as required in section 1003(b) of the Covenant, at which time the authorization provisions of appropriations contained in Article VII, section 704(b) of the Covenant will take effect. For fiscal year 1979, $95,000,000, for fiscal year 1980, $90,000,000, and up to but not to exceed $6,000,000 for program development and construction of facilities required for a College of Micronesia to serve the Micronesian Community.

SEC. 2. Section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is further amended by deleting the words "and up to $8,000,000 for the construction of such buildings as are required for a four year college to serve the Micronesian Community."

SEC. 3. Section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is further amended by deleting all the language beginning with the words "which amounts for each such fiscal year" to the end of Section 2, and substituting a period for the comma after the word "agencies" which comes before the language to be deleted.

CONGRESS OF MICRONESIA,
March 16, 1977.

Hon. HENRY JACKSON,
Chairman, Senate Committee, Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As in years past, Co-Chairman Bailey Olter and I are representing the views of the Congress of Micronesia in the hearings now being held on the TTPI budget request.

We are greatly distressed to observe the frustrations of both our authorizing and appropriations committees due to the fact that the Department of Interior has not given you a draft authorization bill for even FY 1978. We are fearful that these frustrations may be the cause of losses of programs or construction projects. We know you understand that any such losses do not hurt the bureaucrats responsible for not getting legislation to you, rather it directly affects only Micronesians. The same thing happened to us when your investigation revealed the serious management deficiencies in our construction program. We believe that problem is solved with the complete package put together by OICC but we are having a hard time getting our views across to the appropriations committees because there is no authorization.

Thus, as it appears to us that the Executive Branch is having obvious difficulties in developing a bill, we respectfully request that you introduce the attached on our behalf.

Our request encompasses the following:

1. Provides for a three-year time span which will allow prudent planning well in advance for FY '79 and FY '80.

2. Provides for appropriations not to exceed—

a. $108,862,000 for FY 1978.
b. 95,000,000 for FY 1979.
c. 90,000,000 for FY 1980.

Those levels anticipate implementation of the largest part of the five-year basic infrastructure program set forth by OICC, and includes the Northern Marianas Government only through FY 1978.

3. Provides for appropriations up to $6,000,000 for a College of Micronesia. Under separate cover, we are forwarding the Congress of Micronesia position on Dr. Douglas Harlan's report. It is our belief that the job can be done for less than the current $8 million authorization and anticipates some Congress of Micronesia funding support.

4. Provides for an appropriation not to exceed $10 million for loss or reduction in Federal grant-in-aid programs. For example, the loss of FAA matching funds previously anticipated will cripple the construction effort unless this provision can be maintained and utilized.

The people of Micronesia will be most grateful should you see fit to intercede on their behalf. If we could participate in an early hearing on this bill we could take advantage of OICC's presence in Washington and give you a detailed, complete presentation on the total five-year construction program.

Thank you very much.

Sincerely yours,

RAYMOND SETIK,
Chairman, Joint Committee on Program Planning and Budget.

ADDITIONAL COSPONSORS

S. 8

At the request of Mr. DOLE, the Senator from Missouri (Mr. DANFORTH) and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 8, to amend the Watershed Protection and Flood Prevention Act.

S. 92

At the request of Mr. WILLIAMS, the Senator from Massachusetts (Mr. BROOKE) and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 92, to amend the Export Administration Act of 1969.

S. 97

At the request of Mr. BROOKE, the Senator from Rhode Island (Mr. PELL), the Senator from New Jersey (Mr. CASE), the Senator from South Carolina (Mr. THURMOND), and the Senator from Connecticut (Mr. RIBICOFF) were added as cosponsors of S. 97, to amend the Internal Revenue Code.

S. 122

At the request of Mr. BROOKE, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 122, the Electric Utility Rate Reform and Regulatory Improvement Act of 1977.

S. 185

At the request of Mr. CHURCH, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 185, to amend the Social Security Act.

S. 198

At the request of Mr. GRIFFIN, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 198, the Residential Insulation Credit Act of 1977.

S. 240

At the request of Mr. DOLE, the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 240, to amend the Soil Conservation and Domestic Allotment Act.

S. 265

At the request of Mr. MCINTYRE, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 265, the Elderly and Handicapped Persons Transportation Act of 1977.

S. 459

At the request of Mr. CHURCH, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 459, to authorize reduced fares on airplanes for certain individuals.

S. 594

At the request of Mr. BENTSEN, the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 594, to amend the Trade Act of 1974.

S. 650

At the request of Mr. BELLMON, the Senator from Kansas (Mr. PEARSON) and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of S. 650, to provide temporary emergency assistance to wheat producers.

S. 689

At the request of Mr. KENNEDY, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 689, a bill to amend the Federal Aviation Act of 1958 to encourage, develop and attain an air transportation system which relies on competitive market forces.

S. 749

At the request of Mr. ANDERSON, the Senator from Missouri (Mr. EAGLETON) and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 749, to amend the Internal Revenue Code of 1954.

S. 801

At the request of Mr. MCINTYRE, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 801, to amend title I of the Housing and Community Development Act of 1974.

S. 808

At the request of Mr. CASE, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 808, a bill to encourage greater emphasis on the production and conservation of energy in developing countries through development and utilization of unconventional energy technologies.

S. 835

At the request of Mr. CHURCH, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 835, to provide a program of income tax counseling for elderly individuals.

S. 845

At the request of Mr. DOLE, the Senator from New Jersey (Mr. CASE) and the Senator from Massachusetts (Mr.

BROOKE) were added as cosponsors of S. 845, the Dole-McGovern Food Stamp Act of 1977.

S. 926

At the request of Mr. CLARK, the Senator from New York (Mr. JAVITS), the Senator from South Dakota (Mr. ABOUREZK), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 926, to provide for public financing of primary and general elections for the U.S. Senate.

S. 975

At the request of Mr. WILLIAMS, the Senator from Colorado (Mr. HART) and the Senator from New York (Mr. JAVITS) were added as cosponsors of S. 975, to improve the administration of the National Park System.

S. 995

At the request of Mr. WILLIAMS, the Senator from Connecticut (Mr. WEICKER), the Senator from Hawaii (Mr. INOUYE), the Senator from Arizona (Mr. DECONCINI), the Senator from Oklahoma (Mr. BELLMON), the Senator from Oregon (Mr. HATFIELD), and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 995, to amend the Civil Rights Act of 1964.

SENATE RESOLUTION 105

At the request of Mr. NELSON, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of Senate Resolution 105, calling for a White House Conference on Small Business.

SENATE RESOLUTION 117—SUBMISSION OF A RESOLUTION DESIGNATING NATIONAL SMALL BUSINESS WEEK

(Referred to the Committee on the Judiciary.)

Mr. NELSON (for himself, Mr. MCINTYRE, Mr. NUNN, Mr. HATHAWAY, Mr. HASKELL, Mr. CULVER, Mr. WEICKER, Mr. BARTLETT, and Mr. PACKWOOD) submitted the following resolution:

S. RES. 117

Resolved,

Whereas the United States of America is entering on a period of economic recovery;

Whereas such recovery can only be accomplished by a revitalization of the nation's small business community;

Whereas 97 percent of the more than 13 million enterprises in the United States are classified as small business;

Whereas these small enterprises provide 52 percent or more of all the non-government employment in the United States;

Whereas said small businesses provide 48 percent of the business output in the United States;

Whereas 43 percent of the Gross National Product of the United States is produced by small business;

Whereas more than one-half of all innovative and technological developments originate in the small business community; and

Whereas the Senate Small Business Committee and the Senate have consistently recommended a greater fostering of the nation's small business community as a resource to reduce unemployment, increase production, combat inflation, and to provide for future avenues of enterprise;

Therefore, be it resolved by the Senate of the United States that it is the sense of the Senate that the President of the United States by proclamation designate the week of May 22 through May 28, 1977 to be Small Business Week, for the purpose of fostering development of the small business community, providing for the discussion of new ideas on how to strengthen the small business community, and presenting an opportunity for the people of the United States to reaffirm the importance of small business to the overall economy of the nation.

Mr. NELSON. Mr. President, today Senators MCINTYRE, NUNN, HATHAWAY, HASKELL, CULVER, WEICKER, BARTLETT, and PACKWOOD, the members of the Small Business Committee, join with me in submitting a resolution asking the President to designate the week of May 22 through 28, 1977, as National Small Business Week.

The Nation's small business community is a vital and important part of our economy. It produces 48 percent of the Nation's business output, employs 52 percent of the nongovernmental work force, and produces 43 percent of the gross national product. The small business community's 13 million members make up 97 percent of all the business in the country.

Small business is a highly important innovative branch of the American economy. Its accomplishments include the introduction of mercury dry cells, air conditioners, power steering, jet engines, FM circuits, and photocopying machines. Independent entrepreneurs have pioneered new farming techniques, and have spurred the development of better manufacturing techniques, speedier distribution of goods, and the betterment of services. The independent, owner-managed business is the backbone of the American way of life.

However, small business is a troubled branch of the American economy.

It is saddled with the costs of complying with the regulations that were designed to control the Nation's largest companies. It faces an inequitable tax burden, as well as an excessive paperwork load. As a result, many small companies now work harder for the Government than for themselves.

Further, the small business community has usually not had access to or influence within the Government bureaucracy. Small companies faced with regulatory or taxation problems, or desirous of entering the Government procurement system have a difficult time in gaining easy access or quick action.

National Small Business Week should provide us with an opportunity to salute the Nation's 13 million small businesses, to call attention to their problems, and to publicly demonstrate their importance.

It would provide the Members of the Senate with an occasion for a dialog on small business, and to express new thoughts on these continuing problems. It could be a significant prelude to the White House Conference on Small Business called for in Senate Resolution 105.

Mr. President, I urge my colleagues to join in calling on President Carter to proclaim a National Small Business Week.

Mr. MCINTYRE. Mr. President, I am pleased to be a cosponsor of the resolution designating the week of May 22 through 28 as "National Small Business Week."

National Small Business Week gives us an opportunity to recognize the achievements of small business, and to focus our attention on the particular problems and needs of small businesses in this country.

There can be no doubt of the importance of small business to the health of the national economy. Small business employs 52 percent of the nongovernmental work force and 43 percent of the Nation's business output. Obviously the health of small business is fundamental to the economic well-being of the country.

I think it is important to remember that small business is also a highly creative and inventive sector of our economy. Indeed, products which have become the basis of major industries—from the light bulb to photocopying—were originated in small workshops and businesses. Small business is important, too, in maintaining the competitive nature of our economy. Not only do they generate new products and processes, such as new alternative energy devices, they are also the closest to the consumer and to the community. These businesses provide the individual attention and care to the product and the customer that means so much. Therefore, to further the interests of small business in this country is to strike a blow for the vitality of the free enterprise system.

We have a full agenda before us, Mr. President. The Senate has already shown that it cares about small business by acting to preserve the Committee on Small Business as an independent voice in the Senate committee structure.

Now we must act to continue our efforts to address the problems of paperwork and overregulation, inequities which do not permit small business to take full advantage of the tax laws, and to make the Federal Government and its programs more sensitive to small business.

SENATE RESOLUTION 118—SUBMISSION OF A RESOLUTION RELATING TO THE FOREIGN ASSISTANCE PROGRAM

(Referred to the Committee on Foreign Relations.)

Mr. PELL submitted the following resolution:

Whereas the United States desires to continue to help the less developed countries in their efforts to acquire the technology and resources necessary for development;

Whereas the idea of providing development, humanitarian, and disaster assistance, pioneered by the United States, has been taken up by multilateral organizations and private organizations as well as by other countries;

Whereas multilateral organizations and private organizations are becoming increasingly important and effective in providing development and other forms of assistance because, among other reasons, their activities are not influenced by national considerations; and

Whereas the President of the United States has called for a restructuring of the Execu-

tive Branch to increase its effectiveness: Now therefore, be it

Resolved, That it is the sense of the Senate that—

(1) continued, heavy reliance by the United States on bilateral assistance programs is no longer necessary or desirable; and

(2) the President should review the foreign assistance program with a view toward providing all United State's development, humanitarian, and disaster assistance through multilateral organizations and private organizations or through the Department of State where bilateral programs are appropriate.

ORGANIZATIONAL CHANGES IN THE PROVISION OF AMERICAN FOREIGN ASSISTANCE

Mr. PELL. Mr. President, today, I am submitting a resolution recommending that the President of the United States examine, in the context of his plans to reorganize the executive branch, the institutional structure of our foreign aid system with a view toward reorganizing it so that developmental, humanitarian and disaster assistance financed by appropriated funds would be channeled through multilateral and private organizations on one hand or the Department of State on the other where bilateral programs are appropriate for political reasons.

The United States has been the pioneer in promoting and implementing the idea of developmental, humanitarian and disaster assistance. We have been so successful in this that the number of nations as well as multilateral and private organizations providing such assistance has grown enormously.

This very success has, at the same time, considerably altered the circumstance surrounding assistance—broadening and diversifying its base—so that it now is another reflection of the great complexity and interdependence of our world. No longer is the United States the only important actor in this field, and no longer are governments the only significant sources of assistance. Indeed one of the most encouraging developments in this area is the growth of assistance activities managed and directed by multilateral organizations like the United Nations, the Organization of American States and the Inter-American Development Bank, and private organizations such as the Save the Children Federation, the Partners of the Americas or National Catholic Relief.

Let me give some examples of this growth: The International Bank for Reconstruction and Development committed $486.4 million to developing countries in 1964. Ten years later in 1974 the figure was $3.2 billion. The Inter-American Development Bank committed $118.2 million in 1964 but $1.1 billion in 1974. European Community commitments grew from $63.8 million in 1964 to $247 million in 1974. Grants from American private voluntary agencies increased from $599 million in 1971 to $735 million in 1974.

I find this trend to larger roles and responsibilities for nongovernmental organizations in the assistance field encouraging for two reasons: First, such organizations foster a shared sense of purpose and common struggle for a decent and meaningful life because they involve many people of diverse backgrounds from both developed and developing nations actively in the planning and implementation of assistance programs. This kind of cooperative behavior, which transcends governments, is an imperative in this era of interdependence. Second, this trend will probably result in more effective programs and, therefore, more useful and meaningful results.

The reasons for this effectiveness are many. The most important, however, is probably the fact that their activities do not jar the national sensitivities of the countries concerned. This permits them to set and enforce higher standards than can bilateral donors or lenders. The attitude of recipient countries is well expressed in the words of Eduardo Frei Montalva, the last Christian Democratic President of Chile:

It is inadmissible that the mere fact of making available financial aid gives any nation the right to demand that another implement specific types of structural changes. This would constitute an intolerable infringement of national sovereignty. That is why in this situation, it is necessary to use multilateral channels for the supply of foreign assistance.

This point was made more explicitly by Eugene Black in his farewell address to the Board of Governors of the International Bank for Reconstruction and Development:

An international organization will make aid available with the sole purpose of helping the country receiving that aid. Because they are known to have no ulterior motive, they can exert more influence over the use of a loan than is possible for a bilateral lender: they can insist that the projects for which they lend are established on a sound basis, and—most important—they can make their lending conditional on commensurate efforts being made by the recipient country itself.

In addition to this general rule of effectiveness of nongovernmental assistance programs, private organizations enjoy some unique additional advantages: Their programs directly involve and release the creative energy of large numbers of people in this country and others. This is a critically important matter for the shaping of cooperative international behavior because it creates constituencies with a concrete interest in it. Second, private programs, because of their diversity and relatively small scale, are likely to be more flexible and innovative than large, bureaucratic, official organizations. Finally, as I know from my own experience when I was vice president of the International Rescue Committee, private programs are generally more cost effective than governmental ones because their overhead costs are much lower—principally because the salaries they pay are lower and the prerequisites they provide to their employees are much less than those received by persons working for nonprivate groups. This, of course, is another expression of the high motivation animating the private groups.

At the same time, bilateral assistance programs are meeting with increased difficulty—principally because of their decreasing acceptability to the less developed countries for nationalistic reasons. This situation lessens their effectiveness and can lead to perversions of the original purpose of the assistance program if the donor or lending country compromises excessively on performance terms with the recipient country for reasons of state.

As I said earlier, the very success of assistance—a matter for which this country is largely responsible—has changed the circumstances surrounding it. The major change is the rise of other than governmental donors and lenders. This is a significant and welcome development and marks a step forward in international cooperation and in economical and effective assistance delivery. This trend should be encouraged, and we should act now to adjust our own official assistance programs to take advantage of this new reality and opportunity.

We are fortunate in that the necessity and opportunity to make such a change have converged. President Carter has frequently called for a reorganization of the executive branch of the Government to make it more effective, efficient and open. I believe that we should reorganize our foreign aid programs with a view toward channeling most U.S. development, humanitarian and disaster assistance through multilateral and private organizations on the one hand or through the Department of State on the other where bilateral programs are appropriate for political reasons. In the resolution which I am introducing today, President Carter is urged to consider such a reorganization.

SENATE CONCURRENT RESOLUTION 13—SUBMISSION OF A CONCURRENT RESOLUTION SETTING FORTH THE STANDARDS AND RIGHTS OF FOSTER CHILDREN

(Referred to the Committee on Human Resources.)

Mr. BARTLETT submitted the following concurrent resolution:

S. CON. RES. 13

Resolved by the Senate (the House of Representatives concurring), That every foster child has the following inherent rights and standards for treatment:

(1) to be cherished by a family of his own, either his family helped by readily available services and supports to reassume his care, or an adoptive family or by plan, a continuing foster family;

(2) to be nurtured by foster parents who have been selected to meet his individual needs, and who are provided services and supports, including specialized education, so that they can grow in their ability to enable the child to reach his potential;

(3) to receive sensitive, continuing help in understanding and accepting the reasons for his own family's inability to take care of him, and in developing confidence in his own self-worth;

(4) to receive continuing loving care and respect as a unique human being, a child growing in trust in himself and others;

(5) to grow up in freedom and dignity in a neighborhood of people who accept him with understanding, respect, and friendship;

(6) to receive help in overcoming deprivation or whatever distortion in his emotional, physical, intellectual, social, and spiritual growth may have resulted from his early experiences;

(7) to receive education, training, and career guidance to prepare him for a useful and satisfying life;

(8) to receive preparation for citizenship and parenthood through interaction with foster parents and other adults who are consistent role models;

(9) to be represented by an attorney at law in administrative or judicial proceedings with access to fair hearings and court review of decisions, so that his best interests are safeguarded;

(10) to receive a high quality of child welfare serviecs, including involvement of the natural parents and his own involvement in major decisions that affect his life.

Mr. BARTLETT. Mr. President, I am today submitting to the Senate a concurrent resolution on the status of foster children. I introduced this during the 1976 National Foster Children's Week, and it still seems appropriate that the Senate, and the Congress as a whole, should review the needs of the foster child.

A number of individuals in my own State of Oklahoma are very active in the organization, National Action for Foster Children Committee, which is an outgrowth of the National Conference of Foster Children held in 1971. It is a volunteer organization of lay citizens with the purpose of creating public awareness for the needs of foster children.

My State is also a very active participant in annual activities related to foster children, and several communities schedule special events and programs during this period.

The needs of foster children are basically the same as any other child's, but because of their unique position in our society, special attention needs to be drawn to their needs. My resolution enumerates rights and standards of treatment which have been endorsed nationally. The standards include family care, education, counseling, legal rights, and social services. I would hope that my fellow Senators would endorse this concurrent resolution for the benefit of the approximately 350,000 foster children of this country, and I encourage rapid consideration and expeditious handling.

SENATE CONCURRENT RESOLUTION 14—SUBMISSION OF A CONCURRENT RESOLUTION RELATING TO THE KILLING OF NEWBORN HARP SEALS

(Referred to the Committee on Foreign Relations.)

Mr. MATSUNAGA (for himself, Mr. CRANSTON, Mr. MAGNUSON, Mr. PACKWOOD, Mr. PELL, and Mr. WILLIAMS) submitted the following concurrent resolution:

S. CON. RES. 14

Resolved by the Senate (the House of Representatives concurring):

Whereas the annual six-week Harp seal hunt in Canada has commenced on March 15, 1977, amidst growing public concern and protest;

Whereas the Canadian Government has increased the quota for this year's hunt by one-third to 17,000 seal pelts;

Whereas the 1977 quota will allow hunters to kill up to 90 percent of the newborn seal pup population;

Whereas it is predicted that the annual hunt will eventually destroy the Harp seal herds;

Whereas seal hunting regulations in Canada allow the barbarous practice of killing the baby seals by repeatedly striking the heads of the animals with clubs; and

Whereas there is a growing international appreciation of the need to preserve the endangered species of animals: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That, because the killing of newborn Harp seals in Canadian waters is a cruel practice which may cause the extinction of that species of seals, the Government of Canada is urged to reassess its present policy of permitting such killing in Canadian waters.

CANADIAN HARP SEAL HUNT

Mr. MATSUNAGA. Mr. President, a cruel and brutal event is presently occurring along the eastern shorelines of Canada. The atrocity to which I am referring is the annual Canadian Harp seal hunt, which officially opened March 15 and will continue for the next 6 weeks, unless the Canadian Goverment takes immediate action to halt this plunder.

Mr. President, I cannot in all honesty and with a clear conscience overlook—nor dismiss—the tragic plight of the newborn Harp seal pups. Because of strong concerns and convictions toward safeguarding the welfare of endangered or potentially-endangered species of animals like the Canadian Harp seals, I along with Senator CRANSTON, Senator MAGNUSON, Senator PACKWOOD, Senator PELL, and Senator WILLIAMS now introduce a resolution urging the Canadian Government to reassess its current policy of permitting the killing of the newborn Harp seals in Canadian waters.

Despite burgeoning and large-scale international alarm and protest against the slaughter of the Harp seals, the Canadian Government continues to condone this violent annual spring rite. Furthermore, it has increased the quota for this year's hunt by one-third. This means up to 170,000 seals would be slain. Conservationists and environmentalists are already predicting that the hunt will eventually destroy the Harp seal herds and that the increased 1977 quota will enable hunters to eliminate up to 90 percent of the newborn seal population.

Every spring on the ice floes in the Gulf of the St. Lawrence and on the drifting ice off the Labrador coast, the Harp seals bear their young—only to have them slaughtered through merciless exploitation by fur hunters. Wielding hardwood clubs 24 to 30 inches long, hunters strike the foreheads of the newborn pups, crushing their paper-thin skulls.

Mr. President, through the companion resolution introduced by Congressman LEO J. RYAN of California along with a substantial number of cosponsors in the other body of the Congress, there is already a strong and fervent move to address the Canadian Government with this callous slaying of the Canadian seal pups. I urge this body to lend strong support and swift action to adopt the concurrent resolution which I propose. Each minute of delay in adopting this resolution endangers the continued existence of the Canadian Harp seal.

Mr. CRANSTON. Mr. President, I am pleased to join as cosponsor of a resolution by the distinguished Senator from Hawaii (Mr. MATSUNAGA) urging the Canadian Government to review its Harp seal hunt policy.

Many Californians have expressed to me their growing concern over the cruel manner in which these hunts are carried out, with clubs, and I believe Canadian officials should review their policy in light of the international concerns over these clearly inhumane seal-kill practices.

Mr. PELL. Mr. President, on March 15 the Canadian Government officially opened the hunting season on baby Harp seals. Thousands upon thousands of these baby seals, most only a few days old, will be slaughtered by both Canadian and Norwegian hunters off the coast of Canada.

Man is undoubtedly the worst predator in the history of the world. We have become inured to some of man's predations such as the slaughter of domesticated animals to provide man with food. The bludgeoning of baby Harp seals, however, assaults our sensitivities, for it is carried out not to provide for man's basic needs; but to provide man with a fine white fur.

The Harp seal has survived the perils of an Arctic existence for thousands of years. Its adaptations to ice and adverse weather are no defense, however, against the threat of man.

In the face of international outrage over these killings, the Canadian Government has made little progress toward halting these mass slaughterings. Faced by the threat of man's hunting, the future of the baby Harp seal is bleak, indeed. If the species is to survive, as surely it must, it will do so only in small numbers, unless action is taken in the very near future.

Mr. President, I believe that each of us must decry, as unconscionable, this inhumane and very unnecessary slaughter of a slowly diminishing species of animal, with which we share this Earth. For that reason I am happy to cosponsor the resolution submitted today by the distinguished Senator from Hawaii (Senator MATSUNAGA) urging the Government of Canada to reassess its policy in regard to Harp seals.

Mr. WILLIAMS. Mr. President, Tuesday of this week marked the beginning of the annual slaughter of baby seals in Canada.

Every spring, Harp seals come to the ice floes off the coasts of Newfoundland and Labrador to bear their young. When they are 3 or 4 days old, the pups' fur turns white, and stays that way for about 10 days. It is during this period that Canadian and Norwegian hunters descend on the seal herds, club the newborn seals to death, and skin them. The pelts are sent to the fur industries in Canada and Europe to be fashioned into coats and other luxury items.

Mr. President, I feel strongly that this hunt is inhumane. And I am convinced that it poses a clear threat to the survival of the harp seal.

In 1972, the Canadian Government itself released a report prepared by a spe-

cial advisory committee, which warned that the Harp seal was approaching extinction. The report recommended a phase-out of the seal hunt, followed by a moratorium on the killing.

Despite this recommendation and growing international protest, the Canadian Government continues to permit and support the annual hunt. In fact, this year's quota of 170,000 baby seals is a substantial increase over last year's.

Because of my concern about the survival of seals and other ocean mammals, I sponsored the Marine Mammal Protection Act, which became law in 1972. The act prohibits U.S. citizens from killing any marine mammal and bans the importation of marine mammals and marine mammal products. There is a specific prohibition on the taking or importation of marine mammals which are nursing or less than 8 months old.

The Marine Mammal Protection Act also encourages international efforts to conserve these species.

It is in the spirit of international cooperation and concern that I sent a telegram to Prime Minister Pierre Trudeau requesting his intervention on behalf of the Harp seal. It is in that same spirit that I join my distinguished colleague, Senator MATSUNAGA, today in sponsoring a concurrent resolution urging the Canadian Government to reassess its policy of allowing the baby seal hunt. I am hopeful that the full Senate will make clear its position on this matter, by passing the resolution without delay.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—SENATE RESOLUTION 110

AMENDMENT NO. 78

(Ordered to be printed and to lie on the table.)

Mr. ALLEN submitted an amendment intended to be proposed by him to Amendment No. 65 proposed to the resolution (S. Res. 110) to establish a Code of Official Conduct for Members, officers, and employees of the United States; and for other purposes.

AMENDMENTS NOS. 79 THROUGH 85 AND NO. 90

(Ordered to be printed and to lie on the table.)

Mr. SCHMITT submitted eight amendments intended to be proposed by him to amendment No. 65 proposed to the resolution (S. Res. 110), supra.

AMENDMENT NO. 86

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted an amendment intended to be proposed by him to amendment No. 65 proposed to the resolution (S. Res. 110), supra.

AMENDMENT NO. 92

(Ordered to be printed and to lie on the table.)

Mr. MUSKIE (for himself, Mr. BAYH, Mr. DOLE, Mr. GARN, Mr. INOUYE, Mr. LAXALT, Mr. LUGAR, Mr. MCGOVERN, Mr. PACKWOOD, Mr. SCHMITT, Mr. WALLOP, and Mr. DOMENICI) submitted the following amendment intended to be proposed to amendment No. 65, proposed to Senate Resolution 110, supra:

AMENDMENT NO. 92

On page 24, beginning with line 13, strike out all through line 24 on page 26.

Renumber proposed rules XLV through L (and cross references thereto) as XLIV through XLIX, respectively.

(*Explanation:* This amendment deletes Rule XLIV, "Outside Earned Income," and leaves in force the limitations on honoraria contained in the Federal Election Campaign Act Amendments of 1976.)

AMENDMENTS NOS. 93, 94, AND 95

Mr. MUSKIE submitted three amendments intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENT NO. 93

On page 24, beginning with line 13, strike out all through line 24 on page 26, and inset the following:

"RULE XLIV

"OUTSIDE INCOME

"1. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis), the aggregate amount of the outside income of such individual for such period shall not exceed 15 per centum of—

"(a) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(b) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"2. For the purposes of this rule, the term 'outside income' means all income (within the meaning of section 61 of the Internal Revenue Code of 1954), other than amounts disbursed by the Secretary of the Senate, reduced by the expenses incurred in the production of such income which are deductible for Federal income tax purposes. Such term includes, but is not limited to (1) income received as a result of personal services actually rendered; (2) income from family enterprises; (3) gains derived from dealings in property or investments; (4) interest; (5) rents; (6) dividends; (7) annuities; (8) income from discharge of indebtedness; (9) distributive shares of partnership income; (10) income from an interest in an estate or trust; and (11) any 'buy-out' arrangement from professional partnerships or businesses.

"3. Notwithstanding the limitations of paragraph 1, a Senator, officer, or employee may receive income in excess of the amount allowed by such paragraph if that excess income is—

"(a) necessary to pay Federal, State, or local income taxes;

"(b) received and expended for the purpose of influencing his nomination for election to, or his election to, public office; or

"(c) necessary to meet expenses forced upon him by extraordinary personal circumstances.

"RULE XLV

"ESTABLISHMENT OF TRUSTS

"1. A Senator, and an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis)—

"(a) who owns and controls property (other than a savings account) which is the source of income shall establish one or more trusts and transfer such property to one of such trusts; and

"(b) who receives income from any property which he does not own and control (including a trust of which he is not the grantor) shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of subparagraph (a).

"2. If a Senator, officer or employee receives income in excess of the amount which may be retained under rule XLIV, he shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of paragraph 1.

"3. For purposes of this rule, the term—

"(a) 'trust' means a trust (1) in which the management, investment and reinvestment of property constituting the corpus, and of the income therefrom, is solely at the discretion and under the control of the trustee, and (2) no distributions of income from which may be made to the grantor or any beneficiary except to the extent authorized under rule XLIV;

"(b) 'savings account' means an account in a financial institution upon which interest (as such term is used for Federal income tax purposes) is paid or credited, and, if an individual makes any withdrawal from a savings account during such year to the extent that the amount of such withdrawal does not exceed the amount of such interest;

"(c) 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954; and

"(d) an individual shall be considered as owning and controlling any property or interest therein (including a savings account)—

"(1) which he owns jointly with his spouse or a dependent; or

"(2) which is owned and controlled by his spouse or a dependent, but only to the extent that such property (or the amount in a savings account) was acquired from such individual by gift or was acquired, directly or indirectly, with funds or other property provided by such individual.

"4. An individual to whom paragraph 1 applies shall comply with the provisions of such paragraph within 90 days after the date on which such provisions first apply to such individual."

Renumber proposed rules XLV through L (and cross references thereto) as XLVI through LI, respectively.

On page 54, line 17, before "shall" insert "and rule XLV of the Standing Rules of the Senate (as so amended), relating to Establishment of Trusts,".

AMENDMENT NO. 94

On page 24, beginning with line 13, strike out all through line 24 on page 26, and insert the following:

"RULE XLIV

"OUTSIDE INCOME

"1. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis), the aggregate amount of the outside income of such individual for such period shall not exceed 15 per centum of—

"(a) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(b) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"2. For the purposes of this rule, the term 'outside income' means all income within the meaning of paragraph 3 below, other than amounts disbursed by the Secretary of the Senate, reduced by the expenss incurred in the production of such income which are deductible for Federal income tax purposes.

"3. 'Outside income' shall be limited to (1) income received as a result of personal services actually rendered; (2) income from family enterprises; (3) gains derived from

dealings in property or investments; (4) interest; (5) rents; (6) dividends; (7) mineral and patent royalties; (8) annuities; (9) income from discharge of indebtedness; (10) distributive shares of partnership income; (11) income from an interest in an estate or trust; (12) any 'buy-out' arrangement from professional partnerships or businesses; (13) income from the exercise of stock options; (14) and income from life insurance and endowment contracts.

"4. Notwithstanding the limitations of paragraph 1, a Senator, officer, or employee may receive income in excess of the amount allowed by such paragraph if that excess income is—

"(a) necessary to pay Federal, State, or local income taxes;

"(b) received and expended for the purpose of influencing his nomination for election to, or his election to, public office; or

"(c) necessary to meet expenses forced upon him by extraordinary personal circumstances.

"RULE XLV

"ESTABLISHMENT OF TRUSTS

"1. A Senator, and an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis)—

"(a) who owns and controls property (other than a savings account) which is the source of outside income shall establish one or more trusts and transfer such property to one of such trusts; and

"(b) who receives income from any property which he does not own and control (including a trust of which he is not the grantor) shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of subparagraph (a).

"2. If a Senator, officer or employee receives outside income in excess of the amount which may be retained under rule XLIV, he shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of paragraph 1.

"3. For purposes of this rule, the term—

"(a) 'trust' means a trust (1) in which the management, investment and reinvestment of property constituting the corpus, and of the income therefrom, is solely at the discretion and under the control of the trustee, and (2) no distributions of income from which may be made to the grantor or any beneficiary except to the extent authorized under rule XLIV;

"(b) 'savings account' means an account in a financial institution upon which interest (as such term is used for Federal income tax purposes) is paid or credited, and, if an individual makes any withdrawal from a savings account during such year to the extent that the amount of such withdrawal does not exceed the amount of such interest;

"(c) 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954; and

"(d) an individual shall be considered as owning and controlling any property or interest therein (including a savings account)—

"(1) which he owns jointly with his spouse or a dependent; or

"(2) which is owned and controlled by his spouse or a dependent, but only to the extent that such property (or the amount in a savings account) was acquired from such individual by gift or was acquired, directly or indirectly, with funds or other property provided by such individual.

"4. An individual to whom paragraph 1 applies shall comply with the provisions of such paragraph within 90 days after the date on which such provisions first apply to such individual."

Renumber proposed rules XLV through L (and cross references thereto) as XLVI through LI, respectively.

On page 54, line 16, strike out "Earned".

On page 54, line 17, before "shall" insert "and rule XLV of the Standing Rules of the Senate (as so amended), relating to Establishment of Trusts,".

AMENDMENT NO. 95

On page 24, beginning with line 13, strike out all through line 24 on page 26, and insert the following:

"RULE XLIV

"OUTSIDE INCOME

"1. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis), the aggregate amount of the outside income of such individual for such period shall not exceed 15 per centum of—

"(a) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(b) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"2. For the purposes of this rule, the term 'outside income' means all income (within the meaning of section 61 of the Internal Revenue Code of 1954), other than amounts disbursed by the Secretary of the Senate, reduced by the expenses incurred in the production of such income which are deductible for Federal income tax purposes. Such term is limited to (1) income received as a result of personal services actually rendered; (2) income from family enterprises; (3) gains derived from dealings in property or investments; (4) interests; (5) rents; (6) dividends; (7) annuities; (8) income from discharge of indebtedness; (9) distributive shares of partnership income; (10) income from an interest in an estate or trust; and (11) any 'buy-out' arrangement from professional partnerships or businesses.

"3. The term 'outside income' shall not include (1) disability benefits; (2) veterans' benefits; (3) income from pension plans or qualified deferred compensation plans; (4) income from service in the military reserve; (5) royalties from books; and (6) proceeds from the sale of creative or artistic work.

"4. Notwithstanding the limitations of paragraph 1, a Senator, officer, or employee may receive income in excess of the amount allowed by such paragraph if that excess income is—

"(a) necessary to pay Federal, State, or local income taxes;

"(b) received and expended for the purpose of influencing his nomination for election to, or his election to public office; or

"(c) necessary to meet expenses forced upon him by extraordinary personal circumstances.

"(b) who receives income from any property which he does not own and control (including a trust of which he is not the grantor) shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of subparagraph (a).

"2. If a Senator, officer or employee receives outside income in excess of the amount which may be retained under rule XLIV, he shall establish a trust and transfer such income to such trust, or shall transfer such income to a trust established for purposes of paragraph 1.

"3. For purposes of this rule, the term—

"(a) 'trust' means a trust (1) in which the management, investment and reinvestment of property constituting the corpus, and of the income therefrom, is solely at the discretion and under the control of the trustee, and (2) no distributions of income from which may be made to the grantor or any beneficiary except to the extent authorized under rule XLIV;

"(b) 'savings account' means an account in a financial institution upon which interest (as such term is used for Federal income tax purposes) is paid or credited, and, if an individual makes any withdrawal from a savings account during such year to the extent that the amount of such withdrawal does not exceed the amount of such interest;

"(c) 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954; and

"(d) an individual shall be considered as owning and controlling any property or interest therein (including a savings account)—

"(1) which he owns jointly with his spouse or a dependent; or

"(b) 'savings account' means an account in a financial institution upon which interest (as such term is used for Federal income tax purposes) is paid or credited, and, if an individual makes any withdrawal from a asvings account during such year to the extent that the amount of such withdrawal does not exceed the amount of such interest;

"(c) 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954; and

"(d) an individual shall be considered as owning and controlling any property or interest therein (including a savings account)—

"(1) which he owns jointly with his spouse or a dependent; or

"(2) which is owned and controlled by his spouse or a dependent, but only to the extent that such property (or the amount in a savings account) was acquired from such individual by gift or was acquired, directly or indirectly, with funds or other property provided by such individual.

"4. An individual to whom paragraph 1 applies shall comply with the provisions of such paragraph within 90 days after the date on which such provisions first apply to such individual."

Renumber proposed rules XLV through L (and cross references thereto) as XLVI through LI, respectively.

On page 54, line 16, strike out "Earned".

On page 54, line 17, before "shall" insert "and rule XLV of the Standing Rules of the Senate (as so amended), relating to Establishment of Trusts,".

AMENDMENT NO. 96

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENT NO. 97

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

Mr. CRANSTON. Mr. President, under the resolution before us, gifts to the Senator's spouse or dependents from any one source aggregating more than $100 or $250 for gifts of transportation, food or lodging in any one year must be disclosed. My amendment would raise the annual aggregate gift disclosure level to $500 for an adult dependent.

I am concerned about the adult son or daughter of a Senator who is attending college and is listed as a dependent for income tax purposes even though he or she is living away from home and is leading an independent adult life.

To require the public disclosure of gifts of say jewelry or clothing from a

boyfriend or girlfriend—gifts which might easily aggregate more than $100—would constitute an intolerable invasion of the privacy of these young men and women. A Senator's adult offspring should not be required to live in a fishbowl because of their parent's avocation.

Moreover, where is the equity for the 23-year-old graduate student living away from home but listed as a dependent who must make disclosure when his 21-year-old brother, still living at home, but employed and not a dependent, is not required to disclose gifts? Anyone attempting to influence the Senator by giving gifts to his dependents would hardly differentiate betwen the two sons—yet gifts to the older son would be disclosed—while gifts to the younger son would not be.

However, I do agree that a large gift to an adult dependent whom the Senator is supporting could have financial impact on the Senator. Thus I propose that the disclosure requirement be raised to $500 for an adult dependent.

AMENDMENT NO. 98

(Ordered to be printed and to lie on the table.)

Mr. MUSKIE submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENT No. 98

After line 12 of page 21, add the following:

"8. Each Senator will submit for public disclosure following each quarter of the calendar year a report on the average number of hours per week in session spent by him engaged in the following official duties: (a) preparation for and attendance at floor activities; (b) preparation for and attendance at committee meetings; (c) conferences with staff; (d) general legislative research and drafting; (e) meetings with and other activities on behalf of constituents or other private citizens; (f) meetings with and other activities involving other Federal, State and local government officials; (g) travel to and from and within home State; and (h) participation in conferences and other public events concerning public issues."

AMENDMENT NO. 99

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to Amendment No. 65 to Senate Resolution 110, supra.

Mr. CRANSTON. Mr. President, Senate Resolution 110 prohibits any officer or employees of the Senate from soliciting, holding, or distributing campaign funds for any candidates to Federal office except for one member of the Senator's staff in Washington and one in the home State office whom the Senator specifically designates to handle such funds.

My amendment will give a Senator the option to have both assistants designated to handle campaign funds in the Washington office.

Because a Senator's campaign committee is located in the home State, I personally do not find it necessary to have any member of my field office staff involved in handling campaign money. The campaign committee staff is, after all, charged with fundraising and handling all other financial aspects of a campaign. I try to keep my field office out of campaign financing activities and engaged only in providing constituent services and other official and nonpolitical Senate duties.

For me, and I imagine for other Senators, too, the need is greater to have people authorized to handle campaign funds in the Washington, D.C., office because of that office's distance from the campaign committee in the home State. As we all know, campaign contributions are sent quite frequently to the Senator directly, rather than to the local campaign organization or to the Senatorial Campaign Committees here in Washington.

I believe that in most offices the handling of campaign money requires two persons—besides the Senator—if only to have one acting as a backup in the event the other is ill or absent in the home State on business or on vacation. The two staff assistants generally are administrative or advisory personnel to whom the Senator has assigned responsibility over the nonfundraising political aspects of his office.

Of course, it should be understood that whatever fundraising restrictions are placed on staff, we cannot totally eliminate contact which support personnel such as mailroom assistants or secretaries will have with the fundraising process as contribution checks are channeled to the Senator or his two "political fund" assistants. I do not believe there is any way to control such contact.

AMENDMENT NO. 100

(Ordered to be printed and to lie on the table.)

Mr. ROTH (for himself, Mr. HASKELL, and Mr. WALLOP) submitted an amendment intended to be proposed by them to the resolution (S. Res. 110), supra.

AMENDMENTS NOS. 101 THROUGH 106

(Ordered to be printed and to lie on the table.)

Mr. DURKIN submitted six amendments intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENT No. 101

On page 30, line 7, insert the following: No member should vote, in committee or on the floor, on any matter where he individually or as a fiduciary, or his spouse or dependents, has a direct financial interest, or any other interest that could be substantially affected by the outcome of the vote.

On page 32, after line 1, insert the following new section:

(j) For purposes of this rule "financial interest" means ownership of a legal or equitable interest, however small, or a relationship as director, adviser, or other active participant in the matter being voted, except that:

(j) For purposes of this rule "financial investment fund that holds securities" is not a "financial interest" in such securities unless the member participates in the management of the fund;

(ii) An office in an educational, religious, charitable, fraternal, or civil organization is not a "financial interest" in securities held by the organization;

(iii) The proprietary interest of a policyholder in a mutual insurance company, of a depositor in a mutual savings association, or a similar proprietary interest, is a "financial interest" in the organization only if the outcome of the vote could substantially affect the value of the interest; and

(iv) Ownership of government securities is not to be considered a "financial interest" vote.

AMENDMENT No. 102

On page 26, line 8, through line 11 after the semi-colon strike the following:

(2) income from family enterprises if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor;

AMENDMENT No. 103

On page 26, line 8 through line 11, strike the following: "income from a family-owned farm employing no more than 10 employees if the services provided by the Senator or officer or employee of the Senate are not a material income producing factor."

AMENDMENT No. 104

On page 28, line 1, inserting the following: After the word "a" strike the word "principal."

AMENDMENT No. 105

On page 12, line 11, insert the following new section:

4. Each individual shall include in each report for each calendar year for which he is required to file a report under paragraph 1 a copy of his or her tax return filed with the Internal Revenue Service for the preceding tax year and a copy of a net worth financial statement setting forth the current fair market value of each asset and liability owned or owed by the reporting individual.

AMENDMENT No. 106

On page 35, line 15, insert the following:

(2) a Senator may mail franked mail with a simplified form of address for delivery within the State for which he was elected; and

(3) franked mail sent with a simplified form of address as provided under paragraph (1)—

(A) shall be prepared as directed by the Postal Service, and

(B) may be delivered to—

(i) each box holder or family on a rural or star route,

(ii) each post office box holder, and

(iii) each stop or box on a city carrier route.

AMENDMENT NO. 107

(Ordered to be printed and to lie on the table.)

Mr. BELLMON submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENTS NOS. 108 THROUGH 110

(Ordered to be printed and to lie on the table.)

Mr. PERCY. Mr. President, I am submitting three amendments for printing today which I will call up at a later time. Following is a brief description of each of the three amendments.

AGE DISCRIMINATION

The resolution prohibits discrimination in employment of Senate staff on the basis of race, color, religion, sex, national origin, or state of physical handicap. My amendment also prohibits discrimination on the basis of age.

ETHICS COMMITTEE STAFF ACCESS TO TAX RETURNS

This amendment would require the Ethics Committee to promulgate regulations to protect the confidentiality of tax returns examined by the Ethics Committee.

Such regulations shall include dis-

missal for employees disclosing such information to unauthorized persons.

I would have preferred to have written civil and criminal penalties into law for unauthorized disclosure of such information. However, as this is only a resolution, it cannot be used to enact statutory sanctions. The amendment therefore provides only for the Ethics Committee to promulgate rules to protect the confidentiality of tax returns.

At such time, however, that the Senate passes legislation to apply, in law, financial disclosure legislation to all three branches of Government, I will offer an amendment to apply civil and criminal penalties, in law, to employees who violate the confidentiality of tax returns.

STUDY OF CLERK HIRE ALLOWANCES

Senate Resolution 110 requires the Committee on Rules and Administration and the Committee on Appropriations to study Senatorial allowances to determine whether they are adequate to defray necessary and appropriate expenses incurred in connection with the operation of a Member's office.

This amendment would simply require that that study include whether or not clerk-hire allowances should be increased to provide sufficient administrative personnel for Members to comply with the provisions of this resolution.

It may be that the resolution as finally adopted will require bookkeeping and other reporting requirements not otherwise necessary which might involve additional expense.

Mr. President, I ask unanimous consent that the texts of these three amendments be printed at this point in the RECORD.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 108

On page 40, line 7, insert "age," after "origin,".

AMENDMENT NO. 109

On page 19, after line 5, insert the following new paragraph:

"(e) The Select Committee on Ethics shall promulgate regulations and procedures to ensure the confidentiality of tax returns and tax return information examined by the staff of that committee pursuant to subparagraph (b) above. Such regulations shall include the sanction of dismissal for any employee who knowingly and willfully communicates to any unauthorized person information derived from any confidentially filed tax return or tax return information examined pursuant to subparagraph (b) above."

AMENDMENT NO. 110

On page 49, line 22, after the ".", add,

"In considering such legislation, the Committees shall consider the need to increase clerk-hire allowances to provide for additional expenses that might be necessary to comply with the requirements of this resolution."

AGRICULTURE AND CONSUMER PROTECTION ACT—S. 275

AMENDMENTS NOS. 87, 88, AND 89

(Ordered to be printed and referred to the Committee on Agriculture, Nutrition, and Forestry.)

Mr. PEARSON. Mr. President, the authorizing legislation for the food for peace program expires on December 31, 1977, with the expiration of the Agriculture and Consumer Protection Act of 1973 (Public Law 93–86). It is appropriate, therefore, to analyze the current program and revise it, if necessary, during this session of the 95th Congress.

The two original goals of the food-for-peace program were to expand U.S. farm trade in order to reduce large surplus stocks which were expensive to store and to use U.S. abundance to assist needy nations. Thus, the goals specifically stated in the Agricultural Trade Development and Assistance Act (Public Law 480) were to develop new markets for American farm products, to dispose of surplus agricultural commodities, to combat hunger and malnutrition, to encourage economic development in developing nations, and to promote the foreign policy of the United States.

Since the beginning of the food-for-peace program in 1954, the United States has provided food assistance to more than 100 countries, at a loss of over $25 billion. Under title I, the United States sells farm commodities to needy nations at long-term, low interest rates. Under title II, the United States donates farm commodities to nations faced with famine or natural disasters. Many nations that required massive food aid in the early years of the program, such as West Germany and Japan, have become major cash customers of U.S. agricultural goods. An illustration of the success of the food aid and marketing goals of the program is that 14 developing countries, which received aid in the 1950's, have become net cash customers in the 1970's.

Mr. President, the world food situation took a dramatic change for the worse in 1972, when inclement weather combined with economic and political factors reduced global food reserves to a precarious level. Many poor areas, unable to purchase needed supplies, required immediate, massive shipments of food to combat famine. In 1972, the United States supplied 9.8 metric tons of food aid.

Tight food supplies throughout 1973, 1974, and even 1975 in some areas of the world influenced legislation emphasizing the humanitarian aspects of the program. The International Development and Food Assistance Act of 1975 (Public Law 94–161) set a minimum of 1.3 million metric tons for food donations under title II. It also required the allotment of at least 75 percent of the volume of title I sales to nations with a per capita GNP of $300 or less. These changes seemed reasonable in mid-1975 in light of the world food situation and the low level of U.S. stocks.

As we approach mid-1977, however, we face an improved world food situation and increasing U.S. grain stocks. Last September, the head of the United Nations Food and Agricultural Organization announced that the world food situation had improved for the first time since 1972 and that world carryover stocks were increasing.

Mr. President, the U.S. Department of Agriculture has estimated increases in the stocks of U.S. wheat and feed grains. The carryover for wheat at the end of this marketing year should top 1 billion bushels, the largest supply on hand since the early 1960's. As of January 1, 1977, U.S. stocks of corn and grain sorghum were 9 percent and 3 percent higher, respectively, than at the beginning of the previous year.

Because of these changes, we need to reexamine the limitations placed on Public Law 480 during the years of scarcity. First, I believe that the 75–25 percent allocation formula for title I has proved unworkable. It has resulted in nations that wish to purchase our food being unable to do so, even when we had the food to sell.

Second, the United States should encourage market development programs in the nations that receive Public Law 480 food. This will increase the amount of food that actually reaches the needy people in these nations by improving the distribution and storage and by increasing the uses to which this food can be put.

Third, the minimum tonnage figures as set in title II should be increased, as the amounts set in 1975 are too low to reflect the agricultural conditions of 1977.

Mr. President, the first amendment which I am introducing today will grant the President an additional option should he feel that "substantially changed circumstances merit a waiving of the 75–25 percent allocation formula for title I.

Mr. President, last year this provision proved counterproductive. Relatively good harvests in some of the poorest countries that usually buy title I commodities reduced their need for U.S. food. As they bought less, the total amount that could be sold also declined. To keep the 75–25 percent formula intact, the United States could not sell large amounts of food to other poor nations with per capita GNP's just over $300 a year.

The Agriculture Department originally predicted that countries below the $300 cutoff would require 3,262,000 tons this budget year. The countries above $300 a year would thus get 1,084,000 tons. Now, because of the bountiful harvests in India, Pakistan, and Bangladesh—all in the below $300 range—those projections stand at 2.6 million tons for the poorest countries. This causes a reduction of roughly 300,000 tons in the available allotments for the nations above the $300 per capita income.

Thus, for example, Morocco will only get half of the 100,000 tons of food which it needs. Jordan is expected to get only 50,000 tons of wheat, but could use up to another 100,000 tons.

Mr. President, both the foreign nations which wanted to buy and the U.S. farmers who wanted to sell were economically injured by the 75–25 percent formula. The formula conceived in 1975 was written for specific world conditions which have now changed.

Senator TALMADGE's bill (S. 275) would allow the President to reallocate food that was not sold under the 75–25 per-

cent provision to those nations with a per capita income over $300. I agree with this provision and hope that it will be included in the final version of the bill.

Mr. President, I would like to add a second criteria allowing the President to waive the 75–25 percent formula. I believe that domestic supplies should also serve as a factor. After the initial offers of food have been made to the nations with the lowest per capita income, remaining surpluses should be made available. The trigger device for this option should be when the surplus of a commodity is in excess of a year's domestic needs. In the case of wheat, for example, this would mean 530 million bushels. The present surplus is over 1 billion bushels, thus this provision would free 500 million bushels of wheat to be included in title I and available for sale to nations eager to buy American food.

Mr. President, the second amendment is concerned with market development.

Many developing nations find it impossible to finance needed technological innovations in their agri-industry sector. I urge that 5 percent of the proceeds of sales from title I shall be set aside and made available to the Secretary of Agriculture to finance projects that will aid in the utilization, distribution and storage of these commodities. This will enable a greater percentage of the food to actually reach the needy people. It will assist in developing new and better uses for the food.

Mr. President, let me give you some examples of the types of projects that would contribute significantly to future expansion of U.S. agricultural commodities. Indonesia would like to build a model bakery. The government of Indonesia recognizes the superiority of a combined rice/wheat versus an all-rice diet. Most bakeries are small and tradition-bound. Construction of the model bakeries would serve as a catalyst for encouraging bakers nationwide to modernize facilities.

Morocco needs financial and technical assistance to establish a pilot beef feed lot. Increased beef production would expand protein supplies for a growing population. The project would increase Morocco's demand for high quality beef animals, feed grains, and protein feeds.

Sudan is interested in construction of large dairy farms with capacities of 6,000 cows. Construction calls for new technology and financial assistance. Increased production of dairy products would help the growing demand in domestic and regional markets. U.S. cooperation would set the stage for expanded trade in dairy animals as well as feed concentrates.

Nigeria imports beans in cans which is costly and reaches only a small segment of the potential market. Domestic cannaries would assure lower priced commodities to the population and expand the demand for imported beans.

Mr. President, many nations which receive food from the United States have inadequate storage and handling facilities. A General Accounting Office report issued last November noted that food losses through spoilage and spillage destroyed approximately 10 percent of the food supply in most developing nations. Insects and rats also consume food that could nourish hungry humans. An emphasis on building adequate food storage facilities in recipient nations would be beneficial to all concerned.

Mr. President, again I commend Senator TALMADGE for his leadership in this field. His bill recognizes the great need for improved market development. This amendment clarifies two issues. First, it gives the control over this program solely to the Secretary of Agriculture. This will minimize jurisdictional disputes. Second, it delineates that the sole support for this program shall come from title I sales. This will simplify the funding for this program.

Mr. President, the third amendment will raise the minimum tonage figure set in title II by the legislation of 1975. Because programming agencies have tended to view the minimum levels as a target, rather than as a minimum, I urge that we increase this level from 1.3 million metric tons to 1.6 million metric tons.

Mr. President, this amendment calls for 100,000 tons to be placed at the disposal of the International Emergency Reserve. This is strictly a reserve of 500,000 metric tons, pledged to the world food program and made available for emergency humanitarian assistance. Placing this food at the disposal of the world food program should not be seen as a commitment by the United States to join the world food reserve program developed at the World Food Conference in 1974.

In addition, I believe that we should institute phased increases in the levels of the minimum amounts of title II donations consistent with the managerial abilities of both government and voluntary agencies.

Mr. President, the three amendments I have submitted today are consistent with the original aims of the food for peace program—to use American agricultural abundance to assist developing nations—and I urge their adoption.

NOTICE OF HEARING

COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referrred to and is now pending before the Committee on the Judiciary:

W. J. Michael Cody, of Tennessee, to be U.S. attorney for the western district of Tennessee for the term of 4 years, vice Thomas F. Turley Jr. resigning.

On behalf of the Committee on the Judiciary notice is hereby given to all persons interested in this nomination to file with the committee in writing, on or before Thursday March 24, 1977, any representations or objections they may wish to present concerning the above nomination with a further statement whether it is their intention to appear at any hearing which may be scheduled.

ADDITIONAL STATEMENTS

JOINT ST. PATRICK'S DAY APPEAL FOR PEACE IN NORTHERN IRELAND

Mr. KENNEDY. Mr. President, I ask unanimous consent that a joint St. Patrick's Day appeal for peace in northern Ireland, signed by the Speaker of the House of Representatives (Mr. O'NEILL), the distinguished junior Senator from New York (Mr. MOYNIHAN), Gov. Hugh L. Carey of New York, and myself, may be printed in the RECORD.

I also ask unanimous consent that the text of today's joint statement by Secretary of State Vance and Dr. Garret Fitzgerald, the Minister for Foreign Affairs of Ireland, may be printed in the RECORD, together with the text of yesterday's address by Dr. Fitzgerald at Georgetown University.

I commend Dr. Fitzgerald's address as an important and informative statement on the background and current situation in Northern Ireland, and I join many others in welcoming this extremely able minister of the Irish Government to this country on his St. Patrick's Day visit.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOINT ST. PATRICK'S DAY APPEAL FOR PEACE IN NORTHERN IRELAND, MARCH 17, 1977

The world has looked with increasing concern over the past eight years on the continuing tragedy that afflicts the people of Northern Ireland. Each of us has tried in the past to use our good offices to help see that the underlying injustices at the heart of the Northern Ireland tragedy are ended, so that a just and peaceful settlement may be secured.

It is evident to us, as it is to concerned people everywhere, that continued violence cannot assist the achievement of such a settlement, but can only exacerbate the wounds that divide the people of Northern Ireland.

We therefore join together in this appeal, which we make in a spirit of compassion and concern for the suffering people in the troubled part of Ireland. We appeal to all those organizations engaged in violence to renounce their campaigns of death and destruction and return to the path of life and peace. And we appeal as well to our fellow Americans to embrace this goal of peace, and to renounce any action that promotes the current violence or provides support or encouragement for organizations engaged in violence.

We make this appeal on St. Patrick's Day 1977, a day on which Irish peoples of all traditions everywhere should feel proud to rejoice in our common heritage, and a year in which peace should come at last to Northern Ireland.

EDWARD M. KENNEDY,
THOMAS P. O'NEILL, JR.,
DANIEL PATRICK MOYNIHAN,
HUGH L. CAREY.

TEXT OF JOINT STATEMENT ISSUED BY THE MINISTER FOR FOREIGN AFFAIRS OF IRELAND, DR. GARRET FITZGERALD, AND THE U.S. SECRETARY OF STATE, MR. CYRUS VANCE, FOLLOWING THEIR MEETING ON THE MORNING OF MARCH 17, 1977

1. The Minister for Foreign Affairs and the U.S. Secretary of State discussed the situation in Northern Ireland and expressed concern about the continued violence there.

2. The Minister for Foreign Affairs expressed appreciation to the Secretary of State for the continued efforts of the U.S. Administration to limit support for violence in Northern Ireland by persons mistakenly motivated in the United States, and for its wish to ensure that legitimate concern for human rights is not misused by those who support violence as a means to political ends in Ireland.

3. The Secretary of State reaffirmed the longstanding U.S. Government policy of

non-involvement in the issue of Northern Ireland.

4. Both the Secretary of State and the Minister for Foreign Affairs expressed their commitment to the statement of President Carter made on October 28, 1976 which opposed violence as part of a solution to the Irish question and expressed support for negotiations and peaceful means for finding a just solution involving the two communities of Northern Ireland and which would protect human rights.

TEXT OF SPEECH DELIVERED AT GEORGETOWN UNIVERSITY BY DR. GARRET FITZGERALD ON MARCH 16, 1977

When I travel outside Ireland and discuss the problem of Northern Ireland with people in other countries I am always struck by the different prespective from which this tragic problem is viewed externally. Outside Ireland, it seems to me, the Northern Ireland crisis is, perhaps because of media treatment, seen primarily as one of violent conflict between organizations dedicated to destruction and murder. The political aspect of the situation is little reported and little understood. It is the IRA, its various splinter organisations, and Protestant para-military bodies such as the UDA and UVF, as they kill and destroy, make the headlines, or at least find mention in the media of countries outside Ireland.

To many people in the world the conflict thus may seem to be one primarily between these bodies, which, in some way are seen by much of world public opinion as representing, or at any rate reflecting, the moods and wishes and fears of the two different sections of the population of Northern Ireland with their different ethnic origins.

Of course, within Ireland as outside it, the activities of these organisations make many of the headlines. No one living in Ireland North or South could fail to feel overwhelmed by the torrent of meaningless violence which has continued, seemingly unendingly for so many years, and which from time to time in various ways has overflowed from the North to the Republic and to Great Britain.

The scale of its impact may best be seen and may best be grasped by an American audience, perhaps, by multiplying the consequences of this violence in terms of the population difference between the United States and Northern Ireland. The United States has a population 150 times greater than that of Northern Ireland. Thus the death roll in Northern Ireland if it were to be reproduced on an American scale would have involved over 200,000 deaths and 2½ million injuries over a period of less than 8 years. Moreover the scale of damage to property, as a percentage of the gross domestic product of Northern Ireland would be equivalent in American terms to something like 50 billion dollars a year.

At the same time the arbitrariness of the violence, which puts every member of the community at risks, is a particularly demoralising feature. We are not dealing here with a guerrilla campaign between revolutionary or para-military forces and the institutional forces of law and order—this type of conflict represents only a very small fraction indeed of the violence in Northern Ireland. The vast majority of the murders, especially in recent years, have been sectarian killings in which Protestants are murdered by the IRA simply because they are Protestants, and therefore presumed to support the union with Great Britain, while Catholics are murdered by Protestant paramilitary gangs simply because they are presumed to be opposed to this union. The shooting down of ordinary citizens in their homes and at their places of work, or their mass murder by the bombing of bars, restaurants, shops, etc. has created an atmosphere of total insecurity for the entire community. At certain times the IRA campaign takes marginally different forms—thus at present the Provisional IRA are concentrating on murdering Protestant business men in the hope that in this way they may disrupt the economy of Northern Ireland, as they have failed to do by blowing up property.

This violence has from time to time overflowed into the Republic also. Amongst the crimes committed by Provisional IRA activists in the Republic, have been the murder of one of my political colleagues, a Protestant Senator, who happened to visit the home of his fiancee at a time when a Provincial IRA gang were burning down the house, and throwing the family Bible into the fire. The family happened to be Protestants: the recent murder of a member of the police force of the Republic by setting a booby trap in a deserted house, then phoning the police anonymously to make sure they would come to the house; the burning down of cinemas in the centre of Dublin; the kidnapping of the Dutch businessman, Mr. Herrema; the murder of the British Ambassador and a girl member of the Northern Ireland office staff and hundreds of robberies of post offices, banks and shops.

These facts about the Provisional IRA and its campaign of indiscriminate and largely sectarian violence need to be bluntly stated and cannot be glossed over.

The acts of violence undertaken by these organisations do not however, to us in Ireland, represent the key to the Northern Ireland problem. Indeed by their campaign, which has disgusted the vast majority of the Irish people, North and South, they have made themselves irrelevant to the real problem—the political problem. They are of course relevant to the extent that their violence creates tensions within the Northern Ireland community which make political negotiations between representative groups of the two sections of the community more difficult. But they are relevant only in this negative sense, thus few people in Ireland, North or South, believe for a moment that the problem of Northern Ireland would be resolved by some kind of negotiation involving these violent groups, or negotiation between them. Even their negative impact on the possibility of finding a political solution is probably far from decisive. It is certainly arguable that a much more potent obstacle to agreement between political representatives of the two sections of the community has been the impact of extreme Protestant politicians whose influence has been a powerful barrier to conciliation on the Loyalist side.

To understand why the role of the men of violence is seen in Ireland as not being politically crucial it is necessary to understand how little support they have amongst the people in either section of the community in Northern Ireland or in the Republic. This is to a large degree measurable in political terms because during the period of the Northern Ireland crisis since 1968 many elections have taken place, both in Northern Ireland and in the Republic, which have not merely been completely free elections, but which in the Republic throughout this period and in Northern Ireland in the latter part of this period, have been carried out according to a proportional representation system which provides a very accurate reflection of the voting pattern in the strengths of the different political groups elected to office.

It is true that in a number of instances the extremists have not put forward candidates for elections because of their consciousness of their political weakness. But all the extremist groups have been tested to some extent on some occasions, and all have failed to secure even the most minimal support.

Thus, Provisional Sinn Fein, the political party of the Provisional IRA, put forward candidates in half the constituencies in local government elections in the Republic in 1974 and secured 1½% of the votes. In Northern Ireland Provisional Sinn Fein have not put forward candidates at any election. On occasions candidates however, have gone forward who are known to reflect their viewpoint and in no proportional representation election have any of these been elected to a provincial body—Parliament, Assembly or Convention. In general the position of Provisional Sinn Fein with regard to elections in Northern Ireland has been one of advocating abstention from the polls and it is possible to measure approximately the amount of support implied by this policy by seeing the extent to which the voting strength of the Nationalist Catholic section of the population is under-represented at the polls. Such an analysis does not suggest that their political support has run to more than about five or six per cent at any period.

So far so the Official IRA represented by Official Sinn Fein are concerned, they have presented candidates both in the Republic and in Northern Ireland. Like the Provisional Sinn Fein they secured 1½% of the votes in the local elections in 1974 in the Republic. In Northern Ireland they also secured a somewhat similar small percentage in local elections but have failed on any occasion to have one of their representatives elected to the regional Parliament, Assembly or Convention.

On the Protestant side some of the paramilitary organisations have in certain elections put forward candidates for election. It has been rare indeed for any of these candidates even to secure as many as 1,000 votes in constituencies where the votes run into tens of thousands.

Against this background it is easy to see why in Ireland itself these bodies are regarded as having little political significance, however much death and destruction they can wreak. Therefore the political discussion in Ireland turns around the positions of the political parties in Northern Ireland which actually secure the support of the electorate in frequent free elections that have taken place there during this period of crisis.

These political parties represent the two different sections of this community, which is divided basically on ethnic lines, between the descendants of the original Irish inhabitants of this part of the province of Ulster and the descendants of the 17th century colonists who came there from England and Scotland. Unlike all the earlier colonists—and Ireland has been colonised wholly or partially many times during the millennia—those who came in this last wave of colonisation in the 17th century failed to assimilate with the indigenous inhabitants because of the religious division that had arisen through the reformation in the previous century. It was the lack of intermarriage between the colonists and the earlier inhabitants, caused by this religious division, which ensured that each of these two groups has retained its own sense of indentity over a period of almost four centuries.

The more immediate roots of the present problem lie, however, in the reactions of British governments immediately before and after the first World War to the problem posed by the insistent demand of the great majority of the Irish people for, as a minimum, self-government within the United Kingdom, or Home Rule. The descendants of the post-reformation colonists, Protestant by religion, not merely in North East Ireland, where they represented a local majority, but also in the rest of the island where their numbers were much smaller, feared the consequences of finding themselves under the control of a Home Rule government democratically elected by the majority of the Irish people, Roman Catholic in religion, and, it was feared, likely to feel resentful at the centuries-long domination by the minority of colonists.

Throughout most of the country this Unionist Protestant minority was too small to influence the ultimate decision to grant Home Rule, but in the North East, in parts of which the Protestant Unionists outnumbered the Catholic Nationalists by over 2 to 1, the situation was different. The threat of violent resistance to Home Rule by this local Protestant majority in the North East weakened the resolution of successive British governments to give Home Rule to Ireland *as a unit* and led to the decision in 1920 to set up two Home Rule parliaments, one in the North East and one in the remainder of the country.

The motivation for this decision is something which historians will eventually have to judge. In part at least it certainly reflected an unwillingness on the part of British politicans to take on such a powerful and determined group as the Protestant Unionists majority in the North East corner of the island. There may also, however, have been a further consideration—the apparent desirability from Britain's point of view of ensuring that, in part of Ireland at least, there would be a government backed by a local majority strongly loyal to the British connection and securing for Britain a reliable strategic base in the island, the greater part of which might be expected to move on in due course from Home Rule to independence.

Historians will also have to judge as to the wisdom of this decision to divide Ireland in this way. It seems to me unlikely that they will conclude that the decision was one that was wise in the long-term interests of Ireland or perhaps, indeed, even of Britain.

First, so far as Northern Ireland is concerned the effect of the decision was to give a dominant and controlling position in that area to a local majority which still psychologically felt itself to be a minority in the island as a whole, fearful of the new Irish State evolving to the South of it, and fearful of the nationalist Catholic minority within its own frontiers. This fear-ridden group, determined to hang on to the privileges which the Protestant minority had had in Ireland throughout the period of British rule, reacted to the creation of the new Northern Ireland Home Rule area by taking discriminatory measures against the artificially-created Catholic nationalist minority within this area—measures designed to ensure that wherever possible this minority would not gain control even of local administrations where they had a local majority and to discourage them from finding employment within Northern Ireland, thus minimising the danger of a deeply feared term demographic shift in their favour, based on the higher Catholic birth rate.

Thus, so far as the social psychological, and political situation of Northern Ireland was concerned, the solution, a partition, produced the worst possible result especially as Britain's satisfaction at having, as most British political leaders short-sightedly thought, found a solution to the Irish problem led successive British governments to abdicate completely their responsibility for controlling the discriminatory actions of the provincial governments formed exclusively by representatives of the Protestant Unionists.

In the Republic, too, the division of the island in 1920 had bad effects. When the Home Rule status of this larger part of the island was transformed into Dominion status within the British Commonwealth in 1922, (which became full sovereign independence in 1931), this new State found itself with an overwhelmingly Roman Catholic population—the Protestant minority within this area was only 6% at that time. This had the effect of encouraging successive governments in the Republic to modify some of the laws of the State inherited from the previous period of British rule along lines compatible with the teaching of the Roman Catholic Church on certain moral issues, and led to the introduction of a new Constitution in 1937 which also bore the marks of Roman Catholic influence.

At the same time the new State sought to repay the debt it owed to the language revival movement of the early years of the century by making the use of the Irish language essential for school examination purposes and for entry to the public service. Thus the new Irish State developed along Catholic, Gaelic lines which tended to deepen the divisions that already existed before independence between North and South.

Another consequence of the division of the island so far as the Republic was concerned was that the initial incredulity and non-acceptance of the idea that the island of Ireland could be divided, turned gradually into a form of irrendentism on the part of the new State, best summed up in the phrase "give us back our lost Six Counties" as if these six counties were the property of the other twenty six! Even though this view was not in most cases held with much passion or strong conviction, nevertheless it exacerbated relations between North and South and intensified the already pre-existing fears of the Northern Protestant Unionists.

The situation created by the division of the country and the establishment of a Home Rule system in Northern Ireland was one which clearly carried with it ultimately the seeds of its own destruction. The Catholic Nationalist minority artificially created within Northern Ireland could not be expected indefinitely to accept total exclusion from power at the level of the provincial government and in the late 1960s the resentment of this minority was transformed from a sterile anti-partitionism to a constructive demand for civil rights and the ending of discrimination. This switch in the whole emphasis of the policies pursued by the nationalist minority in Northern Ireland owed much to the example of the American Civil Rights movement of the 1960s.

Because this new movement involved, on the part of the Catholic nationalist minority in Northern Ireland, an implied acceptance of the existance of Northern Ireland, for the time being at least, and a willingness to participate in its institutions, it carried with it the possibility and prospect of at least an interim solution to the Irish problem—had the Protestant Unionist majority had the imagination to grasp the opportunity thus offered. Unfortnately this did not happen. The shock effect of seeing the system of safeguards for their domination through discrimination, built up so carefully over so many decades, destroyed overnight by the reforms imposed by the British government in 1969, following the demands of the Civil Rights movement, had indeed the opposite effect on the Protestant Unionists. To them the Civil Rights movement appeared not as a belated acceptance by the Catholic nationalists of the Northern Ireland statelet, and a willingness to work within the system there, but rather as a threat to what they had come to accept as their natural right to control exclusively and indefinitely the fortunes of this area, without interference from the sovereign British power, and without effective resistance from the Catholic Nationalist minority.

Throughout the whole of the period since the Northern crisis started, it is this psychological attitude of the Protestant Unionist majority which has posed an insuperable obstacle to a solution to the problem of governing Northern Ireland. In other respects, however, the political situation has evolved favourably, and several other major obstacles to a solution have removed themselves.

Thus, quite apart from the highly significant change in the attitude of the Catholic nationalist minority within Northern Ireland, a change also occurred during the early 1970s in the attitude of politicians and public opinion in the Republic. The unthinking irredentism of many decades in this part of Ireland has been displaced by a new, more realistic, and more generous approach, involving a recognition of the impossibility of securing a reunification of Ireland by any other means than the free consent of a majority of the people of Northern Ireland.

This change in attitudes in the Republic is important because it has effectively removed one of the major psychological problems of the Northern Protestant majority—the fear that the larger and more heavily populated Southern Irish State would in some way and at some point seek to impose and succeed in imposing, reunification, against the wishes of the Protestant majority in Northern Ireland.

Yet another obstacle to a solution disappeared around the same time, as British politicians and British public opinion, faced with the intractable character of the political problems of Northern Ireland, woke up to the fact that retaining control of this area brought more problems in its wake than it did advantages. In a nuclear age the presumed strategic advantage of bases in the area was in any event greatly reduced, and the burden imposed on Britain, both financially and strategically in terms of the need to transfer troops from Germany to Northern Ireland, thus weakening the United Kingdom's participation in NATO, has created a completely different situation, in which the great majority of British politicians and British public opinion have lost all interest in remaining in Northern Ireland save to the extent and for the period necessary to find an honourable solution and one that will not leave behind chaos and civil war in an island within a dozen miles of their shores.

While there remain those in Ireland who do not yet recognise this fundamental change in British attitudes, and who still see the Northern Ireland problem in simplistic terms as being merely a question of getting British out of the part of Ireland over which it still exercises sovereignty, this view no longer commands general support; both in Northern Ireland and in the Republic the great majority of people recognise that the real problem is rather the relationship between the two sections of the community in Northern Ireland, whose mutual fears of each other are such that, given the existence of para-military bodies on both sides, the premature withdrawal of the British presence could precipitate a real civil war.

At the same time it has to be said that there is a school of thought that despairs of a solution being found by political means in the foreseeable future and that is prepared, if not to risk the consequences of an actual British withdrawal, at least to take a chance on a declaration by Britain of an intent to withdraw at some future time. However, given the danger that even such a long-term declaration of intent could precipitate a major crisis, by tempting extremists on both sides to move in rapidly to fill the potential vacuum that would be created by such a British declaration, this idea is firmly rejected by the Irish Government, whose first and compelling concern must be the avoidance of the danger of a drastic intensification of violence in the North, where the very survival of the isolated Catholic Nationalist minority who live in so-called "ghetto areas" in the Eastern part of the province would be in danger.

I have spoken of the changes that have taken place in the attitude of the Catholic Nationalist minority in Northern Ireland, of the new perception of the problem in the Republic, and of the—somewhat belated—British recognition that they no longer have an interest in maintaining a presence on Irish soil.

Thus the last seven years have seen major changes taken place in a number of the elements of the Northern Ireland problem so that the previously numerous and in combination apparently insoluble political difficulties have now been reduced to one single issue—the willingness of the Protestant Unionist majority to share power with elected representatives of the Catholic nationalist minority, who are willing to join in the government and administration of

the province, and to work with representatives of the Protestant Unionist majority to put down violence emanating from both extreme—and who are also willing to agree that the question of the reunification of Ireland be left to be determined in the future by a majority decision of the people of Northern Ireland.

Given that in any such power-sharing government or administration the elected representatives of the Protestant unionists would be entitled on a proportional basis to 65–70% of the seats in government, it may not be easy to understand why this issue should be, or have become, the final stumbling block in the way of a political solution to the Northern Ireland problem. To a certain extent at least this difficulty has arisen because of the fact that in the difficult process of mental readjustment to the ending of the period of Protestant Unionist domination, which has led to the break up of the Unionist party monolith into half a dozen political parties, a number of these new parties have fought to retain the support of the Protestant Unionist electorate by making this issue of power-sharing a crucial question—in other words by getting on a political hook on this issue.

But the fact that this has happened is itself a reflection of the depth of the fears and misunderstandings that exist between the two sections of the community in Northern Ireland. A large proportion of the Protestant Unionist electorate, in its fear for the survival of the identity of this section of the community, makes few or no distinctions between the tiny minority of IRA supporters on the one hand, and the vast majority of the Catholic nationalist community who support the constitutional SDLP party which is opposed to violence, and is willing to work within the existing system on a power-sharing basis until such time as a majority in Northern Ireland agree to political reunification of the island.

These fears are easily played upon by the more extremist of Protestant Unionist politicians. And the less extreme political leaders on the Protestant Unionist side clearly fear that any compromise on what has been elevated into the crucial issue—viz. power-sharing in government—will play into the hands of Paisley, and will lead to their being discredited with the electorate, as other Unionist politicians have been discredited in the recent past when they have agreed to compromise on the power-sharing issue.

Another reason why the question of power-sharing has not yet been faced by the leaders of the Protestant Unionist majority is that while it has been the policy of the British Government and Opposition since 1972 that devolved provincial government will be restored only on a power-sharing basis, during a significant part of this period—in particular between 1974 and 1976—this policy was not always clearly enunciated by British political leaders. Fearful of alienating Unionist opinion by too aggressive statement of this policy, both the British Government and Opposition at various periods during this 2-year period have weakened their impact upon Unionist opinion by seeming to water it down or to play it down.

However, since last Autumn there has been a clear recognition in British political circles of the counter-productive character of this trend towards a watering down or playing down of the power-sharing issue and a very positive re-statement of British policy, both by the Government and by the Opposition, has in recent months reconcentrated attention on this question of power-sharing and has faced the Protestant Unionist majority more clearly than for several years past with the need to redefine in some way their policy on this issue, if they are to secure, as the vast majority of them clearly wish to secure, a restoration of devolved provincial self-government. In this situation there exists some possibility of political movement, although past disappointments in this respect have been so numerous that most people continue to regard the possibility of an early political solution with considerable scepticism.

In the meantime the problem facing politicians in Northern Ireland is that of maintaining their role in society over a prolonged period during which they have no formal functions to perform. These politicians were elected less than two years ago to a Convention, designed to seek a political solution; but they failed to agree, and this Convention was dissolved by the British Government. The facilities available to the politicians in the form of the Parliament building at Stormont, near Belfast, were then withdrawn from them, and even the function of representing local constituency interests ceased to be recognized by the British Government.

These British tactics, which many regard as seriously mistaken, have created severe problems for the politicians in Northern Ireland, who need above all to have a positive role to play during the period while opinion evolves towards agreement on some kind of solution to the power-sharing problem. There is a real danger that the political system in Northern Ireland could disintegrate if left too long in this state of limbo, and there is therefore—quite apart from the urgency imposed by the continuing campaign of violence—a very real need for early progress along this road.

CONCORDE LANDING

Mr. GOLDWATER. Mr. President, this rather childish attitude of New York relative to the Concorde landing at the JFK Airport or not, has gone far enough, in my opinion. No one can object to the attitude that is growing in France and England that if we are going to have this attitude against the world's most modern airliner, which is not made in America, then it would be perfectly natural for them to take this same attitude against our jets landing in their country. The Concorde has been landing at Dulles Airport for many months and no one seems to have moved away or raised any unusual objections. I would hope that New York would agree to having this airliner land at its airport. I am sure that those people who, for some reasons known only to themselves, like to build homes near busy airports, would get used to the noise of the Concorde in short order and the United States could join those forward-looking countries which are not afraid of improvements in transportation. Mr. Robert Hotz has written an editorial entitled "New York's Concorde Stall," and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NEW YORK'S CONCORDE STALL

(By Robert Hotz)

The political authorities of New York have no valid reason for banning Concorde operations from John F. Kennedy International Airport, so they are conducting an obfuscating bureaucratic delaying action that is typical of that bankrupt municipality. The Port Authority of New York and New Jersey originally promised a Concorde decision on Dec. 10 based on the six-month test operations at Washington's Dulles International Airport.

British Airways and Air France Concordes have been operating to Dulles for nine months. During this period, about 27,000 fare-paying passengers have flown the Atlantic in half the normal subsonic jet schedule on about 380 flights. The Federal Aviation Administration has monitored noises and environmental effects and made the data available publicly. The Concorde has been flying over the states of Virginia, Maryland and Delaware without a smidgen of sonic boom.

Its airport vicinity noise is about the same as the early-vintage 707 and DC–8 but vanishes quicker because of a faster climb to altitude. Both Washington newspapers, the Post and Star, which were violently anti-Concorde before it arrived on the Washington scene, recently have urged New York to permit a similar Concorde test period. Even President Jimmy Carter, who mouthed some of the now-outdated environmental cliches during his presidential campaign, is now finding that New York's unreasoning intransigence is about to cause him some severe international headaches with Britain and France and is backing off his earlier opposition to supersonic flight.

In Britain, where anti-Concorde hysteria was even worse than in New York, a year of actual operations has dissolved all of the myths its opponents propagated before any facts were available. The resident of greater London and greater Paris, as well as Washington, has been living with Concorde without any of the direct consequences ranging from skin cancer to shattered windows prophesied by the anti-Concorde witch doctors. Dallas is preparing to receive the Concorde to provide the fastest possible link for its burgeoning business community with Europe.

There were three principal bugaboos raised about the Concorde and all supersonic flight operations before Concorde went into transatlantic service. They were:

SONIC BOOM

Even the most hysterical of the boom bombasts must now concede that nobody within acoustical range of any Concorde terminal has ever heard a sonic boom from Concorde. However, the New York Times is still shrilling that Concorde's "vibrations tilt paintings on the wall and rattle dishes on the shelves." We challenge the Times to produce one authenic incident where Concorde's "vibrations" tilted a single painting or rattled a single dish. In actual instrumented tests along the west coast of England during early Concorde flight testing, it was determined that Concorde's high-altitude cruise overpressures had less effect on the ancient cathedrals than the mighty organs that boomed in their interior every Sunday.

ENVIRONMENTAL POLLUTION

The U.S. government has spent $23 million to study the effect of supersonic flight on the environment and concluded its effects, if any, were negligible. The whole mythology of the supersonic environmental pollution of which President Jimmy Carter was a gullible victim has evaporated in the face of scientific study.

AIRPORT NOISE

This is the only problem on which Concorde critics can still make an argument, if not a case. Concorde is about as noisy as earlier U.S. jets that have been operating out of JFK for almost 20 years without any serious attempt to ban them. It is noiser than later model transports equipped with high bypass ratio fan engines. However, Concorde's noise pattern does not spread as far into the surrounding community as the subsonic jets' because of its more rapid rate of climb. Aside from all the engineering-legalistic gobbledygook of the noise measuring profession, Concorde flights in and out of JFK would hardly be perceptible to the surrounding community against the current noise level background. We sympathize with the annoyance of people unfortunate enough to have picked homes in the immediate vicinity of a jet airport, but trying to crucify Concorde will not solve their problems.

The 16-month test period for Concorde operations in the U.S. originally included

New York as well as Washington, but the Port Authority, intimidated by the political thunderers, has steadfastly refused to allow any factual testing. Instead it has commissioned two professors to write studies on the theoretical effects of Concorde operations in New York. It is obvious that the Port Authority does not want to face facts but rather to search for theories that can justify its delays.

New York City has been trying to combat the dry rot that has been eroding its former preeminence as the commercial capital of this nation. At the heart of this problem is its viability as a communications center. Air traffic at JFK has been declining for the past five years as seasoned travelers seek to bypass New York. A high percentage of Concorde passengers using Dulles is siphoned out of New York by special connections. Others from the hinterland are now funneling into Dulles to make Concorde connections instead of using the traditional path to New York to catch the heavy subsonic transatlantic schedules. The New York Chamber of Commerce and labor unions recognize the economic drain a Concorde ban would accelerate. Only a handful of cynical politicians who are wooing constituents by fighting the mythical Concorde dragon and a few thousand long-suffering airport vicinity residents are trying to hold back progress in much the same manner as people who lay down on the early railroad tracks more than a century ago.

The British and French governments should ignore the Port Authority's stalling tactics and press immediately their suit in Federal Courts. Concorde deserves its chance to land in New York, and the sooner it happens, the sooner the clouds of political gas that now hang over Long Island will dissipate.

UNITED JEWISH APPEAL

Mr. MOYNIHAN. Mr. President, in synagogues and temples throughout the country, America's Jews will devote the Sabbath, Saturday, March 19, 1977, to honoring the work of the United Jewish Appeal. It is the Nation's largest fundraising organization and, in its 39-year history, has enabled literally millions of men, women, and children to lead lives of renewed dignity and purpose in Israel, the United States and communities in need elsewhere in the world. I think it is important that all Americans join in recognition of the outstanding work of this organization and in acknowledgement of the depth of humanitarian responsibility that exists within Jewish ethics and religion.

Centuries ago, the sage Rabbi Hillel asked:

If I am not for myself, who is for me? If I am only for myself, what am I? If not now, when?

These questions speak to the heart not only of the Jewish ethos but of the moral dilemma of all mankind. For who will act on our behalf if not we ourselves? How can we limit our responsibility to only the narrow parameters of our own lives? And how much longer must the world wait until it develops an attitude of conscience and justice toward all mankind?

The world was willing to wait in the 1940s. It was willing to ignore the survivors of the holocaust, the remnant of the millions killed and the civilization destroyed. In spite of their shock and outrage, America's Jews—through the work of the Joint Distribution Committee, which is funded by the UJA—cleaned out the concentration and displaced persons camps—brought homeless and stateless Jews to Israel—and helped to rebuild the shattered Jewish communities of Europe.

The world has beeen willing to wait while anti-Semitism has manifested itself in every generation—but, through the efforts of America's Jewry and the work of the United Jewish Appeal, funds have been raised to bring hostages from lands of oppression to lives of freedom in Israel and to house, educate and train them for jobs there so that they can begin new lives in a nation committed to democratic values.

The world has been willing to wait until the Soviet Union, in flagrant disregard for the rights of man, has tried to suppress the freedom movement among Jews and other dissidents. Through the principled example of America's Jewish community, we in government have been reminded of our obligation to continue our support of this struggle for human rights. And it is through the work of the UJA that funds are provided to the Jewish agency in Israel and to the United Hias Service and NYANA in the United States, to help resettle these freedom fighters.

There is an active Jewish Federation and Welfare Fund within most of our own communities. These Jewish philanthropies provide for far more than the Jewish community and reach out to many members of the total American community.

The roots of the Old Testament have been deeply meaningful as a standard of morality and conscience throughout the American experience. It is important for us to recognize, as well, that the people of the Old Testament continue to derive from their religion the source of their concern for the welfare of mankind.

1984: A MORE HOPEFUL VIEW

Mr. CHURCH. Mr. President, in last Sunday's Boston Globe, an article by former Attorney General Elliot Richardson appeared. It is a thought-provoking piece from a man who was at the very center of the efforts to undo the coverup that was so widespread during the Watergate scandal.

Mr. Richardson's basic premise is that, having come through Watergate, and as a result of the investigation by the Senate Select Committee on Intelligence, exposing the whole pattern of abuses by the CIA and the FBI, the United States is moving away from George Orwell's version of big brother which that author so chillingly foretold in his book, "1984."

Writes Mr. Richardson:

One could have constructed a case in 1972 or 1974 that we were likely to meet Orwell's timetable. But, today, only a few years later, I am prepared to argue that quite the contrary situation exists, that in fact the wave of 1984-type activity has crested and that we are farther in a symbolic sense from the evils of 1984 than we were in 1964 or 1974.

In his article, Mr. Richardson outlines the background, including the cold war and the anti-Communist hysteria of the 1950's, that led up to Watergate and the abusive practices of our domestic and foreign intelligence services. He then makes the telling point that—

It is ironic that in our efforts to combat the underpinnings of 1984 in Stalinist Russia, we moved down the road to 1984 at home.

I commend this article to a wider readership, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Mar. 13, 1977]

1984 IS NOT FAR OFF, BUT ORWELL'S WORLD IS NOW BEHIND US

(By Elliot Richardson)

(Three decades ago, George Orwell published "1984," a literary classic describing a future world in which individual thought and action are submerged by an all-encompassing state.

(How near are we to that world? Focus asked Elliot Richardson, who has held a wide variety of high government jobs and is now U.S. ambassador to The Law of The Sea Conference, to give his views.)

As we move ever closer to the year 1984, the temptation to examine our society in light of George Orwell's warnings becomes irresistible.

The world of telescreen, doublethink, and the Thought Police portrayed in "1984" has become more than literary fiction. Indeed, it has had a profound effect upon American political thought in the Cold War era.

The realization has slowly dawned on the so-call "free world" that impersonal forces and strong central governments are not the exclusive property of Iron Curtain countries.

Nor have our concerns been mollified by events of the early 1970s.

Watergate presented the spectacle of top officials in our freely elected government blithely conspiring to violate the law and obstruct justice in the name of national security and executive privilege but in the fact of political opportunity and self-protection.

Wiretapping telephone conversations, bugging what participants thought were private discussions, breaking into the offices of opponents and third parties, using instruments of legitimate government action as weapons to punish political enemies, playing campaign dirty tricks, fabricating and perpetuating an elaborate cover-up—surely these seemed to add up to a long step toward "1984." Even the President's spokesman seemed to be practicing newspeak when he described past statements as "inoperative."

But the advent of "1984"-type activity began long before Watergate and can be seen in retrospect as a response to international Cold War politics.

In the aftermath of World War II and the partitioning of Europe, tensions were higher than many younger Americans today can appreciate. The Berlin Wall, the Korean War, and the strident anti-Communism of the 1950s identified with Sen. Joe McCarthy combined to make the Cold War seem as menacing as a hot war and to require a similar degree of response.

These perceptions led to governmental actions and attitudes which, from today's perspective cannot be reconciled with the democratic process.

Security became an obsession in the emotion-charged atmosphere of the late 1940s and 1950s, when many Americans had survived the second world war in their lifetimes and feared that a third was not far off.

Even casual affiliations of 20 years past were liable to prompt an investigation and charges of subversion. If the growing intelligence establishment committed excesses from time to time in the course of its mission, well, this was "war" and the end justified the means.

While these forces colored the attitude of the general public, they particularly influenced those who worked in government with

the charge of protecting us from the Communist threat.

At the same time, we witnessed an acceleration of the historical trend toward concentration of power within the White House, a trend aided by a passive Congress. There gradually developed what Arthur Schlesinger has called the "Imperial Presidency," which encouraged Presidents to regard themselves as embodying the law and to regard those who opposed their policies as obstructing the national interest.

In this "us-against-them" environment, many leaders acquired an enemy-oriented mentality. Just as the Communists were enemies of the United States, so too were other Americans who held differing political views. This attitude surfaced in concrete form years later in the so-called White House "enemies list."

A blue-ribbon group headed by former Vice President Nelson Rockefeller found evidence of the following activities by the CIA (Central Intelligence Agency), whose legal charter precludes it from "police, subpoena, law enforcement powers, or internal security functions."

Operation CHAOS, operating between 1967 and 1974, catalogued information on the domestic activities of American citizens, exceeding the CIA's statutory authority. The Office of Security infiltrated dissident organizations and followed US citizens in a manner the Rockefeller group termed "unreasonable."

CIA investigations violated constitutional rights of privacy. The report found the domestic use of 32 wiretaps, 32 instances of bugging, and 12 break-ins, none conducted under a judicial warrant and only one with written approval of the Attorney General. Starting in the early 1950s the CIA illegally intercepted mail.

Under a test program, the drug LSD was given by the CIA to persons unaware they were being tested, a clearly illegal activity.

A Senate Committee on Intelligence confirmed these findings and developed similar material on the FBI (Federal Bureau of Investigation), which between 1956 and 1971 operated a counter-intelligence program (Cointelpro) to disrupt target groups on both the right and left ends of the American political spectrum.

What began as a vehicle to gather material against the Communist Party led eventually to 2370 separate acts of counter-intelligence and disruption against such organizations as the Socialist Workers Party, Ku Klux Klan, Dr. Martin Luther King, the Southern Christian Leadership Conference, CORE (Congress of Racial Equality), and Students for a Democratic Society.

While many of the Cointelpro activities were legal and perhaps proper, the program included the leaking of confidential material to the press, the forging of papers and infiltration by agents into target groups.

The Senate Select Committee on Intelligence Activities staff report noted that former FBI Director J. Edgar Hoover had complied with improper requests from Presidents Franklin Roosevelt, John Kennedy, Lyndon Johnson, and Richard Nixon. Involved were telephone taps on aides and press, building FBI files on critics, and the assignment of agents to gather political intelligence at a national party convention.

Thus, the same mentality that saw the ends justfying the means in Cold War terms, that misused the intelligence system, later saw justification for using similar tactics to halt domestic dissent.

It is ironic that in our efforts to combat the underpinnings of 1984 in Stalinist Russia, we moved down the road to 1984 at home.

One could have constructed a case in 1972 or 1974 that we were likely to meet Orwell's timetable. But, today, only a few years later, I am prepared to argue that quite the contrary situation exists, that in fact the wave of 1984-type activity has crested and that we are farther in a symbolic sense from the evils of 1984 than we were in 1964 or 1974.

The pendulum has been swinging in the other direction, and unless I miss my guess, it still has a way to swing.

There are several explanations for this swing, but I think it can largely be explained by citing only two. First, it is fair to say that the American people simply reacted to the frightening glimpse of the abuse of power to which they were exposed. What they saw terrified them, and the previous warnings of people like Orwell played some part in this reaction.

But the degree of public response is better explained by the second argument, namely the environment in which these exposures were made.

In recent years the American people have witnessed a steady growth, in the centralization, pervasiveness, and intrusiveness of governmental power. These disclosures not only revealed a kind and degree of activity we hadn't known existed but came at a time when sensitivity to the pervasiveness and intrusiveness of modern-day government was at a high point.

For the very reason that government today is so very much involved in our lives, we recognize that our vulnerability to the abuse of governmental power has increased.

Fortunately, the disclosure of these abuses triggered a more vigorous exercise of oversight activities by the Congress and stimulated a wave of hard-hitting investigative reporting by the media.

These activities not only spurred on the investigations but heightened public awareness and concern, making similar abuses of power at some future time less likely than they otherwise would have been.

Had Watergate never happened, we almost certainly would still be heading in Orwell's predicted direction today. As it was, the evils surfaced while there was still time to correct them.

But even if we have succeeded for the present in halting the kind of overt totalitarian activity conceived by Orwell in "1984," we must still combat the forces which, while not threatening us in such an obvious way, nonetheless pose dangers of equal significance.

Left unchecked, such mutually reinforcing trends as urbanization, a bigger and more remote government, and ever faster technological change could eventually destroy our capacity for self-government as well as the human dignity and freedom which are its chief end.

And yet it is always a mistake to extrapolate the trends of the present without allowing for the dynamic interplay of counter forces. Orwell's frightening glimpse into the future and the subsequent events that seemed to confirm his prediction evoked forces which served actually to make his warning a self-defeating prophecy.

In the same manner, our present concern for the submergence of the individual, and the consequences this can have, may prompt us to take corrective action.

With determination, creativity, and the common sense that have characterized America, we can come to think of 1984 in terms of a daughter's graduation or a 10th wedding anniversary rather than as a code word for everything antithetical to our national values.

FARM POLICY

Mr. DOMENICI. Mr. President, on March 14 last, the distinguished minority leader, Mr. BAKER, entered into the RECORD my testimony on our farm policy, which was presented before the Agriculture Committee earlier this month. However, at that time the exhibits for my testimony were not available.

I would like to ask that this testimony, along with the full text of these exhibits, be printed into today's RECORD. I feel it is very important since, for the first time, we have actual production costs made available by individual farmers. This information highlights the extreme plight that many members of our agriculture community are now suffering.

It is my sincere belief that the information provided by these farmers is of value to my colleagues and our Nation.

Mr. President, I ask unanimous consent that my testimony and exhibits be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY BY U.S. SENATOR PETE DOMENICI

Mr. Chairman and Members of the Committee, I am pleased to appear before you today and testify on behalf of the Agricultural Producers of New Mexico.

In my testimony, I would like to make some general statements on farm policy and then move into some areas where I will make specific recommendations.

First, Mr. Chairman, let me say that I have not seen a time during the past several years in which more instability and uncertainty afflicted the agricultural community in my state and in the Rocky Mountain Region.

As I have toured my state, farmers, ranchres, and members of the financial community that have dealt for years with the producers of food and fiber have told me of their deep fears about the future of agriculture in this nation. I do not need to remind you all of the great service our agricultural producers have done for Americans and the rest of the world. And the success of American agriculture can at least in part be attributed to the sensitivity this committee has shown to the needs of both producers and consumers.

However, it seems to me that many farmers and ranchers now feel caught up in events out of their control—events that may force them into bankruptcy or into financial hardship. I hope that whatever legislation this committee adopts will pay particular attention to the new equation that our farmers and ranchers confront—increasing costs of energy and fertilizer, decreasing returns on their produce, and, in many areas, an uncertain water supply aggravated by this year's drought. This new equation could spell serious disruption of the nation's agriculture.

When considering legislation on farm and food policy, we realize that a unique set of economic and physical relationships affect our farm markets.

First, major farm crops are harvested only once a year, requiring that supplies be stored and metered out until the next harvest. This metering system relies on future markets that provide buyers and sellers with prices for future purchases or sales. If supplies become scarce, futures prices rise, which tends to reduce purchases by domestic and foreign buyers and assures a supply of the commodity at the end of the marketing year. If supplies increase, futures prices fall, encouraging longer use of supplies and lower carryover at year's end.

Second, in our farm economy a small variation in the supply of a commodity causes a large variation in its price. A shortage of food brings a willingness to pay high prices; too much results in little demand for more at any price. A shift from too much to too little or vice-versa causes dramatic fluctuations in price.

Third, livestock-meat production involves a multi-year process requiring large amounts of grain. As a result, livestock production must be coordinated with feed crop production or unusual instability will occur in livestock cost and profit relationships.

Fourth, one out of every four acres har-

vested in America is exported. Variations in demand for, or in the volume of, our annual export shipments cause sharp fluctuations in market prices with subsequent effects on grain and livestock producers, and eventually on the consumers.

It should be evident that the complexity and uniqueness of our food and fiber production system demonstrate the difficulty of developing any farm and food policy. However, it does suggest certain goals toward which we should aim in legislating a farm policy. I believe the direction we choose to take should take into consideration the following objectives:

1. To assure Americans an adequate supply of food and fiber.

2. To assure adequate production incentives to our nation's farmers.

3. To promote reasonable stability in our farm and food markets with minimal government interference in market forces.

4. To develop and expand foreign markets for our agricultural commodities; and, finally,

5. To provide an adequate amount of flexibility in our programs to allow America's agricultural producers to meet changing conditions.

While these goals and many more, have been suggested by others, I do believe the ones I have briefly summarized here should guide the committee in their deliberations.

Mr. Chairman, I would now like to make specific recommendations on provisions which I feel should be included in any new farm legislation.

First, commodity loan level rates should be set at more realistic levels and target prices should be adjusted, as accurately as possible, to levels close to current costs of production. I should admit that in New Mexico there is some area of disagreement between various farm organizations and individual farmers as to what constitutes realistic loan levels and the concept of target prices set at full cost of production levels. However, many farmers have indicated that if it is the intent of Congress to set target prices at current costs of production levels, they disagree with the figures provided in the Economic Research Service estimates and with the figures contained in several of the legislative proposals which have been introduced. Most New Mexico farmers would ask the committee to take another look at the formulas used to evaluate costs of production, especially in the area of land costs. Along these lines, I would like to submit for the record a series of tables prepared by Milton Townsend, a specialist in farm business management for the State Department of Vocational Education (Exhibit 1).

These tables show the costs of production, gross returns and net returns for various commodities over a period of several years, based upon actual farming operations in Roosevelt County, New Mexico. In addition, I would like to submit testimony prepared by Jack Muse, President of the New Mexico Wheat Growers Association, which discusses recent costs of production increases in the areas of energy and transportation (Exhibit 2).

Second, I recommend that the maturity of commodity loans be extended from one year to any period, not exceeding five years, specified by the producer-borrower, and bearing an interest rate not to exceed 5 per cent.

Third, I recommend adoption of S. 505, introduced by the Senator from Oklahoma, Mr. Bellmon, and which I cosponsored. The purpose of this legislation is to assist wheat and feed grain producers to construct grain shortage facilities on their farms. Loans guaranteed under this bill would be guaranteed up to 90 percent of the total cost of the storage facility, not to exceed $500,000. The size of the storage facility would be based upon the amount of space required to store the average quantity of the commodity produced by the borrower during the two preceding crop years. The term for these loans would be for any period, not in excess of 10 years, as specified by the borrower.

Fourth, I would recommend to the commodities that the Consolidated Farm and Rural Development Act be amended so as to raise the limits on Farmers Home Administration farm ownership and farm operating loans.

Authority should be given for farm ownership loans up to $200,000, instead of the present $100,000, and up to $300,000 for guaranteed loans. Authority should also be given to increase farm operating loan limits from $50,000 to $100,000, and up to $200,000 for guaranteed loans.

At this point I will submit for the record three documents. The first is a statement presented by Ben McAlister, President of the Clovis Production Credit Association, which discusses the problems in financing agriculture (Exhibit 3). The second is a letter from Grant J. Morper, President of the Citizens Bank of Tucumcari, New Mexico, which documents the financial statements of two farms over a five year period, one dryland and the other irrigated (Exhibit 4). And finally, a letter from Mr. Clyde Baisten, Chairman of the Agricultural Committee of the New Mexico Bankers' Association, which discusses their problems with the Farmers Home Administration and the Emergency Livestock Loan Program (Exhibit 5).

There are many other areas of interest in general farm legislation. However, in the interest of brevity, I would recommend to the committee that any new legislation contain provisions which accomplish the following:

Provide incentives for foreign countries who wish to purchase and store grain in this country.

Provide restraints that will insure our foreign customers against an unnecessary interruption in their food supply;

Update crop allotments to reflect more current cropping patterns;

Update and streamline the disaster provisions in the 1973 Act; and

Allow the control of carryover stocks and reserves to remain in the hands of the individual producers. Concerning this issue, I would like to submit for the record a statement by Wayne Baker, President of the Roosevelt County Farm and Livestock Bureau (Exhibit 6).

Let me close by making one final observation. I have recently been approached by several livestock and crop producers who are not in the habit of "crying wolf" and asking for government assistance. They have convinced me of the severity of their situation and of the need for this Congress to develop and expedite the passage of meaningful farm legislation.

P.S. By way of a postscript, Mr. Chairman, I would like to insert in the record a letter sent to Senator Talmadge (exhibit 8) on the need to increase acreage allotments for Valencia peanuts. New Mexico's Valencia peanut industry has been a continuing bright spot in the State's economy and the Congress would be derelict in not doing everything possible to foster this crop. I thank the chair for allowing me to testify on this critical national issue.

Thank you for the opportunity of appearing before you today.

EXHIBIT 1

COW-CALF AND YEARLING SUMMARY

FARM MANAGEMENT ANALYSIS, PORTALES, N. MEX.

[Averages for 7 yr]

Items of comparison	1969	1970	1971	1972	1973	1974	1975	7 yr. average	1976 estimate
1. Number of ranches	4	1	4	6	6	5	5	4.37	5

TESTIMONY PRESENTED TO SENATOR PETE DOMENICI AT CLOVIS, N. MEX., BY JACK MUSE, PRESIDENT, NEW MEXICO WHEAT GROWERS ASSOCIATION

Senator Domenici: Thank you for taking the time to come here to discuss our problems in agriculture. I am Jack Muse, 32 years old and have been farming since June of 1964. I am also President of NMWGA. My farming career began when I leased 200 acres of irrigated land, and since that time my farming operation has grown to 1550 acres of irrigated land. 480 acres of the 1550 are mine, and 1070 leased. I raise corn, wheat, and milo. In 1976, my production consisted of 582 acres of wheat, 430 of corn, and 132 of milo, and I utilized 11 irrigation wells and three tailwater return systems to irrigate my crops.

I have been asked to relate some facts concerning the effect of energy costs on my operation. In considering this matter, the fact just kept coming to my mind that the greatest energy shortage or problem lies in the hearts of our farmers. Never before, in the 12 years I have been farming, have I seen the attitude and motivation of farmers at such a low state. The aggressiveness and determination which has for so long characterized the farmers in the Southwest seems to have been eroded by fall embargos, low prices, high production costs, huge carryover projections, and little prospect for any improvement in any of these areas.

I have prepared a chart showing the relationship of fuel costs for my wells and several different equipment items. A quick look at comparisons of 73–76 total costs for fuel give a very vivid picture of what higher energy costs are doing to farmers. It seems that the cost of Natural Gas for pumping is the most severe increase. While diesel fuel and gasoline prices have about doubled, the cost of Natural Gas has tripled, and is projected to be quadrupled by the summer of 1977.

To illustrate more vividly what has happened on my farm . . . . My normal wheat production is about 600 acres with an average yield of 65 bushels per acre, for a total of 39,000 bushels which is worth $91,650 at $2.35 per bushel. Due to many high costs of production items, but principally the high cost of Natural Gas for pumping, I have reduced my wheat average for 1977 to 240 acres of dryland, which has a potential of 20 bushels per acre for a total of 4,800 bushels or $11,280 at $2.35. This amounts to a loss of $80,370 in gross income. I would also like to point out that this is a loss to the local business community, state, and the nation. If the estimated farm dollar is circulated four times, what does this really mean to the local economy?

Another way to illustrate energy cost increase is in the fact that for the month of July, 1976, the Fuel Cost Adjustment for pumping on my farm was $2,762.81. Our base rate is almost equal to this 40¢ PCA adjustment so it makes the total bill about $5,200 for a months' pumping last July. Our rate has now gone from approximately 80¢ to $1.18.

Another area in which farmers are paying higher energy costs is in transportation. Our local grain price is based on Gulf Port bids for the most part. The local elevators get the Port bids and then start subtracting freight and handling to determine prices paid to farmers. Here again, higher energy costs cause higher freight and handling rates which the farmer is unable to pass on, but must absorb.

Grain drying is also another major energy expense for farmers. Fertilizer costs are also tied very closely to Natural Gas prices.

One thing that must be clear about the energy needs of agriculture is that a growing plant won't wait for water or cultivation. Its growth can't be turned off and on. We must have fuel at the right time.

Although most of the information I have given you is related to irrigation farming, it will be apparent from looking at the chart on tractor fuel consumption that the dryland farmers are in much the same shape.

Again, thank you for your concern and for coming here, and if you have any questions, I would be happy to try to answer them.

Well No.	Engine type	Pump lift	Size (inches)	GPM	HP	Natural gas (cu ft/hr)	Use (hrs/yr)	Annual consumption

Total use, trucks and pickkps: 8,000 gal times cost at: 1973, 29 cents—2,320; 1974, 42 cents—3,360; 1975, 47 cents—3,760; 1976, 50 cents—4,000. Grand total, cost of diesel and fuel per year: 1973—$25,906; 1974—$38,856; 1975—$48,116; 1976—$55,427.

EXHIBIT 3

A STATEMENT CONCERNING THE PROBLEMS RELATIVE TO FINANCING AGRICULTURE TODAY

(Presented to Hon. Senator PETE DOMENICI, Clovis, N. Mex., December 16, 1976)

Senator Domenici, as a representative of Clovis Production Credit Association, I appreciate this opportunity to meet with you and discuss the problems relative to the financing of agriculture today.

I'm not sure that everyone realizes that Clovis Production Credit Association is the largest agricultural lender in the state of New Mexico. During our last fiscal year we loaned farmers and ranchers of our area, which includes the counties of Curry, Roosevelt, DeBaca, Guadalupe and Quay, a total of $121,162,598. This is a lot of money! According to the last Federal Reserve figures that we have available, our association's penetration in this area has increased dramatically during the last few years. Last year we loaned 50% of all money that we loaned for agriculture on a short-term basis. Our purpose is to loan money to farmers and ranchers so they may improve their standard of living and accomplish the goals they have set for themselves. We are finding this more difficult to do all the time.

The table in Exhibit A shows the lending activity of this association since 1968 when I became President. Shown is the number of members served each year, the average amount of money used per member, the amount of loans that we've had as renewals at the beginning of each year, the percent of increase of these renewals over the previous years, the total amount of money loaned including renewals each year, with a percentage increase over the previous years, and the new money, that is money above the renewals that has been loaned each year. This is a frightening picture of what is happening to agriculture today.

In the last five years the amount of money used per member each year has increased from $138,140.00 in 1972, to $239,452.00 in 1976, or an increase of 73.3 percent. During the same period, due in part to an increase in the number of members served, total loans made by this association have increased from $65,759,282 in 1972 to an all-time high of $121,162,598 in 1976, or an increase of 84.25 percent. This increase is not a problem to the association, what really disturbs us is the fact that the amount of renewals since 1972, $18,271,428, has increased to $49,957,396 at the end of this year. This is an increase of 173.5 percent. Any illusions anyone might have that the farmers and ranchers of this area have been doing well should be dispelled by these figures.

A further study of this chart will show that the association had large increases in renewals during the years of 1973 and 1974 when we had the cattle crash. Then when the supply of grain was down to its lowest ebb in this country and grain prices skyrocketed, the amount of renewals in 1975 dropped to 19%, compared to 32% the previous year. In the beginning of 1976, our renewals were down to just 3.9% over what they were the previous year. This improvement in loans was due to the high grain prices and somewhat better cattle prices. At least our cattlemen were not losing as much money as in previous years. The frightening part of this is that when we geared up the productive capacity of American agriculture, at the urging of the President and Secretary of Agriculture and planted from fence to fence and had a bumper crop, the market fell because our anticipated exports market did not materialize. Our renewals have skyrocketed this year to date. American agriculture cannot survive under such conditions.

There has been a mistaken feeling throughout this country that farmers never had it so good. This is not so! The tremendous amount of money required for capital investments to increase efficiency and the increased cost of production have made it impossible for farmers and ranchers to show any progress. They have been staying in business up until this time because of the appreciation of their land value. We fear that this appreciation in land value has ceased due to the fact that our underground water is diminishing and dwindling energy supplies. We do not expect land values to decrease much, but for the next several years we see no reason for them to continue to appreciate or to be a marketable item. Exhibit B shows the percentage of our loans secured by real estate only.

After studying these facts it should not surprise anyone that many of the commercial banks are closing out their agriculture loans. They tell us that the risks involved in financing agriculture are greater than they are able to take. They realize the necessity of a strong agriculture to the economy, but would rather allow someone else with more expertise do the financing. Another farm lender, Farmers Home Administration, is so strangled with red tape and low lending limits that they are unable to help. This is creating an even larger increase in the amount of money the Production Credit Association must lend under the current hazardous conditions.

I am as firm a believer in the free enterprise system as any man. I believe in this free, market-oriented system, but it will not work under the conditions we have today. Some changes in American agriculture must be made.

The cattle industry has been in a sad situation since 1973. Grain farmers have done better during this period especially in 1974 and 1975 due to agriculture programs that reduced supplies in storage and the huge grain sales to other countries reduced our grain supplies to a manageable level. Farmers received prices that allowed them to make a reasonable profit. With these good years and in response to the government's urging, farmers planted fence to fence. They set a goal of maximum production and reached it. Their assurance of an open, receptive export market disappeared when the world as a whole had bumper crops. Former importers became exporters and purchase commitments were cancelled. Prices plummeted and farmers began to face the specter of bankruptcy. This is not good for our nation which depends on these few to feed and clothe them.

I think it is time for the Congress of the United States to start looking at maintaining a viable agriculture in America. This can be done by farmers securing a price that will pay them their cost of production plus a reasonable margin for their labor. In these periods of high inflation, and I'm convinced that the federal government is not going to stop this, independent, productive, farmers cannot survive the current surpluses and resulting low prices until the world has another bad crop year and we can dispose of our over production.

I do not believe that increasing price supports or target prices is the answer to our problem. Recently President Ford increased the support price for wheat. Today's market price for wheat has plummeted to near the support price. This has been the history of support prices. I'm convinced that if support prices are increased for wheat further and for the other grains that are produced in this country, that whatever price is established as a loan price, will be the market price. American agriculture, though it was stable, never flourished under these conditions.

For the market system to work in this country, we must get production in line with normally expected demand. I think the best hope of doing this is the revival of the old Soil Bank program which in my opinion was one of the best programs that we've ever had for American agriculture. The reason that I say this is because it saved our land and our resources until such time as they were needed. We have too much productive capacity in America today and it is not all needed. Therefore, I think we should re-institute a Soil Bank program whereby farmers can bid to retire their land over a period of time. The primary objective of this should be the retirement of land under irrigation in areas where water is secured from an unrechargeable underground formation. It does not make sense to me or to a lot of other people for a farmer to be pumping water that

can never be replaced, using natural gas that will not be replaced, using fuel imported from overseas at high prices, and go broke in the process. This is what is happening now. Under a Soil Bank program those farmers that want to place their land in the program can do so. Those that want to produce for the free market system have the opportunity to do so, but they will have a chance to make a profit because production will be reduced nearer to demand.

I know that only a small percent of the population of this country is engaged in the production of food and fiber. I know the problems that you as a Senator would face in Congress in trying to get this program enacted, but I believe the strong environmental groups in the nation would be allies in securing a program that would conserve our resources until such time as they are needed. I'm convinced that it will not be too many years in the future until all the productive capacity available will be needed to feed and clothe the people of our nation. We must start now to conserve our water, our energy resources, and above all our economic base, a free and productive agriculture.

EXHIBIT 4

TUCUMCARI, N. MEX.,
December 30, 1976.

Senator PETE V. DOMENICI,
U.S. Senate,
Washington, District of Columbia

DEAR SENATOR DOMENICI: On your recent visit to Tucumcari, we discussed briefly with you what we feel a major economic problem, that of Agriculture. You suggested we put our thoughts in writing to you.

I have worked in Agriculture lending for 18 years, 7 years with Farmers Home Administration and 11 years here with Citizens Bank. During these years, increase in land values are the only way farmers in our area have been able to stay in business, but during the past 3 years, the large increases in production cost have caused these land equities to be used up. I can see that without a turn around in this trend, quite a number of family farmers are going to be out of business within 18 months.

This country must simply either, or:

1. Cut production.
2. Sell our commodities abroad.
3. Provide a greater federal subsidy.

I will cite 2 family farm operations that would be typical of our area, one dryland and one under irrigation.

DRYLAND

Age 50, married, 3 children, born and raised in this community. Owns 800 acres, rents 1100 acres, runs 50–70 cows; grain-wheat operation.

	Acres owned	Value	Total assets	Liabilities
1976	800	95,000	125,600	95,000
1975	800	90,000	152,800	82,000
1974	800	80,000	126,250	78,000
1973	800	68,000	109,000	24,770
1972	800	60,000	112,500	44,400

He has now sold his cows, the net worth decreased 37,500 in 5 years, even with land values increasing by 35,000. He must place his debt on long term with FHA and if the trend continues, their loan limit will not be sufficient to stay.

IRRIGATED

Age 35, married, 2 children, raised on farm in this community. Owns 355 acres, runs 40–50 cows; grain, wheat and alfalfa operation.

	Acres owned	Value	Total assets	Liabilities
1976	355	115,000	171,260	108,800
1975	355	105,000	172,560	98,855
1974	355	95,000	161,375	103,850
1973	355	93,000	165,525	90,000
1972	355	90,000	137,470	71,720

Net worth decreased $3,290 during these 5 years, even with land values increasing $25,000.

I believe FHA loan limits for direct real estate loans should be increased to $200,000 from the present $100,000 and their operating loans authority increased from $50,000 to at least $100,000.

I think generally farmers hate to see greater government involvement, but must realize they can not continue with high cost production and depressed crop prices. Past farm programs have been based on allotments, however, many acres in Quay County are not allotted.

It seems to me if two alternatives can be considered, direct payments to farmers to divert acres from production would be better than increasing support levels that would create high government storage cost. We must have a strong agriculture and all taxpayers may have to support it.

Yours very truly,

GRANT J. MORPER,
Vice President.

Re FHA Emergency Livestock Loan Program.

Mr. PETE V. DOMENICI,
Old Senate Office Building,
Washington, D.C.

DEAR MR. DOMENICI: One of the many topics of consideration during the New Mexico Bankers Association Agricultural Committee Annual Conference was the FHA Emergency Livestock Loan Program. The problems and concerns of the program voiced by the New Mexico agricultural bankers present prompted my writing to you for your consideration, review, and clarification of our interpretations of the program.

The major inconsistencies of the program identified by our state's agricultural bankers are as follows:

1. To many bankers' dismay, the line of credit program cannot be operated in the same manner as most bankers interpret "line of credit". After a herd of cattle has been sold and the operating funds have been applied to the note, the funds have to remain as applied and cannot be used to restock livestock for another season or year.

Many bankers have found that they cannot allow the livestock producer to pay on his note even though the producer made a profit with one season or one year's production of livestock because the funds cannot be reborrowed for the next season or year's production. Payment on the producer's note would leave him with no working capital or means to produce an income for living or further repayment. If the producer is other than a cow-calf operator and has sustained financial losses to warrant or qualify him for participation in this program, it would be impossible to expect the producer's livestock operation to provide enough income from the first year's operation or the first initial investment to repay the loan, pay interest, cover all operational expenses, living expenses, and allow for restocking. The producer and his banker need some means of clarification of this phase of the line of credit to assure both that the successful operator can operate more than one year without fear of foreclosure or discontinuation of funds.

2. Some bankers have been informed that a producer has qualified for the E L Loan, but cannot feed livestock in a commercial feedlot unless he owns the feedlot. Personally, I have not found any mention of this in the regulations, and have not visited with FHA personnel about it. However, it is of concern in some areas.

3. There is a definite problem involving the length of time in getting applications approved for producers. Many bankers indicated that they had not had any applications approved for their financially distressed producers and eventually discontinued their efforts. Other bankers were very disappointed with the time involved in getting qualified producers applications approved. Many indicated that six months was a fairly common time period. Often this delay caused a producer to completely miss a season, or for the yearling operator, resulted in a whole year without any income for living and operating.

Personally, I have worked on two applications for over six months. Before we could get approval, the producers became so dispirited that they sold all land, livestock, and equipment of necessity. Another application took fifteen months to be approved. This long delay in approving programs will make the banker and producer very disconsolate.

Aside from the concerns listed above, the New Mexico Agricultural Committee wants you to know that this program has been appreciated and realizes that it has helped many producers in financial distress. Many of them could not have been financed any other way and could not have survived the duration of our still existing livestock crisis without the assistance of the E L Loan Program.

We are writing in an effort to define problems encountered with the program. Many of the regulations seem unnecessarily cumbersome and have taken from the flexibility and effectiveness of this essentially good program. We recognize that the program was intended for the good of the producer and ask for your assistance in intepretation of these technicalities to facilitate communication between FHA, the producer, and the banker. We fur-

ther ask for an attempt to accelerate processing of the loans.

Thank you for your careful consideration of this extremely important issue involving a production of vital importance to our state as well as our nation!

Respectfully yours,

CLYDE G. HAISTEN,
Chairman, Agricultural Committee,
New Mexico Bankers Association.

Testimony presented to Senator Pete Domenici at Clovis, New Mexico by: Wayne Baker, President, Roosevelt County Farm and Livestock Bureau.

FOOD RESERVES

Food reserves have been thought wise ever since Joseph recommended them to the Pharoah of Egypt, and saved the people from seven years of famine. I don't think the question is, "Should we have reserves or not?" The question is: Where should we have them? Who should own and control them? How, when, and for whom should they be used? And how can they be insulated from the market place without depressing the market?

I believe we have reserves today. When we produce fifty percent more wheat than we use domestically and it averages out to be about one-fourth of all our crop acreage must be exported, we have reserves. Presently, about fifty percent of all grain is owned by the American producer and storage for this grain is paid by the American producer. This is not by choice but the result of, in part, government action. Our government has asked the American farmer to produce to his fullest capacity, then the government has allowed export markets to be lost by embargoes and longshoremen strikes. Our Congress in addition, has consistently legislated cheap food policies.

If we go back to government owned reserves or surpluses as we had in the 1950's and 1960's we would be taking a giant step backwards. This would further depress prices and force more farmers out of the business, which in turn would reduce the supply. Government managed and controlled agriculture is not in the best interest of our nation, or its farmers. This is one of the biggest reasons that Communist countries buy grain from us. I believe the reserve problem is best met when the government's part in agriculture is to preserve a good healthy market oriented agriculture. In this way, farmers and ranchers can do what they like best—produce products efficiently, and have an adequate standard of living for their families.

I do not believe we need government held reserves today, simply because we have a built-in reserve in our nation's ability to produce when the price is conducive to provide an incentive to the grower.

If, however, we have a grain reserve for political reasons, either national or international, I would outline some guidelines to be followed:

1. The reserves should be held and owned by the farmers. This must be done to allow the market to function. We all understand the political numbers game and how it works. If farmers did not retain control of the grain, any amount of government owned grain would depress markets. A government that can create reserves can also release the reserves. All urban legislators would know it was there, as well as importing nations in need of grain. Some have talked about the government going into the market when prices were low and purchasing grain. This would reduce the supply that year, but it would depress prices from then on. I think it would stabilize prices, but at an unreasonably low level.

2. The government should help build and pay for on-farm storage. If reserves are needed for national emergencies or world food shortages farmers cannot bear the burden of the cost.

Presently there is a very inadequate farm storage government loan; this loan provides for: (a) Needed storage space for one year's production of supported crops on a farm. (b) A loan of up to $25,000. (c) If the loan exceeds $10,000 it requires a first lien on the land. (d) All materials must be new. (e) A loan for 70% of the structure, excluding materials and labor for concrete work and electrical wiring. (f) A variable interest rate at the cost of money to CCC presently 7.5% for five years.

These requirements need to be greatly liberalized to be more in line with building costs today, and so that accessory equipment such as legs, dumping pits, etc. could also be built. The first lien requirements on the land make it very difficult to even consider such a loan. The facility should be big enough to hold more than one year's production.

3. Reasonable storage fees should be paid the farmer plus a two-three years recourse loan, based on reasonable average production costs. During this time the farmer himself could shift production to compensate for declining prices and have this time to price his product.

4. International money reserves could be established rather than government owned grain, to buy grain at market value when a famine or whatever emergency existed in another country.

Any establishment of government controlled reserves would have many adverse effects on all segments of agriculture. I believe it will make large supplies of cheap grain and put a ceiling on grain prices rather than a floor. This would encourage excessive feeding of cattle, hogs, and poultry, flooding the meat market quickly. I would like to see more on-farm storage as this would help stabilize farm prices at a more reasonable level with good effects for the livestock industry, the farmers and the American consumer.

EXHIBIT 8

WASHINGTON, D.C.,
March 8, 1977.

Hon. HERMAN E. TALMADGE,
Chairman, Senate Agriculture Committee,
Washington, D.C.

DEAR HERMAN: The Peanut Industry is the bright spot on the agriculture horizon in New Mexico because of the stability it provides for the entire Agricultural community. We are all well aware of the problems the agriculture and farming communities are presently facing. There are now great uncertainties as to production in the West because of the drought conditions.

The New Mexico peanut growers met this week with the Department of Agriculture for the 25th consecutive year to request an increase in Valencia peanut allotment. This year as in the past, they were able to establish the eligibility and need for more Valencia peanuts. The New Mexico State ASCS report on Valencia peanuts produced in 1976 indicates that all eligible Valencia peanuts went into commercial markets and brought 120% of support price to the farmer.

Peanuts have been grown in the State of New Mexico for over fifty years. My research shows that peanut acreage in New Mexico reached a peak during 1945, 1946, and 1947 with 14,000 acres planted in peanuts.

In 1956, an amendment to the farm bill was passed in the Senate, granting Valencia peanuts a 50 percent increase. The House seemed to feel that the Secretary could do this at his discretion so the amendment was rejected in the House. I am enclosing a copy of a letter from Congressman A. M. Fernandez to The Honorable Ezra Taft Benson dated April 6, 1956, describing this action is enclosed for your information.

SURFACE MINING AMENDMENTS

Mr. MELCHER. Mr. President, I ask unanimous consent that amendments No. 66 and 67 to S. 7 be printed in the RECORD.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 66

On page 117, beginning with line 22, strike out all through line 3 on page 118 and insert in lieu thereof the following:

SURFACE OWNER PROTECTION

SEC. 423A. (a) The provision and procedures specified in this section shall apply where coal owned by the United States land the surface rights to which are owned by a surface owner as defined in this section is to be mined by methods other than underground mining techniques. In order to minimize disturbance to surface owners from surface coal mining of Federal coal deposits, the Secretary shall, in his discretion but, to the maximum extent practicable, refrain from leasing such coal deposits for development by methods other than underground mining techniques.

(b) Any coal deposits subject to this section shall be offered for lease pursuant to section 2(a) of the Mineral Leasing Act of 1920 (30 U.S.C. 201a), except that no award shall be made by any method other than competitive bidding.

(c) Prior to placing any deposit subject to this section in a leasing tract, the Secretary shall give to any surface owner whose land is to be included in the proposed leasing tract actual written notice of his intention to place such deposits under such land in a leasing tract.

(d) The Secretary shall not enter into any lease of such coal deposits until the surface owner has given written consent and the Secretary has obtained such consent, to enter and commence surface mining operations, and the applicant has agreed to pay in addition to the rental and royalty and other obligations due the United States the money value of the surface owners's interest as determined according to the provisions of subsection (e).

(e) The value of the surface owner's interest shall be fixed by the Secretary based on appraisals made by three appraisers. One such appraiser shall be appointed by the Secretary, one appointed by the surface owner concerned, and one appointed jointly by the appraisers named by the Secretary and such surface owner. In computing the value of the surface owner's interest, the appraisers shall first fix and determine the fair market value of the surface estate and they shall then determine and add the value of such of the following losses and costs to the extent that such losses and costs arise from the surface coal mining operations:

(1) loss of income to the surface owner during the mining and reclamation process;

(2) cost to the surface owner for relocation or dislocation during the mining and reclamation process;

(3) cost to the surface owner for the loss of livestock, crops, water, or other improvements.

(4) any other damage to the surface reasonably anticipated to be caused by the surface mining and reclamation operations; and

(5) such additional reasonable amount of compensation as the Secretary may determine is equitable in light of the length of the tenure of the ownership: *Provided*, That such additional reasonable amount of compensation may not exceed the value of the losses and costs as established pursuant to this subsection and in paragraphs (1) through (4) above, or $100 per acre, whichever is less.

(f) All bills submitted to the Secretary for any such lease shall, in addition to any

rental or royalty and other obligations, be accompanied by the deposit of an amount equal to the value of the surface owner's interest computed under subsection (e). The Secretary shall pay such amount to the surface owner either upon the execution of such lease or upon the commencement of mining, or shall require posting of bond to assure installment payments over a period of years acceptable to the surface owner, at the option of the surface owner. At the time of initial payment, the surface owner may request a review of the initial determination of the amount of the surface owner's interest for the purpose of adjusting such amount to reflect any increase in the Consumer Price Index since the initial determination. The lessee shall pay such increased amount to the Secretary to be paid over to the surface owner. Upon the release of the performance bonds or deposits under section 419 or at an earlier time as may be determined by the Secretary, all rights to enter into and use the surface of the land subject to such lease shall revert to the surface owner.

(g) For the purpose of this section the term "surface owner" means the natural person or persons (or corporation, the majority stock of which is held by a person or persons who meet the other requirements of this section) who—

(1) hold legal or equitable title to the land surface;

(2) have their principal place of residence on the land; or personally conduct farming or ranching operations upon a farm or ranch unit to be affected by surface coal mining operations; or receive directly a significant portion of their income, if any, from such farming or ranching operations; and

(3) have met the conditions of paragraphs (1) and (2) for a period of at least three years prior to the granting of the consent. In computing the three-year period the Secretary may include periods during which title was owned by a relative of such person by blood or marriage during which period such relative would have met the requirements of this subsection.

(h) Where surface lands over coal subject to this section are owned by any person who meets the requirements of paragraphs (1) and (2) of this subsection (g) but who does not meet the requirements of paragraph (3) of subsection (g), the Secretary shall not place such coal deposit in a leasing tract unless such person has owned such surface lands for a period of three years. After the expiration of such three-year period such coal deposit may be leased by the Secretary: *Provided*, That if such person qualifies as a surface owner as defined by subsection (g) his consent has been obtained pursuant to the procedures set forth in this section.

(i) Nothing in this section shall be construed as increasing or diminishing any property rights held by the United States or by any other landowner.

(j) The determination of the value of the surface owner's interest fixed pursuant to subsection (e) or any adjustment to that determination made pursuant to subsection (f) shall be subject to judicial review only in the United States district court for the locality in which the leasing tract is located.

(k) At the end of each two-year period after the date of enactment of this Act, the Secretary shall submit to the Congress a report on the implementation of the Federal coal leasing policy established by this section. The report shall include a list of the surface owners who have (1) given their consent, (2) received payments pursuant to this section, (3) refused to give consent, and (4) the acreage of land involved in each category. The report shall also indicate the Secretary's views on the impact of the leasing policy on the availability of Federal coal to meet national energy needs and on receipt of fair market value for Federal coal.

(l) This section shall not apply to Indian lands.

(m) Any person who gives, offers, or promises anything of value to any surface owner or offers or promises any surface owner to give anything of value to any other person or entity in order to induce such surface owner to give the Secretary his written consent pursuant to this section, and any surface owner who accepts, receives, or offers or agrees to receive anything of value for himself or any other person or entity, in return for giving his written consent pursuant to this section, shall be subject to a civil penalty of one and a half times the monetary equivalent of the thing of value. Such penalty shall be assessed by the Secretary and collected in accordance with the procedures set out in subsections 418(b), 418(c), 418(d), and 418(e) of this Act.

(n) Any Federal coal lease issued subject to the provisions of this section shall be automatically terminated if the lessee, before or after issuance of the lease, gives, offers or promises anything of value to the surface owner or offers or promises any surface owner to give anything of value to any other person or entity in order to (1) induce such surface owner to give the Secretary his written consent pursuant to this section, or (2) compensate such surface owner for giving such consent. All bonuses, royalties, rents, and other payments made by the lessee shall be retained by the United States.

AMENDMENT NO. 67

On page 59, beginning with line 11, strike out all through line 22 and insert in lieu thereof the following:

"(5) the proposed surface coal mining operations, if located west of the one hundredth meridian west longitude, would—

"(A) not interrupt, discontinue, or prevent farming on alluvial valley floors that are irrigated or naturally subirrigated, but, excluding undeveloped rangelands which are not significant to farming on said alluvial valley floors and those lands that the regulatory authority finds that if the farming that will be interrupted, discontinued, or prevented is of such small acreage as to be of negligible impact on the farm's agricultural production, or,

"(B) not adversely affect the quantity or quality of water in surface or underground water systems that supply these valley floors in (A) of subsection (b)(5):

Provided, That this paragraph (5) shall not affect those surface coal mining operations which in the year preceding the enactment of this Act (1) produced coal in commercial quantities, and (2) were located within or adjacent to alluvial valley floors or had obtained specific permit approval by the State regulatory authority to conduct surface coal mining operations within said alluvial valley floors.".

55 ON THE HIGHWAY: SAVING ENERGY AND LIVES

Mr. PERCY. Mr. President, on January 30 the New York Times published an article by Ben A. Franklin entitled "Truckers Plan National Slowdown to Protest 55-M.P.H. Speed Limit." The article describes a recent effort by the Independent Truckers Association to go slowly on highways—40 miles per hour—as a means of protesting the 55-mile-per-hour national speeed limit.

A 55-mile-per-hour speed limit saves hundreds of thousands of gallons of gasoline. In so doing, we decrease our dependence on foreign producers, as well as decreasing the amount of pollutants our vehicles spew into the air each day.

These factors alone might lead us to retain the 55-mile-per-hour speed limit. There is an even more important consideration, however. Since the lower speed limits went into effect in 1974, over 27,000 lives have been spared from automobile accidents. Do we place so low a value on human life that we are willing to lose thousands of lives for the sake of slightly faster driving? I suggest not.

Mr. President, this article demonstrates how easy it is to forget the benefits of a 55-mile-per-hour speed limit. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TRUCKERS PLAN NATIONAL SLOWDOWN TO PROTEST 55-M.P.H. SPEED LIMIT

(By Ben A. Franklin)

ROANOKE, VA., Jan. 29.—Despite three years of Federal and state efforts to slow highway traffic to the 55-mile-an-hour limit imposed by Congress in 1974, the campaign has not only failed but has also inspired a type of Prohibition-era conspiracy to flout the law.

Starting at midnight tomorrow, the first concerted campaign to repeal the 55-mile-an-hour limit and raise it to at least 65 is to begin with a trucker's slowdown to 40 miles an hour. On Monday, there may be scattered traffic jams on the interstate highway system.

On this stretch of the four-lane interstate highway, the shield-shaped, red and blue route markers proclaiming "I–64" seem to be read by almost all drivers as "I go 64."

At 64 miles an hour, it is widely believed that many state troopers tend to overlook the 9-mile-an-hour excess in speed.

According to the International Association of Chiefs of Police, prosecutors and judges in some states and counties—the association will not say which ones—have been declining to bring to trial cases in which the offender does not exceed the old speed limit. In most states, that was 65 miles an hour.

The risk-taking mood of the majority of motorists was evident in observations by The New York Times in recent months, in which a borrowed police radar was used on three interstate highways in Virginia and Maryland: I–64, I–81 and I–95. The average speed of 70 vehicles clocked, about half of them trucks, was 64 miles an hour.

With citizens' band radio and radar detectors, some drivers, including truckers, were willing to go 70 miles an hour and over if the highway "was clean and green," meaning free of Smokey Bear, a C.B. term for state troopers.

PROHIBITION PARALLEL

The parallel to the Prohibition era, with its good-humored contempt for the law even among otherwise law-abiding citizens, is also evident in a gathering public campaign to repeal the 55-mile-an-hour speed limit.

Thousands of truckers, mostly independent owner-drivers, have been asked by the Independent Truckers Association to cruise on interstate highways on Monday at no more than 40 miles an hour.

The 40-mile-an-hour slowdown is meant to be a legal but nonetheless an attention-getting demonstration. The protesting truckers, marking the anniversary of spontaneous driver demonstration that snarled traffic in 1974, contend that the 55-mile-an-hour limit costs each independent driver—who profits by rapid deliveries and turnarounds—hundreds of dollars a year in traffic fines. The truckers association wants Congress to de-

cree a 65-mile-an-hour limit on interstate highways.

The truckers association grew out of the group that led such widespread demonstrations in 1974 against the 55-mile-an-hour speed limit and rising Federal fuel prices that some states mobilized the National Guard.

The association said that trucks from coast to coast will carry posters opposing the 55-mile-an-hour limit and that truck operators will "evangelize" automobile drivers over CB radio. But the truckers have been urged to stay within the law—not to cruise abreast at 40 miles an hour on a two-lane highway, for example. There are laws against obstructing traffic.

"TOWN MEETINGS" PLANNED

They are to proselytize nontrucking motorists by showing highway courtesy and by urging "four wheelers," or family cars, to join them in a series of "town meetings" opposing the 55-mile-an-hour speed limit at truck stops along the interstate highways.

The demonstration here, on the stretch of I-81 that runs down Virginia's Shenandoah Valley, is to be led by Mike Parkhurst of Los Angeles, president of the truckers association and editor of Overdrive magazine, and Bill Scheffer, a trucker from Breezewood, Pa., who is the association's eastern vice president.

ART MURPHY

Mr. CHURCH. Mr. President, recently Art Murphy, an Idaho State Senator was honored in a "portrait of a distinguished citizen" by the Idaho Statesman of Boise, our largest newspaper.

As the article notes, Art Murphy is truly "a self-made man" who was born in 1898 when Indians were still encamped on the shores of Idaho's Lake Pend Oreille, where he grew up.

Art Murphy has served in the Idaho Legislature—in both its House and Senate—at various times since 1936. He has presently served in the Idaho Senate since 1956, a term of service longer than any present legislator now in office, and the only one to serve as both majority and minority leader in both houses of the legislature.

But as important as politics have been to Art Murphy's life, he is also an avid sports fan and a former professional baseball player.

I ask unanimous consent, Mr. President, that this portrait of one of Idaho's most distinguished citizens be printed in the RECORD.

There being no objection, the portrait was ordered to be printed in the RECORD, as follows:

[From the Idaho Statesman, Boise, Idaho]

PORTRAIT OF A DISTINGUISHED CITIZEN

Art Murphy, state senator for District 4, is a true self-made man.

Born "on the wrong side of the Northern Pacific tracks" in 1898 when the Indians were still pitching their tepees on the shores of Lake Pend Oreille, Murphy remembers throwing coal off coal cars to keep from freezing during the winter.

Murphy dropped out of high school and signed a contract to play baseball with the Pacific International League in 1920. He joined the Northern Utah League in 1921 and the Timber League in 1926, where he led the league in batting with a .425 average.

In 1927, Murphy was purchased by Oakland in the Pacific Coast League, and played on the pennant-winning team. He also managed the minor-league Ogden team for the parent Oakland club in the first half of the 1927 season.

Murphy returned to Mullan in 1928 to work for the Federal Mining Co. and play baseball. He first ran for the Idaho House of Representatives in 1936. Since the salary of politicians in those days was $5 a day, no one campaigned and, Murphy says, he won because of his baseball fame.

Murphy lost in 1938 but returned to the legislature and became assistant House majority leader in 1940, when there were 50 Democrats and only nine Republicans in the House. He was defeated for the Senate in 1944, and did not run again until 1950, when he again was elected to the House.

He served another term in the House, and was first elected to the Senate in 1956, where he has served 11 consecutive terms. He has served longer than any other legislator now in office, and is the only legislator to serve as majority and minority leader in both houses.

Murphy was the first to sponsor a slot-machine bill, and also carried the first bill to establish a fish and game commission.

Murphy led the fight in the Senate for voting rights for 19-year-olds and helped revise the Idaho election laws.

Murphy was director of the board to restore the Cataldo Mission and the Wallace Museum and chairman of the platform committee at the Democratic convention.

He has served as president of the Mullan Chamber of Commerce and as the first civil defense director of Shoshone County.

Murphy, who has served under seven different Idaho governors during his long legislative career, is married to the former Anietta Rolfs of Mullan.

It was the sight of Murphy, affectionately called "Pops" by his friends, that brought tears to the eyes of former Gov. Cecil Andrus as Andrus finished his farewell State of the State address to the legislature upon becoming secretary of the Interior.

"He is a terrific guy," said Lt. Gov. Bill Murphy. "His record shows that the confidence the people at home give him is confirmed by the legislature. He has had a hell of a career."

NOMINEE FOR FTC CHAIRMANSHIP, MICHAEL PERTSCHUK, AN EXCELLENT CHOICE

Mr. PERCY. Mr. President, I would like to voice my heartiest approval of President Carter's nomination of Mr. Michael Pertschuk to the position of Chairman of the Federal Trade Commission. His selection is an excellent indication of what I hope will be a continuing commitment on the part of this new President to seek out the best qualified persons to head the independent regulatory agencies.

The selection also speaks well for the seasoned judgment of my esteemed colleague, the senior Senator from the State of Washington (Mr. MAGNUSON), who, as chairman of the Senate Commerce Committee, years ago had the good judgment and foresight to select the highly talented and respected Mr. Pertshuk as staff director of that committee.

Mr. Pertschuk is one of the most knowledgable persons to be found in the area of consumer protection and business regulation. His 15 years as a Senate staff member, universally respected by his colleagues, have made him intimately familiar with the legislative process and have thoroughly demonstrated his ability to work effectively with the Congress. As chief counsel to the Senate Commerce Committee for more than a decade, Mr. Pertschuk has shown himself to be a capable, imaginative, and conscientious leader.

Particularly gratifying is the fact, based on personal knowledge and acquaintance, that Mr. Pertschuk shares the desire of so many of us in the Congress to see the regulatory process be made more effective and responsive to the felt needs of the American public. Every effort must be extended to make regulations more clear, consistent, and sensible. Yet it seems almost as if the bulk of Federal regulations were drafted with the opposite goals in mind. Without sufficient direction, many of these rules and codes have grown, Topsy-like, to the point that they now diverge from or even contradict the underlying purposes of regulatory legislation—to promote competition and fair business practices.

I am confident Mr. Pertschuk concurs that the time has come for a reassessment of the goals of Federal regulation, a revision of the byzantine rulemaking procedures, and a review of agency performance. To this end, Majority Leader ROBERT C. BYRD, Senator ABRAHAM RIBICOFF, and I, along with 30 additional colleagues, have joined in sponsoring S. 600, the Regulatory Reform Act of 1977, which requires these tasks to be undertaken and completed according to a rigid discipline over the next 8 years.

I look forward to working with Mr. Pertschuk in this endeavor, and I welcome his nomination.

There appeared a short piece concerning Mr. Pertschuk's nomination in the March 7, 1977, issue of Newsweek. Although too brief to do proper justice to his distinguished career, it will nonetheless be of interest to anyone unfamiliar with his background, the respect he enjoys, and his accomplishments.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REGULATION: A TOUGH MAN FOR THE FTC

His name is hardly a household word, but as chief counsel of the wide-ranging Senate Commerce Committee, Michael Pertschuk is one of the most powerful men on Capitol Hill. The commerce committee has oversight powers covering virtually everything involving interstate or foreign commerce—and chairman Warren Magnuson has allowed the 44-year-old Pertschuk to run it as his own personal fiefdom for more than a decade. But while few Congressional staffers wield such influence, Pertschuk may soon be leaving the Hill. Last week, the White House spread the word that, pending an FBI background check, President Carter planned to nominate Pertschuk to head one of the most controversial and important agencies in Washington—the Federal Trade Commission.

The proposed appointment delighted consumer advocates. "Rarely has there been a more perfect match between the technical requirements of a government post and the talents of the nominee," proclaimed Ralph Nader, a longtime friend of Pertschuk. Some businessmen, however, were alarmed—though after weeks of rumors that Carter was considering flamboyant ex-Congresswoman Bella Abzug for the FTC chair, many were clearly

relieved at the choice. "He has a reputation for listening," said legislative-affairs chief Ed Grefe of Philip Morris, which along with the rest of the tobacco industry is currently the subject of an FTC investigation aimed at determining whether cigarette advertising is enticing young people to start smoking. "If Carter was serious in his campaign promise to be concerned with consumer affairs, he picked the most knowledgeable guy on Capitol Hill."

CREDIT

Pertschuk has worked in Washington for 15 years, serving as an aide to former Sen. Maurine B. Neuberger of Oregon before joining the commerce committee staff in 1964. As the committee's de facto boss, Pertschuk can claim at least partial credit for the creation of the Consumer Product Safety Commission, Federal standards for tires and flammable fabrics and many auto-safety and insurance reforms.

But perhaps his most conspicuous accomplishment has been his use of legislative clout to transfer the FTC from a somnolent backwater that rarely exercised its formidable statutory powers into an activist agency that often infuriates business.

It was mainly as a result of Pertschuk's prodding that Congress passed the Magnuson-Moss Act of 1974, which extended the FTC's jurisdiction beyond business "in" interstate commerce to those merely "affecting" it. What's more, it authorized the agency to establish tough new rules of conduct, telling businessmen from funeral directors to hearing-aid dealers just what they can and cannot do. The FTC, for example, is currently preparing regulations that will dictate to food producers which products they can advertise as being wholesome or nutritious.

It is this new activism—the agency currently has 749 separate investigations underway, ranging from the tobacco study to an effort aimed at breaking up the oil industry—that has embroiled the FTC in controversy. Businessmen charge that many of the probes are little more than costly fishing expeditions. And they complain that the blizzard of rules and regulations issued by agency lawyers in recent years seems designed more to harass business than protect consumers. Many businessmen are especially outraged at such actions as the FTC's "shared monopoly" case against breakfast-cereal manufacturers, based on the novel concept that a handful of firms can control the market without any overt conspiracy.

Pertschuk himself is maintaining a discreet silence until he is officially nominated, but friends say that he agrees with much of the criticism—up to a point. According to associates, he believes that FTC regulations have become too cumbersome and its procedures too lengthy.' He also is known to feel that too many of the FTC's bright young lawyers too often evaluate potential prosecutions with an eye to how winnable they are, not how much good they are likely to do.

ASSURANCE

But while Pertschuk will seek to streamline the FTC, associates say he will stress increased corporate competition and fair business practices. Moreover, he may well use his legislative expertise to push for consumer-protection laws that give the FTC even broader enforcement powers. How much he will actually accomplish will depend largely on how much backing he gets from Congress and Carter. But Pertschuk, who at first discouraged White House overtures to take the job, is no stranger to the art of the quid pro quo—and chances are he wouldn't have accepted the nomination without assurances of White House support. "Every industry lobbyist will scream for more staff and more money when Mike is appointed," says a former aide to Virginia Knauer, President Nixon's consumer adviser. "They're all afraid of him."

A BETTER WAY OF SELLING ARMS

Mr. KENNEDY. Mr. President, a recent article in the Christian Science Monitor suggests quite cogently that we explore with far greater enthusiasm cooperative procurement policies with our NATO allies in the areas of defense needs.

Robert E. McGarrah, a professor at the University of Massachusetts School of Business Administration, raises interesting examples of ways in which such standardized weapons use and development might produce significant cost savings.

I urge my colleagues to examine this article which suggests that—

Multinational cooperative programs to develop and export common conventional weapons are practical means for Washington to strengthen its leadership and the solidarity of the Western community and to reduce U.S. defense expenditures without risking Western security.

The only cautionary note I would offer is that the initial decisions as to what weapons are needed and what kind of sales are desirable must be made within a framework of an accepted political policy and a coherent arms sales policy.

To undertake a particular weapons system because of an offer to jointly fund its development from any nation makes no sense when that weapon is not essential to our own needs or conflicts with policies designed to reduce conventional arms in a particular region of the world.

I ask unanimous consent that the article "A Better Way of Selling Arms" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A BETTER WAY OF SELLING ARMS

(By Robert E. McGarrah)

The change of leadership in Washington should occasion a change in the American arsenal of democracy. The goal should be a multinational cooperative arsenal for democracy.

For decades the United States has stood alone as the military-industrial superpower of the noncommunist world. The Pentagon's arms policies of "buy American" *exclusively* and "export American" *aggressively* have evoked similar policies by other democratic governments.

U.S. Government competition with British, French, and West German governments for shares of global arms markets has inflicted unnecessary burdens of keeping redundant American and European arms firms from going bankrupt. Western governments' competition has spread or intensified the arms race in nonaligned countries more than competition between Western and communist governments.

Unlike their counterparts in nonmilitary production, Western arms firms are not free to compete or merge interests in a larger, more efficient North Atlantic or Pacific defense market. Washington refuses to procure arms from foreign industrial sources and demands that allied governments procure arms from American firms to pay cost of deploying U.S. forces abroad.

Although NATO governments are committed to their alliance for political and military security, U.S. policies for military-industrial independence have jeopardized the security of NATO military forces. Gen. Alexander M. Haig, Jr., Supreme Allied Commander of NATO forces, said that the "will, solidarity, and unity" of NATO forces is perceived by Warsaw Pact forces to be weak because of governments' failures to cooperate in developing and deploying standard weapons. Gen. Andrew J. Goodpaster, former Supreme NATO Commander, estimated that common weapons could increase NATO's military effectiveness by 30 to 50 percent for most units and up to 300 percent in the case of some tactical air units. In a recent study commissioned by the Pentagon it was estimated that NATO governments could save from $10 to $12 billion annually if their defense ministries developed and deployed common equipment for their military forces.

During the past several decades Americans spent about 7 percent of their gross national product (GNP) and about 45 percent of their federal budget for military purposes, while Europeans spent about 3.5 percent of their GNP and 18 percent of their national budgets for those purposes. If this burden had been shared equally, the U.S. defense budget could have been reduced, and the West's military-industrial solidarity and effectiveness would be much stronger than they are today.

While Americans have been spending more on defense, their allies have spent more to develop and export civilian products. The U.S. position has declined significantly in world trade of virtually all industrial goods. But U.S. exports of armaments exceed the combined arms exports of all other Western countries.

Of course, growth in technology and industry for military and civilian products requires the same resources now in more limited supply than ever before. The same dollars of federal contract expenditures for civilian products result in higher productivity and employment of more people than for military products.

Civilian products are used immediately after they are produced. But weapons are not, except in wartime. It could be that U.S. overinvestment in redundant arms industry capabilities, which cannot produce returns, has been a cause for the underinvestment, inflation and unemployment in industries for housing, mass transportation, antipollution systems, which do produce returns.

There are precedents for policies of cooperative arms development and exports. A study by the Rand Corporation for the U.S. Air Force found that the Japanese Government increased its funding and procurement of F–104–J aircraft by 20 percent because of cooperative arrangements for Japanese firms to participate with U.S. firms in production.

When, as negotiator for the U.S., this writer was able to offer British firms a fair opportunity to compete for production of "Mallard" field army communications equipment for the U.S. Army, the UK government agreed to fund 30 percent of the development costs. This was far more than its proportionate share of the total number of Mallard systems scheduled for deployment by allied armies.

The Belgian, Danish, and Dutch governments agreed to procure F–16 aircraft after the U.S. Air Force decided to procure the F–16 and U.S. defense firms agreed to cooperative production arrangements with their industries.

Multinational cooperative programs to develop and export common conventional weapons are practical means for Washington to strength its leadership and the solidarity of the Western community, and to reduce U.S. defense expenditures without risking Western security. Moreover, cooperative programs would facilitate international agreements for multinational companies to channel flows of funds, materials, technology,

and to schedule production and employment in the mutual best interests of cooperating nations.

Bribery payments to sell arms would no longer be encouraged. The image and performance of multinational firms could be improved.

Savings from cooperative arms development could be reinvested in contracts with U.S. industries for developing mass transportation, health delivery, or pollution control systems. The funds and centralized organization Washington now employs to promote arms exports could be diverted to promote exports of such civilian equipment.

Policies for U.S. military industrial independence are no longer realistic. Global resource limitations have already forced irreversible commitments to civilian-industrial interdependence for energy, food, and most other industrial materials and products. We should cease standing alone as the West's military-industrial superpower. The new administration and 95th Congress should resolve to authorize and fund Pentagon programs for conventional weapons if they are to be undertaken in cooperation with governments of other industrial, democratic nations.

IN COMMEMORATION OF 150 YEARS OF THE BLACK PRESS OF AMERICA

Mr. LUGAR. Mr. President. I take pride in paying tribute today to the black press of America, which was founded 150 years ago yesterday.

Freedom's Journal, the first newspaper to be published in the United States by men of African descent, appeared on March 16, 1827. The publishers of the weekly paper, John B. Russwurn and Samuel Cornish, were ardent, active abolitionists, and the objective of Freedom's Journal is explicit in its name.

Since that time, many hundreds of newspapers have been published by and for black Americans, and today we also have dozens of excellent "black" magazines—such as Ebony, Jet, Essence, Encore, Tuesday, and Dawn.

In my home State of Indiana we have several excellent black publications, including the South Bend Reformer, Frost Illustrated, the Gary Crusader, the Gary American, the Gary Info, the Indiana Herald, and the Indianapolis Recorder.

These and other black publications have truly become an American institution, and I am pleased to wish them continued success as they maintain the highest traditions of journalism.

GENOCIDE AND REFUGEES

Mr. PROXMIRE. Mr. President, a Washington Post article during the past week has described an often overlooked problem which results from the crime of genocide—refugees.

According to the article, Mr. President, thousands of Ugandan citizens have been forced to flee their homeland because of the determination of Idi Amin to wipe out members of the Acholi and Lango tribes. Christians have also been forced to flee the "tribal and religious genocide" in Uganda, bringing the number of recent refugees in Kenya to between 600 and 10,000.

The fate of these victims of Idi Amin's genocidal purge is difficult to comprehend. The Washington Post described the situation in this way.

> By the thousands, refugees . . . are streaming into Kenya to avoid the brutal regime of Amin. They feel they face death or torture at home. Here they face a hard life in a country that already has more refugees than it can handle.

Whether these people stay in their homes to suffer persecution or whether they flee to an unknown land, their lives will be forever disrupted. This sad legacy is one of the direct results of genocide and it is one reason why I have persistently worked for this body's ratification of the Genocide Convention.

Realistically, our ratification of the Genocide Treaty would probably not have saved the lives of the 2,000 to 5,000 persons who have died in Uganda since January. But our ratification of the Genocide Treaty would have provided more credibility to President Carter's criticisms of the Amin government, perhaps increasing the President's influence in the area.

The Ugandan situation has cast a spotlight on the genocide issue. It has also focused attention on our failure to ratify the Genocide Convention. Now is the time to act. I urge that we ratify the treaty at once.

FOREIGN VIEW OF U.S. ENERGY HABITS

Mr. PERCY. Mr. President, as we regain our footing after another energy shortage, it might be instructive to see what other nations are thinking of us.

The London Times last month carried an editorial entitled "The Price of American Waste." That editorial says in part:

> Energy conservation has always . . . been more profligate in the United States than in any other country. Houses and offices are hotter in winter and cooler in summer than anywhere else. Americans use larger, less efficient cars than any other people.

When I was in Japan recently I learned some of our Japanese friends think of us as "energy hogs."

In an article entitled "Blaming America"—Sunday Times of London, reprinted in the New York Times of February 28—Peter Rodgers writes:

> It is high time that the blame for causing the next energy crisis is put where it belongs, not in the Middle East but in America.

Peoples of underdeveloped nations are amazed at how much energy we waste. In many cases we waste more than another entire nation uses.

When we tally up the costs of our energy guzzling, in addition to considering environmental damage, loss of nonrenewable resources and dependence of foreign cartels, let us not forget also the contempt of other nations. Many of them have already learned to use conservation energy; so must we.

Mr. President, the two articles I mentioned, "The Price of American Waste" and "Blaming America," are reminders to us of how foolish our energy habits look to the rest of the world. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the London Times, Feb. 3, 1977]

THE PRICE OF AMERICAN WASTE

It is the weather that has brought the American energy crisis to the surface. Energy consumption has always, however, been more profligate in the United States than in any other country. Houses and offices are hotter in winter and cooler in summer than anywhere else. Americans use larger, less efficient cars than any other people. For a while, especially under the impact of the 1973 oil price crisis, there was some shift of fashion toward the compact car, with its better fuel performance. But the fashion was short-lived and Detroit is once again producing and selling "gasoline guzzlers" as it did in pre-Opec days.

For decades this profligacy was a matter of purely domestic concern, for the United States was effectively self-sufficient in energy from indigenous sources. From the 1950s onwards, however, American energy consumption has steadily outstripped domestic production. This widening gap has been filled by imports, first from Canada and Venezuela, but now in the main from the Middle East. The consequences, economic and political, of this shift have been profound.

President Nixon reacted to the 1973 oil price rises and the sudden evidence of Opec's political power with the much publicized Project Independence. Its aim was to restore the United States to complete self-sufficiency in energy by the mid-1980s. The Project, though its objectives were subsequently scaled down, must be deemed a failure. The United States is still importing over 40 per cent of its oil requirements and the effective dependence of the entire American economy on Middle East oil producers has increased and will inevitably increase further.

There are many factors contributing to this worsening situation. On the side of supply, the development of nuclear power generation has been slower than was forecast. The expansion of the coal industry has, likewise, lagged behind expectations. In both these cases, the increasingly effective environmental lobby has had a significant influence in slowing development. In addition, with its tenacious objections to the Alaska pipeline, the exploitation of those oil reserves has been long delayed.

On the side of demand, the situation has unquestionably been made worse by a deliberate policy of low pricing. The reserves of natural gas have been exploited to the point of exhaustion by the Federal Pricing Policy, under which low prices have hugely stimulated demand. With all oil products, however, the American economy has enjoyed lower prices, and consequently inflated demand, on a scale unknown in other industrial countries. The concepts of energy conservation have played no effective part in official American policy.

The United States is not unique in having failed to develop and implement a coherent energy policy. The European Community thought seriously about the problem in the shadow of the events of 1973. Today, however, lulled by temporary plenty, it is no nearer to a sensible policy than it was then. There is further the danger that, under immediate pressures from the balance of payments, our own Government will give insufficient weight to the arguments for conservation of the North Sea resources.

It is, however, the American energy economy and its imbalance that creates the international problem, because of its sheer size. The effect has been to destabilize international oil prices. It has effectively created the power of Opec by creating the conditions in which a producer cartel can be effective. By tying the American economy to the political instabilities of the Middle East it has created a whole new dimension of diplomatic and military problems. At an industrial level, also, there is increasing resentment that the

American economy is able to produce and compete with the rest of the world from the highly favourable base of cheap energy costs. For all these reasons, the rest of the world must have the closest interest in President Carter's attempts to produce a domestic energy policy which would be more effective than that of his two predecessors.

[From the New York Times, Feb. 28, 1977]

BLAMING AMERICA

(By Peter Rodgers)

LONDON.—It is high time that the blame for causing the next energy crisis is put where it belongs, not in the Middle East but in America. The land of big cars, overheated houses, stifling offices and half-empty airplanes is doing more to store up trouble for the rest of us on the energy front than the Shah of Iran and all the greedy hordes of the Organization of Petroleum Exporting Countries put together.

The world will be seriously short of oil by 1985, according to the Organization for Economic Cooperation and Development, which published an unusually sharply worded report on energy. But who is doing most to bleed the earth of its energy supplies without replacing them? Who is sucking in vast and increasing quantities of OPEC oil, threatening shortages which are likely to drive up prices a lot more effectively than any gathering of belligerent oil ministers?

None other than the home of the market economy, the United States—which has nothing resembling a free market in energy, and where oil and gas prices are kept down by haphazard legislation which actually promotes the profligate habits of its citizens. And if there is one single villain in this piece who is really helping OPEC, it is the American motorist. Encouraged by low prices and taxes, largely oblivious to the effect of American habits on the outside world, he is an oil gobbler whose return to his love affair with big cars is startlingly obvious. A trifling flirtation with small engines after the 1973 oil crisis seems to be over already.

The United States has a dominating influence on world energy which is worth spelling out. It uses as much as the rest of the 26 nations in the O.E.C.D. put together. It now imports a staggering amount of oil, nearly half of its entire consumption, sucking in this year nearly a third of OPEC's output, equivalent to four times what the British North Sea will produce at full flood. The rise in United States imports between 1974 and 1977 alone is roughly equivalent to an entire British North Sea's worth.

Yet some experts reckon that the United States could without much trouble save half a North Sea's worth of oil imports simply by using smaller and more efficient car and lorry engines. That may be too optimistic, but even the O.E.C.D.'s careful estimates suggest that two simple measures in transport could by themselves save 35 million tons of United States oil imports a year by 1985. These are a statutory increase fuel economy to 27.5 miles per gallon, and pooling of truck and aircraft operations.

The O.E.C.D. says that in theory the United States ought to be able to cut its oil imports by well over half by 1985, with a combination of conservation and encouragement to domestic producers to exploit new supplies. That is more than the rest of the O.E.C.D. countries could contribute together, and would be enough to prevent an otherwise serious oil shortage.

The story of American oil prices, which blatantly encourage higher consumption, shows why. In theory, Federal price controls, which keep domestic oil production well below OPEC price levels are to be phased out by April 1979. In practice, many expect that they will continue, because of the power of consumer lobbies and the opposition of Congress to something as politically unpopular as high prices. The chances of additional gasoline taxes, at a European level high enough to affect consumption dramatically are pretty remote.

If hopes of real conservation through prices are low, what about finding new supplies of energy? This is another side of America's chaotic policy. Forget solar energy and all the other gee-whizz ideas, and look at gas prices. These are a classic example, now enshrined in the text books, of how controlled prices prevent exploration and new production and backfire on the consumer. At this very moment, industrial supplies are being cut off in the United States to protect homes.

Theoretically these controls are being dismantled, but few people believe it will happen fast, despite a faltering start made last year. Yet according to the O.E.C.D., an end to gas price controls could bring the energy equivalent of another 70 million tons of oil a year to market by 1985, indirectly cutting United States oil imports and taking some of t' pressure for supplies off Europe, Japan and the developing world.

If the United States had done something about its imports from 1974 onwards instead of inventing high-sounding nonsenses like Nixon's Project Independence, there might have been no oil-price rise at all in January. It takes only a small world surplus to provoke price shaving, as the experience of 1975 has shown.

With President Carter about to stimulate the economy, some oilmen now fear that this could be a big enough boost to imports to produce world shortages later this year, not in 1985. Market forces and American car owners will be doing OPEC's job for it.

SOARING COST OF THE B–1 BOMBER

Mr. CULVER. Mr. President, the B–1 bomber is likely to cost even more than the latest official estimate of $94 million per plane.

According to information provided to the Senate Armed Services Committee, the price tag is now likely to jump to nearly $117 million for each aircraft.

Last fall, an independent cost analysis team in the Air Force calculated that production of the B–1 could cost 20 percent more than the current program estimates. In addition, recent changes in the program may add another $1.9 billion to the price tag. All together, the B–1 program could cost $28.5 billion.

If these internal Air Force estimates prove accurate, each B–1 will end up costing nearly $117 million, or nearly three times the original estimate of $40 million.

Though all estimates are necessarily imprecise, I believe this latest, much higher, estimate deserves the closest scrutiny. As I understand it, the independent cost analyst team made one estimate of a 4-percent increase in B–1 production costs, based upon the historical experience with a large number of aircraft. The team then made a second estimate, however, considering only the production costs of our most recent generation of combat aircraft, which resulted in the projected 20-percent increase above the current official estimate.

In addition to this Air Force estimate, the General Accounting Office, in a study of the B–1 released on February 16 of this year, concluded that "current estimated program costs could be exceeded by several billion dollars." This is further evidence that the official program estimates are likely to be well below actual costs.

It is clear that the plane we do not need will cost far more than we can reasonably afford. Even at the previous $94 million per copy estimate, the B–1 is not worth its enormous cost.

The marginal improvements promised by the B–1 do not justify these soaring costs. The more we spend on the B–1, the less money is available to meet more urgent military requirements as well as vitally important domestic needs.

For example, the money for each B–1 would be enough to buy 185 modern tanks, or at least seven of our best F–15 fighter planes, or more than 17,000 TOW antitank guided missiles.

If spent on domestic programs, the alternatives are also impressive. For the price of a single B–1 bomber, we could pay the operating costs of 1,000 rural health clinics for an entire year. For the same amount, we could provide a year of daily, family-style hot meals for 160,000 elderly people under current Federal nutrition programs.

In view of the ever-rising B–1 costs and the valuable alternative expenditures, I cannot see how President Carter, who called the B–1 wasteful and unnecessary during the campaign, could now decide to go ahead with this enormously expensive program.

Mr. President, I ask unanimous consent that the summary digest of the latest GAO report on the B–1 be printed in the RECORD.

There being no objection, the digest was ordered to be printed in the RECORD, as follows:

STATUS OF THE B–1 AIRCRAFT PROGRAM

The primary mission of the B–1 aircraft is to deter nuclear aggression by standing ready to deliver weapons from low altitudes at high subsonic speeds. Full-scale development of the B–1 began in June 1970 and flight testing of development aircraft began in December 1974.

From September through November 1976, the B–1 program was reviewed by the Air Force, outside panels, and the Defense Systems Acquisition Review Council. On December 2, 1976, the Secretary of Defense authorized the Air Force to proceed with production of the B–1 aircraft but required a review by the Defense Systems Acquisition Review Council before proceeding with production of the defensive avionics subsystem which is still in the development phase.

The production contracts were negotiated to limit the expenditure of procurement funds to a cumulative rate not to exceed $87 million a month through June 1977. The first production aircraft is scheduled to be delivered in 1979 with initial operational capability scheduled for May 1982.

GAO reviewed the status of the B–1 aircraft program with emphasis on flight and ground test performance and problems. The flight testing of the development aircraft has proceeded reasonably well and has disclosed no major problems which would dictate a delay in production. As with any major developmental program, testing has disclosed a number of areas that will require improvement. (See pp. 13 to 27.)

The major concerns over this program at

the current time are (1) the continuing increases in program costs and (2) the pace of development of avionics subsystems. (See pp. 6, 17, 18, and 28 to 31.)

The following are the important matters noted during GAO's review:

Many of the B–1 mission capabilities were demonstrated during the 417 hours of flight testing completed as of November 30, 1976. Some problems, involving aircraft components, the engine, and the offensive avionics, were not completely resolved and potential solutions must be flight tested further. Planned flight testing will continue into 1982. (See pp. 14 to 21.)

During flight tests, the B–1 was flown on terrain following runs at mach 0.85 at 200 feet. Because of test range limitations, each run was limited to a few minutes. While a complete demonstration of range has not been accomplished during flight testing, the Air Force stated that analyses based on the flight test indicate the B–1 will meet the range requirements. (See p. 10.)

The Air Force Test and Evaluation Center completed an initial operational test and evaluation of the B–1 weapon system in October 1976. Center officials said the B–1 will have the capability to perform the missions for which it was designed. As of January 11, 1977, the final Center report was not yet published and, thus, not available for review by GAO. (See p. 19.)

Static testing of major airframe components to 150 percent design limit load and an airframe to 100 percent of design limit load were completed. Aeronautical Systems Division engineering personnel have expressed concern over the adequacy of the B–1 static testing program. The Air Force recognizes that there is some risk involved in the latter; however, the Air Force considers this risk to be well within an acceptable level. (See pp. 22 and 23.)

Fatigue testing of major airframe components is scheduled to be completed in 1977. Fatigue testing of an entire airframe is scheduled to be done in 1981 and 1982. (See p. 23.)

The engine product verification test program was completed in August 1976. Engine thrust requirements were met or exceeded, but weight and some of the fuel consumption requirements were not met. The tests to date have not demonstrated the capability of the engines to ingest a required number of small birds without significant power loss. Problem solving, further development, and testing of the engine will be part of a continued engineering development program scheduled to last until 1979. (See pp. 24 to 27.)

Testing of the defensive avionics will begin in 1977. Analysis indicated that this subsystem's weight, electrical power, and cooling requirements will not be met but it is expected that when the subsystem is consolidated with other avionics items, the total weight, electrical power, and cooling specifications will be adequate. (See pp. 28 and 29.)

Program cost increased by $1,693.5 million to $22,889.5 million. An independent cost estimate was made in 1974 using different methodology and estimates of inflation then used for developing the current estimate. A comparison of the estimates shows that current estimated program costs could be exceeded by several billion dollars. Air Force officials stated that the differences in the estimates were well within the range of estimating accuracy. An independent cost estimate completed in 1976 was not made available during GAO's review because the Department of Defense considered it to be an internal document being used at the time for decisionmaking purposes. (See pp. 5 to 8.)

Development of the expendable countermeasures subsystem, which dispenses flares and chaff, began in 1976. Flight testing of this subsystem is planned for 1979. (See p. 30.)

The Air Force had not selected a tail warning set to detect the firing of air-to-air missiles so that expendable counter-measures can be more effectively used. (See p. 30.)

Since production of defensive avionics is not scheduled to begin until 1979 and the first delivery is not scheduled until 1981, the first 34 production aircraft will be delivered without defensive avionics and will require retrofit when the equipment becomes available. (See pp. 30 and 31.)

In approving the B–1 for production, the Secretary of Defense directed the Air Force to include in its follow-on testing: (1) nuclear hardening sufficient to meet the threat, (2) evaluation of detection range, and (3) alert response time and mission range. A test and evaluation master plan must also be submitted for review and coordination. (See p. 20.)

RECOMMENDATIONS

GAO recommends that the Secretary of Defense analyze the results of completed static tests to assess the risk of proceeding with B–1 production without static testing an airframe to 150 percent of the design limit load.

In view of the continually increasing cost estimate for the B–1 program, the Congress should require the Secretary of Defense to provide them with information on (1) recent independent cost estimates and the consideration given to these higher estimates in developing the most recent B–1 program cost estimate and (2) the results of the initial operational test and evaluation and the consideration given to the results in approving the B–1 for production.

A draft of this report was reviewed by agency officials associated with management of the program and their comments have been incorporated as appropriate.

THE IMPORTANCE OF THE INTERNATIONAL FINANCIAL INSTITUTIONS

Mr. PERCY. Mr. President, last week the Foreign Assistance Subcommittee conducted hearings on legislation to fund two international development banks, the International Bank for Reconstruction and Development—World Bank—and the Asian Development Bank.

In the hearings, we were considering an administration request for a very large amount of money—a multi-year authorization of over $5 billion. This figure is a little misleading, however, because over $2 billion of these funds are only pledged guarantees for certain types of loans, and would only be used in the event of large defaults. The IBRD has never had a default on a loan, so the chances of these pledged funds being "called" are considered remote.

Nevertheless, many Americans who have had to tighten their belts to pay the heating bills and the tax collector and to put nutritious food on the table are going to ask why—why should we be diverting our resources to other parts of the world?

One very important reason is that in terms of our own national interest, our long-run economic well-being will depend on the cooperation and economic health of the developing world. In this testimony, Treasury Secretary Blumenthal pointed out that the developing countries represent an important market for U.S. exports and are major suppliers of much needed raw materials to this country. Increasing monetary flows to the developing countries can provide a stimulus to world economic recovery by stimulating aggregate world demand. Multilateral lending institutions provide a very effective way of channeling these funds.

As another justification for U.S. participation in the multilateral development effort, I would proudly point out that the people of this country have never shrunk from an opportunity to help those in need. While all of the countries which borrow from the development banks need assistance to improve their standards of living, among these are many countries poor enough to be eligible for "soft loans" with low interest rates, long grace periods and long maturities. For example, the countries which borrow from the International Development Association, the soft-loan facility of the World Bank, have a per capita income of less than $200. The economic growth rates of the "poorest" countries are the slowest among any group of countries in the world. They need substantial concessional assistance just to meet minimum needs.

Almost no one has worked with the economic needs of the developing countries more closely than has Robert S. McNamara, who as President of the World Bank has been a highly effective spokesman on development issues. In his address to the Bank's Board of Governors in Manila last October, he discussed these needs. With regard to the poorest countries of the world, McNamara said:

> By any objective standard, absolute poverty is an anachronistic tragedy in our century. A tragedy because it is a condition of life beneath the level of human decency; and anachronistic because there are now at hand the economic and technological means to end it.

Mr. President, I ask unanimous consent that the text of Mr. McNamara's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS TO THE BOARD OF GOVERNORS

(By Robert S. McNamara, president, World Bank group)

I. INTRODUCTION

We meet this year against the background of a growing recognition that equality of opportunity among men, both within nations and between nations, is becoming a critical issue of our time.

The search for greater social justice, and a more equitable economic environment, is evident at both national and international levels.

At the national level it is leading to serious reexamination of earlier growth strategies. It is causing governments to focus more directly on the massive problems of the absolute poor—the hundreds of millions of individuals whose basic human needs go unmet. It is stimulating a search for new development techniques that can combine substantial economic growth with greater equity in income distribution.

At the international level, it is focusing on the immense income disparities between the developed and developing nations, and it is directing attention to the desperate plight of the very poorest countries.

On our meetings in this forum over the past three years, I have discussed the nature and extent of absolute poverty; the maldistribution of income in developing societies; and the immense disparity in wealth between the developing and the industrialized nations. Within the Bank, we have intensified our study of these problems and the weight of the evidence is that they are continuing to worsen rather than improve.

It is, then, these critical issues—issues that are growing more and more insistent—that I want to explore with you further this morning. In particular, I want to answer the question: how can the World Bank respond most effectively to them?

To develop the answer, I shall:

Review the trend of income growth in the developed and developing countries during the past decade, and project its probable course over the next—distinguishing between the problems of the poorest nations, and of the so-called "middle-income" developing countries.

Consider in the case of the poorest nations the fundamental reforms required if they are to make even minimal progress against the intolerable conditions of absolute poverty—reforms both in their own internal development policies, and in the international community's development assistance.

Examine the prospects of the middle-income developing countries, and the internal and external changes that must be made if they are to achieve their growth potential, and moderate the distortion in their income-distribution patterns.

Point out the contradiction which would result if the operations of the World Bank Group were to be restricted in the face of the demonstrable need of the developing countries for additional external assistance, and the stated intentions of the developed countries—as expressed in the Special Session of the General Assembly, the UNCTAD Meeting in Nairobi, and the North-South Dialogue in Paris—to help provide that assistance.

And finally, outline the action that will make it possible for the World Bank to contribute to meeting that objective.

These are the issues that all of us must face and deal with if we are to respond to the development task that lies before us.

Let us begin by examining income trends.

II. THE TREND OF INCOME GROWTH IN DEVELOPED AND DEVELOPING NATIONS

In the decade, 1965–75, the disparity in average incomes between those fortunate enough to live in the developed world and those who, by accident of birth, live elsewhere, remained immense.

INCOME DISPARITIES BETWEEN NATIONS[1]

[In constant 1975 U.S. dollars]

	Population (in millions)	Income per capita[2]		
		1965	1975	[3] 1985
1. Poorest nations (below $200 per capita)	1,200	130	150	180
2. Middle-income developing countries (above $200 per capita)	900	630	950	1,350
3. Developed nations	700	4,200	5,500	8,100

[1] Data for centrally planned economies are not published and, therefore, are excluded from the table.

[2] Because the per capita income data in the table are based on official exchange rates rather than purchasing power comparisons, which are unavailable, they represent only broad orders of magnitude.

[3] Long-term projections of economic growth are, of course, highly speculative. They are presented here not as predictions, but only to call attention to problems that may develop if action is not initiated in time to prevent them.

Average incomes in the poorest nations, with populations totalling 1.2 billion, grew at an annual rate of only 1.5%—$2 per year—during the period. And for tens of millions of individuals in these countries at the lower end of the income spectrum their already substandard levels of nutrition, housing, health, and literacy deteriorated even further. These societies have been unable to meet even the minimum human needs of the vast majority of their people.

The middle-incomed developing nations have done considerably better. As a group, they have achieved an overall growth rate for the decade of 6.8%—about 4% in per capita terms. As compared with the poorest nations, they have been able to take advantage of their more favorable endowment in resources, of better market opportunities, and of increased capital flows. Combined with their own vigorous efforts, these factors have made it possible for them to make some progress in reducing malnutrition and unemployment, and in expanding literacy and life expectancy.

Finally, there is the performance of the developed nations over the decade. It can be summed up very succinctly: whatever their other domestic and international difficulties may have been, the peoples of the developed nations enjoyed per capita incomes, in real terms, over the ten-year period that rose in absolute amounts more than in any comparable period in history.

The prospects for the next decade

What is likely to happen to income trends over the next ten years?

[4] The term "middle-income" can be seriously misleading as applied to these countries. It vaguely suggests "middle-class" as if they were somehow semi-affluent societies enjoying a broad level of prosperity. But that is a dangerous simplification. By any realistic comparison with the developed nations, these countries must content with serious problems of poverty.

For the poorest countries, the outlook is bleak: a projected per capita growth rate of at best 2% per year. And for tens of millions of human beings that means at most an advance in income of one to two dollars a year. Even if by extraordinary effort per capita growth rates could be expanded beyond 2%—and that itself is doubtful—it might well mean little or no real alleviation of absolute poverty. Growth in the gross national product, as essential as it is, cannot benefit the poor unless it reaches the poor.

It does not reach most of them now in any meaningful measure.

Could a development strategy be implemented that would reverse that?

It could.

But that would require extensive policy changes within these governments, supported by a comparable effort on the part of the developed nations.

The outlook for the middle-income developing countries is much more favorable. But, penalized by recent declines in their terms of trade and by the worldwide recession, they will not be able to recover their per capita income growth rates of the past decade unless a number of major actions are undertaken.

The governments of these countries must themselves take steps to increase internal savings, expand export earnings, and reduce the severe inequities in income distribution. And the international community must find a feasible way of providing them with additional flows of capital on appropriate terms, and reducing the barriers to their exports, particularly their manufactured goods.

I want to examine these matters now in greater detail. Let us begin with the critical situation in the poorest developing countries.

III. THE PLIGHT OF THE POOREST NATIONS

The past decade for most of the people in the poorest nations has been one of almost unrelieved deprivation. And the future offers little promise of improvement unless substantial shifts in policy are undertaken by both the governments of these nations and the international community itself.

We must try to comprehend what we in fact mean when we speak of poverty in this context. The word itself has become almost incapable of communicating the harshness of the reality. Poverty at the absolute level—which is what literally hundreds of millions of men, women, and most particularly children are suffering from in these countries—is life at the very margin of physical existence.

The absolute poor are severely deprived human beings struggling to survive in a set of squalid and degraded circumstances almost beyond the power of our sophisticated imaginations and privileged circumstances to conceive.

The table below compares conditions of life in the poorest nations and in the developed countries.

	Population (in millions)		Infant mortality (per thousand)	Life expectancy (years)	Malnourished (in millions)	Adult illiteracy (percent)
	Total	Absolute poor				
Poorest nations	1,200	750	128	50	600	62
Developed countries	700	<20	16	72	<20	1

Compared to those fortunate enough to live in the developed countries, individuals in the poorest nations have:

An infant mortality rate eight times higher;

A life expectancy one-third lower;

An adult literacy rate 60% less;

A nutritional level, for one out of every two in the population, below minimum acceptable standards; and for millions of infants, less protein than is sufficient to permit optimum development of the brain.

This is what absolute poverty means for some 750 million human beings in these nations. With an average per capita income of less than $100 today, and little more than a faint promise of a miniscule $2 annual increase over the next decade, they are locked into a set of circumstances that they cannot break out of by themselves.

It is not a scene that any one of us here—so favored, so fortunate, so surrounded in our personal lives by privilege and advantage—can contemplate without compassion and resolve.

The blunt truth is that absolute poverty today is a function of neglect—and of our neglect as much as of anyone's. For we here in this hall represent the governments, and the financial resources, and the international institutions best suited to end the curse of absolute poverty in this century.

Poverty tends to perpetuate itself, and unless a deliberate intervention is designed and launched against its internal dynamics, it will persist and grow.

The responsibility for such an effort lies first, of course, with the governments of the poorest countries themselves. Despite the

fact that in the past decade they have financed almost 90% of their development investments out of their own meager incomes—a fact not often recognized in the developed world—they must make an even greater effort in the future. They have, after all, invested less than $5 billion annually in agriculture (only 3% of their GNP and only 18% of their total investment program), less than $100 million in population planning, and wholly inadequate amounts in essential public services. And much of what they have spent has benefitted only a privileged few.

Yet whatever the degree of neglect the governments in the poorest countries may have been responsible for, it has been more than matched by the failure of the international community to assist them in the development task.

In recent years the poorest nations have received:

Only 6% of the total capital raised by all developing countries through long-term bonds;

Only 10% of the total borrowing by all developing countries in the Eurocurrency market;

Only 45% of the total concessional aid to all developing countries. As a result, the countries of South Asia, for example, received only one-third as much concessional assistance on a per capita basis as all other developing countries.

These instances could be multiplied.

But the central issue is that the plight of the poorest nations can be remedied only by deliberate decisive action, and that action must be taken at both the national and international levels. We must all accept two fundamental points.

The first is that the governments of the poorest nations have to redirect their own efforts to accelerate economic growth and reduce absolute poverty. A reasonable objective for them would be to meet the basic human needs of all of their peoples by the end of the century. They must begin by changing national investment priorities and by putting greater emphasis on assisting the poor to become more productive.

This will involve:

Intensifying the effort to expand domestic food production;

Taking more determined action to moderate population growth.[a]

And directing social services more equitably towards the poor.

The second fundamental point is that although nothing can be accomplished unless these governments themselves act, they clearly cannot meet such an objective without outside assistance. Therefore the international community must help them, and help them generously.

There are four principal ways the industrialized nations can make this help available:

By additional transfers of concessional assistance;

By reallocation of some of their existing assistance;

By easing the burden of present and potential debt; and

By expanding the opportunities of the poorest countries to earn more foreign exchange through exports.

Let us examine each one of these measures in turn.

The official development assistance target

The external assistance needed by the poorest nations over the past few years to achieve reasonable rates of economic growth, and to move toward meeting the basic human needs of their people, has been within the ability of the wealthy world to supply. And it would have been made available had the developed nations met the target, agreed on in the United Nations in 1970, of contributing 0.7% of their GNP to Official Development Assistance (ODA)—and had 0.2% out of this been earmarked for programs benefitting primarily the absolute poor.

But the target has not been met. Nor is there any present indication that it ever will be met.

In 1975 the flows of concessional assistance from 17 Development Assistance Committee (DAC) nations amounted to only 0.36% of their total gross national product, one-half of the target. There was a wide variation, however, within this groups of nations: nine countries provided more than 0.5% of their GNP as ODA; two provided less than 0.5%, but more than 0.3%; and the remaining six were below 0.3%.

This is clearly an unsatisfactory situation, and if the current trends are not reversed, ODA levels, as shown in the table below, are projected to fall to 0.33% by 1980.

ACHIEVEMENT OF ODA TARGETS BY OECD COUNTRIES

[In billions of constant 1975 U.S. dollars]

OECD country groups [1]	Share in total DAC GNP	1975 (estimated) ODA	1975 (estimated) Percent of GNP	1980 (projected) ODA	1980 (projected) Percent of GNP
I	22.8	5.5	0.64	7.5	0.70
II	17.1	2.6	.39	2.5	.31
III	60.1	5.5	.24	5.9	.20
Total	100.0	[2] 13.6	.36	15.9	.33

[1] Group I: Sweden, Netherlands, Norway, Australia, France, Belgium, Denmark, Canada, and New Zealand. Group II: Germany, and United Kingdom. Group III: United States, Japan, Finland, Switzerland, Austria, and Italy.

[2] Since 1974 OPEC members have made available about $5,000,000,000 per year in loans to other developing countries, of which approximately ½ could be classified as ODA.

But ways could be found even now to avoid such a wholly unsatisfactory outcome in 1980. If, for example, the countries that are currently lagging so far behind would agree to increase their flows of concessional assistance by adding to them over the next five years merely a small fraction—no more than 2 to 3%—of the amounts by which their per capita incomes will rise each year, the ODA totals by 1980 would be dramatically larger than shown in the table.

I believe it is time that the industrial nations themselves sat down and candidly reviewed their own record. And I believe they can and ought to come to some firm decisions as to what long-term commitments they are able and willing to make to the poorest nations—to nations whose own development efforts and plans depend so much on a more reasonable resolution of the current aid situation.

Reallocation of existing assistance

It will not be enough simply to increase the level of ODA. Its allocation must be improved as well. ODA should be increasingly directed to the poorest nations and, within them, to programs benefiting the poorest segments of their population. The penalty to the middle-income countries of such an adjustment should be offset by broader trade concessions and greater flows of private capital.

Currently the middle-income countries receive over half the total ODA. In fact, the distribution of concessional assistance on a per capita basis is some 60% higher in middle-income countries than in the poorest nations. If, for example, existing ODA were at least distributed equally between the poorest and middle-income countries on a per capita basis, it would mean an additional $1.5 billion each year for the poorest nations. This could have a very significant impact on the growth of their per capita incomes.

The International Development Association (IDA) is, of course, one of the principal instruments for channelling concessional resources to the poorest nations, and for insuring that these resources are allocated to productive projects benefiting the poorest segments of their societies. In recent years we have pursued a deliberate policy of increasing the share of the poorest nations in the allocation of IDA resources. In FY75 and FY76 these nations received 91% of all IDA commitments. Moreover, IDA resources are increasingly being directed to rural development projects, where they reach large numbers of the absolute poor.

I will return to this point later, when I discuss the replenishment of IDA's resources.

Growing debt burden

The dependence of the poorest nations on public as opposed to private sources of external finance is reflected in the table below. In 1975, public sources provided over 80% of the capital flow to these nations, and held over 80% of their outstanding debt.

DEBT STATUS OF THE POOREST NATIONS [1]

[In billions of current U.S. dollars]

	1973	1975	1980
Current account deficit before Interest payments	2.9	7.2	7.1
Interest payments	.5	.7	1.4
Changes in reserves and short-term debt	.2	—.7	.7
Total remaining to be financed	3.6	7.2	9.2
Financed by medium-and long-term capital from:			
Public sources	3.4	6.0	8.6
Private sources [2]	.2	1.2	.7
Total net capital flows:			
Current dollars	3.6	7.2	9.3
1975 dollars	5.1	7.2	6.4
Outstanding medium- and long-term debt:			
Public sources	18.6	23.6	41.7
Private sources	3.1	4.8	7.2
Total:			
Current dollars	21.7	28.5	48.9
1975 dollars	30.6	28.5	34.2
Debt service:			
Interest payments	.5	.7	1.4
Debt amortization	.9	.9	2.1
Interest payments as percent of GNP	.4	.3	.4
Debt service as percent of exports	12.7	11.5	12.2
Price deflator	71	100	143

[1] Excludes oil exporters.

[2] Includes "Direct Foreign Investment."

The table shows that the outstanding debt and the debt service of the poorest nations has risen since 1973, and is likely to rise still further between 1975 and 1980. However, the increases are not large when adjusted for inflation, and they appear still smaller when account is taken of the growth in exports during the same years. Even in 1980, the debt service burden of these nations, in relation to their exports, is likely to be about the same as in 1973.

The real difficulty that the poorest nations face is not the burden of the debt itself, but rather the very low level of capital flows—a level so low as to seriously limit their economic growth. Their growth was restricted by inadequate capital flows in 1973, and it is being similarly restricted today. Moreover, as the table indicates, these capital flows are likely to remain at a very low level in 1980.

The debt problem of the poorest nations is a long-term one which cannot be solved merely by short-term rescheduling and by further relaxation of already liberal terms. The critical issue here is the need for a substantial real increase in the net flow of capital to the poorest nations, from public sources, beyond the levels which now appear likely.

[a] This problem is, of course, of particular urgency, and rather than attempt to deal with it today, I plan to devote a major address to the subject soon.

Some developed countries could contribute to such an increase by enlarging their gross flows and by making future assistance available on grant or grant-like terms. Other countries have more flexibility and could move more directly towards various forms of debt relief. In either case, the principal objective should be a substantial real increase in net capital flows to the poorest nations over the next decade.

Expansion of exports and reduction of imports

Finally, the poorest nations—which have suffered far more than any other group of countries from the deterioration of their terms of trade over the past decade—must move closer to the long-run goal of standing on their own feet by earning, and saving, more foreign exchange. This will require a number of actions on their part, as well as the help of the developed countries. For example:

Economic policies and governmental procedures should be reshaped to stimulate exports. Such action would result in several billion dollars of additional foreign exchange earnings each year in the poorest countries. This is particularly true of those in South Asia, which have had a declining share in the world's exports of both commodities and manufactured goods in the last ten years.

An accelerated effort should be made by the industrialized nations to reduce the stiff tariff and nontariff barriers that continue to discriminate against a number of the exports of the poorest nations. If these could be substantially eliminated over the next decade, it would mean, in 1975 dollars, an additional $3 to $4 billion of export earnings annually by 1985.

The poorest nations must do more to diversify their exports. Some of them rely heavily on earnings from a few weak commodities such as jute, tea, and sisal, which face a very uncertain future in the world market. And yet there are about 15 million families—90 million people—totally dependent on these three crops for their livelihood. These nations need to restructure their patterns of production in order to reduce excessive dependence on weak commodities. They will need financing to help them to initiate such structural adjustments, and to create new sources of employment for the individuals linked to them.

The poorest nations must reduce their reliance on agricultural imports, particularly foodgrains. By increasing their food production, and by limiting their imports to the present level, they could save $4 billion per year in foreign exchange.

* * * * *

These, then, are the key elements in a program to accelerate economic growth and reduce absolute poverty in the poorest nations.

Is there a comparable approach to the problems in the middle-income countries?

Let me turn to that issue now.

IV. PROSPECTS AND PROBLEMS OF THE MIDDLE-INCOME DEVELOPING COUNTRIES [a]

As I have pointed out, the average annual growth rate achieved by the middle-income developing countries exceeded 6.5% over the last decade. In fact, 20 of the fastest developing countries, with 45% of the population of the middle-income group, experienced an average real growth of 8.8% per annum. Their 390 million citizens enjoy by now an average per capita income 75% higher than ten years ago. On the whole, it is fair to say that the middle-income developing countries have begun to establish a promising structure for high economic growth rates.

Given sound economic management at home, and reasonable support by the developed countries, these countries should be able to continue to strengthen their economies. They face, however, two serious problems.

The momentum of the growth of the oil-importing countries has been sharply interrupted since 1973. On a per capita basis, it fell to 1.5% last year as a direct consequence of the recession in their export markets, the increase in their energy costs, the deterioration in their terms of trade, and the persistent worldwide inflation.

Equally disturbing is the fact that in many of these countries there has been a serious neglect of equity in the distribution of employment opportunities, and in the allocation of public services that affect productivity. The inevitable result has been a severely skewed pattern of income distribution.

In some cases this may in part be due to a transitory stage of economic growth. But on the whole, the middle-income developing countries have greater distortions in their income distribution patterns than any growth theory could possibly justify. They have increased their gross national products over the decade, but the benefits of this growth have accrued disproportionately to the already more favored upper-income groups in their societies, and broadened rather than narrowed the gap between the privileged and the deprived.

This has led in a number of these nations to serious economic, social, and political turmoil. It could lead to a great deal more. These countries must devise institutional and policy frameworks within which the benefits of growth can reach the poor and disadvantaged much more equitably than in the past.

Though these countries do enjoy some distinct advantages over the very poorest nations, the fact remains that collectively they, too, contain large numbers of individuals—some 170 million—trapped in absolute poverty.

ABSOLUTE POOR IN THE RURAL AND URBAN AREAS OF MIDDLE-INCOME COUNTRIES

[1975: in millions]

Region	Absolute poor			Absolute poor as percent of population		
	Rural	Urban	Total	Rural	Urban	Total
Middle East and North Africa	10	30	40	25	27	27
Sub-Saharan Africa	32	8	40	29	27	29
East Asia	25	10	35	25	17	22
Latin America	20	35	55	18	18	18
Total	87	83	170	24	21	23

There are hundreds of millions more in what I have termed "relative poverty"; that is, persons with incomes somewhat above the absolute poverty level, but less than one-third of the national average. These individuals may feel even more frustrated than those in the poorest nations, since they live in an environment of visible economic growth. Their societies are progressing rapidly, but they are not.

A critical prerequisite, then, for continued and stable economic growth in these countries is the formation of an institutional and policy framework that will assure more equitable growth of income for all segments of the society.

But even assuming that effective action is taken by the governments of the middle-income developing countries to moderate these severe income inequities, there are at least three other requirements that must be met to assure long-term sustained growth. The first of these calls for action by the countries themselves, and the other two by both the international community and the countries working together:

The governments of the middle-income developing nations must place even greater emphasis than in the past on mobilizing internal resources for development;

The deterioration of the external debt profile must be arrested by more effective debt management, and by longer-term capital assistance;

And export trade must be expanded.

The restoration of economic growth

To recapture the momentum of growth, there must be a more intensified effort to mobilize internal resources. Over the past decade, investment in the middle-income countries averaged over 20% of their GDP. And nearly 90% of these investments were financed from their own domestic savings. External resource flows, while crucial in supplying the scarce foreign exchange and technical assistance, constituted only 2% of their GDP during the period.

But in the future there must be even greater emphasis on mobilizing and effectively utilizing savings. A prudent limit on the growth of overall consumption is required. And to avoid the anomaly of underutilized capital in a capital-scarce economy, governments will have to devise the kind of price and incentive systems that insure full benefit out of the investments made with such sacrifice. They will need to reassess their exchange rates, interest levels, relative prices, tariff structures, and the associated policies in their economies.

Most of the middle-income countries have demonstrated that they possess the management skills necessary to deal with the purely technical problems of growth. What remains far more uncertain today is the international environment in which they are struggling to recapture their growth momentum. In particular, their debt situation and the continuing protectionist sentiment of the industrialized nations tend to constrain their future prospects.

Debt management and external resource flows

If the middle-income countries do act to restrain the growth of their domestic consumption, and to strengthen internal resource mobilization, they will still confront the problem of a large external debt which is rising rapidly, as is shown in the table below.

DEBT STATUS OF THE MIDDLE-INCOME DEVELOPING COUNTRIES [1]

[In billions of current US dollars]

	1973	1975	1980
Current account deficit before interest payments	3.5	26.1	16.4
Interest payments	2.7	5.2	12.5
Changes in reserves and short-term debt	7.5	−3.1	1.4
Total remaining to be financed	13.7	28.2	30.3
Financed by medium- and long-term capital from:			
Public sources	5.2	8.6	10.9
Private sources [2]	8.5	19.6	19.4
Total net capital flows:			
Current dollars	13.7	28.2	30.3
1975 dollars	19.3	28.2	21.2
Outstanding medium- and long-term debt:			
Public sources	24.5	32.5	64.3
Private sources	31.1	55.8	113.9
Total:			
Current dollars	55.6	88.4	178.2
1975 dollars	78.3	88.4	124.6

Footnotes at end of table.

[a] It is obviously a gross oversimplification to consider the approximately 80 countries as one homogeneous group. They are not. Yet despite great differences among themselves, the middle-income developing countries taken as a whole are sufficiently distinct from the poorest developing nations to warrant discussing them as a separate category.

DEBT STATUS OF THE MIDDLE-INCOME DEVELOPING COUNTRIES[1]—Con.

[In billions of current US dollars]

	1973	1975	1980
Debt service:			
Interest payments	2.7	5.2	12.5
Debt amortization	6.2	6.1	22.0
Interest payments as percent of GNP[3]	.6	.8	1.1
Debt service as percent of exports[3]	18.0	17.0	25.0
Price deflator	71	100	143

[1] Excludes oil exporters.
[2] Includes "Direct Foreign Investment."
[3] Based on a sample of 25 countries that account for over 80 percent of the external debt of the oil-importing middle-income nations.

Events of the past three years—persistent inflation, deterioration in the terms of trade, and prolonged recession in the industrialized countries—have, in effect, swept away the progress they had made in reducing their dependence on external capital. All of these conditions have coalesced to increase their current account deficits from $6 billion in 1973 to $31 billion in 1975.

How was this increase of $25 billion financed? Only $3.4 billion came from government loans. A further $10.6 billion came from shifts in transactions affecting reserves. But the most remarkable element has been the unprecedented growth of private capital flows, which provided the other $11 billion.

Not only is this a large absolute sum, but it represents an increase that few would have thought possible. In 1975, the total net flow of private capital to the middle-income countries is estimated at almost $20 billion, nearly two-and-a-half times the estimated private flows of $8.5 billion in 1973, and more than twice the flows from public sources in 1975.

Most of the increase of private net capital flows has come through the commercial banks of the developed world. They provided a surprisingly large volume of resources, which enabled a number of middle-income countries to continue their economic advance in the face of adverse external conditions. If this flow continues it will help to maintain and even accelerate the pace of development. However, the increased role of the banks in financing the progress of the middle-income countries has created some problems of its own.

The most difficult one is the relatively short-term nature of this commercial lending. The present terms are on average far too short, not only because they discourage the use of such funds for longer-range productive investment, but also because, in the aggregate, these terms exacerbate the debt-service problem of these countries, and erode the creditworthiness which many of them have established over the past decade.

This deterioration in the debt structure of the middle-income countries is contributing to a rapid rise in the debt-service ratio. For 25 of the major borrowers, it is expected to increase from 17% in 1975 to 25% in 1980.

A major cause of the high debt-service ratio is the speed at which the short-term debts need to be rolled over. The interest-rate burden, despite a sharp increase from 1973 to 1980, still remains manageable. But the debt-amortization problem will become increasingly serious. Although in 1975 amortization amounted to only $6 billion, in nominal terms the same as in 1973, by 1980 it will rise to $22 billion.

The dilemma of the middle-income countries can, then, be simply stated. The sharp increase in their current account deficits has not been rolled back. Deficits at high levels are likely to continue for at least the next five to ten years if these countries are to generate the GNP growth rates of 6 to 7%, which are the very foundation for their creditworthiness. But continued heavy reliance on private sources for the financing of such deficits will require very large increases in the outstanding loans held by commercial banks and other financial institutions.[a]

To the extent that a large proportion of such debt is short-term, any temporary foreign-exchange liquidity problem—or even the prospect of one—can too easily be turned into a crisis, or the appearance of one.

This situation calls for a series of actions by national governments, the international commercial banking community, and the international financial institutions.

First, the governments of the middle-income developing countries themselves must recognize the new situation that has arisen. They must increase the current reduced level of savings; adjust relative prices so as to provide adequate incentive to expand both exports and food production; and closely monitor, and where necessary limit, additional external debt.

Second, the international banking community must accept the long-term nature of the financing problems of the developing countries. The most important question facing the lenders is what to do when most of the recent medium-term loans fall due during the next three to five years. This will occur at a time when there is likely to be stronger competing demand for credit from the industrialized nations, the centrally planned economies, and several of the oil-exporting countries.

It would be extremely unfortunate if all the good work that has been accomplished in expanding private flows for development in the recent past were to be undone. But can we really expect extraordinary efforts from the international commercial banking community if the official lenders themselves do not try to improve their own performance? That brings me to actions required by the third group I have mentioned—the international financial institutions.

There is no doubt in my mind—and I have discussed this matter with several bankers heavily involved in lending to middle-income countries—that the confidence of the commercial banking community would be substantially increased were it possible to restore the balance between private lending and official long-term lending to the developing nations. In the case of the middle-income countries, the principal sources of official long-term loans are, of course, institutions such as the World Bank and the Regional Banks. Their role is to serve as financial intermediaries between the world capital markets and these nations.

In view of this unique role, there is a manifest need today for a major expansion in both the capital structure, and lending level, in real terms, of the World Bank and the Regional Banks. I will deal with this issue in more detail a bit later.

Need for Trade Expansion

But larger capital flows, as vital as they are, are not the only ingredient needed in order to restore high GNP growth rates in the middle-income countries. In the long run, trade expansion is even more important.

And yet prospects for the needed expansion are far from encouraging.

A recent World Bank study concluded that the manufactured exports of the middle-income countries are likely to grow by only 10 to 11% a year over the next ten years, as compared to 18% in the decade ending in 1974.

This prospective rate of growth could be increased substantially if the developing countries would act to strengthen and broaden their export programs.

Only three groups of goods—clothing, textiles, and electrical machinery—account for over 50% of the middle-income countries' manufactured exports to the developed nations. Given the obstacles to the expansion of the first two groups, efforts must be made to diversify into many other products as well.

To take another example, just six developing countries account for two-thirds of all manufactured exports to the OECD nations. There is ample scope for other developing nations to participate in this trade and they should seek to do so.

The rate of growth of exports from the developing world would increase still more, of course, if the industrial nations were to liberalize access to their own markets. The present barriers to trade have been well documented, and there is no need to repeat them here. But I would emphasize that this is a field in which the interests of the developing countries and those of the consumers in the industrialized world are more complementary than competitive. Dismantling trade barriers, along with appropriate levels of adjustment assistance, will genuinely benefit both sides.

As a target, would it not be reasonable to expect that the remaining trade barriers imposed by the industrialized nations on the exports of the developing countries could be dismantled, or at least very substantially reduced, over the course of the next decade? If this were to be achieved, the potential benefits to the developing countries would exceed by far anything else that the international community could possibly do in the trade field.

Recent World Bank studies suggest that the elimination of tariff and nontariff barriers could increase export earnings of the developing countries by over $30 billion a year by 1985, in 1975 dollars.

ADDITIONAL EXPORTS RESULTING FROM ELIMINATION OF TRADE BARRIERS

[In billions of dollars, 1975 prices]

Country group	Manufactures	Commodities	Total
Poorest nations	3	1	4
Middle-income developing countries	21	8	29
Total	24	9	33

Much of the support for the remaining protectionism in the developed world understandably springs from the fears of those whose jobs and investments might be displaced. But a ten-year period for the dismantling of trade barriers would allow adequate time for the necessary advance planning and phased adjustments. And unless some such specific timetable is adopted, the political pressures of special-interest groups in affluent nations will prevail over the interests of the majority of ordinary citizens in the rich and poor countries alike.

V. THE NEED FOR A BASIC UNDERSTANDING

Let me now underline one of the major points I have made regarding the prospects of the two groups of developing countries.

Although the formula for economic advance in the middle-income countries differs from that applicable to the poorest nations, the action required is similar in one important respect: both groups of nations need additional support from the developed world if they are to achieve acceptable rates of growth.

It is the recognition of this fact which

[a] If the private lenders are to increase their assistance to developing countries, they need better information. The World Bank itself could help meet that need. We compile and publish debt statistics for our borrowing member countries and for the Eurobond and Eurocredit markets. But these data exclude much private lending and all short-term borrowings. If supported by the international banking community, the Central Banks, and the borrowers, we could go further and assist in the preparation and publication of comprehensive debt reports for each borrowing country.

led to the Special Session of the General Assembly last September in New York; to the formation of the Development Committee composed of Governors of the IMF and the World Bank; to the recent meeting of UNCTAD in Nairobi; and to the North-South Dialogues in Paris. And yet, to date, after more than a year of intense debate, there has been no agreement on the level of additional assistance to be provided to the developing nations.

The reason for the lack of agreement is, I think, obvious: the discussions have focused far too much on details—commodity agreements, buffer stocks, and so forth—rather than on fundamentals.

What is needed, in my view, is a basic understanding among the parties as to:

The nature and magnitude of the problem;

The action required to address it;

The relative responsibilities of the parties for taking such action;

The costs and benefits to each of doing so.

Such an understanding—a "global compact" if you will—would make clear in overall terms both the additional trade and aid support to be provided by the developed nations and policy reforms and structural changes to be undertaken by the developing nations. These should have as one of their major objectives the meeting of the basic human needs of the absolute poor in both the poorest and the middle-income countries within a reasonable period of time, say by the end of the century.

Once the broad limits of such an understanding have been established, then the specific form of assistance to be provided by individual developed nations to particular developing countries could be examined. It would then become apparent that it is relatively unimportant whether the assistance is to take the form of commodity agreements, debt relief, trade concessions, bilateral aid, or multilateral financing—or any particular combination of these—provided the overall total is adequate.

Whatever specific form the package of assistance takes, it clearly will need to include additional capital transfer through existing international intermediaries. And it is to that subject that I now want to turn.

VI. THE ROLE OF THE WORLD BANK

I want to consider three fundamental questions:

First, what the World Bank can and should accomplish in the poorest and the middle-income developing countries in the next several years;

Second, what problems must be dealt with if the Bank is to carry out that role in these countries;

And, finally, what actions need to be taken by the Governors to permit these problems to be solved in a timely fashion.

As I have pointed out, the two categories of developing countries each require external assistance, but on different terms. The poorest countries must have increased flows of concessional assistance if they are to attain even minimally acceptable rates of economic growth, and make headway in their efforts to enhance the productivity and income levels of the absolute poor. This is clearly IDA's role. Without an innovative and expanding IDA program, it is virtually inconceivable that the needs of these countries will be met.

The prospects for the middle-income developing countries are brighter, and the range of possible assistance more varied for many of these countries, in addition to improved trading opportunities, increased flows of long-term capital are particularly important. The IBRD and the Regional Banks can do much to help meet that requirement. The very raison d'étre of these institutions is precisely to overcome the reluctance of private capital to invest directly in the long-term debt securities of developing countries.

The uncalled capital subscriptions of these institutions constitute a form of multilateral guarantee, which has proven its acceptability in the market place. They have demonstrated a capacity to mobilize very substantial sums of private capital for development financing, and they have done so without impairing the access of those individual developing countries considered creditworthy by the market.

Moreover, the world Bank, as well as the Regional Banks, provides a great deal more than a simple transfer of resources. its loans and credits help finance high priority projects essential to development, but for which commercial finance is not normally available.

In particular, both the IBRD and IDA are emphasizing projects designed to raise the productivity of the poor in the developing nations. Before discussing the World Bank as a source of finance, I want to report briefly on the programs I have outlined to you previously that deal directly with these problems in both the rural and urban area.

Rural Development: Plans and Progress

Three years ago at our meeting in Nairobi I pointed out a series of measures that would be necessary in order to raise the productivity of the rural poor. Within the framework of a comprehensive program we identified several specific goals for the World Bank itself.

I stated our intention to increase lending to agriculture by over 40% in real terms in the five-year period, FY74–78, as compared to the previous five years; and proposed to direct an increasing share of our total lending to programs which directly assist the small farmer to become more productive. Over the FY74–78 period, our target was that 70% of all our agricultural loans should contain a component for the smallholder.

Where do we now stand on implementing this program?

There is every reason to believe that the goal set at Nairobi will in fact be exceeded.

Total lending to agriculture, in constant dollars on an annual basis, was more than twice as high in the last three years, FY74–76, as in the previous five. Because of this very rapid growth, the share of agriculture in World Bank lending has risen from 15% in FY72 to nearly 30% in FY75 and FY76, a major shift in emphasis over the three-year period.

Within this expanding overall agricultural program, there has also been a substantial increase in the proportion of assistance designed expressly for improving the productivity and incomes of the rural poor. Whereas only 27% of agricultural operations—10 per year—were rural development projects in FY 69–73, some 55% of the agricultural program in the last three years has focused on the rural poor, including 38 operations approved in FY76 alone.

In weighing the significance of these achievements it is important to consider what they mean in human terms. The operations approved in FY75 and FY76 are expected to benefit directly nearly 5.2 million farm families—or more than 30 million individuals.

Within the five years, FY74–78, we expect to finance projects which have as their objective substantially increasing the incomes—generally by as much as 200 to 300%—of 100 million of the poorest people in the developing countries.

Further, the data available for 60 Bank operations approved last year, or scheduled for approval this year, project an increase in rice and wheat production of over 5 million tons—an amount sufficient to meet the nutritional needs of some 25 million people.

Our efforts to assist the rural poor to become more productive are now fully launched, and I outlined to you last year our plans to initiate a comparable program for the cities.

Urban poverty

The profile of urban poverty differs considerably from that of the rural areas, and there is no simple analog to the small subsistence farmer and his family. But the central strategy remains the same: to help the poor become more productive.

What we are doing is expanding and redirecting our investment in the urban areas in order to insure that it results in increased earning opportunities. I indicated that this would be a major objective of our FY76–80 program. This past year we have taken the first steps toward that objective by translating the agreed-upon goals into operational targets, against which progress can be monitored.

Our new lending targets involve both direct lending for identifiable urbanization projects, and the reorientation of previously programmed lending for industry, development finance companies, and water supply and sewerage projects. Close to 50 new urbanization projects are planned for the five-year period, FY76–80. These will include site and services projects, squatter settlement upgrading programs, small-scale enterprise financing, as well as projects to bring to the poor such productivity-related services as transportation, electricity, and basic education.

But as promising as the rural and urban programs are, the truth is that the Bank is facing serious resource constraints which will severely limit its ability not only to finance these projects, but other forms of economic assistance as well. I want to turn now to this issue, and in particular to the relationship between those constraints and the role the World Bank is to play over the next several years.

Level of World Bank lending

In FY76, new financial commitments of the Bank Group totalled approximately $7 billion. As the table below indicates, in recent years the Bank Group has increased its lending very substantially.

	Average per year				
	1964–68	1969–73	1974	1975	1976
Financial commitments:					
Current dollar (billions)	1.2	2.7	4.5	6.1	6.9
Constant dollar (fiscal year 1976 commitment dollar)	2.7	4.1	5.1	6.5	6.9
Number of IBRD and IDA Projects	56	129	174	190	214

The role of the World Bank in the international development effort, and the scale of its operations, are further illustrated by the fact that at the end of FY76 it was supervising the completion of over 1,000 projects in 94 developing countries—projects representing a total investment of $65 billion, of which the Bank itself is financing $27 billion.

Yet if steps are not taken—and taken promptly—to relieve the resource constraints facing the Bank, this record of growing assistance to the developing nations will come to an abrupt halt and one of the world's principal sources of development finance could find its scale of operations being steadily eroded in real terms.

Commitments planned for the current fiscal year, FY77, amount to $7.3 billion, including $5.8 billion for IBRD. This is an increase over FY76 of 6% in nominal terms, but virtually no change at all when allowance is made for inflation. Moreover, without additional increases in the capital of IBRD, there can be no increase in future years in annual IBRD commitments in cur-

rent dollars above the $5.8 billion level. In real terms, therefore, IBRD commitments will actually decline, falling from $5.8 billion in 1977, to $5.5 billion in 1978, $5.0 billion in 1980, and to no more than $3.9 billion in 1985.

It might be argued that such a decline is only to be expected as countries come to rely more heavily on private finance. Yet, with the exception of a handful of nations such as Finland, Israel, Spain, and Greece, which either recently have, or soon will, "graduate" into the developed-member-country category, and can rely primarily upon the private capital markets, the 80 or 90 developing nations now dependent on the World Bank as a major source of external capital will continue to require that assistance for at least the next decade. Indeed, the majority of them will require it for two or three more decades. Clearly, then, we must take these resource constraints seriously, try to understand how they have arisen, and determine what can be done to relieve them.

Resource Constraints

The first constraint I want to examine is that affecting IBRD. As most of you know, there is a ceiling on total IBRD lending that is written into the basic Article of Agreement. The ceiling requires that the total of loans outstanding at any one time not exceed subscribed capital and retained earnings. Currently the Bank's subscribed capital is about $31 billion, and its retained earnings about $2 billion, constituting a statutory limit of $33 billion.

It may be helpful to put the evolution of the Bank's subscribed capital into historical perspective. When the Bank was founded at Bretton Woods 30 years ago, it was provided a capital base of $10 billion.

The framers of the Articles of Agreement were well aware that if the Bank were successful, it would some day be necessary to expand this capital base. After a little more than a decade of operations that point was reached, and in 1958 the first general review of the Bank's capital structure took place. The outcome of this review was an agreement to double the Bank's capital to a level of $20 billion.

During the 1960s and early 1970s there were no further general reviews of the Bank's capital base, though there were periodic increases on a smaller scale. These minor increases were mainly designed to permit adjustment in the relative positions of individual countries in the Bank in parallel with similar changes negotiated in the IMF.

When the IBRD lending program for FY74–78 was first presented to the Executive Directors in late 1971, there was no mention of any requirement to increase the Bank's subscribed capital to permit implementation of that program—and for a good reason. The long-term projections indicated that the statutory ceiling on Bank operations would not be reached until about 1990.

What happened subsequently is a matter of record. The inflation assumptions which seemed reasonable just five years ago—2% per annum—turned out to bear little resemblance to the double-digit inflation that has actually taken place. It is this factor above all others that lies at the root of the IBRD capital problem and which explains why a constraint that once seemed so distant has now become critical to the Bank's role in the immediate future.

The first major revision in the FY74–78 program that took account of the new rates of inflation was presented to the Executive Directors in June 1974. The changes proposed then in the real level of IBRD lending were relatively small, but the changes in nominal commitments, because of the escalating inflation, were large. Whereas earlier IBRD commitments totalling $14 billion for the five-year period had been envisaged, the revised total was over $22 billion.

When allowance was made for the inflation rates expected after FY78, it became apparent that the restrictive effect of the statutory ceiling on Bank lending would be felt before the end of the 1970s. Recognizing the lead time required to negotiate and to obtain legislative approval for a capital increase for the Bank, we announced our intention then, in June 1974, to begin negotiations on the form, size, and timing of such an increase.

In the event, it required two full years to conclude the first step in the recapitalization of the Bank. In May of this year, the Executive Directors recommended to the Board of Governors a Selective Increase in IBRD capital amounting to $8.3 billion. This was a useful and necessary first step.

But the negotiations on the Selective Capital Increase side-stepped the issue of what growth objective would be appropriate for the Bank over the next several years. The Selective Increase was required to permit adjustment in the relative positions of individual countries in the Bank—in parallel with similar changes negotiated in the IMF—and to support continued lending at the modestly higher level planned for FY77, i.e., $5.8 billion. Debate on what positive rate of growth should be sought for future years was deferred. But it can be deferred no longer.

I believe that the discussions of the second step in the recapitalization of the IBRD ought to begin immediately, and ought to seek an early consensus on a desirable growth objective for the Bank over the next decade.

I recognize that support for any program calling for a real rate of growth will carry with it a number of implications that will require careful scrutiny. The associated borrowing requirements will need to be considered against the background funds. The staffing implications will have to be examined. And, of course, the capital structure of the Bank will have to be reviewed and the budgetary costs to member governments of supporting an adequate capital increase will have to be weighed. Such costs, it should be emphasized, would not be reflected in national budgets or in payments to the Bank until the mid-1980s.

I hope it will be possible to reach an early consensus in favor of an IBRD that is growing adequately in real terms and is committed to assisting governments in their efforts to improve the productivity of both the rural and urban poor. But I expect no decision, and am requesting no action, on this matter during this meeting. Beginning this fall, we shall present to the Executive Directors a series of papers addressed to the issues I have mentioned. It is then that the discussion of the role of the Bank over the next decade can begin in earnest.

My purpose in bringing these matters to your attention today is to provide—with respect to the World Bank at least—a sharper focus for the continuing debate on what the relations should be between the developed and developing nations. Moreover, a longer-term perspective is helpful in resolving another issue that is of more immediate concern; namely, how to avoid an interim and, in my opinion, most undesirable reduction in the real level of IBRD assistance to the developing countries during the period when the recapitalization of the Bank is being completed.

If we follow the path of least resistance, and merely maintain IBRD lending at its current level of $5800 million until formal agreement is reached on the Bank's recapitalization, I fear that the developing nations will have lost irretrievably several hundred million dollars of badly needed financial assistance, and this at a time of great financial stress for many of our borrowers.

In a period of persistent inflation, a lending program that is frozen in nominal terms inevitably means a steady erosion in real terms.

I do not believe a reduction in the real value of IBRD lending in the next two or three years is an objective desired by any of the Bank's member countries. If we allow it to happen, it will be by default, not by design. There are viable alternatives. Let me suggest, very briefly, three of them for your consideration.

First, an increase in the level of Bank lending next year could be offset by a further tightening in the repayment terms of IBRD loans. A substantial hardening of repayment terms has already occurred in conjunction with the increase in Bank commitments to $5800 million in FY77. A further hardening is undesirable, but our borrowers would find this alternative preferable to a reduction in the real value of commitments.

A second alternative would be to increase Bank commitments above the level that could be sustained indefinitely without a further capital increase. The adoption of this alternative would mean that if agreement on a further capital increase were not subsequently achieved, it would be necessary in later years to reduce Bank lending, even in nominal terms, below previous levels. However, so long as this cutback did not have to be so large as to seriously disrupt the work of the institution, it would be consistent with the understanding reached by the Executive Directors earlier this year; that is, the Bank operations and financial plans should not presume a capital increase until it has been approved in principle by member governments.

A third alternative would be to structure the discussions of the Bank's recapitalization in a way which would permit an agreement by next June that the second step would be at least as large as that required to permit a reasonable real growth for the Bank in the next two or three years.

Under any of these three alternative approaches it would not be necessary to obtain legislative action to complete the recapitalization of the Bank until 1980, and payments would not need to begin until 1983. Nothing I have said is intended to suggest that these intervals should be compressed.

The consensus concerning the future role of the Bank must be based on full discussion of the issues involved. My concern, which I believe many of you share, is that in taking adequate time for these deliberations we should not accept an unintended and avoidable interim reduction in real IBRD assistance. There are practical alternatives. I commend them to your consideration; and urge that a decision among them be made in the very near future.

Replenishment of IDA

Let me move now to the other major constraint on our activities—the availability of IDA funds.

All of us are aware of the crucial importance of expanded concessional assistance to the poorest nations. It would be a tragic irony if in the very midst of the effort to strengthen economic relations between North and South, the international community were to falter in its support for IDA, a proven and effective institution that has become the largest single source of concessional assistance to the poorest of the poor.

Failure to support IDA will be interpreted—and not unreasonably—as a clear indication that the international community's concern for the poor is little more than empty rhetoric.

In my address to you last year, I pointed out that the new replenishment of IDA's resources should be established at a level sufficient both to offset fully the effects of inflation, and to provide an appropriate measure of real growth. I urged support both by the traditional donors, and by the capital-surplus oil-exporting countries, and emphasized that decisive action was required if we were to avoid procedural delays that in the end penalize not the Association, but the

poorest countries that all of us are trying to help.

Now, a year later, I must report that progress has been painfully slow. Despite meetings of the Deputies of finance Ministers in November 1975, and again in February and June of this year, there is as yet no final agreement on the amount of the Fifth Replenishment. Moreover, the burden-sharing arrangements have not yet been negotiated.

The only encouraging point in this otherwise bleak prospect is the forthright support IDA has received from a number of countries. Several governments have explicitly supported a replenishment level of $9 billion for the three-year period. Moreover, the government of Kuwait has indicated its willingness to accept a more than fourfold increase in its share of IDA financing up to a level of 2.5% of the total, provided that the traditional OECD donors make a contribution sufficiently large so that there is no question of Kuwaiti funds merely substituting for OECD efforts.

Many other countries have concluded that contributions of between $7.2 and $7.5 billion seem reasonable for the OECD countries. Contributions from the oil-exporting countries, and certain others, should then bring the total to between $8 and $9 billion. I am optimistic that a replenishment of this general magnitude can be successfully negotiated.

There is now, however, almost no chance that the negotiations will be completed in time to permit legislative ratification by June 1977. Yet IDA's commitment authority will be exhausted by that date. Indeed, mainly because of erosion in the U.S. dollar value of the contributions agreed upon at Nairobi three years ago, IDA's commitment authority in the current fiscal year will have to be substantially less even in nominal terms than the amount committed last year.

There is no practical action available to repair the reduction in IDA commitment authority this year. But we can and must act to prevent a complete hiatus in IDA operations beginning June 30, 1977.

The first step is for the Governors firmly to commit themselves to conclude the negotiations for the Fifth Replenishment of IDA no later than March 31 of next year. There is no reason why such a deadline cannot be met, given the requisite determination. Without an agreement by then, the task of arranging for bridging commitment authority after June 30 will be immeasurably more difficult. Hence, a firm commitment to complete these negotiations at least 90 days before that date is the first priority.

Given such a commitment, and assuming the negotiations can be successfully concluded, the problem then becomes one of permitting IDA operations to continue in the period prior to legislative ratification of the replenishment agreement.

In the past, IDA has managed to avoid major disruption to its operations through the generosity of donors who have been willing to make all or part of their contributions available to the Association in advance of formal ratification of the agreement. Some of these countries are understandably reluctant to see their voluntary acts of generosity become a standard practice to be invoked every three years. However, I hope that these countries will be reassured by recalling that when in the past they made advance contributions, the other donor countries did eventually come forward with matching commitments. And since the latecomers were then called upon to catch up with the earlier contributions, the actual financial sacrifice by the advance contributors was small.

In any event, the essential point is that the gap be bridged. I have asked that the subject of bridging arrangements be added to the agenda of the meeting of your Deputies scheduled for next week in Kyoto.

I hope and expect that with sufficient goodwill the contributing countries can find a way to deal with the risk that the agreement they reach in the spring will be modified subsequently in the course of obtaining legislative approval. I feel sure that none of the donors would wish to make the poorest countries the victims of this risk by allowing a gap in IDA's commitment authority to emerge.

VII. SUMMARY AND CONCLUSIONS

Let me now summarize and conclude the central points I have made this morning.

If we look about the world today realistically, it is evident that the desire for a greater degree of equity—for a more just and reasonable equality of opportunity among individuals, both within nations and between nations—is becoming a major concern of our time.

It is a trend that has been gathering momentum for a century or more. The rise of the labor union movement, the drive against racial discrimination, the expansion of civil rights, the enhancement of the status of women—these and similar movements have all had an ingredient in common: the surge towards greater social justice and more equitable economic opportunity.

This broad thrust is growing more insistent today in all nations. It is searching for new solutions to the intolerable problems of poverty.

The per capita incomes of the more than one billion human beings in the poorest countries have nearly stagnated over the past decade. In statistical terms they have risen only about two dollars a year: from $130 in 1965, to $150 in 1975.

But what is beyond the power of any set of statistics to illustrate is the inhuman degradation the vast majority of these individuals are condemned to because of poverty.

Malnutrition saps their energy, stunts their bodies, and shortens their lives. Illiteracy darkens their minds, and forecloses their futures. Simple, preventable diseases maim and kill their children. Squalor and ugliness pollute and poison their surroundings.

The miraculous gift of life itself, and all its intrinsic potential—so promising and rewarding for us—is eroded and reduced for them to a desperate effort to survive.

The self-perpetuating plight of the absolute poor simply cuts them off from whatever economic progress there may be in their own societies. They remain largely outside the entire development effort, neither able to contribute much to it, nor benefit fairly from it.

Unless specific efforts are made to bring them into the development process, no feasible degree of traditional welfare, or simple redistribution of already inadequate national income, can fundamentally alter the circumstances that impoverish them.

The governments of the poorest countries must, then, reorient their domestic policies so that they will both accelerate economic advance and begin to reach the poor with measures specifically designed to help them to become more productive.

All of this is feasible, but not without greater help from the international community. If poverty is to be reduced, then developed nations must squarely face the fact that current and projected levels of Official Development Assistance for the poorest countries are disgracefully inadequate. On the basis of present plans, not only is there no hope that the ODA target of 0.7% of GNP can be reached but there is a serious possibility that performance may erode even further.

The principal reason for this is that the strongest and wealthiest of the OECD nations—countries whose gross domestic product accounts for two-thirds of the entire combined GNP of the 17-nation Development Assistance Committee group—are substantially below the average of the others in their response to the target. And the contribution of these nations will decline even further unless they act deliberately to reverse their projected ODA trends.

The economies of these nations—already immensely productive—will become even more productive over the next few years. For them—or indeed for any of the other developed nations—increasing their help to the poorest countries would not require them to diminish in the slightest their own high standards of living, but only to devote a miniscule percentage of the additional per capita real income they will earn over the decade.

If the governments of the poorest countries do not take the internal measures they must, and if the developed nations do not help them with the development assistance they so seriously need, then the outlook for three out of every five of the 1.2 billion human beings who live in these disadvantaged countries is unspeakably grim.

The record of the middle-income developing countries over the past decade has been better, but their achievement has been marred by serious inequities in their income-distribution patterns.

Not only do the 170 million absolute poor in their societies suffer the same deprivations as those in the poorest countries, but hundreds of millions more subsist on income levels less than a third of the national average.

These extremes of inequality have contributed to severe political turmoil in a number of these countries, and could easily trigger further violence. Governments must recognize that if the growth rates of the past are to be resumed and sustained, their benefits must be more widely distributed.

As those measures are taken—and are buttressed by greater efforts to mobilize internal resources, expand employment, and broaden the range of exports—the industrial nations must find practical ways to assist by permitting more equitable access to their own markets, and by making available additional development capital on reasonable terms.

All of this, too, is feasible, given a sense of fairness and realism. The dialogue over these issues within the international community is intense, but is often confused and ineffectual because of the tendency to prolong debate over peripheral questions, rather than come to terms first with what is clearly fundamental.

And what is fundamental is that the developing nations must make a strong commitment to internal policy reforms; and the developed nations must, in their turn, make a comparable commitment to provide a more adequate amount of development assistance.

It is less important initially what specific forms that assistance will take than that a general agreement be concluded on two basic points: the overall magnitude of the trade assistance and capital requirements within a given time frame; and the scope of the internal policy reforms that will assure its cost effectiveness.

Once these two fundamental issues have been agreed upon, the specific negotiations will have a pragmatic framework in which to proceed.

Whatever may be decided, it is obvious that our own institutions in the World Bank—IBRD, IDA, and IFC—will be involved. That is why we must move promptly to consider, and to resolve, the resource constraints that face us.

We can no longer afford to defer the discussion over the IBRD's future growth. Either we should accept in principle that it ought to continue—as it has over the past decade—to broaden its response to the critical capital needs of our developing member countries.

Or we should decide consciously to let its usefulness decline as the limits of its present capitalization are reached, and as inflation erodes the real value of its commitments.

I believe that the latter course would be extremely unfortunate, particularly since there are a number of practical alternatives to immediate and burdensome budgetary requests. But we must meet the basic issue squarely, and not permit procrastination to drain our opportunities away.

Decisions over the Fifth Replenishment of IDA are even more pressing if a complete hiatus in operations is to be avoided at the end of next June. Surely we cannot contemplate the stark realities of absolute poverty in our poorest member countries, and then turn our backs on the 750 million human beings there who are trapped in it.

IDA has become the international community's primary weapon against the worst forms of poverty. We must not let it grow less effective—or lie unused—through our neglect and failure of purpose.

By any objective standard, absolute poverty is an anachronistic tragedy in our century. A tragedy because it is a condition of life beneath the level of human decency; and anachronistic because there are now at hand the economic and technological means to end it.

But in the final reckoning, it will not be simply economics and technology that end it. It will be people—people who care, people who make sacrifices, people who take practical steps to see the task through.

We are those people.

We have to ask ourselves—each one of us—where we really stand.

FLOW OF OFFICIAL DEVELOPMENT ASSISTANCE FROM DEVELOPMENT ASSISTANCE COMMITTEE MEMBERS MEASURED AS A PERCENTAGE OF GROSS NATIONAL PRODUCT[1]

[1] Figures for 1975 and earlier years are based on actual data. Those for 1976–80 are based on OECD and World Bank estimates of growth of GNP, on information on budget appropriations for aid, and on aid policy statements by governments—they are projections, not predictions, of what will occur unless action not now planned takes place.

[2] Finland became a member of DAC in January 1975.

[3] New Zealand became a member of DAC in 1973. ODA figures for New Zealand are not available for 1960 and 1965.

[4] In 1949, at the beginning of the Marshall Plan, U.S. official development assistance amounted to 2.79 percent of GNP.

[5] Includes the effect of parity changes. Figures through 1975 are based on DAC figures. Deflators for 1976–80 are the same as those for GNP.

THE FORGOTTEN AND "EXPENDABLE" KURDS

Mr. PROXMIRE. Mr. President, the United States has begun to reexamine its policies of supporting regimes which deny their own people basic human rights. Cutting back on military or economic aid to select countries is being applied in a few cases. Certainly, the lack of such a concern for human rights in the past has compounded the repressive nature of several nations.

But what of those cases where the United States was more than a spectator or supplier of military and economic aid? Have there not been circumstances when our country willfully used the aspirations of ethnic minorities for shortsighted parochial reasons totally unrelated to human rights or autonomy?

In one case, the situation involving the Kurdish people of Iran, Iraq, and Turkey, the answer is a regrettable yes. The story of U.S. encouragement to the Kurds in their decade-old struggle against governments which are bent on dispersing and breaking up Kurdish society is one of callous disregard for ethnic and cultural freedoms.

When the United States desired to put pressure on the leftist regime in Iraq, we encouraged and most likely directly supported the Kurdish independence movement. For their own national reasons, so did the nations of Israel and Iran. But as with all things, the times changed. Iran closed its borders to the Kurds, thereby starving the Kurdish guerrilla forces of critical weapons. The United States withdrew its support. The Kurds, deprived of any source of aid, fell victim to the Iraqi Army.

Their peoples were displaced from their traditional homelands—relocated where they could be controlled. The longrun goal appears to be the destruction of the Kurds, at least in Iraq, as a homogeneous group. As Lee Dinsmore, a retired U.S. Foreign Service Officer who served in Iraq has written, "the Kurds were expendable." Mr. Dinsmore's expression, it should be noted, was one of caustic disapproval.

And what was the role of our country? The exact answer is clouded in mystery although enough is known to draw preliminary conclusions. It seems reasonable to assume that we covertly supplied aid to the Kurdish people when it served our political purposes. We encouraged their fight for autonomy. And just as abruptly, we withdrew that support when the political situation changed.

Our concern for their human rights seems no more than a calculated device serving our own interests. It faded from view without comment.

I do not know what the answer is now. I do not know what can be accomplished with the backdrop just described. But I do know that it is not right for our Nation to encourage another people in a desperate fight for autonomy and then callously withdraw that support. This is another example of where covert programs have backfired.

Mr. President, I ask unanimous consent that an article titled "The Forgotten Kurds," by Lee Dinsmore, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Progressive Magazine, April, 1977]

THE FORGOTTEN KURDS

(By Lee Dinsmore)

Mulla Mustafa al-Barzani, the aging leader, father figure, and chieftain-general of the Iraqi Kurdish people, received me recently, here in the United States. We kissed each other in the traditional manner. It was our first meeting, but I had closely followed his cause for a long time.

For three-and-a-half years in the mid-1950s, I served as the U.S. consul at Kirkuk in northern Iraq, where it was one of my responsibilities to report on the Kurds, who constitute about a quarter of Iraq's population. When the Hashemite monarchy of Iraq was toppled in July 1958, the new revolutionary regime closed all the foreign consulates in the North, and I was reassigned to our embassy in Baghdad as a political officer, Al-Barzani had returned to Baghdad from exile in the Soviet Union, but it was out of the question for us to meet at the time; the new Iraqi leadership was highly suspicious of American contacts with the Kurds.

The United States had maintained close and cordial relations with the Iraqi monarchy, but the 1958 revolution changed all that. The new regime took Iraq out of the Baghdad Pact (which became CENTO, the Central Treaty Organization, one of John Foster Dulles's Cold War alliances), and pursued a stridently anti-American line. Suddenly, it suited U.S. policymakers to have insurgent Kurds harass the government in Baghdad.

Millions of Kurds populate northern and

northeastern Iraq, part of the western and northwestern sector of Iran, and part of the eastern end of Turkey. They are mountain people who have lived since ancient times (the Medes were probably their ancestors) in those same Zagros mountains. They speak and write their own Indo-European language, akin to Persian with a large admixture of Arabic. They are Muslims. But though they have lived, cultivated crops, and raised cattle in their mountain valleys and the nearby lower approaches for thousands of years, they have always been ruled by others in their own homelands—in Iraq by an Arab government, in Iran by the Persian Shah, and in Turkey (where they are called "mountain Turks") by a Turkish regime.

The 1920 Treaty of Sevres would have served the Kurdish dream, for it contained an article in which the Ottoman (Turkish) Sultan renounced all claims to non-Turkish territory. However, the surging Turkish nationalists who succeeded the Sultan refused to recognize the treaty, and new terms in the 1923 Treaty of Lausanne made no provision for Kurdish autonomy. Since then the Kurds of Iraq have sought, often violently, to establish an autonomous region within the borders of Iraq. They have never succeeded.

Mulla Mustafa al-Barzani has led the Kurdish movement since 1961, brilliantly directing a dedicated guerrilla force against heavy concentrations of the Iraqi army. From time to time, the Kurds have been encouraged and assisted by the governments of Israel, Iran, and the United States.

Israel believes its interests are served when the Iraqi military is preoccupied with warfare against its own Kurdish citizens, so it has trained Kurdish insurgents on Iranian territory.

Iran has long-standing grievances against Iraq: The Shah particularly resents the terms of a boundary agreement fashioned by the British in the 1930s (and subscribed to by his forebears) which gives Iraq sovereignity over the Shatt al-Arab, the river which flows into the Persian Gulf at the confluence of the Tigris and Euphrates. The open border between the Kurdish regions of Iraq and Iran became the key to the Iraqi Kurds' armed struggle. Across it flowed small arms, ammunition, and even artillery and anti-aircraft weapons for the Kurds.

And the United States, determined to weaken and perhaps topple the leftist regime in Baghdad, assured the Kurds they would continue to receive aid by way of Iran. Such assurances were transmitted by CIA representatives in Baghdad and, according to Kurdish sources, by the White House itself.

The Iraqi Kurds pressed their cause so forcefully that the Baghdad government was compelled, in 1970, to agree to a substantial measure of autonomy in a designated sector of the North. By 1974, however, the Kurdish leadership concluded that the 1970 agreement was a sham. Though a few token Kurds had been taken into the government, they exercised no real power. Thousands of Arabs had been encouraged to move into the Kurdish region to diffuse the population, and some Kurds had been threatened or bribed to move away. Kurds who held responsible positions in the oil fields and production facilities at Kirkuk had been replaced, and the contemplated autonomous regional government, with jurisdiction over education, police functions, agricultural services, road maintenance, and the administration of a budget for such activities had never materialized. A census that was to have been conducted in Kurdish areas was never carried out.

In 1972, Iraq and the Soviet Union concluded an arms agreement, and the Kurds were convinced the Soviet arms would some day be used against them. They felt they had been duped into laying down their weapons in 1970. Mulla Mustafa and his leadership decided they had to resume their armed struggle to force the Iraqis to grant them autonomy.

By early 1975, the Kurds had achieved such success in their armed resistance to the Iraqi army and air force that they felt their goal of a self-governing Kurdish sector of Iraq was in sight. But suddenly, in March 1975, the Iranian and Iraqi governments jointly announced an agreement closing the Iranian border to any further traffic between the Kurds and Iran. With an end to the flow of arms, the Kurdish insurrection was doomed.

What prompted the Shah to reach this surprising agreement with his enemies in Baghdad is still a matter of conjecture. Perhaps, as the traditional leader of the price-raisers in the Organization of Petroleum Exporting Countries (OPEC), he wanted to ensure Iraqi support against the "moderates" of the Arab Peninsula. Perhaps he was impressed by the less strident stance the government in Baghdad has taken in the last few years. Most probably he had in mind the fact that Iran has its own substantial Kurdish minority, which might become restless if Iraqi Kurds achieved autonomy.

In any event, it was clear that Israel and the United States, as well as Iran, had concluded that the Kurdish resistance had served their purposes long enough; the Kurds were expendable.

As thousands of terrified Kurdish villagers fled east into Iran, they were dispersed—some to Teheran, some as far away as Iran's border with Pakistan. In Iraq, some 150,000 to 400,000 Kurds were rounded up and deported to the South, away from the mountains. Egyptian peasants as well as Iraqi Arabs were moved into Kurdish villages that had been emptied by the government. A homogeneous people has been deliberately fragmented and dispersed.

When I met recently with the gravely ill Mulla Mustafa al-Barzani, he said, "Your country sent 50,000 young men to die in Vietnam to help the Vietnamese people. If a half dozen Jews in Moscow raise their voices, your Congress passes laws and threatens the Soviet Union to help them. When I think of what has happened to the Kurdish people, it seems to me that man has become an animal."

The Mulla may be an anachronism in today's sophisticated international politics. He is direct, open, totally dedicated to achieving self-government for his people within the borders of Iraq. He thought the United States was sympathetic toward that objective. He didn't know the Kurds were expendable.

So there is one more place in the Third World where people hate the United States. Still, the CIA probably counts the operation as a success; it kept the Iraqis occupied for fifteen years. And nobody gives a damn about the Kurds.

SENATE ACTION ON WATER PROJECTS

Mr. ANDERSON. Mr. President, I ask unanimous consent that an editorial that appeared in the Washington Star on March 16, 1977, entitled "Protecting the Projects," be printed in the RECORD.

The editorial raises an important perspective on the proposal of President Carter to eliminate construction funds for 19 water projects in the fiscal year 1978 budget. The editorial quotes the important comments that Senators MUSKIE and NELSON made on the Senate floor last week on this issue.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 16, 1977]

PROTECTING THE PORK

It is clear that a majority of the Senate is upset about President Carter's tentative decision to eliminate construction funds for 19 water projects. What isn't clear is whether the senators who last Thursday voted for legislation to overrule the President's decision knew exactly what they were voting on.

As we understand it, the legislation offered by Sen. J. Bennett Johnston of Louisiana was designed to force Mr. Carter to spend money on the 19 projects, as well as some 300 other water projects, whether he likes it or not. But does it?

Sen. Gaylord Nelson of Wisconsin, who wanted time to study Sen. Johnston's spur-of-the-moment legislation, asked during the debate: "Do I have it clear that the effect of this amendment is to bar the President from utilizing the authority he now has for a deferral or a rescission by legislative action in advance of the President making a decision for deferral or rescission on any of the 19 projects?"

"That is correct," Sen. Johnston replied. (Deferrals and rescissions mean approximately the same thing as former President Nixon's "impoundments" which so angered members of Congress that they enacted the Impoundment Control Act. The act made it more difficult, but not impossible, for a President to cut off funds for a federal project.)

Later in last Thursday's debate, Sen. Dale Bumpers of Arkansas, who like Sen. Nelson wasn't sure the Senate was on the right track in acting so precipitately on the Johnston amendment, also wanted to know what the legal effect of the amendment would be.

Sen. Edmund Muskie of Maine, who supported the Johnston amendment—one of the 19 projects President Carter doesn't like is in Maine—responded:

"What the senator from Louisiana does with his amendment is to warn the President in advance that if he sends us a deferral or a rescission with respect to these projects, we are telling him in advance, 'We don't think you have made a case for them, and you ought to think about it a second time.' I think that is an appropriate message to send the President."

Well, does the Johnston amendment bar the President from using his deferral or rescission authority or does it merely send him a message?

Perhaps members of the House-Senate conference committee to which the matter now goes will find out what the legal effect of the amendment is before approving it.

Better still, they ought to remove it from the jobs bill to which it is attached. At least some of the 19 projects, and no doubt many others, are the result of porkbarrelling rather than of real need.

This matter is too important to be decided in a brief floor debate. What's wrong with taking a good look at the 19 projects, as well as at some of the others among the 320 Corps of Engineers and Bureau of Reclamation projects? Do they fit in with what a national water policy should be?

Senator Nelson was on the right track when he said during the Senate debate that he respects and supports "the instinct of the President to finally say, 'For heavens sake, let us not dam every river, every stream and every watershed in this country just as part of some project that is desired by some groups or members of Congress.'"

BRINGING FEMINIST SENSITIVITY TO GOVERNMENT: MINNESOTA'S KORYNE HORBAL

Mr. HUMPHREY. Mr. President, I bring to the attention of the Senate an

article by John Fleming, entitled "Koryne Horbal and the DFL Machine" in the publication Metropolis, of February 15, 1977.

Koryne Horbal has recently been appointed to serve with Ambassador Andrew Young in the U.S. delegation to the United Nations. She has been a leader and worker in the Democratic-Farmer-Labor Party of Minnesota for over 15 years. She has performed every duty from stuffing envelopes to organizing precinct caucuses, to serving as a party officer and a national committeewoman.

Koryne Horbal has been an effective leader and spokeswoman for the feminist movement. She organized the Minnesota DFL Feminist Caucus and has carried her fight for the participation of women in politics to every part of our Nation.

It has been my privilege to be associated with her in many of these endeavors. I can speak from personal knowledge as to her effectiveness, her perserverance, her courage, and her determination. She has been a constructive force in Minnesota politics and now is bringing to bear her talents as an adviser to the President and to our Ambassador at the United Nations. I am proud of her. Her career is a fine example to those who are interested in the role of women in American life.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Metropolis, Feb. 15, 1977]

KORYNE HORBAL AND THE DFL MACHINE

(By John Fleming)

The best thing about the recent conference of the DFL feminist caucus at the Women's Club in Minneapolis was the elevation of Koryne Horbal to superstardom. The next best thing was Governor Perpich's speech. And it was educational to hear St. Paul City Councilman David Hozza grumble that he felt like a "bull in a cabbage patch." As a well-connected young politician, Hozza is accustomed to being near the center of attention. But at the conference, Hozza encountered what one feminist called "the whole man-woman thing." Men, she said, are basically pests. At any rate, Hozza's stroll across the Women's Club ballroom during the conference "sherry hour"—before the luncheon of quiche Lorraine and chocolate mousse—was not a political success. The clusters of women crowding the ballroom paused in their conversation to politely acknowledge Hozza as he approached and introduced himself, but mostly they ignored him. He was treated like an irritating but essentially harmless little boy.

This year's conference was the first held at the Women's Club. The lavish surroundings might have been responsible for the Junior Leaguish appearance of the feminists. Everyone was smartly dressed. A woman showed me a piece of jewelry she wore on a slender chain around her neck: A miniature gold double-bladed axe. It was a symbol of "the lunar mother," she said.

After the luncheon, Governor Perpich arrived to deliver his speech. The audience clearly expected something special from the Governor. Perpich was, after all, the first Governor to formally address the feminist caucus, and in his State of the State address to the Legislature the previous week he had made a point of declaring his interest in the concerns of women and minority groups. After entering the ballroom and receiving a standing ovation, Perpich said, "I can't think of any cause I'd rather see succeed than yours," and the audience rose again and applauded for a long time; it was an electric moment. In his brief speech, Perpich said that he planned a determined effort to promote more women at all levels of state government. We're not doing this because it's the political thing to do, but because it's the right thing to do." He concluded the speech by promising to appoint a woman to the state Supreme Court when the next vacancy occurs. As Perpich walked through the crowd after the speech, dozens of women left their chairs to shake his hand.

The Governor's speech was a tonic for the members of the feminist caucus—a "demonstration of our clout" was the way Linda Donaldson, a caucus official, put it. Perpich's visit and the happy reception given his speech in some ways confirmed what Gloria Steinem said at a fund-raiser in Minneapolis last fall: The effectiveness of Minnesota feminists in lobbying, electoral politics, and education of women is a model for the rest of the country.

By the end of the conference, one anecdote—frequently and elaborately repeated—had become a matter of political myth, like the stories of Jimmy Carter making his bed while campaigning in Iowa. It was the story of Koryne Horbal's phone call.

Horbal was acclaimed by various speakers as the "embodiment of Minnesota feminism" and "one of the five most powerful women in American politics" and "our Kissinger." She is State Coordinator of the DFL feminist caucus and a representative to the Democratic Party's National Committee. As the story went, Horbal was preparing scalloped potatoes "from scratch" in her kitchen one evening early this year when the phone rang: It was long distance from Georgia. "Be in Plains by 11 tomorrow morning," the man on the phone said, "Jimmy wants your advice." Horbal flew to Georgia the next morning to join four other Democratic Party women meeting with Carter. In the month following her trip to Plains, Horbal has shuttled regularly between Minneapolis and Washington. She's met with Carter six times. Her status as a presidential adviser and national political figure will be assured, I suppose, when that recipe for scalloped potatoes becomes as widely known as Bella Abzug's love of floppy hats.

However, along with the optimism and self-congratulation that characterized the conference, there was also a curious undercurrent in insecurity. It occasionally surfaced when the twelve women legislators (the most ever) elected to the Minnesota House and Senate were hailed: Several times it was pointed out that not all of them are strong supporters of the Equal Rights Amendment (ERA) and the Supreme Court decision permitting abortions. Although the feminist caucus is less than five years old, its expectations have been lowered in the last few years. Mary Ziegenhagen, an original member of the caucus, recalled that in 1973 she was predicting in speeches that the Minnesota Legislature would be one-third women by 1980. "At the rate we're going," she said, "we'll be lucky to make that number by the year 2000."

Horbal's speech—the feminist State of the State address—was strangely understated. She discussed the failure of the New York and New Jersey legislatures to ratify the Equal Rights Amendment (38 states must ratify the ERA by 1979 in order for it to become part of the Constitution; so far 35 have approved it). She referred to accounts in the press that "the women's movement is dead." She worried about restrictions being placed on abortion services—"a woman's right to choose" was the expression she used. The Supreme Court giveth, but it can also take things like abortions away, Horbal said. "It is a highly political body."

In her speech, Horbal referred to a long article published in Harper's magazine last November, "Requiem for the Women's Movement" by Veronica Geng. Geng argues that channeling feminist energy toward electoral politics "creates a neat alibi for a fear of male power," that to be satisfied with a women's faction within the Democratic Party is a cop-out and a violation of the original feminist vision, that the everyday relations between men and women are not touched by politics, that political feminism has failed in making progress toward the "new relations of flesh and sentiment" urged by Simone de Beauvoir in *The Second Sex*. (Many of the women at the conference had read the article, and, as one told me, most found it "shrill" and "unrealistic.")

However, Horbal also found much to be pleased with: That two women have cabinet-level positions in the Carter administration, that Ronnie Brooks is an aide to Governor Perpich, that Sandra Gardebring is director of the Pollution Control Agency (PCA), that the "evolution of the Barbie doll into the Bionic Woman" is happening. The main question facing feminists, Horbal said, is "Do we work on the issues now in the public domain? Or do we also function as the cutting edge? . . . Will we go establishment?" Concluding her speech by quoting Rollo May (*The Courage to Create*), Horbal talked of "bringing a humane and feminist sensitivity to government," and she declared herself "cautiously optimistic" about the future of the women's movement.

Jimmy Breslin's description of political power as "smoke on blue mirrors"—power as the manipulation of symbols and signs—came to mind as I listened to Horbal talk about her career in the DFL Party one morning in the week following the conference. Normally, Horbal is full of energy. This morning, however, she was in a meditative, not-quite-somber mood. She talked about power as an alchemist might talk about gold. "My power is two things," she said. "First, the power I've accumulated. Secondly, what people perceive my power to be. Since I've been to Plains and Washington, my power has changed. Power comes to me now because people think I have it. I gather power through loyalty—that's the name of the game, it never changes—my loyalty to other people and their loyalty to me.

"I come from a family that didn't have a lot, in Northeast Minneapolis. We're Polish. When I graduated from high school, I had to go to work, I had to take care of a father at home while my mother was in a sanitarium. When I got into politics, it became an extension of my education, a place where I could really move up and get some power. The Party has been my vehicle for gathering self-power."

In 1968, when Horbal was DFL Chairwoman, she helped prepare a study called "Women in the DFL Party: Present but Powerless." It created "an incredible awakening among the women of the Party," she said. "After that, I became an advocate for women, I gained a different constituency, my role in the Party changed. I was no longer 'The lovely and gracious Koryne Horbal,' as I'd been introduced at 18,000 Party meetings before. I was controversial." As DFL Chairwoman, Horbal wasn't paid; the Chairman was. She made the drapes for the DFL offices. A truism among feminists, Horbal said, is that "The trail-blazer—the significant feminists—don't get the good government jobs." After seventeen years of work in the DFL Party, Horbal has never had a salaried job in government.

When the Minnesota Legislature is in

session, Horbal is a familiar presence. "It's reached the point where a lot of legislators are frightened of me," she said. "When I have a meeting with one of them, I'm prepared. I have my mental agenda, I know exactly what I want. I'm willing to make the tough calls. We want votes, but more often it's leadership we want, for someone to get up on their feet and say something."

Sitting at her kitchen table and drinking coffee on the morning I talked with her, Horbal looked like an average Columbia Heights wife-and-mother. She was barefoot. The house was spotless. That Horbal is the "embodiment of Minnesota feminism" is probably true. She also represents, perhaps, an even larger idea: Minnesota's capacity to assimilate threatening social movements and make them safe. "In Minnesota," Horbal said, "the word 'feminist' is no longer dangerous. Now, it's very easy to say."

A week later, I saw Horbal again. She was bubbling with news from her latest trip to Washington. She'd sat in President Carter's chair in the Oval Office, watched an episode of "Roots" with Gloria Steinem, and picketed the office of HEW Secretary Joseph Califano (who opposes abortion). Horbal told a funny story about Senator Wendell Anderson trying to carry two suitcases and shake hands at the same time (he couldn't do it).

Horbal was busy that day at the caucus office in St. Paul. A photographer and I wanted her to come with us to the Capitol for a picture. She agreed. Although she dislikes being photographed, Horbal posed on the Capitol's broad front steps, in the rotunda beneath the dome, and in front of a statue of Governor John A. Johnson ("Aren't there any women statues?" she wondered). As we drove back to her office, Horbal talked about her family's recent move from Coon Rapids to a new house in Columbia Heights. Her daughter was harassed in school the day before by a gang. Her husband, a contractor, was working on a job in South Dakota.

Driving to the Capitol, taking the photos, and driving back took over an hour. When we arrived at her office, Horbal stayed in the car several minutes and talked some more. She said President Carter was not fully meeting his pledge to hire women for major jobs in the administration. In spite of vigorous efforts by women and minority groups, Horbal said, the Carter Cabinet strongly represents the "old boy" network, the multinational corporations, the established foreign policy and economics think-tanks. Two women have high-level White House jobs: Midge Costanza is an assistant to the President, and Martha Mitchell is an assistant for special projects. "There's an old trick they like to play," Horbal said. "They'll try to send me to the highest woman, they'll want me to see Costanza. Well, I don't want to see Costanza. When I want something, I want the top. To get anything done, you've got to see the top person." As she left the car, Horbal made one prediction: The ERA will pass this year.

SOME DEFENSE CONTRACTORS ABUSING CWAS PROVISIONS

Mr. PROXMIRE. Mr. President, the General Accounting Office has uncovered thousands of dollars in questionable defense costs passed on to the Government by contractors. These costs cannot be challenged because they are exempt from normal audit. Therefore, I have recommended to Defense Secretary Brown that he abolish the contractor weighted average share in cost risk—CWAS—provisions that allow these exemptions.

The CWAS provisions were originally designed to exempt contractors from certain audits when they had a high percentage of fixed-price Government contracts and nongovernmental business.

The GAO has discovered that some contractors have taken advantage of this special exemption to pass on excessive costs to the Government and thus to the taxpayers.

For example, the GAO found that one contractor charged the Government for $733,000 in private plane expenses above what would have been allowed under normal audits. These were costs above the equivalent charges for commercial travel.

In another case, auditors had to let pass charges to Government overhead of $303,000 for losses incurred at a contractor's executive cafeteria, despite a firm Government policy against allowing such expenses.

Similar inefficiencies were noted with one contractor's leasing of $12.4 million of automatic data processing equipment. If this could have been audited, any excessive lease charges over ownership costs could have been disallowed.

The GAO concludes that the concept that competition and fixed-price contracts motivate contractors to accomplish effective control of costs did not prove valid.

The GAO audit covered only 10 defense plants; two locations at each of five contractors. If the GAO found this much waste at this small number of plants, it is frightening to think what the total cost of this program might be.

I have long been concerned about excessive Government regulations and paperwork that accompany contracts and raise prices for everyone. That is why I am reluctant to recommend elimination of the CWAS program and reinstate complete auditing over more Federal contracts.

But the GAO makes a convincing argument that—

> We found no evidence that CWAS was cost-effective. Indeed, we found examples indicating that * * * it increases costs.

The GAO further concluded that eliminating CWAS—

> Will not necessarily increase overhead audit activity or require more manpower.

From every perspective, elimination of CWAS is called for. It has produced no demonstrable savings. Cancellation will not increase costs or raise audit manpower levels. And the more thorough audits that would result will save the taxpayers hundreds of thousands, possibly millions, of dollars annually.

TO RESTRAIN ARMS TRANSFERS

Mr. CULVER. Mr. President, many of us in Congress are very seriously concerned about the pathological international competition in foreign military sales. We have urged repeatedly that the United States take the lead in promoting a conference of world arms suppliers to work out some cooperative restraints on the dangerously high levels and quality of conventional arms transfers. We are now encouraged by President Carter's interest in international controls on the traffic in arms.

In the March 16, 1977, edition of the New York Times, Andrew J. Pierre, a senior research fellow at the Council on Foreign Relations, wrote an article entitled "To Restrain Arms Transfers." Mr. Pierre points out that the argument "if we don't sell, others will" has resulted unnecessarily in a sense of futility and excuses for inaction. He notes that the economic significance of arms sales is easily exaggerated, and that the four major arms suppliers—the United States, the Soviet Union, Britain, and France—have common national security interests in restraining the level and quality of arms transfers. The article further suggests a number of qualitative and quantitative restraints that would seem to be real possibilities for the international agenda.

Mr. Pierre also raises a most important point concerning the relationship between NATO standardization and international arms transfer restraints, saying that cooperative agreements on arms sales would greatly facilitate NATO standardization. I would add that greater NATO standardization can help sustain national defense industries and thereby make it easier to limit the competition in foreign military sales. NATO standardization policies and programs and arms transfers agreements should be pursued vigorously with the recognition that they are related, complementary objectives.

In closing, Mr. Pierre repeats a central point which has been emphasized by many in the Congress. As the world's leading arms supplier—the United States exported half of the world's total military exports in 1975—we have a special responsibility to lead international efforts to control the foreign sales competition.

I commend Mr. Pierre's article to my colleagues, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TO RESTRAIN ARMS TRANSFERS

(By Andrew J. Pierre)

As the Carter Administration revises United States arms-sales policy, it will become evident that any unilateral, self-imposed restraints can be only part of the solution to the problem.

The argument, "If we don't sell, others will," has validity. But it has too often encouraged a sense of futility and provided an excuse for inaction. The time has now come to seek multinational restraints on the arms trade in cooperation with the other supplier countries. Perhaps we can all agree, in some cases, not to sell.

Only four countries—the United States, Soviet Union, France and Britain, in that order—supply over 90 percent of the major weapons transferred to the developing world. Add their Atlantic alliance and Warsaw Pact allies and the figure is raised to 95 percent. (Much attention has recently been given to new suppliers such as Israel, South Africa and Japan, but they are still a long way from capturing a substantial share of the market.)

The predominant role of the Big Four suppliers provides an opportunity for a cooperative regulation of the flow of weapons to the

developing world, where a large increase in arms purchases is now occurring. The avoidance of a superpower confrontation in the Middle East or Southern Africa, and the maintenance of stability in regions such as the Persian Gulf, involve common concerns that could be facilitated by mutual restraints on arms transfers.

In an international conference on conventional-arms-transfer restraints, it would be possible to discuss criteria for the qualitative or quantitative limitation of arms sales. For example, transfer of sophisticated technologies such as cruise missiles, advanced precision-guided missiles and nuclear-capable weapons might be restricted. Steps might be undertaken to avoid transfers that would destabilize the military balance within a region. Discussions might be held on sales over a certain amount, or on any transfer about which one of the suppliers has serious reservations based on its potential political impact on a region.

A conference on conventional-arms-transfer restraints could provide a permanent, ongoing forum for discussion of weapons-sales decisions as they arise, rather than involve treaty-drafting negotiations such as those in the strategic arms limitations talks.

An early effort should be made to involve the Soviet Union when Secretary of State Cyrus R. Vance visits Moscow in March. If the Soviet Union agreed to participate, it should be possible to gain the participation of Britain and France. At a later date other suppliers such as West Germany, Sweden and Czechoslovakia might be invited.

Two objections are sometimes cited in discussing the practicality of common restraints. The first relates to the economic importance of the export of arms for balance of payments and levels of employment. The manufacture of weapons for sales overseas also serves to lower the per-unit costs of the weapons produced for the suppliers' own armed forces. Such considerations are not unimportant to the United States and the Soviet Union, but they are much more critical for France and Britain, which have a far smaller domestic market for arms and whose defense industries are more dependent upon overseas sales.

But, the economic significance of arms sales can be easily exaggerated. For example, only 3.5 percent of France's total exports in 1975 was accountable by arms exports, and they constituted only one-fifth of the exports to the Middle East oil-producing countries. Of a total work force of 22 million, only 70,000 are engaged in manufacturing weapons for customers abroad. Roughly comparable figures apply to Britain.

The maintenance of viable national defense industries is perceived as an important political goal, but this must be seen in the context of strong technological and economic pressures that, in any case, are driving the Europeans toward greater weapons cooperation among themselves and with the United States.

Moreover, a limited form of international regulation of arms sales, seeking essentially to avoid specific transfers that can have destabilizing, war-producing effects need not lead to a serious curtailment of total arms production at all.

A second objection is that recipient states will see supplier restraints as discriminatory or paternalistic. And yet, one can imagine a number of circumstances in which states in a region may look approvingly on a suppliers' agreement not to introduce certain weapons into an area, thereby avoiding a local arms race. What is important is that the aims of suppliers' restraints be discussed with traditional recipients and when possible be mutually agreed upon.

Cooperative restraints on arms sales would greatly facilitate progress on other issues, such as the achievement of greater North Atlantic Treaty Organization arms standardization and limits on the transfer of arms into the Middle East as part of an Arab-Israeli settlement. They will not be easy to achieve. But as the world's No. 1 arms supplier, the United States has a special responsibility to give such an initiative a try.

AMERICA'S NEWEST RAILROAD

Mr. GRAVEL. Mr. President, one of the most innovative enterprises in the country today is Auto-Train Corp., which has ferried a million and a quarter people and their automobiles between Washington and Florida since it began operations 5 years ago. In a day when railroads are best known for going bankrupt, Auto-Train is making money. This success story qualifies it, I believe, for our special attention. I, therefore, ask unanimous consent that there be printed in the RECORD an address by Eugene K. Garfield, president of Auto-Train Corp., before the Wharton Graduate School on February 14, 1977. Mr. Garfield explains how Auto-Train got its start and some of the philosophy behind its successful operation. His comments will, I am sure, be of interest to anyone sincerely concerned about the direction of transportation policy in this country.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY EUGENE K. GARFIELD

I would like to share with you some of Auto-Train's history, how our operation works, and make a few observations regarding why our enterprise was possible.

The Auto-Train is the only new private rail passenger operation in this country in 50 years, and distinctively, it is the only profit-making passenger railroad in the entire world.

We started in 1969 with $65 in the bank and today our revenues are more than $30 million a year—and, ladies and gentlemen, we are indeed very proud of that growth.

How did we get to where we are today? The first step was a $3 million, three-year study—authorized by the United States Congress in 1965—to determine the feasibility of an auto-ferry service in the United States.

The government report—completed in 1967—concluded that such a service would not only be feasible, but profitable as well—and Congress then determined that its development should be pursued by private enterprise—a rare declaration by the U.S. Government.

Such optimism was further enhanced by a Ford Motor Company Study offering similar conclusions.

In spite of these two favorable, independent opinions, no one was jumping at the auto-ferry opportunity.

I learned of the report when I was working as an Assistant to Alan Boyd, the first Secretary of Transportation in Washington. My job was to represent the Secretary to all the governors in the country—which did not include railroad responsibilities.

I had an appointment with him to give him a report on my day's activities, and the Secretary was busy. And as I sat in the waiting room, there on the table with a bunch of Time and Newsweek magazines was a three-year old report describing the auto-ferry concept between Washington and Florida.

I began to read it, dig into it, and then when I walked into the Secretary's office, I said, "Mr. Secretary, what is this report about? It was started in 1965, completed in 1967, and here it is December, 1969. Is the study going to be used?" He said, "No, Congress didn't appropriate any money." And I said, "Do you mind if I take it home and read it?" He said, "Go ahead." And I did.

I read it again and again and became excited about it, and I knew from that point on that I was going to start my idea of an Auto-Train.

I couldn't get the idea out of my mind in spite of the dismal opinion of so many, "that first wheel would never roll".

I was convinced that the concept was sound. Therefore, I left the Department of Transportation to turn the Auto-Train idea into reality.

As I mentioned, I started on this adventure with $65. Since I didn't have enough money to afford a lawyer, and I was a Florida lawyer myself, I drew up the Charter and filed the Articles of Incorporation in the Secretary of State's Office in Tallahassee.

I explained to the clerk that the Articles were for a new railroad. The clerk looked up at me and said, "Sure they are! Good Luck!" I said, "It'll take a lot more than luck and I want you to ride our trains someday."

After incorporating, I had to identify what needed to be done to give substance to the corporation, and to actualize my idea—and I had to decide upon an order of priorities to accomplish my goals.

The difficulty was—everything was interrelated.

You see, I couldn't obtain ICC licensing for a railroad without a railroad to run and tracks to run on.

I owned no rights of way, no track, no terminals, no locomotives, no passenger cars and no service facilities—nothing but an idea. Even if I had had substantial capitalization—we couldn't begin to afford to build a railroad from the ground up.

I knew what I wanted to do—provide an auto-ferry service, transporting passengers and their cars between Washington and Florida in good, clean, safe equipment, and in the luxury we all remember rail service to be.

Since I couldn't construct a railroad, and the purchase of one was out of the question—especially with $65—I knew I had to utilize someone else's existing route—and the way to do that was to enter into an operating agreement with various railroads for the operation of the Auto-Train over their trackage—much like a lease—and I had to do all of this without sufficient money, before even tackling the myriad of problems of implementation.

I picked my route and arranged a series of meetings with the top corporate officials—and their legal staffs—of the Seaboard Coast Line and RF&P Railroads to negotiate an operating agreement.

The bargain finally reached was hard—but we did reach an agreement which I knew I could live with, because I had paid attention to and assessed the strength of a new untapped market of Auto-Train travelers.

I then found all of the rolling stock I needed to accomplish my task, and I learned that only the locomotives could be financed—and do you know why? Because the bankers knew that they could be resold after repossession. All other railroad rolling stock—even refurbished—was quote unbankable unquote.

With an operating agreement in my hand and the equipment selected and optioned—I now had the ability to put the Auto-Train physically on the tracks. With that, I convinced the ICC that the operating agreement and the optioned rolling stock was my railroad to meet the requirement! They agreed—and we were granted the necessary governmental approvals with an ICC Class One railroad operating certificate. The groundwork had been laid.

Now, I was in a position to finance the project with the public sale of securities.

Wall Street bankers were polite when they

ushered me out of their offices and "suggested" that I go back to the practice of law.

I didn't want to do that.

The rather bleak history of passenger railroads in the late 1960's made it even more difficult for me to start a new railroad.

As a matter of fact, the very same time I was trying to convince people that my idea would work, the Penn Central went bankrupt.

I recall a syllogism by George Bernard Shaw, which aptly describes my plight in those days. "The reasonable man adapts—he said—to the world: the unreasonable one persists in trying to adapt the world to himself. Therefore, all progress depends on the unreasonable man."

I was unreasonable because I wanted progress especially in the railroad industry.

Repeatedly, I was told that the venture was too risky—that the train will never make a profit—and that my concept for the Auto-Train was a classic textbook case of a Harvard business school study destined for failure. But I felt differently.

Mark Twain once said, "A man with a new idea is a crank until that idea is proven a success." I was very much alone in those days because I was that "crank".

The experts allowed theory and guidelines for financial analyses to become rigid and inflexible rules of practice.

They automatically condemned an innovative proposal because the Auto-Train did not meet the standard textbook formula.

Innovation and creativity do not always follow a textbook formula.

Almost after a year and a half of rejections, and that could test anyone—it was finally, a small Florida underwriting firm that had confidence in my idea.

It was like going back home—the largest equity underwriting that they ever did was $2 million. They put together a selling group syndicate across the country—in places such as Tennessee, Arkansas and North Carolina.

We went public in 1971 and raised 7 million dollars which enabled us to buy the equipment, build the terminals, and make my dream a reality.

What the financial experts failed to see, the public grasped at an instant.

700,000 shares of stock were sold within an hour from the time they were initially offered on the over-the-counter market—mostly to small investors. A share block over 500 shares was a rarity.

We received those proceeds at the end of July, 1971—exercised all our options, began refurbishing and rebuilding our equipment and terminals—took delivery of our locomotives—advertised on October 4th and sold out for the first year shortly thereafter—and in 4 months—literally working around the clock—we built a railroad! On December 6, 1971, the first wheels turned.

On the inaugural trip we carried 35 automobiles—I loved every one of them—and 100 passengers south to Florida in full view of CBS, NBC, and ABC network news who traveled with us all the way to Florida—so everything had to be perfect.

Since that inaugural trip, we have carried to and from Florida more than 1 and a quarter million passengers, and have created approximately 700 new jobs.

Last month alone we transported over 10,000 automobiles and approximately 25,000 passengers.

In December, 1975—on our 4th Anniversary—we transported our one millionth passenger, Governor Askew spoke at our ceremonies honoring that event. The Governor compared the Auto-Train to the bumble bee.

"You know," he said, "a group of aeronautical engineers examined the bumble bee to determine its flight characteristics. The scientists concluded, the body is not streamlined enough—it is too dense for its size—the wing span is too small to support its body—the bumble bee could not fly."

"Well, we know otherwise. We know that the bumble bee can fly," the Governor said. "We also know that it is possible to make a good idea fly. It takes dedication, determination and hard work—in spite of general negative attitudes toward new ideas". Governor Askew stated it well.

And I can tell you tonight that the Auto-Train is indeed flying!

As I was building a new railroad, I learned something so very important to me . . . and I hope to you: the sudden realization that the Auto-Train could not have been developed in any country on the face of this earth except in the United States of America—and only because of our country's free enterprise system.

What a priceless freedom!

Nowhere else in the world could I, with $65, start a passenger railroad for profit, and make it work, and have it profitable less than 90 days after the start of operations.

My respect for and devotion to this freedom stems from having worked hard in this system.

My respect is all from firsthand experience, and, therefore, quite indelible.

History tells us that the free enterprise system and its ability to flourish with new ideas helped make this country the world leader it is today.

What troubles me is the ever increasing confrontation between the public sector, striving for control, and the private sector, struggling to retain its identity.

There is a significant percentage of our population who believe, that society may best be improved through greater governmental participation in the country's economic life. If you carry that to its logical conclusion—there could be no Auto-Train.

Fletcher Byron, Board Chairman of Koppers Company, was quoted recently as saying, "In five to ten years we will be moving strongly in the direction of State control of capital intensive industries. Our political system just won't allow corporations to make the profits they need." And we all know that profits are the life blood of free enterprise.

The people rightfully control the political system. But a recent poll showed that 60% of the public believe that corporations make too much money—50% to 75% return on sales, they said. And that's sad.

The true answer is 5%.

Yet there are 33 million Americans who own shares in American business. It is they who should become a leading constituency for the free market economy, and be educated to preserve that system which makes our country so great.

When legislation or regulations are proposed that will adversely effect free enterprise, every American citizen should step forward into the political process and speak up: If they do not, they will not only hurt themselves, their own freedom and productivity, but our country's as well!

Regulations are moving toward telling people what they can do rather than what they can't do—and that is a danger.

It is critically important that we preserve the private sector, because, whether we realize it or not, as this sector shrinks, for any reason, to that degree, individual liberty will also shrink.

I am deeply committed to the free enterprise system, and feel compelled to speak out for its survival, because without that system, I would not be standing before you today.

Brock Adams, the new United States Secretary of Transportation, said, "The Federal Government should be viewed as the banker or lender of last resort for . . . (capital) support . . . a kind of silent partner"—and this, I believe, is the most sensible approach I know to the relationship between government involvement and the private sector.

Ladies and gentlemen, you are the frontline in the very actual struggle to preserve private enterprise. You can protect a society that still cherishes excellence—and still values freedom. Each of you must accept the responsibility of reaching out, grasping and strengthening the freedom which allows new creative ideas to flourish.

As for us at Auto-Train, we will continue to grow, prosper, and become even more successful by working within the free enterprise system and subscribing wholeheartedly to the philosophy of Robert Browning, "A man's reach should exceed his grasp."

ENERGY ACTION NO. 11 CRUDE OIL PRICE CEILINGS

Mr. JACKSON. Mr. President, on March 15, the Federal Energy Administration transmitted to the Senate the President's proposal to continue the presently authorized 10 percent rate of increase in the composite average price for domestic crude oil. This proposal has been designated energy action No. 11. It will become effective, pursuant to section 551 of the Energy Policy and Conservation Act, at the end of 15 days of continuous session of Congress unless either House passes a resolution of disapproval. This period will expire at midnight March 30, 1977.

Section 8 of the Emergency Petroleum Allocation Act—EPAA—added by the Energy Policy and Conservation Act—EPCA—provides that the average price of all domestic crude oil at first sale be subject to a ceiling. The term of mandatory controls provided for in the act extends through April 1979. The price ceiling, set at $7.66 per barrel in February 1976, was initially permitted to increase at an annual rate equal to the sum of the rate of inflation and 3 percent. In August 1976 the Energy Conservation and Production Act—ECPA—amended section 8 of the EPAA to establish a fixed rate of escalation of 10 percent per year. The proposal contained in energy action No. 11 would continue this rate of increase for the remainder of the period of mandatory controls. If energy action No. 11 is disapproved the rate of increase in the domestic average composite price will revert to the rate of general inflation.

Actually, domestic crude oil prices are presently frozen. Thus acceptance or denial of this proposal will have no immediate effect on prices received by domestic producers of crude oil. This freeze has been necessitated by deficiencies in the FEA's ability to monitor actual first sale prices for crude oil at the inception of the EPCA program and also by subsequent definitional adjustments made by FEA which have permitted increased volumes of oil formerly priced at around $5 per barrel to qualify for prices in excess of $11 per barrel.

Mr. President, for the information of my colleagues and the public, the following material describing the FEA proposal should be inserted in the RECORD:

FEA's letter of transmittal for energy action No. 11:

The proposed amendment to FEA's regulations—enclosure A;

The table of contents of FEA's "Historical Summary of the Implementation of Section 8 of the Emergency Petroleum Allocation Act of 1973"—enclosure B; and

FEA's analysis of projected prices assuming energy action No. 11 is accepted and assuming it is rejected—enclosure C.

I ask unanimous consent that this material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL ENERGY ADMINISTRATION,
Washington, D.C., March 15, 1977.

Re: Continuation of the Adjustment as a Production Incentive to the Maximum Weighted Average First Sale Price for Domestic Crude Oil (Energy Action No. 11).

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Section 8 of the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159 "EPAA"), which was added to that Act by the Energy Policy and Conservation Act (Pub. L. 94-163 "EPCA"), established a crude oil pricing policy. Section 8(a) of the EPAA required the adoption of regulations such that the actual weighted average first sale price for all domestic crude oil would not exceed a maximum of $7.66 per barrel in February, 1976. Adjustments to the $7.66 per barrel maximum price to take into account the impact of inflation as measured by the adjusted GNP deflator and as a production incentive are permitted by section 8(d) of the EPAA. As amended by the Energy Conservation and Production Act (Pub. L. 94-385 "ECPA"), the combined effect of any section 8(d) adjustments shall not result in an increase in the maximum weighted average first sale price in excess of 10 percent per year, and the adjustment which is permitted as a production incentive is the difference between the overall ceiling of 10 percent per year and the rate of inflation as measured by the adjusted GNP deflator.

Section 8(f) of the EPAA provides that the President may submit on March 15, 1977, in accordance with the procedures specified in section 551 of the EPCA (i.e., as an "energy action"), an amendment to continue the adjustment as a production incentive provided for in section 8(d) of the EPAA. Section 8(f) of the EPAA further provides that if no amendment to continue the adjustment as a production incentive takes effect pursuant to section 8(f), no such adjustment may thereafter be applied.

Pursuant to the authority delegated to me by the President (E.O. 11790), I hereby submit as Energy Action No. 11 an amendment which provides for continuation of the adjustment as a production incentive currently provided for by section 8(d) of the EPAA.

Inasmuch as this Energy Action is to provide for a continuation of the existing adjustment as a production incentive, rather than a modification thereof, the "amendment to the regulation promulgated under section 4(a)" which is being submitted pursuant to the provisions of section 8(f) of the EPAA consists of the previously adopted amendments to the crude oil price regulations. Such regulations, which have been amended in contemplation of the continuation of the adjustment as a production incentive, are set forth as Enclosure A.

If, pursuant to the Congressional review procedures of section 551 of the EPCA and the procedures of section 8(f)(2)(5) of the EPAA, this Energy Action were to be finally disapproved, the regulations set forth at Enclosure A would be required to be revised so that no adjustment as a production incentive could any longer be given any effect and only the adjustment to take into account the impact of inflation could thereafter be applied.

Current FEA crude oil price regulations specify ceiling prices for lower tier and upper tier domestic crude oil through July, 1977. (Schedule No. 6 of Monthly Price Adjustments, Enclosure A) Such ceiling prices, which are subject to change, were adopted in order to eliminate fully by June 30, 1977, or at the latest by July 31, 1977, all cumulative excess receipts which have resulted from the actual weighted average first sale price for domestic crude oil (the "actual composite price") having exceeded the maximum weighted average first sale price of such crude oil (the "legal composite price"). Section 8(c) of the EPAA contemplated that actual composite prices might exceed or be less than the legal composite price, and provided procedures whereby excess receipts are required to be taken into account in future prices, and whereby less than maximum allowable receipts are permitted to be taken into account in future prices. A general description of the administration of the composite price system since it was made effective in February, 1976 by section 8 of the EPAA is set forth in Enclosure B. A report on the impact of the regulatory amendments made pursuant to section 8 of the EPAA, including the regulatory amendments required by the statutory amendments to that section made by sections 121 and 122 of the ECPA, has been submitted to the Congress, pursuant to the requirement set forth in section 8(f)(1) of the EPAA.

Because the crude oil ceiling prices have been specified only through July, 1977, FEA will, on or before August 1, 1977, adopt ceiling prices for subsequent months. So that the impact of this Energy Action may be fully evaluated, lower tier, upper tier and composite price levels have been projected in Enclosure C through May, 1979 on the basis of (a) a continuation of the adjustment as a production incentive and the adjustment to take into account the impact of inflation, together amounting to not more than 10 percent per year, and (b) termination of the adjustment as a production incentive and continuation only of the adjustment to take into account the impact of inflation. In each instance, inflation has been projected to be at an average rate of 5.5 percent per year.

In essence, continuation of the adjustment as a production incentive could permit lower tier and upper tier ceiling prices to be restored to and maintained in real dollars at the level that existed in February, 1976 for lower tier crude oil ($5.05 per barrel), and at the level that was intended in February, 1976 for upper tier crude oil ($11.28 per barrel).

Discontinuation of the adjustment as a production incentive would mean, on the other hand, that the legal composite price could be increased at not more than the rate of inflation. Because the projected rate of decline in production of lower tier crude oil results in an increase in the actual composite price of approximately 3 to 3.6 percent annually, a projected inflation rate of 5.5 percent would result in a maximum rate of increase in lower tier and upper tier ceiling prices of approximately only 1.9 to 2.5 percent per year.

Discontinuation of the adjustment as a production incentive would, therefore, effectively prevent maintenance of February, 1976 ceiling price levels for domestic crude oil in real dollars. It would therefore, tend to have a dampening effect on domestic production, particularly in view of the fact that there are indications that the cost of producing crude oil is increasing at a faster rate than the rate of inflation as measured by the GNP deflator.

Until the enactment on August 14, 1976 of the ECPA, the adjustment as a production incentive was limited to not more than 3 percent per year. Section 122 of the ECPA removed the 3 percent limitation and added a new subsection (j) to section 8 of the EPAA, which stated, in part, that:

"As soon as practicable after the date of enactment of this subsection, taking into consideration the greater flexibility provided by the amendments relating to the production incentive adjustment under section 122 of the Energy Conservation and Production Act, the President shall promulgate such amendments to the regulation under section 4(a) (relating to price) as shall (A) provide additional price incentives for bona fide tertiary enhanced recovery techniques and (B) provide for the adjustment of differentials in ceiling prices for crude oil that are the result of gravity differentials which are arbitrary, discriminatory, applied on a regional or local basis without reasonable justification, or fail substantially to reflect current relative market valuations of such differentials."

An extensive notice of proposed rulemaking proposing market level prices for incremental crude oil produced by the application of certain tertiary enhanced recovery techniques, as well as alternative methods for affording additional price incentives for bona fide tertiary enhanced recovery techniques, was issued by FEA on January 6, 1977 (42 FR 2616, January 12, 1977). Hearings on the proposal were held on March 3 and 4, 1977. FEA currently estimates that incremental crude oil resulting from application of tertiary enhanced recovery techniques and eligible to be sold at market level prices could amount to an additional 170,000 to 250,000 barrels per day by May, 1979. At projected market level prices, such additional tertiary production is estimated to generate an additional $164 million to $242 million in crude oil receipts through May 1979. (Enclosure C)

With respect to gravity differentials, FEA adopted amendments to the regulations, effective October 1, 1976, that permitted increases in the ceiling prices for lower tier crude oil produced in California and Alaska by adjusting gravity differentials for such crude oil to more accurately reflect current market conditions. It appears, however, that such adjustments in the ceiling prices have generally not resulted in increased selling prices, apparently because of certain aspects of the regulations pertaining to the entitlements program. Accordingly, FEA is issuing a notice of proposed rulemaking to consider amendments to its regulations that would tend to permit lower tier crude oil produced in California and Alaska to receive its adjusted ceiling price. The impact of any such amendment is expected to be an additional $100 to $200 million in annual crude oil receipts.

Correction of gravity price differential problems and creation of additional price incentives for tertiary enhanced recovery are, as indicated by section 122 of the ECPA, matters of high priority. Accordingly, to the extent that regulatory actions with respect to such matters result in an actual composite price that would limit the increase in lower tier and upper tier prices to less than the rate of inflation, an energy action would be necessary to maintain the upper tier and lower tier prices in real dollar terms.

Finally, it should be noted that FEA is preparing a report for submission to Congress on April 15, 1977 pursuant to section 8(g) of the EPAA, on whether the crude oil price regulations provide positive price incentives for the development of North Slope

Alaskan crude oil production without lessening needed incentives for sustaining or enhancing crude oil production in the remainder of the United States. The FEA is currently soliciting written comments and will hold public hearings on March 21–23 to obtain data necessary to prepare the April 15 report.

If, as preliminary information indicates might be the case, the transportation costs for North Slope oil are so high as to depress wellhead prices for such crude below the composite average, and if a decision is made not to eliminate North Slope prices from the composite average, the composite itself would be reduced, thus providing greater flexibility at least initially to increase prices for upper and lower tier production in the lower 48 states. On the other hand, if the North Slope wellhead prices exceed the composite average and they also are included in the calculation of the composite, the opposite effect will occur. Section 8(g) gives the President authority to submit an energy action to the Congress to eliminate up to two million barrels of North Slope crude oil from calculation of the composite if he finds such action necessary to avoid an adverse effect on incentives for production in the lower 48 states.

As required by Section 8(g), FEA will report to the Congress in April the results of its analysis of likely North Slope wellhead prices, and will at that time propose (1) a rule for the establishment of a ceiling price on North Slope crude and (2) whether or not to exclude North Slope crude from the composite.

Sincerely,

JOHN F. O'LEARY,
Administrator.

ENCLOSURE A

AMENDMENT TO THE REGULATIONS

(Energy action No. 11)

No further amendment to the regulations is required at this time. FEA crude oil price regulations currently in effect (10 CFR Subpart D) are based upon continuation of the adjustment to the maximum weighted average first sale price as a production incentive which is now provided for in section 8 of the EPAA.

SUBPART D—PRODUCERS OF CRUDE OIL

§ 212.71 Applicability.

This subpart applies to each first sale of domestic crude oil except as provided in Subpart C of this part.

§ 212.72 Definitions.

"Base production control level" means: (1) with respect to months ending prior to February 1, 1976:

(A) if crude oil was produced and sold from the property concerned in every month of 1972, the total number of barrels of domestic crude oil produced and sold from that property in the same month of 1972;

(B) if crude oil was not produced and sold from the property concerned in every month of 1972, the total number of barrels of crude oil produced and sold from that property in 1972, divided by 12;

(2) with respect to months commencing after January 31, 1976, except as provided in § 212.76, either:

(A) the total number of barrels of old crude oil produced and sold from the property concerned during calendar year 1975, divided by 365, multiplied by the number of days in the month in 1975 which corresponds to the month concerned; or

(B) if the producer elects to certify crude oil sales for 1972 in accordance with § 212.-131(a)(1), the total number of barrels of crude oil produced and sold from the property concerned during the calendar year 1972, divided by 366, multiplied by the number of days during the month in 1972 which corresponds to the month concerned.

"Current cumulative deficiency" means: (1) prior to February 1, 1976, the total number of barrels by which production and sale of crude oil was less than the base production control level, for all months in which production and sale of crude oil was less than the base production control level subsequent to the first month in which new crude oil was produced and sold, minus the total number of barrels of domestic crude oil produced and sold in each prior month which was in excess of the base production control level for that month, but which was not classified as new crude oil because of this requirement to reduce the amount of new crude oil in each month by the amount of the current cumulative deficiency;

(2) effective February 1, 1976, the total number of barrels by which production and sale of crude oil has been less than the base production control level subsequent to the first month (after February 1, 1976) in which new crude oil was produced and sold, minus the total number of barrels of domestic crude oil produced and sold in each prior month after February 1, 1976, which was in excess of the base production control level for that month, but which was not classified as new crude oil because of this requirement to reduce the amount of new crude oil in each month by the amount of the current cumulative deficiency.

"First sale" means the first transfer for value by the producer or royalty owner. With respect to transfers between affiliated entities, the "first sale" shall be imputed to occur as if in arms-length transactions.

"New crude oil" means, with respect to a specific property: (1) prior to February 1, 1976, the total number of barrels of domestic crude oil produced and sold in a specific month, less (A) the base production control level for that month, and less (B) the current cumulative deficiency;

(2) effective February 1, 1976, the total number of barrels of domestic crude oil produced and sold in a specific month, less (A) the property's base production control level for that month and less (B) the current cumulative deficiency since February 1, 1976; and

(3) shall not in either period include any number of barrels not certified as new crude oil pursuant to the provisions of § 212.131(a)(1) within the consecutive two-month period immediately succeeding the month in which the crude oil is produced and sold, except where such recertification is explicitly required or permitted by FEA order, interpretation, or ruling.

"Old crude oil" means: (1) prior to February 1, 1976, the total number of barrels of crude oil produced and sold from a property in a specific month, less the total number of barrels of new crude oil for that property in that month, and less the total number of barrels of released crude oil for that property in that month;

(2) effective February 1, 1976, the total number of barrels of crude oil produced and sold from a property in a specific month, less the total number of of barrels of new crude oil for that property in that month.

"Property" means the right to produce domestic crude oil, which arises from a lease or from a fee interest. A producer may treat as a separate property each separate and distinct producing reservoir subject to the same right to produce crude oil, provided that such reservoir is recognized by the appropriate governmental regulatory authority as a producing formation that is separate and distinct from, and not in communication with, any other producing formation.

"Released crude oil" means an amount of crude oil produced from a property in a particular month prior to February 1, 1976, which is equal to the total number of barrels of new crude oil produced and sold from that property in that month. The amount of released crude oil for a property in that particular month shall not exceed the base production control level for that property in that month, and shall not include any number of barrels not certified as such pursuant to the provisions of § 212.131(a)(1) within the consecutive two-month period immediately succeeding the month in which the crude oil is produced and sold, except where such recertification is explicitly required or permitted by FEA order, interpretation, or ruling.

§ 212.73 Lower tier ceiling price rule.

(a) *Rule.* Except as provided in § 212.74 with respect to new crude oil, no producer may charge a price higher than the lower tier ceiling price for any first sale of domestic crude oil.

(b) *Lower tier ceiling price determination other than in Alaska and California.* The lower tier ceiling price for a particular grade of domestic crude oil in a particular field other than in Alaska or California is the sum of: (1) The highest posted price at 6 a.m., local time, May 15, 1973, for transactions in that grade of crude oil in that field, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted; plus (2) $1.35 per barrel.

(c) *Lower tier ceiling price determination in Alaska and California.* In Alaska and California, the lower tier ceiling price for a particular grade of domestic crude oil in a particular field is the sum of: (1) The highest posted price at 6 a.m., local time, May 15, 1973, for transactions in that grade of crude oil in that field, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted; plus (2) $1.35 per barrel; plus (3) 2 cents for each degree API gravity between 34 degrees API gravity and 40 degrees API gravity that the domestic crude oil being offered for sale is below 40 degrees API gravity, plus (4) 3 cents for each degree API gravity that the domestic crude oil being offered for sale is below 34 degrees API gravity.

§ 212.74 Upper tier ceiling price rule.

(a) *Rule.* Notwithstanding the provisions of § 212.73(a), a producer may in any month charge a price not to exceed the upper tier ceiling price in first sales of new crude oil.

(b) *Upper tier ceiling price determination.* The upper tier ceiling price for a particular grade of domestic crude oil in a particular field is (1) the highest posted price on September 30, 1975, for transactions in that grade of crude oil in that field in September 1975, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted; less (2) $1.32 per barrel.

(c) *Retroactive increase in price.* No producer may charge or accept a retroactive increase in price for crude oil, other than crude oil which is exempt from this Subpart pursuant to § 212.54 and is sold on September 1, 1976, or thereafter, or crude oil which is exempt from this Subpart pursuant to § 212.55 and is sold on April 5, 1976, or thereafter. Retroactive increase in price means any price charged or offered after the close of the calendar month in excess of the highest price prevailing for that grade of crude oil, in first sales between the producer and the purchaser of the domestic crude oil, during the calendar month in which it was produced and sold.

§ 212.75 Determination of Upper Tier Crude Oil Produced from Unitized Properties.

(a) *Rule.* With respect to each unitized property, a producer shall, as of the effec-

tive date of unitization, establish a unit base production control level.

(b) *Definitions.* For purposes of this section—

"Current unit cumulative deficiency" means the total number of barrels by which production and sale of crude oil from the unitized property was less than the unit base production control level subsequent to the first month (following the establishment of a unit base production control level for that unitized property) in which any crude oil produced and sold from that unit was eligible to be classified as actual new crude oil (without regard to whether the amount of actual new crude oil was exceeded by the amount of imputed new crude oil), minus the total number of barrels of domestic crude oil produced and sold in each prior month from that unitized property (following the establishment of a unit base production control level for that unitized property) which was in excess of the unit base production control level for that month, but which was not eligible to be classified as actual new crude oil because of this requirement to reduce the amount of actual new crude oil in each month by the amount of the current unit cumulative deficiency.

"New crude oil" means either (a) actual new crude oil, which is the total number of barrels of crude oil produced and sold in a specific month from all properties that constitute the unitized property, less (1) the unit base production control level, and less (2) the current unit cumulative deficiency; or (b) imputed new crude oil, which is a number of barrels of crude oil equal to the total number of barrels of new crude oil produced and sold during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property, from all properties that constitute the unitized property, divided by 12; whichever number is greater.

"Old crude oil" means the total number of barrels of crude oil produced and sold in a specific month from all properties that constitute the unitized property, less the total number of barrels of new crude oil produced and sold from the unitized property in that month, and less the total number of barrels of crude oil sold at the upper tier ceiling price pursuant to the provisions of paragraph (f) of this section.

"Significant alteration in producing patterns" means the occurrence of either (1) the application of extraneous energy sources by the injection of liquids or gases into the reservoir, or (2) the increase of production allowable for any property that constitutes the unitized property.

"Unit base production control level" means, (1) the total number of barrels of old crude oil, as defined in § 212.72, produced and sold during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property from all properties that constitute the unitized property; plus (2) the total number of barrels of crude oil produced during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property from all stripper well properties that constitute the unitized property; divided by 365, and multiplied by the number of days in the particular month.

"Unitized property" means the right to produce crude oil that arises from a unitization agreement approved by the applicable governmental regulatory authority (or FEA).

(c) Notwithstanding the provisions of paragraph (a) above, a producer shall not be required to establish a unit base production control level for a particular unitized property, provided that the producer has (pursuant to the provisions of 10 CFR Part 205, Subpart G) certified to FEA its intention to continue to determine volumes of upper and lower tier crude oil separately for all properties that constitute the unitized property, and provided further that the unitized property has not sustained a significant alteration in producing patterns.

(d) Except as provided in paragraphs (e) and (f) below with respect to new crude oil and imputed stripper well property crude oil, no producer of crude oil from a unitized property may charge a price higher than the lower tier ceiling price (as set forth in § 212.73 of this part) for any first sale of domestic crude oil produced and sold from the unitized property.

(e) Notwithstanding the provisions of paragraph (d) above, a producer of crude oil from a unitized property may, in any month, charge a price not to exceed the upper tier ceiling price (as set forth in § 212.74) in first sales of new crude oil produced and sold from the unitized property.

(f) Notwithstanding the provisions of paragraphs (d) and (e) above, the prices charged by a producer of crude oil from a unitized property in any month in first sales of imputed stripper well crude oil (which is a number of barrels of crude oil equal to the total number of barrels of crude oil produced during the 12-month period immediately preceding the establishment of a unit base production control level for the unitized property from all stripper well properties that constitute the unitized property, divided by 12) are exempt.

§ 212.76 Adjustments to Base Production Control Levels.

(a) *Eligibility.*

(1) With respect to each property from which no new crude oil is produced in any month in the 5-month period ending June 30, 1976, a producer may, for each six-month semi-annual period commencing after June 30, 1976, adjust the base production control level for the property concerned for each month during that six-month period in accordance with paragraph (b) of this section.

(2) With respect to each property from which new crude oil is produced in any month in the 5-month period ending June 30, 1976, a producer may adjust the base production control levels applicable thereto in accordance with paragraph (b) of this section, commencing with the six-month semi-annual period immediately following a six-month semi-annual period ending subsequent to June 30, 1976, in which the total amount of crude oil produced and sold from the property concerned was less than the sum of the base production control levels for that period.

(b) *Rule.* The base production control level for properties which qualify for an adjusted base production control level may be adjusted only in accordance with the following formulae:

(1) For the first six-month semi-annual period:

$$ABPCL=(1-ARPD/1.33)(BPCL)$$

(2) For each subsequent six-month semi-annual period:

$$ABPCL=(1-ARPD/2)(ABPCL')$$

Where:

ABPCL=The adjusted base production control level for the month concerned.

BPCL=The base production control level for the month concerned, computed under § 212.72 as revised effective February 1, 1976.

ABPCL'=The sum of the adjusted base production control levels for the immediately preceding six month period as computed to this section, divided by the number of days in that period and multiplied by the number of days in the month concerned.

ARPD=The annual rate of production decline applicable to the property concerned. The ARPD is determined by subtracting the total amount of crude oil produced and sold from the property concerned in 1975 from that property's total amount of crude oil produced and sold in 1972. The result, expressed as a percentage of the total amount of crude oil produced and sold from that property in 1972, is divided by three to obtain the ARPD.

§ 212.77 Adjustments to Ceiling Prices.

(a) *Rule.* Notwithstanding any other provision of this Part, the FEA may, with respect to months commencing after February 29, 1976, provide for adjustments to the ceiling prices established under §§ 212.73 and 212.74 to take into account the impact of inflation, provide a production incentive, and otherwise to achieve compliance with the Act. The adjustment to reflect the impact of inflation shall be measured by the first revision of the quarterly percentage change, seasonally adjusted at annual rates, of the most recent price deflator for the gross national product, except that the combined effect of the adjustment to take into account the impact of inflation and to provide a production incentive may not result in an increase in the maximum weighted average first sale price (as defined in section 8(a) of the Act) in excess of 10 percent per year.

(b) *Procedures.* In providing for price adjustments under paragraph (a) of this section, FEA shall from time to time issue a price adjustment schedule as an Appendix to this Subpart which shall specify the dollar amounts by which lower and upper tier ceiling prices may be adjusted pursuant to this section. Each price adjustment schedule shall be effective only until superseded by a subsequent price adjustment schedule. In subsequent price adjustment schedules FEA shall, as necessary, revise the lower and upper tier price ceilings applicable to the months remaining at the time the subsequent price adjustment schedule is issued, in order to reflect changes in the rate of inflation; to make compensating adjustments when the weighted average first sale price actually charged is found to have exceeded, or is found to have fallen short of, the maximum weighted average first sale price permitted under the Act; and otherwise to achieve compliance with the Act.

(c) *Application of price adjustments.* (1) Price adjustment schedules issued pursuant to paragraph (b) of this section shall reflect application of the price adjustment to take into account the impact of inflation and to provide a production incentive in the following manner. The combined percentage price adjustment to reflect the production incentive and the impact of inflation shall be applied in the same amount to adjust the lower and upper tier ceiling price. To the extent that the full amount of the combined percentage price adjustment cannot be so applied, due to the limitations of section 8(a) of the Act, the available combined percentage price adjustment shall be applied in the same amount to adjust the lower and the upper tier ceiling price until only the percentage price adjustment to reflect the impact of inflation remains to be applied. Thereafter, the full percentage price adjustment to reflect the impact of inflation shall continue to be applied to adjust the upper tier ceiling price, and the portion of the percentage price adjustment to reflect the impact of inflation which remains, if any, shall be applied to adjust the lower tier ceiling price; except that in no event shall the weighted average lower tier ceiling price be reduced pursuant to this sentence below the highest level reached through application of price adjustments pursuant to this paragraph.

(2) Notwithstanding paragraph (c)(1) of this section, FEA may issue price adjustment schedules pursuant to paragraph (b) of this section which, to the extent deemed necessary by the FEA to achieve compliance with the Act, restrict further price adjustments or require reductions in ceiling prices.

APPENDIX.—SCHEDULE NO. 1 OF MONTHLY PRICE ADJUSTMENTS

[Effective Mar. 1, 1976. For limitations on continuing effectiveness, see below.]

Month	Lower tier May 15, 1973, posted price [1]	Upper tier Sept. 30, 1975, posted price [2]

[1] The price referred to in 10 CFR 212.73(b)(1).
[2] The price referred to in 10 CFR 212.74(b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on April 8, 1976, pursuant to 10 CFR 212.77. It restates the lower and upper tier price ceilings applicable to crude oil produced and sold in February, 1976, as determined under 10 CFR 212.73 and 212.74, and provides information for determining the adjusted lower and upper tier ceiling prices applicable to crude oil produced and sold in each of the remaining 39 months of the crude oil price control program, beginning with the month of March, 1976.

This schedule is No. 1 in a series of price adjustment schedules to be issued periodically by FEA under § 212.77. Subsequent price adjustment schedules will revise the lower and upper price ceilings applicable to the months remaining at the time the revised schedule is issued, in order to reflect changes in the rate of inflation, to correct for actual composite prices which exceed or fall short of the adjusted statutory composite price, and otherwise to achieve compliance with the Emergency Petroleum Allocation Act, as amended. Consequently, this Schedule No. 1 will remain effective only for a limited number of months until it is superseded by Schedule No. 2. Price projections for the full 39 months of the price-adjustment program are provided in Schedule No. 1 merely as a planning guide for producers, indicating the levels to which prices will rise in the future based on projections of current price and production data estimates and on current price regulations.

APPENDIX.—*Schedule No. 2 of Monthly Price Adjustments*

[Effective July 1, 1976]

	Lower tier 5/15/73 posted price [1]	Upper tier 9/30/75 posted price [2]
February 1976	+1.35	−1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05

[1] The price referred to in 10 CFR 212.73 (b)(1).
[2] The price referred to in 10 CFR 212.74 (b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on June 30, 1976, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February through June, 1976, as determined under 10 CFR 212.73, 212.74, and 212.77, and holds the lower and upper tier price ceilings applicable to crude oil to be produced and scld in the months of July and August, 1976, at the respective ceiling prices for the month of June, 1976.

Effective July 1, 1976, this price adjustment schedule supersedes Schedule No. 1 of Monthly Price Adjustments, as provided in 10 CFR 212.77(b). This Schedule No. 2 of Monthly Price Adjustments will remain effective only for two months, when it will be superseded by Schedule No. 3.

APPENDIX.—*Schedule No. 3 of Monthly Price Adjustments*

[Effective Sept. 1, 1976]

	Lower tier 5/15/73 posted price [1]	Upper tier 9/30/75 posted price [2]
February 1976	+1.35	−1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05
September	1.48	1.05
October	1.48	1.05
November	1.48	1.05

[1] The price referred to in 10 CFR 212.73 (b)(1).
[2] The price referred to in 10 CFR 212.74 (b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on August 31, 1976, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February through August 1976, as determined under 10 CFR 212.73, 212.74, and 212.77, and holds the lower and upper tier price ceilings applicable to crude oil to be produced and sold in the months of September, October, and November 1976, at the respective ceiling prices for the month of June 1976.

Effective September 1, 1976, this price adjustment schedule supersedes Schedule No. 2 of Monthly Price Adjustments, as provided in 10 CFR 212.77(b). This Schedule No. 3 of Monthly Price Adjustments will remain effective only for three months, when it will be superseded by Schedule No. 4.

APPENDIX.—*Schedule No. 4 of Monthly Price Adjustments*

[Effective Dec. 1, 1976]

	Lower tier 5/15/73 posted price [1]	Upper tier 9/30/75 posted price [2]
February 1976	+1.35	−1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05
September	1.48	1.05
October	1.48	1.05
November	1.48	1.05
December	1.48	1.05

[1] The price referred to in 10 CFR 212.73 (b)(1).
[2] The price referred to in 10 CFR 212.74 (b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on November 30, 1976, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February through November 1976, as determined under 10 CFR 212.73, 212.74, and 212.77, and holds the lower and upper tier price ceilings applicable to crude oil to be produced and sold in the month of December 1976, at the respective ceiling prices for the month of June 1976. This schedule is effective only until December 31, 1976. Price ceilings for 1977 will be provided by Schedule No. 5, to be issued in late December, 1976.

APPENDIX.—*Schedule No. 5 of Monthly Price Adjustments*

[Effective Jan. 1, 1977]

	Lower tier 5/15/73 posted price [1]	Upper tier 9/30/75 posted 9/30/75
February 1976	+1.35	−1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05
September	1.48	1.05
October	1.48	1.05
November	1.48	1.05
December	1.48	1.05
January 1977	1.48	1.25
February	1.48	1.25
March	1.48	1.25

[1] The price referred to in 10 CFR 212.73 (b)(1) or in 212.73(c)(1), 212.73(c)(3), and 212.73(c)(4).
[2] The price referred to in 10 CFR 212.74 (b)(1).

This schedule of monthly price adjustments was issued by the Federal Energy Administration on December 31, 1976, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February through December, 1976, as determined under 10 CFR 212.73, 212.74, and 212.77, and holds the lower tier price ceilings applicable to

crude oil to be produced and sold in the months of January through March, 1977, at the ceiling price level for the months of June-December, 1976, consistent with statutory composite price requirements. As the schedule indicates, consistent with statutory composite price limitations, a temporary reduction is also made in upper tier ceiling prices below the level of June-December, 1976.

This schedule is effective only through March 31, 1977. Price ceilings for subsequent months will be provided by Schedule No. 6, to be issued no later than March 31, 1977. This schedule may, however, be superseded prior to March, 1977, by early issuance of Schedule No. 6 to reflect further ceiling price adjustments based on unanticipated trends in actual composite price levels.

APPENDIX—*Schedule No. 6 of Monthly Price Adjustments*

[Effective Mar. 1, 1977]

	Lower tier 5/15/73 posted price [1]	Upper tier 9/30/75 posted price [2]
February 1976	+1.35	−1.32
March	1.38	1.25
April	1.41	1.18
May	1.45	1.11
June	1.48	1.05
July	1.48	1.05
August	1.48	1.05
September	1.48	1.05
October	1.48	1.05
November	1.48	1.05
December	1.48	1.05
January 1977	1.48	1.25
February	1.48	1.25
March	1.48	1.70
April	1.48	1.70
May	1.48	1.70
June	1.48	1.70
July	1.48	1.70

[1] The price referred to in 10 CFR 212.73 (b)(1) or in 212.73(c)(1), 212.73(c)(3), and 212.73(c)(4).

[2] The price referred to in 10 CFR 212.74 (b)(1).

This schedule of price adjustments was issued by the Federal Energy Administration on March 1, 1977, pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February, 1976, through February, 1977, as determined under 10 CFR 212.73, 212.74, and 212.77, and continues to hold the lower tier price ceilings applicable to crude oil to be produced and sold in the months of March through July, 1977, at the ceiling price level for the month of June, 1976. In addition, upper tier ceiling prices, which were reduced under Schedule No. 5 effective January 1, 1977, are further reduced effective March 1, 1977, as indicated in this schedule.

This schedule is effective only through July 31, 1977. Price ceilings for subsequent months will be provided by Schedule No. 7, to be issued on or about July 31, 1977. This schedule may, however, be superseded prior to July 31, 1977, by early issuance of Schedule No. 7 to reflect further ceiling price adjustments based on unanticipated trends in actual composite price levels.

ENCLOSURE B

HISTORICAL SUMMARY OF THE IMPLEMENTATION OF SECTION 8 OF THE EMERGENCY PETROLEUM ALLOCATION ACT OF 1973

(Energy action No. 11)

I. The Energy Policy and Conservation Act.
II. Stage I (February 1, 1976).
A. Number of Tiers.
B. Lower Tier Crude Oil—Base Production Control Level ("BPCL").
C. Upper Tier Crude Oil—"Stripper Well Lease Crude Oil" and "New Crude Oil."
1. Stripper Well Leases.
2. New Crude Oil.
D. Maximum Weighted Average First Sale Price—"Composite Price."
1. Lower Tier Ceiling Price Rule.
2. Upper Tier Ceiling Price Rule.
E. Monitoring Crude Oil Prices.
F. Production and Sale of Stripper Well Crude Oil from Unitized Properties ("Imputed Stripper Well Crude Oil").
III. Stage II (March 1, 1976).
A. Application of Price Adjustments.
1. The Application of Price Adjustments to Both Tiers.
2. Lower Tier Price Adjustments.
3. Price Adjustments to Provide Production Incentives.
B. BPCL Adjustments.
C. Price Adjustments Procedures.
D. GNP Deflator Adjustments.
IV. Stage III Proposal (May 4, 1976).
V. Amendment to the Definition of "Property" (September 1, 1976).
VI. The Energy Conservation and Production Act.
A. The Stripper Well Property Exemption.
1. Change in the Qualifying Period.
2. Imputed Stripper Well Crude Oil.
3. Stripper Well Property Classification for "New" Marginal Properties.
B. Adjustments to Gravity Price Differentials for Heavy Crude Oil.
1. Background.
2. Subsequent Considerations.
VII. Corrective Actions to Comply with Statutory Composite Price Limitations.

ENCLOSURE C

PROJECTED PRICES FOR DOMESTIC CRUDE OIL WITH AND WITHOUT THE ADJUSTMENT AS A PRODUCTION INCENTIVE

(Energy action No. 11)

I. CONTINUATION OF THE ADJUSTMENT AS A PRODUCTION INCENTIVE

FEA has explored uses for the 10% adjustment, if it is retained.

First, FEA has tentatively concluded that the prices of lower tier and upper tier crude oil could be adjusted upward over several months (*e.g.*, four), from their present levels to levels that would represent their real dollar prices at February 1976 levels of $5.05 (lower tier) and $11.28, (upper tier adjusted downward 20¢ to reflect projected prices in February—actual prices were $11.48) and then further escalated.

An attached table shows actual and projected prices for lower and upper tier crude oil using actual quarterly gross national product ("GNP") deflators to date and a projected GNP deflator of approximately 5.5% through May 1979. Maintaining the return in constant dollars to producers of lower and upper tier crude oil is more likely to provide incentives to maintain current production levels.

FEA currently estimates that, because of the annual shift in relative volumes of lower tier and upper tier oil caused by approximate 8% annual rate of decline in production of lower tier oil the entire 10% adjustment permitted by this Energy Action No. 11 would be utilized to maintain upper and lower tier prices at the rate of inflation (5.5% projected), with a minimal amount of cumulative excess receipts through May 1979 (projected to be approximately $96 million). Of course, to the extent actual composite prices were to result in any excess receipts, FEA would take corrective action pursuant to section 8(c) of the EPAA.

Correction of gravity price differential problems and creation of additional price incentives for tertiary enhanced recovery are, as indicated by section 122 of the ECPA, matters of high priority. Accordingly, to the extent that regulatory actions with respect to such matters result in an actual composite price that would limit the increase in lower tier and upper tier prices to less than the rate of inflation, an energy action would be necessary to maintain the upper tier and lower tier prices in real dollar terms.

It should be noted that the maintenance of constant dollar values for the February 1976 $5.05 and $11.28 prices slightly differs from the current regulations.

II. TERMINATION OF THE ADJUSTMENT AS A PRODUCTION INCENTIVE

If this Energy Action is disapproved, the "maximum allowable weighted average first sale price" will not be permitted to increase at a 10% annual rate but only at the rate of inflation, as measured by the GNP deflator, projected to be 5.5%. Because of the annual shift in relative volumes of lower and upper tier oil, prices of lower tier and upper tier oil would be permitted to escalate only 1.9–2.5% annually.

III. PRICE PROJECTIONS

In order to demonstrate the importance of retaining the full ten percent adjustment FEA has analyzed three alternative hypothetical scenarios. A description of these scenarios, referred to hereinafter as Cases 1, 2 and 3, follows. Each case assumes that the future GNP price deflator will be approximately 5.5 percent.

Case 1 assumes that: (1) the ten percent adjustment to the maximum allowable weighted average price is retained; (2) current cumulative excess receipts are eliminated in June 1977 through the existing freeze on the lower tier price and 65 cent rollback of the upper tier price; and (3) FEA will establish a future schedule which escalates lower and upper tier prices individually and which allows their constant dollar prices to remain at the February 1976 levels of $5.05 and $11.28 (assuming a projected average quarterly GNP deflator of 5.5%). Thus actual lower tier and upper tier prices are increased from the June 1977 levels of $5.17 and $10.98 per barrel during July through October 1977 in order to attain the February 1976 values escalated in current dollars to $5.49 and $12.27 in October 1977. If current cumulative excess receipts are not eliminated in June, the adjustments cannot begin in July, but would begin the month after cumulative excess receipts are eliminated.

In May 1979, the resulting legal composite price would be $10.37, the lower tier price would be $5.98 and the upper tier price would be $13.36. Cumulative excess receipts by producers in May 1979 would be $96 million.

Since the analysis of this case shows a final positive balance of excess receipts, FEA would have to restrain slightly the schedule of allowable lower tier and upper tier prices in order to arrive at May 1979 without such a balance. Thus, Case 1 illustrates that, even with continuation of the ten percent escalation of the legal composite price, current projections indicate that the current dollar equivalents of February 1976 lower tier and upper tier prices could not be maintained, even in the face of a reasonable assumption as to the future rate of inflation based on recent history. It follows that in this case adjustments for gravity differentials and special incentives for tertiary recovery, or other high-cost or high-risk exploration or development, such as offshore crude oil production, would require energy actions to increase the 10% maximum allowable adjustment to the legal composite price to maintain a rate of increase in lower tier and upper tier prices at the rate of inflation.

Case 2 assumes that:

(1) the adjustment as a production incentive is not retained,

(2) beginning in June 1977, the legal composite price escalates monthly at a rate of 5.5 percent per year,

(3) FEA will escalate each tier at 1.9–2.5% from the February 1976 prices to arrive at an actual weighted average price in May of 1979 which would yield no excess receipts to producers.

In this case, the May 1979 lower tier ceiling price would be $5.49 and the upper tier ceiling price would be $12.26. There would, of course, be no cumulative excess receipts by producers.

This case demonstrates that failure to continue the ten percent escalation of the legal composite price would not permit lower tier and upper tier prices to be increased at a rate which will even offset the effects of inflation. The May 1979 lower tier price of $5.49 in this case would be only 44 cents higher than the February 1976 price of $5.05 and would be 49 cents lower than the price of $5.98 which would be necessary to maintain a constant dollar value equivalent to the February 1976 price. The May 1979 upper tier price of $12.26 would be only 98 cents higher than the February 1976 price of $11.28 and would be $1.10 lower than the price of $13.36 which would be necessary to maintain a constant dollar value equivalent to the February 1976 price. This case, by failing to offset inflationary increases in allowable prices, would be expected to depress the domestic crude oil production rates in 1980 that would otherwise result from an orderly pattern of price increases offsetting inflation. In this case, any adjustments for gravity differentials and incentives for tertiary recovery could be provided, in the absence of a further energy action, only at the expense of foregoing a significant portion of lower tier and upper tier price increases.

Case 3 analyzes the effect of providing special incentives for tertiary production in addition to all the Case 1 assumptions. FEA assumes in this case that incremental tertiary production would be from 170 to 250 MB/D if incentives took the form of allowing such production to be sold at market prices. This case assumes that OPEC prices are increased at a rate which will maintain a future price of $13.00 in 1975 dollars and is thus consistent with National Energy Outlook forecasts ($13.00 Case).

In this case, cumulative excess receipts by producers would, in May 1979, be $260 million or more, as a result of the monthly differences between actual weighted average transaction prices and the legal composite price. FEA has analyzed this case in order to quantify the amount required, between July 1977 and May 1979, to provide this level of incentive for production from tertiary recovery methods. At projected market level prices, such additional tertiary production is projected to involve an estimated additional $164 million to $242 million in crude oil receipts through May 1979.

Correction of gravity price differential problems and creation of additional price incentives for tertiary enhanced recovery are, as indicated by section 122 of the ECPA, matters of high priority. Accordingly, to the extent that regulatory actions with respect to such matters result in an actual composite price that would limit the increase in lower tier and upper tier prices to less than the rate of inflation, an energy action would be necessary to maintain the upper tier and lower tier prices in real dollar terms.

PROJECTED CRUDE OIL PRICES

Month/year	Case 1		Case 2	
	Upper tier	Lower tier	Upper tier	Lower tier
June 1977	10.98	5.17	10.98	5.17
July 1977	11.30	5.25	11.20	5.21
August 1977	11.62	5.33	11.42	5.24
September 1977	11.95	5.41	11.66	5.28

JACK FROST: ARCTIC EXERCISE ENDS

Mr. STEVENS. Mr. President, I welcome this opportunity to congratulate the men and women of Eielson and Elmendorf Air Force bases and all of those military units involved in the overwhelming success of "Jack Frost 1977."

Eielson AFB hosted units from throughout the Lower 48 that participated in this simulated exercise in combat training in arctic conditions. It was the largest joint exercise held in Alaska, and the military is to be commended.

Mr. President, I ask unanimous consent that the Air Force Times article, "Jack Frost: Arctic Exercise Ends," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Air Force Times, Feb. 14, 1977]

JACK FROST: ARCTIC EXERCISE ENDS

ELMENDORF AFB, ALASKA.—Jack Frost, the largest joint exercise ever conducted in Alaska, was completed last week as aircraft and people swarmed in all directions.

At the peak of the exercise, Gen. Carl K. Carlaton, commander, Military Airlift Command, visited the area and pointed out the mission of his outfit.

"It doesn't matter whether it's a Navy, Army or an Air Force operation," he said. "MAC is usually the first in and the first out."

The C–141s and C–130s that moved some 5000 people and 5000 tons of equipment into the Alaska interior came from the 17th Tactical Airlift Group here and from Air National Guard units in Van Nuys, Calif., and Cheyenne, Wyo.

Jack Frost required communications and Col. Theron L. Jenne, commander of the 1931st Communications Group here, was ready. With him were the 176th Communications Flight, Kulis ANGB, Alaska, the 3d Combat Communications Group, Tinker AFB, Okla., the 4th CC Squadron, Altus, AFB, Okla., the 124th Tactical Control Flight, Blue Ash ANGB, Ohio, and the 252d CC Group, Camp Murray, Wash.

More than 12,000 miles of communications were set up to provide point-to-point and common user voice, secure and nonsecure and weather networks capable of handling thousands of calls each day.

The U.S. Readiness Command at MacDill AFB, Fla., designed the exercise.

Other units and equipment involved in Jack Frost included F–106s from the 84th Fighter Interceptor Squadron, Castle AFB, Calif., which carried out an air defense role for the "friendlies".

The 5010th Combat Support Group's base operations section was responsible for parking all the aircraft which landed at Eielson AFB, Alaska. Maj. Ron Poole, chief of base ops, said his dispatchers handled an aircraft every two to 2½ minutes.

The men and women of Det. 2, 11th Weather Squadron, also at Eielson, did as much work in a week of Jack Frost as they normally did in a month, Maj. Mike Fox, commander, reported.

The reproduction section of the 5010th was on a seven-days-a-week basis and turned out a workload about 40 percent higher than usual. TSgt. Bill Gann was in charge.

One outfit worked for both sides. This was the 25th Tactical Air Support Squadron at Eielson which, flying O–2A forward air control aircraft, performed visual reconnaissance for AF and Army air strikes and search and rescue runs for simulated downed planes.

Heat, light and power were provided by the 5010th Consolidated Aircraft Maintenance Squadron at Eielson, which had 264 portable units available. These played a pivotal role on the flightline, being used to warm and start the aircraft.

Tactical Air Command A–7Ds steadily attacked friendly forces during Jack Frost. They came from the 76th Tactical Fighter Squadron, England AFB, La. The mother organization is the 23d Tactical Fighter Wing, which traces its origins to the Flying Tigers of World War II.

Fast and efficient automotive service for Jack Frost was supplied by the 5010th Transportation Squadron at Eielson. The unit's demand for "taxi" service increased 20 percent in the first week. Included was a shuttle bus route which took people to work and to the show hall.

A single A–10, newest attack aircraft is the AF inventory, took part in Jack Frost. Its pilot, Maj. Francis C. Gideon of the AF Flight Test Center, Edwards AFB, Calif., said the plane, designed for close air support of ground forces, underwent its first test in an actual Arctic battlefield training situation.

Unconventional warfare teams had a busy time placing simulated demolition charges on the hulls of enemy ships and otherwise operating in secret. These missions were supported by the TAC C–130Es and AC–130 gunships from the 1st Special Operations Wing, Hurlburt Field, Fla.

Not the least of the jobs performed in Jack Frost was that done by the battery shot of the 21st Field Maintenance Squadron here. The shop maintains every battery at Elmendorf, at all the Alaska remote sites and in the

Alaska Army National Guard. Douglas Dunn is chief of the three-man shop.

Until the day before Jack Frost began, members of the 616th Aerial Port Squadron combat control team thought they were going to control air traffic from Jeeps. This seemed an unlikely prospect to TSgt. J. C. Bradshaw, so he, with TSgt. John Drozdowski, built a mobile control tower for the job at Clear Creek landing zone. With the tower they literally could set up a small airport in the field.

Part of the "enemy" came from Malmstrom AFB, Mont. These are the people who fly the EB–57 electronic warfare aircraft of the 17th Defense Systems Evaluation Squadron.

A pilot, Capt. Tom Godbold, said, "We simulate a bomber attack and attempt to foil the searching radar from ground sites and F–4 interceptors."

The Montanans chalked up a number of "kills." A kill is registered when an interceptor from the friendly forces flies in front of an E B–57 without seeing it.

Six RF–4 jets from the 363d Tactical Reconnaissance Wing, Shaw AFB, S.C., flew reconnaissance in Jack Frost. Lt. Col. Paul Schmidt, a squadron commander with the 363d, is a veteran of 196 combat missions in Southeast Asia.

Two swing-wing F–111s and an A–7 were able to penetrate friendly air defense systems and inflict heavy damage at Kodiak Island, monitors reported. The all-weather fighters, operating out of Elmendorf, are based with the 474th Tactical Fighter Wing at Nellis AFB, Nev. Strikes also were launched against air defenses around the Ft. Greely air strip.

AF Lt. Gen. W. W. Marshall, deputy CinC, U.S. Readiness Command and director of Jack Frost, said, "This looks like a first class, exercise."

THE IRISH IN AMERICA

Mr. WILLIAMS. Mr. President, St. Patrick's Day affords us an excellent opportunity to acknowledge the wonderful accomplishments of Irish Americans, and the role they have played in the growth and development of this country.

The story of the Irish in America dates back to earliest colonial days. St. Patrick's Day was celebrated in New York and Boston in the early 1700's. Over 4,000 of Washington's soldiers had Irish surnames, and a member of Maryland's Carroll family was the first signer of the Declaration of Independence.

Yet it was during the mid-1800's that the immigration of the Irish into this country began in earnest. Fleeing the poverty of their famine-stricken homeland, this new group of Irish was generally less skilled and less educated than the Irish who had come here before, and they found an America unwilling and unready to accept them on an equal basis. Singled out because of their foreign origin and religion, the Irish were soon forced into the most menial jobs and the most miserable living conditions.

For many years, Irish Americans struggled for full acceptance into American society, and in doing so they became full participants in the unfolding of our history. For example, the great industrial revolution that brought fundamental changes to the character of American life demanded labor, and the Irish had come at the right time to answer that demand. The textile mills of the Northeast, the great railroads stretching out toward the West, and the factories and foundries that were sprouting up in all sections of the country all put the Irish to work, placing them at the center of the process that would make this country the industrial giant of the world.

The crisis of civil war called forth men to fill the ranks of the Union and Confederate armies, and again Irish-Americans responded. Most enlisted in the Union Army. Regiments were formed composed wholly of Irishmen all eager to join in the defense of their adopted country.

By the end of the 19th century, Irish Americans could look back with pride on their contribution to the building of America, and they could look forward with anticipation to a full, meaningful involvement with its future.

With the election of John F. Kennedy in 1960, the last barrier to full participation in American life came crashing down.

In this century, Irish Americans have left their mark on virtually all aspects of the American experience. Such names as F. Scott Fitzgerald, Jack Dempsey, Helen Hayes, George Meany, and John Kennedy can only suggest the profound impact that Americans of Irish descent have had on life in this country.

Irish Americans still maintain strong cultural ties with Ireland, but we are fortunate to have their great contributions here in America.

ANTINUCLEAR PETITIONS NEARING HALF MILLION MARK

Mr. GRAVEL. Mr. President, I am pleased to be able to report to my colleagues that the Task Force Against Nuclear Pollution, Inc.—Post Office Box 1817, Washington, D.C. 20013—has collected, sorted, and computerized according to congressional district over 450,000 petition signatures asking that the Government stop the proliferation of nuclear powerplants.

The petition drive, which is endorsed by Ralph Nader, is no ordinary petition effort. When signatures are received, they are sorted according to congressional district and added to a constantly updated mailing list which is used to keep signers up-to-date on nuclear/solar issues. The petitions are never lost; they are shown to legislators at all levels of government over and over again. Recently, the task force announced that when the half-million mark is reached it will be taking the petitions to the White House.

The task force's primary legislative goal is passage of the Nuclear Energy Reappraisal Act, which was reintroduced in the House on the first day of this session—January 4, 1977—by Representative HAMILTON FISH, JR., of New York. The bill mandates a study by Congress Office of Technology Assessment of all nuclear power issues, including nuclear safety, radioactive waste disposal, nuclear sabotage and terrorism, low-dose nuclear pollution, nuclear economics, uranium availability, nuclear reliability, subsidies to the nuclear industry from the Federal Government—including the insurance subsidy represented by the Price-Anderson Act, et cetera. An appraisal of nonnuclear energy sources, including efficiency, would be required. The study would continue for 5 years, during which time a moratorium would be declared on the licensing of new nuclear plants. Plants currently operating or under construction would not be affected during the 5-year "reappraisal" period. At the conclusion of the study, Congress could decide whether or not to resume licensing, and under what conditions. If Congress took no action, a gradual phaseout of existing plants would begin.

So far, Representative FISH reports the bill (H.R. 882) has 30 sponsors:

LIST OF SPONSORS

Herman Badillo, NY.
Berkley Bedell, IA.

Theodore Weiss, NY.
Lester Wolff, NY.
Leo Zeferetti, NY.

The bill was referred jointly to three House committees: Interior and Insular Affairs, chaired by Representative MORRIS UDALL of Arizona; Interstate and Foreign Commerce, chaired by Representative JOHN DINGELL of Michigan; and International Relations, chaired by Representative CLEMENT ZABLOCKI of Wisconsin.

Representative UDALL has already announced that his committee will hold hearings on the bill. This is a significant development, since moratorium bills introduced for the past 5 years were routinely introduced to the now-defunct Joint Committee on Atomic Energy, which refused to hold hearings on them.

Mr. President, I think we owe a debt of gratitude to the thousands of citizens who, through the petition drive, are helping to make democracy work to protect us and future generations from the dangers of nuclear power. Their dedication seems to be based on the understanding, becoming ever more widespread, that nuclear power irreversibly mortgages the future for all generations to come. We must acknowledge that it is just plain wrong to produce huge quantities of radioactive waste that could burden not only ourselves, but future generations as well, with epidemics of cancer, birth defects, and other damage caused by exposure to radioactivity. It is a special insult to society to produce plutonium, which, in addition to being an extreme

cancer hazard, invites the proliferation of atomic bombs and nuclear terrorism.

The signatures the task force has collected are on petitions that read as follows, or are similar:

I petition my representatives in government to sponsor and actively support legislation to: (1) foster wide use of solar—including wind—power now; and (2) phase out operation of nuclear powerplants as quickly as possible.

Mr. President, I ask unanimous consent that the January 1977 report of the task force listing numbers of signed petitions be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

TASK FORCE AGAINST POLLUTION, INC. REPORT OF JANUARY 1977

CLASSIFICATION OF CERTAIN ALASKAN LANDS

Mr. STEVENS. Mr. President, recently I attended a series of meetings with the Governor of Alaska, Senator MIKE GRAVEL, and Congressman DON YOUNG in Anchorage on the congressional considerations of Federal lands which have been withdrawn under section 17(d)(2) of the Alaska Native Claims Settlement Act for study as potential additions to the national parks, wildlife refuges, forests, and wild and scenic rivers systems. At these meetings, representatives of 14 different interest groups spoke to us of their concerns regarding the eventual congressional decision on the classification of these d-2 lands. Since each of you will have to vote on the final disposition of d-2 lands, I feel it is my obligation to share with you the statements prepared by the different interest groups for these meetings. These statements were prepared at our request so that we would have a specific record of the statements made at the meetings we attended.

As you read these statements, I ask that you consider the impacts of d-2 lands on each of the interest groups that these spokesmen represented. The d-2 lands question is one of great importance to the State of Alaska, and it is important for all of us to fully understand the views and concerns held by local Alaskans who will be most greatly affected by the final disposition of these withdrawn lands.

Mr. President, I ask unanimous consent that these statements be printed in the RECORD.

Congressman DON YOUNG is submitting half of these statements, and I am having the rest printed. A list of the statements I am submitting for printing is provided for your convenience.

First. Statement of the Alaska Federation of Natives.

Second. Two statements from the State chamber of commerce.

Third. Statement from the Alaska Miners Association.

Fourth. Three statements from Alaska recreational groups: Izaak Walton League; Alaska Professional Hunters; and the Alaska Wildlife Federation and Sportsmen's Council.

Fifth. Statement from the Alaska Military Command.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALASKA FEDERATION OF NATIVES: STATEMENT OF POSITION ON D2 ISSUES

This statement on D2 issues is the general Alaska Federal of Natives position at this time. Specific recommendations and positions are subject to change as member organizations of AFN review D2 issues. AFN has prepared D2 legislation which is presently in draft from with member organizations reviewing general provisions and proposed classifications.

Subsistence needs of Alaskan Natives must be protected by:

1. Clearly establishing subsistence as the priority use of fish and wildlife.

2. Protection and sound management of subsistence resources and habitat.

D2 legislation must be consistent with the Senate House Conference Committee report on ANSCA, December 14, 1971 (No. 92-581) Section C(2), which states in part: "The conference committee, after careful consideration, believes that all Native interest in subsistence resources lands can and will be protected by the Secretary through the exercise of his existing withdrawal authority. The Secretary could, for example, withdraw appropriate lands and classify them in a manner which would protect Native subsistence needs and requirements by closing appropriate lands to entry by nonresidents when the subsistence resources of these lands are in short supply or otherwise threatened. The Conference Committee expects both the Secretary and the State to take any action necessary to protect the subsistence needs of the Natives."

D2 legislative action necessary to protect the subsistence needs of Alaskan Natives includes:

1. Through land classifications and by means of appropriate regulatory and management policies, the Secretary shall balance the needs, rights and safety of the visting public with customary subsistence practices in such a way that the established subsistence needs of resident Alaskan natives shall not be impaired.

2. The Secretary may permit non-native subsistence activities and sports hunting and fishing but only after a determination that such activities will not be detrimental to the subsistence needs of resident Alaskan Natives.

3. There will be established local regulatory subsistence boards, composed of local subsistence users, which (with the review and final authority of the Secretary or his designee) will develop such regulations and management policies as may be necessary to protect subsistence resources, habitat and the needs of subsistence users.

4. Privately owned subsistence lands must be protected by establishing the Alaska Land Bank.

ALASKA LAND BANK

We propose creation of the Alaska Land Bank, governed jointly by Federal and State Commissioners, for the purposes of fostering long term management of privately owned subsistence resource lands, village and regional land planning and stabilized growth. The Land Bank would function as follows:

1. Any owner of fee title land in Alaska can bank up to 80% of his land holdings.

2. Land banked may be utilized by its owner for all traditional and ordinary uses of ownership except commercial and developmental use.

3. Banked land may be withdrawn from the Land Bank at the rate of 25% every 5 years.

4. Land banked with the Land Bank Commission shall not be subject to State or local real property taxes and shall not be subject to adverse possession.

The Lank Bank would guarantee that a certain portion of regional land would be available on a tax base. The Bank would benefit all Alaskan citizens by creating a more stable land situation, a more controlled process of land transfer from one private owner to another and protection from resource exploitation.

WILDERNESS REVIEW

Within one year of the date of enactment of this Act the Secretaries of Agriculture and Interior should designate certain land to be studied for wilderness classification. Within the following 3 years the Secretaries should submit these recommendations to Congress. We are opposed to the "instant wilderness" concept.

Wilderness designation should not affect subsistence uses of the land and subsistence land uses should not impair an area's suitability for wilderness designation. Customary uses permissible in a wilderness area should include such mechanized transportation, hunting tools and methods and shelter as are customarily used at the time of enactment of this Act.

COOPERATIVE MANAGEMENT AGREEMENTS

D2 legislation should authorize and encourage cooperative management agreements between Federal, State and private land owners. There should be established authority to offer tax relief to private land owners and to lease land from private land owners (at the owner's option) for purposes of land management consistent with management of public interest lands.

ACCESS AND TRANSPORTATION

Access and transportation should be provided by existing law and through development of a statewide transportation policy in cooperation with a joint Federal-State-Native planning institution. Transportation objective should be:

1. Necessary transportation of people and natural resources which will be provided through the prudent use of such railroads, pipelines, roads and other transportation modes as are necessary.

2. Any transportation plan will seek to minimize environmental, social and cultural impact and be particularly sensitive to the needs and desires of those villages which do not wish surface transportation links to metropolitan areas.

AGRICULTURE

Agriculture may be encouraged so long as it does not interfere with established subsistence land use patterns or conflict with subsistence resource management.

FORESTRY

Forestry may be permitted on public interest lands provided that such activities do not interfere with subsistence resources and that only forest with significant commercial value are utilized.

FIFTH MANAGEMENT SYSTEM

No comment at this time.

FEDERAL-STATE CLASSIFICATION ENTITY

At this time, Congressional land classification is recommended. Continuation of the Federal State Land Use Planning Commission in its advisory capacity.

MINERAL DEVELOPMENT

Exploration and development of significant mineral deposits should be permitted under existing laws and regulations pertaining to specific Federal land classifications when such activities will not result in significant environmental, cultural or social impact. Particular attention must be given to the impact of access and increased population on subsistence resources and village life styles.

PUBLIC INTEREST LAND CLASSIFICATIONS

The classification of public interest lands should be consistent with the following considerations:

1. Native village and regional land selections shall take precedence over D2 classifications.

2. Multiple use classifications may be designated in situations where significant beneficial development prospects exist and only in a way which will not result in significant impact on subsistence resources.

3. Habitat and ecological systems should be protected.

4. Restrictive use classifications of public interest lands should not place undue restrictions on the development of adjacent private lands. In some instances restrictive public interest land classification should be buffered with less restrictive classification; for example, a National preserve might provide a buffer between private lands and a National Park.

5. Owners of private land adjacent to public interest lands should have the right of first refusal to provide concessions and services to forest, park, and refuge areas. This would promote private land management consistent with the public interest lands.

STATE SPONSORED 17(d)(2) LANDS ISSUE

(Remarks by Thomas E. Kelly, Consultant, Earth Sciences, Representing Alaska State Chamber of Commerce)

Governor Hammond, Senator Stevens, Senator Gravel and Congressman Young. I am pleased to have this opportunity to discuss with you a matter of great importance to all of us—the resolution of the so-called d(2) lands in Alaska. This presentation is on behalf of the State Chamber of Commerce of which I am a member of the Chamber's land use task force.

Over the past year I have had the privilege of discussing with most of you on an informal basis certain specific areas of concern that are embodied in many of the previously introduced d(2) bills. Today I do not wish to narrowly confine my remarks to specific geographical areas of the state that are or have been included in one of the proposed four-systems withdrawals. I think it is more important at this point to attempt to develop together a meaningful, objective and, hopefully, a successful approach that everyone can accept regardless of their particular self-interest or philosophy of how the public lands should be classified and managed.

First I believe that those of us who advocate multiple use management and wise development with reasonable environmental safeguards are not opposed unilaterally to every proposal to expand a park or refuge boundary or to create new units of the National Parks, Wildlife Refuges, Wild and Scenic Rivers or National Forests. Since those I am representing

* * * * *

and emphasis is given to National Forest proposals as is given to park or refuge proposals. This has not been the case in the past.

Passage of the Alaska Native Claims Settlement Act provided for many things. Perhaps the most significant for the long range is how land in Alaska would be owned and managed. It gave priority to Native rights to lands but did not, to my knowledge, repeal or diminish the obligation to provide for fulfillment of state entitlement as set forth in the Alaska Statehood Act.

The withdrawal of up to 80 million acres of lands for study and possible inclusion in one of four systems, if deemed advisable by Congress, was not a mandate that there must be 80 million acres set aside specifically in one of the four systems. The 80 million acre ceiling as interpreted under 17(d)(2) has largely been ignored by sponsors of legislation during the current and past session of Congress.

The provision, as I understand it, was to make sufficient land of suitable character available for possible inclusion in one of the four systems so that other uses available under the existing public land laws and mineral leasing acts would not preempt the specific four systems classification. However, the d(2) provision was not intended to deny settlement of native or state land entitlement pursuant to those selections as determined by the natives or the state.

In other words to fairly and honestly carry out the provisions of the Statehood Act and ANSCA with respect to land selection—these two landowners should be statutorily allowed to proceed to finalize all their selections before the Congress decides on how much and where to place up to 80 million acres in one or more of the four systems. To give priority to the four systems is contrary to the intent of Congress and is disruptive to accomplishment of native and state selections.

The areas delineated as d(2) lands were defined by DOI personnel without full knowledge or understanding of the nature or potential value of the lands for various purposes. In effect, a few individuals set down and outlined an area on a map that might be best suited for inclusion in one of the four systems.

Since the passage of ANSCA a great amount of technical and geologic data has been obtained on the probable economic value of specific d(2) lands and the appropriateness or lack thereof other d(2) land for parks, refuges, wild rivers or forests.

All of the information (proprietary or public) needs to be assessed before an arbitrary decision to place x acres in one category or y acres in another is made final.

Many professionals who are well experienced and thoroughly familiar with specific areas of this state are prepared to share with you geologic and biologic facts on specific areas. They are also prepared to argue objectively why certain lands are best suited for a four system category exclusive of all other categories and why certain lands presently identified as d(2) fit none of the criteria that should be utilized if a d(2) proposal is to have beneficial meaning in the long term.

Those of us who are labeled multiple use proponents or more commonly developers or exploiters are far more like the environmentalists than vice-versa. We regard parks as inevitable and believe it is a necessary increment in a total land use program. But where and how much should be determined in light of the country's long range need for natural resources.

In summary we believe that the native selections should proceed to final conveyance without impediment of conflicting d(2) proposals on the same lands. We believe the state should follow and obtain all the lands

to which it is entitled. Then, with the remaining public domain, a careful weighing of all information and comparision of economic with non-economic values should allow reasonable men to determine which lands are best suited for a specific purpose. Esthetic and non-economic values should be carefully compared to known or potential economic values and to the fullest extent possible each should be accommodated.

It can be done. Opposing viewpoints that are emotionally stirred without knowledge or facts can only lead to a solution that nobody really wants.

It is important that you, as our elected representatives, give us the best clue of how to get the full information—without undue bias—before Congress.

If some uncompromising, starry-eyed advocate of single use lands (e.g. parks or wild river proponents) urges that a high alpine meadow with abundant wildlife be preserved for all mankind and someone can show that the high alpine meadow is neither that nor a good habitat but rather a potential large mineralized area or a future oil and gas field—do you think someone with the final decision making authority will listen?

All we ask is a chance to prove what we are saying and not have a preconceived and illogical land use category thrust upon us because of a few who would make utopia where none can exist.

STATEMENT OF CLARENCE KRAMER, FOR THE STATE CHAMBER OF COMMERCE, FEBRUARY 14, 1977

Gentlemen, I am particularly pleased to be here today to take advantage of your gracious offer to confer on the D-2 lands issue. We are certainly concerned in Southeastern Alaska that the Udall Bill, which provides for creation of five instant Wilderness Areas and two instant Wild and Scenic River areas in Southeastern Alaska, without any study whatsoever could be most harmful to not only the timber industry, but also mining, the other multiple uses, and Native selection rights. We are of the view that a careful and thorough inventory and review of the lands should precede their classification. Each of you gentlemen, I realize, has taken a position against the Udall Bill for precisely this reason.

We are concerned that, as with the Udall Bill, many of the proposals for the disposition of the (d)(2) lands have not paid enough attention to inventorying and studying the lands involved. It seems incongruous that those who consistently call upon industry for more planning would, to meet their own land use desires, seek wholesale land classification without planning. It is beyond dispute that there are areas within the Interior of Alaska which should be placed within the four Federal management systems. By § 17 (d)(2) of the Alaska Native Claims Settlement Act (ANCSA) Congress sought to establish a review of those lands which the Secretary of Interior believed included candidates for four system classification. Congress placed an 80 million acre ceiling on this, not for the purpose of requiring that 80 million acres be classified, but to cause selectivity in classification recommendations. Most of the proposals which have been made with respect to the (d)(2) lands seem to be based on premise that at least 80 million acres should be classified within the four systems within the shortest possible time. This is a significant shift in what was intended by Congress and what was expected by the people of Alaska under the Alaska Statehood Act. (Statehood Act). It creates a "land grab" opportunity which if allowed to occur could greatly interfere with the State's ability to make its own selections from a land pool of high quality lands or even to obtain the 103 million acres promised it under the Statehood Act. The "immediate four systems classification" approach could also significantly interfere with the intent of the Alaska Native Claims Settlement Act.

Interference with the Statehood Act and ANCSA occurs in several ways. First, there has simply not been sufficient time for the Land Use Planning Commission to inventory, review, and study 80 million acres to the extent necessary for classification at the present time or within the foreseeable future. We believe it to be bad land use management to take action with respect to any land where that action has not been preceded by sufficient planning. To allow this to happen with respect to § 17(d)(2) lands would recreate the "instant wilderness" approach of the Udall Bill. Incidentally, we recommend against such an approach in full realization that under Interior's Bill most of the commercially forested land in the Interior would go in to National Forests.

Second, since Congress contemplated that only the highest value lands among those withdrawn would be intensively reviewed for four system classification, it provided a procedure for disposition of those lands withdrawn, but not selected for four system classification as follows:

"Any lands withdrawn pursuant to Paragraph (A) not recommended for addition to or creation as units of the National Park, Forest Wildlife Refuge, and Wild and Scenic Rivers system at the end of two years shall be available for selection by the State and the Regional Corporations, and for appropriation under the public land laws." (§ 17(d)(2)(C)).

Thus, forced immediate classification of insufficiently studied land will result in the loss of potentially valuable lands to both State and Regional Corporations selections. Even if there are 103 million acres available for State selection as contemplated by the Statehood Act, the right is meaningless unless high value land is included. The key here is to maximize the pool of land from which the State can select as Congress obviously intended in the above subsection of § 17(d)(2). The same opportunity for selecting from a pool of high value lands holds true with respect to Regional Corporation selections. Thus, forced immediate classification of all the (d)(2) lands could significantly reduce the quality and quantity of the lands available for State and Native selection.

Third, forced immediate classification of at least 80 million acres could interfere with the main purpose of the Act—the transfer of lands to Alaska Natives. After the conveyances contemplated by ANCSA the Native Corporations should be in a position to become economically self-sufficient through use of their lands. However, it is possible that regulations promulgated under the Clean Air Act of 1970 and the Federal Water Pollution Control Act of 1972 in combination with single use classification of (d)(2) lands could deprive Native lands of their economic potential. The Administrator of the Environmental Protection Agency has promulgated regulations designed to prevent "significant deterioration" of air quality in those areas which have air that is already cleaner than the national ambient air quality standards. (See 40 CFR, part 51.) The regulations employ a classification scheme under which these "Clean Air" regions may be designated Class I, II or III. All such areas initially are designated Class II under which specified increments in sulfur dioxide and particulate matter pollution are considered "insignificant". The State, Indian Territory, or Federal Land may be redesignated unilaterally by the Federal land manager after hearing and by application to EPA. Designation as Class I implies a region of very clean air in which relatively small increments in air pollution would be considered significant deterioration. Accordingly, if at least eighty million acres are immediately classified into the four systems then the next step by environmental groups could be to petition the New Secretary of Interior to have some of these lands reclassified from Class II Air Regions to Class I Air Regions. Activities on adjacent lands which interfere with the Class I status of D-2 lands would be subject to prohibition. Therefore, timber processing plants of either the pulp mill or saw mill variety and concentration plants for mining which Native groups may want to use in connection with their newly acquired lands are in jeopardy from the outset.

There is a similar classification scheme under the Federal Water Pollution Control Act of 1972 with respect to water. 40 CFR 130.17 prohibits "significant deterioration of water uses". Accordingly, Native harvesting of timber along streams which pass through their lands could be prohibited if a particular stream flows into a single use (d)(2) area. The impact of the Air Act and Water Act as they presently exist and under proposed amendments obviously need to be carefully analyzed for off land impacts before any four systems classification is done.

Fourth, forced immediate classification of at least 80 million acres without creating easements across the lands could rob many adjacent State and Native lands of any economic significance whatsoever. Without easements the (d)(2) lands could serve as barriers to economic use of the land by the State and Natives alike. The location of such easements will require careful study and review.

These factors suggest development of a common sense approach to the 17(d)(2) land classification problem. As we view it, the first step should be the separation of the unarguably high value ecological lands which should be put into the four systems now from those lands which have demonstrated high natural resource potential or need further review and study. We believe this separation should be accomplished by requiring a near consensus of Alaskans for immediate land classification within the four systems. All other (d)(2) lands should be held in some type of inventory status pending full classification and review. As we understand it, this approach accords with the general thrust of the Governor's preliminary proposal regarding (d)(2) lands. We agree with the Governor that there should be some type of system wherein lands are held in a category other than the four systems until such time as all their values have been determined, transportation corridors have been selected, and we have a better view of how these lands might most efficiently be incorporated into Alaskan social and economic needs. Transfer of lands from unclassified inventory to classified status should be made in small parcels over a long period of time. As part of the review of the lands it would be entirely appropriate to open the unclassified inventory lands to mining so that their mineral potential can be known before classification.

I would like to digress for just a moment and state several concerns that we have with the Governor's preliminary proposal which we hope might be considered as the idea is further developed. As stated, the basic thrust of the Governor's proposal as we understand it, is very much in keeping with our own thinking on this matter. However, at page 15 of the Staff Briefing Paper on the subject there is the following remark regarding the inventory status of the unclassified (d)(2) lands:

"There regulations would establish land classifications, setting forth permitted and prohibited uses. The authority of the Commission would, of course, be limited with respect to Alaska Resource Lands by the *prime value designation* for each area." (emphasis added).

We are of the persuasion that the un-

classified (d)(2) lands should be available for ultimate multiple use classification following appropriate inventory and review. The foregoing quote from the Staff Briefing Paper seems to preclude this. While we doubt that this result was intended we hope that the point will be clarified. Secondly, and connected with first is a question not addressed by the Governor's proposal: Who shall be the land manager? It is our belief that the Forest Service has proven itself to be far and away the best multiple use land manager in Alaska. Of the four designated systems, only the Forest Service has recognized mining as a legitimate land use. However, the Forest Service has a policy of not managing lands for dominant use of prime use. Thus, the idea of classifying land for prime use precludes the Forest Service from being a candidate for land manager.

Since we see the Governor's Preliminary (d)(2) Proposal as one designed to keep open the options for classification of these lands, we believe it inconsistent to either preclude Alaska Resource lands from ultimately being managed in a multiple use classification or preclude the Forest Service from being the land manager of such areas. We respectfully request that there be a review of this matter with an idea of resolving the problem in favor of the Forest Service.

This, incidently is what we particularly like about the Bill proposed by Congressman Don Young. Implicit in his Bill is a recognition of the fact that the Forest Service is the best multiple use land manager. Further, Congressman Young's Bill, like the Governor's, tends to maximize the flexibility of the State by limiting the amount of land which would go into forced immediate single use classification within the four systems. Accordingly even though a different approach has been taken by each of you, we see this common thread between your proposals.

In presenting the Alaska position on the (d)(2) issue we have to impress upon the people of the lower forty-eight the vastness of Alaska. The eighty million acres involved here is two-thirds the size of California. That an area may be open to development does not necessarily mean that it will be developed. In fact, we can expect that a large portion of Alaskan lands will remain de facto wilderness, whether or not they are available for development. Mining development will take place only on those areas where an economically viable operation can be conducted. There will of course be greater impacts upon the land than the mine itself. But, for the most part mining, will be a localized, relatively short-term duration activity which will greatly benefit the State and National economies, and which will be returned to de facto wilderness status within a short period of time after usage is complete. The same thing is true of use of the timber resource. It, too, is available to support State and local economies, particularly Native economic expectations. With careful management under existing environmental safeguards harvested timber lands will return to the de facto wilderness land pool after use. The point is that use of economically recoverable resources will touch only a small portion of the Interior of Alaska, and even, then, the impact will be localized and of short term duration as regards the overall ecological unit.

Most of the (d)(2) proposals we have reviewed do not appear to have considered the establishment of a timber industry within the context of the (d)(2) issue. Since this is our opportunity let me give you a brief overview. In December 1975, the Federal Court for the District of Alaska decided *Zieske* v. *Butz*. It could well have been that the impact of that lawsuit would have shut down the entire industry on the Tongass National Forest. Since Federal timber is the only source of supply in Southeastern Alaska, such a lawsuit would have put 3,500 people out of work in our Region. We are currently engaged in a struggle with the Forest Service regarding timber appraisal. Since we have a single timber supplier on the Tongass it is difficult to determine what the fair market value of timber is and consequently we are each groping in the dark, seeking a good faith solution to the problem. The problem is that we cannot turn to another supplier.

My point is that the timber industry is best off in a situation where there is a mix of Federal, State and private lands. This gives the operator three sources of supply. A wise timber purchaser will purchase from all three so that if one source is threatened he can turn to the others to keep his plant open, his employees working and his customers supplied. This spreads out the environmental impact of the harvesting and allows for an orderly flow of materials to an operator, consistent with the best multiple use principles.

With the exception of the Interior's Bill and the notable exception of Don Young's Bill most of the(d)(2) proposals do not put enough of the 18–28 million acres of estimated commercial forest land into a status which would make it a candidate for forestry management. That these other proposals would put but a fraction of the commercially forested (d)(2) lands into National Forests indicates to us that they have either failed to address the questions of whether or not there should be a forest industry in the Interior or have decided that there should not be one. Under these proposals a forest industry in the Interior would be forced to rely on the State and Native timber were we to operate in the Interior, with no assurance that Native Timber would be available as a result of the Clean Air and Water Act problems we discussed before. This combination of circumstances does not make it attractive at the present time for investors to invest the capital necessary to begin a timber industry in the Interior.

Thus, with respect to an Interior timber industry we believe that we still need to cross the conceptional Rubicon: should there or should there not be a timber industry in the Interior? Right now the wood industry supports 3,500 jobs in Southeastern Alaska and is the most important private employer in the Region. We are doing this with commercial forest lands base of 4.5 million acres, only a fraction of which is harvested at any one time. The Interior forests have a land base of approximately 22.5 million acres of commercial and productive forest land and more than 31 billion board feet of commercial timber. Accordingly, the area could provide up to 36,000 jobs depending of course, on market conditions and how intensively we want to manage the lands. Remember that what we are talking about is the total commercially forested land base in the Interior—Federal, State and Native. The 36,000 jobs (which would be there year after year because the resource is renewable) are based on the economics of scale which could be effected by good utilization of the forested lands of all three owners. Naturally, if an important segment of these forested lands are withdrawn, as is the case with most of the (d)(2) proposals, the economies of scale evaporate, same State and Native forested areas become uneconomic to operate or are rendered inaccessible, and the jobs opportunities tails off.

Do not take our word for this. Before reaching classification decisions with respect to the (d)(2) lands, review the potential for a viable timber industry in the Interior with and without the commercially forested Federal lands included in the operating land base. We believe you will then agree with us that Federal lands must be included to go forward with a viable timber industry in the Interior. There is sufficent time for such a study, particularly if you agree to maintain a large portion of the present (d)(2) lands in unclassified status pending inventory and review.

OUTLINE OF POSITION, ALASKA MINERS ASSOCIATION, (d)(2) MEETING, FEBRUARY 14–15, 1977, ANCHORAGE, ALASKA

I. GENERAL BASIS OF POSITION

The best possible solution to the (d)(2) issue which can be made before December 18, 1978, is to follow the guidelines put down, first, in Sec. 17(d) of the Alaska Native Claims Settlement Act and, second, in other federal acts, including the Federal Land Policy and Management Act of 1976, the Mining and Minerals Policy Act of 1970, and the National Forest Management Act of 1976. The solution also must consider national security and must be consistent with the policies and objectives of the Alaska Statehood Act and the Alaska Native Claims Settlement Act.

The Alaska Statehood Act, with its extensive grants of land to the people of this state, makes it clear that Congress intended to give Alaskans the resources to be economically self-sufficient. Resolution of the (d)(2) issue must be consistent with this objective.

There also can be no doubt that an overriding purpose of the Alaska Native Claims Settlement Act was to provide for the economic well-being of Native Alaskans. Creation of Native corporations could have no other purpose.

Sec. 17(d) of ANCSA in most general terms mandates withdrawal, study, and classification of federal lands, and sets up a process of land-use planning. In stating—in (d)(2)—four systems of diverse purpose and type of management, we believe that Congress intended that lands with a diversity of values and resources could be designated for the type of management provided for by the US Forest Service, just as much as lands of some prime scenic value, or habitat would be recommended, respectively, as National Parks and Wildlife Refuges. Further, in its establishment of a land-use planning commission, Congress intended that the recommendations would be made in the light of the best possible information.

The "BLM Organic Act" has now established that most of the public domain lands will be retained by the United States and managed under multiple use philosophy. The National Forest Management Act of 1976 further refines the management role and public responsiveness of the U.S. Forest Service.

Seven years ago Congress set forth our nation's mineral policy objectives. In the Mining and Minerals Policy Act of 1970, Congress declared that it is the continuing policy of the federal government to encourage private enterprise in the development of an economically sound domestic mining industry and to foster and encourage the orderly development of domestic mineral resources.

In short, Congress, on all of the foregoing occasions, has spoken directly on issues which are at the heart of the (d)(2) matter. We believe it is important that those pronouncements be kept in mind as debate on (d)(2) continues.

II. SPECIFIC CONCERNS OF THE ALASKA MINERS ASSOCIATION

In order to carry out the policy of the United States, as expressed in the Mining and Minerals Policy Act of 1970, the mining industry needs to have access to the public

domain to find and develop deposits, and it needs to have the right to transport mineral products to market if this is warranted by economic conditions.

In turn this implies that most of the federal public domain, and especially that of recognized or suspected mineral potential, be in management systems which allow discovery and transport of minerals—essentially that most public lands be administered by the U.S. Forest Service and/or U.S. Bureau of Land Management. It also means that there should be an attempt to exclude mineral terrains from preservation systems.

Another factor which mandates multiple use of most Alaska land is that we do not know how extensive Alaska's minerals are, and we do not know where they are. Our fear is that to the extent Congress closes the door to mineral activity in Alaska, Congress is locking up uninventoried resources. We believe this action to be unsound and contrary both to good land-use planning and to the Mining and Minerals Policy Act.

Inasmuch as (d)(2) boundaries and management systems affect the opportunities available in adjacent State and Native lands, the (d)(2) settlement must recognize the rights of access of the State and the Native peoples, and because resources do not recognize these man-made boundaries, provision must be made for development of jointly owned resources.

III. POSITION ON OTHER ASSETS OF (d)(2)

The Association recognizes that many problems must be addressed in the (d)(2) legislation. These problems include subsistence, management of critical habitat, the development of agriculture and forestry. Just as in mineral development, the Association proposes that these issues be addressed through careful study of the availability and distribution of resources and needs of the people.

IV. OTHER AREAS OF DISCUSSION

For the record, the Association wants to establish that mining will not, over time, cause loss of other opportunities in land management. Various statistics are available to support this contention. The President's Commission on Materials Policy found that less than 0.3 percent of the land area of the United States has been disturbed by mining to produce all the mineral materials needed since 1776. Much of this disturbance is that of "urban or transportation system mining," such as rock and gravel pits. Since it is highly unlikely that Alaska will ever be generally urbanized, or laced by a highly developed road system, a better figure to use is the 0.01 to 0.02 percent that would be distributed by mining of the locatable minerals. Most of this land can be reclaimed and—with the healing of time—is available even for wilderness, as is recognized in the "Eastern Wilderness Act." Mining must be considered an interim use in any land-use management program.

In summary, the Alaska Miners Association advocates accessibility to most of the public lands for mineral activities and multiple-use management of most Alaska land. We believe that this position is in keeping with the national interest as expressed by Congress.

[From the Izaak Walton League (Anchorage Chapter)]

D–2 LANDS POSITION STATEMENT APPROVED BY BOARD OF DIRECTORS ON FEBRUARY 8, 1977

The Izaak Walton League (Anchorage Chapter) supports the establishment of National Interest Lands in Alaska. Recognizing that large areas of Alaska should be reserved and protected for perpetual Public use, we believe that these lands must be set aside now.

We support the multiple use concept of these lands where proper management allows for the conservation of its total resources. We believe that the nonrenewable resources can, will, and should be developed as the National need requires. Such development shall be controlled for maximum protection of an areas renewable resources. We support laws, rules, and regulations that are essential to manage, develop, preserve, and protect all land and resources under the Public ownership so that their quality is maintained or enhanced for future generations. We believe that these controls are necessary for both commercial uses, such as grazing, timber or mining and the noncommercial uses such as fishing, hunting, camping, rockhounding, or off highway vehicle use.

We support the continuation of hunting in all areas where good wildlife management allows for the perpetuation of the species. Recognizing both the consumptive and nonconsumptive values of wildlife, we would support a management concept that provides for the optimum wildlife population on the land, that an area's ecosystem can sustain. This would be in contrast with the optimum harvest concept.

We oppose the designation of subsistence hunting areas for special use by special groups. Subsistence hunting shall not be reserved for any group but will be restricted to and justified by need alone.

Fishing will be allowed in all areas. The natural perpetuation of the fishery shall be the first goal of its management. We support the use of our fisheries for all of the People, with management for the maximum sustained yield to benefit both sport and commercial users.

ALASKA PROFESSIONAL HUNTERS ASSOCIATION, INC.: POLICY STATEMENT ON D–2 LANDS

It is of concern to the Alaska Professional Hunters Association that fish and wildlife habitat be protected from unwise degradation of lands classified under section 17 D–2 of the Alaska Native Claims Settlement Act.

Alaska Professional Hunters Association was the first group to produce recommendations for disposition of D–2 lands. At the time, we recommended primarily administration by the U.S. Fish and Wildlife Service. Lands classified as D–2 are federal lands and as such will be managed by a federal agency. Under that premise we still feel that our original proposal still stands, and this proposal has been endorsed by the National Rifle Association.

Polarization of two factions representing exploitation and preservation have obscured the issue of wise utilization of both renewable and non-renewable resources. Americans are adjusted to unrestricted use of fossil fuels, minerals, and forestry products. We cannot believe that the extraction of these resources will cease because of preservationist demands. We perceive the issue as natural resource extraction with the least possible wildlife habitat degradation as possible. The Alaska pipeline is a prime example showing the public that you can extract a nonrenewable resource from an area with the least disturbance to our game habitat.

With the exception of the National Park Service, the critical issue is not which agency shall manage D–2 lands, but that their mission be detailed in the enabling legislation. Sport hunting is not only our livelihood, but the great majority of Alaska residents enjoy this great outdoor activity. We desire that provisions to protect this valuable heritage in perpetuity be clearly spelled out in any D–2 legislation enacted by Congress.

It is of vital importance that fish and wildlife resource management by the State of Alaska be specified and detailed in any D–2 legislation. We strongly urge that separate legislation be considered for each area with specific wording allowing the harvest of our renewable game resources under the control and management of the Alaska Department of Fish & Game.

THE ALASKA WILDLIFE FEDERATION AND SPORTMEN'S COUNCIL*—POSITION STATEMENT** ON THE D-2 LANDS OF ANCSA

The Council has on record commented on the EIS prepared by the agencies proposing D–2 withdrawals. The following recommendations are presented for consideration in D–2 legislation.

1. PUBLIC INPUT NECESSARY ON SPECIFIC AREAS

The magnitude and diversity of the D–2 proposals precludes knowledgeable input on all areas from but few citizens. Accordingly, the Council prefers separate legislation for each proposal and thus insure the people's wish and contribution to the separate entity without confusing the whole of agency proposals. Legislation should provide, for each proposal, the objectives and multiple or singular uses or combinations of uses.

Legislation should avoid the deficiencies, in existing Executive orders, in providing objective guidelines for federal administrators without the ultimate bureaucratic decision. Omnibus bills tend to be less specific and complicate legislative processes for both the Congress and the people. All proposals should be accompanied by cost estimates for administration.

2. FISH AND GAME RESPONSIBILITY

Legislation should recognize the State's responsibility for managing the fish and wildlife resources on D–1, D–2 and public domain.

Recent federal statutes have continued to erode the State's responsibility, i.e. Marine Manual, 200 Mile Limit, Endangered Species.

3. WILDERNESS CLASSIFICATION

Legislation should not be confounded by Wilderness classification.

Legislation should follow the precedent of the Wilderness Act, giving the agency ten years to give Congress its recommendation on what areas are to be included in wilderness classification. Present knowledge of minerals, mode of travel, and past and potential use does not permit a reasonable classification at this time.

4. DUAL AGENCY CONTROL

Legislation should avoid dual agency control, a monster we should leave to Loch Ness.

Exchange of expertise between federal and state agencies, if required by statute, may better serve the people and avoid duplication of technical services.

5. NATIONAL FORESTS AND REFUGES

The Council supports, in general, the proposals for National Forests and National Refuges with multiple use.

We are reserving comment on boundaries and the specific wording, in legislation, with respect to objectives and use. The U.S. Forest Service should manage for wildlife on lands primarily suited to wildlife, and U.S. Fish & Wildlife Service should manage for forests on lands primarily suited for forest use.

6. MINERALS, OIL AND METAL, EXPLORATION AND DEVELOPMENT

Given agency authority to control and monitor, consistent with the objectives of a given area, mineral exploration and development should be permitted on all D–2 lands with the exception of portions of monuments and parks and critical fish and wildlife habitat.

---

* The Council represents sportsmen groups in Anchorage, Fairbanks, College, Cordova, Haines, Juneau, Ketchikan, Sitka and Palmer.

** This statement has also been approved by the Fairbanks Coalition of Outdoorsmen including snowmobilers, Chena River Sportsmen, trappers, Tanana Valley Sportsmen's Association, Interior Wildlife Association, and outboarders.

The public concern and existing environmental statutes will preclude most of the past mistakes from mineral exploration and development. The need for strategic minerals, mining industry, and energy resources will ultimately dictate these uses. Serious objection to recent BLM mining regulations indicate a need for more reasonable control of mining.

7. NATIONAL PARK PROLIFERATION

The Council has a record of support for National Parks in Alaska and has long supported the need for Congressional mandates to replace Executive orders. The Council is disturbed over the magnitude and inadequate justification of the National Park Service proposals which include vast areas of ordinary landscape without unique features of national significance in flora, fauna, scenery, archaeology, geology or history. These "acre happy" proposals, if accepted by Congress, will unnecessarily exclude many other potential uses.

Of particular concern are the large additions to McKinley and Katmai and the Wrangell-St. Elias and Arctic Parks. The Council would support reasonable additions to the Park system, though not yet justified, and providing the creative legislation specifies objectives and uses.

The Council considers the term "Preserve", used by the "Conservation Coalition" (Sierra Club, Conservation Society, etc.), as a NPS ruse for a holding pattern before landing a park. The EIS by the NPS used a suggestion to permit "subsistence hunting" as a ruse for public support. Preserves, if created, should be managed by an agency (BLM, FWS, FS) other than NPS. The term "subsistence hunting_fishing" is inconsistent, constitutionally and definitively, and should not be used in legislation.

The NPS fishery management is notoriously poor. The Park proposals include important river systems where the anadromous and resident fisheries are the most important singular use not to be subverted to other priority uses.

8. BLM ORGANIC ACT

The new BLM Organic Act may now prompt suggestions for retention of all D–2 lands under BLM. We consider this an appropriate potential for areas of controversy, such as the NPS proposals. The Council, however, supports the concept of National Parks, forests, refuges, and scenic rivers being managed by the respective bureaus and not run the hazard of single agency control. Legislation should also consider lands declassified from D–2 to D–1 and provide guidelines for the BLM.

9. GOVERNOR HAMMOND'S COMANS

The Council supports the concept of Governor Hammond's comans but believes it a compromise defensive position and seriously doubts that it will satisfy the interests of people and the members of Congress who were the D–2 genesis. Controversial areas, where there exists a complicated mix of Federal, State and Native selection lands and where the need exists for similar management, "Comans" may be appropriate. ANCSA conflicts with the Statehood Act in land selection and the D–2 provision restricts Native selection. The State, Native and community needs should be more carefully identified before classification of D–2. "Preserve and protect" is an omnibus phrase implying lands outside of national dedications are of no concern.

10. WILD AND SCENIC RIVERS

Except for disturbance by placer mining, most Alaskan rivers qualify for wild and scenic classification. The existing proposals are deficient in recognition of (1) irregular, ill defined boundaries, (2) valid existing claims, (3) managerial problems and costs, (4) conflicts with corridors for transmission and transport, (5) necessary fishery management, and (6) use for trapping, hunting, fishing, and use of power vehicles.

TERRITORIAL SPORTSMEN, INC.—ALASKA'S NATIONAL INTEREST LAND CONSERVATION ACT, H.R. 39

The Territorial Sportsmen, Inc. of Juneau, a non-profit sportsmen oriented conservation organization dedicated to the principles of multiple use and proper management of our natural resources, have recently received a copy of H.R. 39 introduced by Congressman Udall. The Territorial Sportsmen have had a long, continuing interest in the matters relating to land management and allocations in Alaska. There are numerous sections of H.R. 39 which in our opinion are not in the best interests of the State or the Nation. While we have only had access to a copy for three days, after careful review, we are deeply concerned with the language contained in H.R. 39. The purpose of this release is to provide members of our organization and other interested members of the community and the State with some of the facts.

The proposal would designate 147 million acres of wilderness which would be in addition to existing withdrawals for various purposes including military withdrawals. The 147 million acres, plus the previous dedications and withdrawals, would place 46½ percent (approximately) of Alaska's entire land area of 362,516,000 acres in the wilderness classification. The designation in total of millions in acres of wilderness is greater than the combined areas of the States of California and Washington.

In addition to designation of National Park and National Wildlife areas as wilderness, all wild and scenic rivers would be managed as wilderness by the National Park Service. This would include 23 wild and scenic rivers. These rivers are outside and in addition to proposed parks and refuges. The boundaries of these designated rivers will average two miles on each side. Managed as wilderness by the National Park Service, these 23 proposed wild and scenic rivers will not be available for recreation, development, agriculture, current hunting practices, hydroelectric power site developments, timber harvesting or mining.

Under management by the National Park Service or as National Wildlife refuges, the State of Alaska (Alaska Department of Fish and Game) loses the primary responsibility for management of fish and wildlife species on these areas. The Secretary of the Interior is authorized to publish regulations, prescribe conditions and enforce such regulations and conditions for restrictions of hunting and fishing to subsistence use.

Although the Forest Service, Department of Agriculture, has currently designated approximately 2.5 million acres in seven wilderness study areas in the Chugach and Tongass National Forests and is currently managing them to protect the wilderness values, while the U.S. Geological Survey is completing the required study of mineral values, these designations are ignored by the proposed legislation or supplanted with instant designations of wilderness classification includes:

ADMIRALTY ISLAND

1,030,000 acres excluding only the Angoon Native Village and related selected lands. The Goldbelt and Shee Atika, Inc. Native rights and selections on Admiralty Island are ignored.

MISTY FJORDS

2,400,000 acres instant wilderness classification includes the 590,000-acre Granite Fjords wilderness study area managed by the Forest Service. Although the U.S. Geological Survey minerals survey findings are nearly ready for evaluation, instant wilderness designation precludes consideration of this information. The expanded area of 2,400,000 acres also includes the U.S. Borax Company's Quartz Mountain molybdenum project and would essentially block the development of this project.

The West Chichagof-Yakobi wilderness area proposal of 405,000 acres encompasses the Forest Service Unit Management plan for this area. A 5-year study including a formal environmental impact statement. The final impact statement based on extensive public involvement included designation of a 40,000-acre wilderness study area and management of most of the area as backcountry. The designation of the entire area as wilderness ignores the 5-year study and environmental impact statement, would block the development of Inspiration Mining Company's copper-nickel deposit on Yakobi Island. Several year-long residences and other existing recreation facilities would also be adversely affected by such classification.

The Yakutat Forelands, 300,000 acres and Stikine-LeCente 305,000 acres are also areas on the Tsongas National Forest currently under study in the Forest Service's land management planning process. Although the areas have not been studied for mineral values, instant wilderness classification would be made. Native claims, opportunities for agriculture and other forms of development are also ignored.

The Nellie Juan area on the Chugach National Forest is also designated as instant wilderness. Although this corresponds to the Forest Service's designated wilderness study area, the mineral surveys by the U.S. Geological Survey are not completed and Native claims are ignored.

Management of these National Forest wilderness area designations would be taken over by the National Park Service, eliminating the State of Alaska's responsibility for management of fish and wildlife species and restricting hunting and other opportunities for multiple use management.

The proposed legislation would also modify existing land classifications in southeast Alaska.

COPPER RIVER DELTA AREA

Elimination of the Forest Service's Copper River Delta Game Management Area, where the Forest Service has a cooperative agreement with the State of Alaska Department of Fish and Game, seriously undermines the Forest Service's Multiple Use Management program. The Forest Service also has cooperative efforts underway in this area with the U.S. Fish and Wildlife Service, University of Alaska, and University of Minnesota. The Forest Service should be encouraged to continue such efforts rather than blocking such work.

H.R. 39 FAILS TO RECOGNIZE THE AGRICULTURAL POTENTIAL IN ALASKA

The agricultural potential in Alaska is not considered in the provisions of this proposed legislation. In fact, existing and potential agricultural lands are included in proposals for National Parks, National Wildlife Refuges, and Wild and Scenic Rivers preventing the use of these agricultural lands.

The Subcommittee on Agricultural Production, Marketing and Stabilization of Prices of the Committee on Agriculture and Forestry, U..S. Senate, held hearing in Palmer, Alaska on August 16, 1976, and in Fairbanks on August 17, 1976, on the agricultural potential in Alaska. The record of these hearings has been printed and clearly show the importance of these agricultural lands. The Alska State Legislature and Governor Hammond have also recognized this important agricultural resource and additional agricultural lands have been identified.

It is essential that all of these agricultural lands be recognized and be available for use either as farmlands or as grazing lands. H.R. 39 should be referred to the Senate and House Committees on Agricultural and Forestry to assure these agricultural values are considered and will be available for use.

The Alaska National Interest Land Conservation Act—H.R. 39 also proposes to greatly modify existing land classifications in southeast Alaska and Prince William Sound severely retarding the conservation (wise use) of resources on the Tongass National Forest, Chugach National Forest, and Glacier Bay National Monument.

The Glacier Bay National Monument is enlarged to a total of 2,800,000 acres and is all designated wilderness. These lands include highly significant and economically available minerals critical to the Nation's needs. Opportunities for developed recreation facilities, hunting, aquaculture, and timber harvesting would also be foreclosed by these designations.

Retention of and classification of additional areas as National Forest which will permit multiple use management of these various resources should be made.

In conclusion, we would again urge that everyone become familiar with this proposal. Hearings no doubt will be held. Copies of the entire Act should be available in Alaska in the near future. I suggest you contact the various offices of our State delegation to secure copies or write directly to your Congressman or Senators. We would like to point out, also, that in our opinion this proposal does not recognize the economic factors involved. Certainly the proposals for southeast Alaska would, in our opinon, put southeast Alaska in a very precarious position so far as economics are concerned. I am sure this should be of interest to all Alaskans. We will be commenting further on this legislation. We are advised that other legislation will also be introduced in the very near future. We certainly should have some options.

HEADQUARTERS ALASKAN AIR COMMAND,
February 10, 1977.

HON. TED STEVENS,
U.S. Senator,
Anchorage, Alaska

DEAR SENATOR STEVENS: This is in response to your request of January 11, 1977 for the Department of Defense position on the proposed d–2 land withdrawal.

The basic position of the military in Alaska at this time is substantially the same as previously developed after initial review of the Department of Interior proposal in 1973. The military departments in Alaska have no objection to the d–2 land withdrawal proposals as long as there is no resultant adverse effect upon military training or operating areas in Alaska now in use or proposed to be used in the future.

Certain current activities by the military which could be affected by the d–2 land proposals include such operations as the annual resupply of Air Force installations by sealift barge and commercial barge by coastal and inland waterways, operation of military-controlled aircraft below 1000 feet above ground level when required for emergency or rescue operation and for FAA-approved low-level training routes and military ground maneuver rights.

Additionally, in those instances where a proposed withdrawal affects an area in which the Corps of Engineers has been authorized to perform a civil works study, those withdrawals should be deferred until the study is complete. Currently, there are several ongoing studies which may be affected by the proposed withdrawals; such as, those involving the Upper Susitna River, Copper River, and Yukon River, all of which have tremendous hydroelectric potential. Any withdrawal should provide for ingress and egress to present and potential hydroelectric sites together with easements and rights-of-way for transmission of power.

The protection of the military operation and training interests can, of course, be assured by incorporation of specific safeguards into the withdrawal legislation. Alternatively, the Department of Interior may provide protection from negative impact on military operations by appropriate regulatory provisions.

A few military reservations and some of the identified potential water resource development areas located within the proposed withdrawals are set forth in Attachment 1.

Similar letters have been forwarded to Governor Hammond, Senator Gravel, and Mr. Young.

Sincerely,

M. L. BOSWELL,
Lieutenant General, USAF.
JAMES G. BOATNER,
Brigadier General, USAF.
GEORGE R. ROBERTSON,
Colonel, Corps of Engineers.

EXAMPLES OF MILITARY LANDS AND CIVIL WORKS AFFECTED BY D–2 LAND WITHDRAWALS

1. The following Air Force lands in Alaska are within the proposed boundaries of the currently recommended d–2 withdrawals:

a. Cape Romanzof Air Force Station, within the Yukon Delta National Wildlife Refuge.

b. Big Mountain Radio Relay Site, within the Iliamna National Resource Range.

c. Tatalina Air Force Station, within the Yukon-Kuskokwim National Forest.

d. Cape Newenham Air Force Station, within Togiak National Wildlife Refuge.

e. Naknek Recreation Annex No. 2, in Katmai National Park.

f. Fort Yukon Air Force Station and Porcupine Recreational Annex, in Porcupine National Forest.

g. Cape Lisburne Air Force Station, within the Alaska Coastal National Wildlife Refuge.

2. The following Air Force real estate is located in the ecology zone:

a. The Seward Recreational Annex is within the ecology zone of the Harding Icefield-Kenai Fjords National Monument.

b. Fort Yukon Air Force Station and Porcupine Recreational Annex are located within the ecology zone of the Yukon Flats National Wildlife Refuge as well as the Porcupine National Forest.

c. Naknek Recreation Annex No. 1 and Naknek Recreation Annex No. 2 are located within the ecology zone of the Iliamna National Resource Range.

3. The following potential hydroelectric development projects are partially or totally within the proposed boundaries of the currently recommended d–2 withdrawals:

a. Forty Mile, within the Fortymile National Wild River.

b. Holy Cross, within the Yukon-Kuskokwim National Forest and the Koyukuk National Wildlife Refuge.

c. Ruby, within the Yukon-Kuskokwim National Forest.

d. Crooked Creek, within the Yukon-Kuskokwim National Forest.

e. Naknek, within the Katmai National Park.

f. Dubli, within the Koyukuk National Wildlife Refuge.

g. Ingersol, within the Iliamna National Resources Range and the Lake Clark National Park.

h. Crescent Lake, within the Iliamna National Resources Range.

i. Lake Iliamna, within the Iliamna National Resources Range.

j. Rampart, within the Yukon Flats National Wildlife Refuge, the Yukon-Charley National Rivers, and the Porcupine National Forest.

k. Agashashok, within the Cape Krusenstern National Monument and the Noatok National Arctic Range.

l. Tuksuk, within the Chukchi-Imuruk National Reserve.

m. Tazimina, within the Iliamna National Resources Range and the Lake Clark National Park.

n. Wood Canyon, within the Wrangell-St. Elias National Park.

o. Yukon Taiya, within the Yukon Flats National Wildlife Refuge and the Porcupine National Forest.

p. Woodchopper, within the Yukon Flats National Wildlife Refuge, the Yukon-Charley National Rivers, and the Porcupine National Forest.

q. Porcupine, within the Yukon Flats National Wildlife Refuge and the Porcupine National Forest.

r. Chakachamna, within the Lake Clark National Park.

4. There are no Army real estate interests involved.

(This concludes Additional Statements submitted by Senators today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning busines is closed.

SPECIAL GRAZING AND HAY PROGRAM FOR WHEAT ACREAGE

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of S. 650, which will be stated by title.

The legislative clerk read as follows:

A bill (S. 650) to provide temporary emergency assistance to wheat producers by permitting such producers to utilize a portion of their farm wheat acreage allotments for grazing purposes or for hay rather than for commercial production.

The Senate proceeded to consider the bill which had been reported from the Committee on Agriculture, Nutrition, and Forestry, with an amendment to strike all after the enacting clause and insert the following:

That the Agricultural Act of 1949, as amended, is amended by adding at the end of title I a new section as follows:

"SPECIAL GRAZING AND HAY PROGRAM FOR WHEAT ACREAGE

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall administer a special wheat acreage grazing and hay program for the 1977 crop. Under the special program, a producer shall be permitted to designate a portion of the wheat acreage allotment for the farm, not in excess of 40 per centum thereof, which was planted to wheat prior to January 1, 1977, and which shall be made available for use by the producer for grazing purposes or for hay production rather than for grain production. A producer who elects to participate in the special program shall be paid a payment as provided in paragraph (3) of this section.

"(2) Any producer who elects to participate in the special program shall designate the specific acreage on the farm which is to

be used for the purposes prescribed in paragraph (1) of this section. No crop other than hay may be harvested from acreage included in the special program.

"(3) The Secretary shall pay any producer participating in the special program an amount determined by multiplying the projected yield for wheat established for the farm times the number of acres included in the special program times $1. The producer shall be ineligible for any other payments or price support on the portion of the wheat acreage allotment for the farm which the producer elects to include in the special program.

"(4) Acreage included in the special program shall be deemed to have been planted for harvest for the purposes of wheat acreage history.

"(5) The Secretary is authorized to issue such regulations as may be necessary to carry out effectively the provisions of this section.

"(6) The Secretary shall carry out the special program authorized by this section through the Commodity Credit Corporation. This section shall become effective October 1, 1977, and the provisions thereof shall be retroactive to cover payments for 1977 crop wheat planted prior to January 1, 1977.".

The PRESIDING OFFICER. Time for debate on this bill is limited to 1 hour, to be equally divided and controlled by the Senator from Oklahoma (Mr. BELLMON) and the Senator from Georgia (Mr. TALMADGE), with 30 minutes on any amendment in the first degree, and 20 minutes on any amendment in the second degree, debatable motion, appeal, or point of order.

Who yields time?

The Senator from Oklahoma.

Mr. BELLMON. Mr. President, I yield myself 10 minutes.

Mr. President, I ask unanimous consent that Brad Gungoll of my staff and the following staff members of the Committee on Agriculture, Nutrition, and Forestry be permitted to be present on the floor during consideration of S. 650, including all rollcall votes thereon: Mike McLeod, Carl Rose, Dale Stansbury, Bill Taggart, and Dale Sherwin.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I ask unanimous consent that the distinguished senior Senator from Kansas (Mr. PEARSON) and the Senator from Texas (Mr. BENTSEN) be added as cosponsors of S. 650.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I ask unanimous consent that the amendment of the Committee on Agriculture, Nutrition, and Forestry to S. 650 be agreed to and that the bill, as amended, be considered as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may I interrupt the Senator?

I take it the Senator's request with respect to the committee amendment being agreed to and considered as original text for the purpose of further amendment was cleared with the chairman on this side of the aisle?

Mr. BELLMON. That is correct.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BELLMON. Mr. President, S. 650 would establish a special 1-year program to provide emergency assistance to wheat producers for the 1977 crop. The bill is designed to prevent a further buildup in wheat stocks and promote a better market balance between supply and demand.

Under the special program—

First. A producer would be permitted to designate an acreage of cropland on the farm not to exceed 40 percent of the wheat acreage allotment. As the bill was reported by the Committee on Agriculture, Nutrition, and Forestry, the designated acreage must have been planted to wheat prior to January 1, 1977.

Senator YOUNG is in the Chamber. He has an amendment, which we plan to accept, which would eliminate that date.

The acreage would be available for use by the producer for grazing purposes or hay production rather than for grain production. No crop other than hay may be harvested from the acreage.

Second. The producer would receive from the Secretary of Agriculture an amount determined by multiplying the number of acres placed in the program times the projected yield for wheat for the farm times $1.

Third. The producer would not be eligible for any other payments or price support on the portion of the wheat allotment placed in the program.

Mr. President, it is clear that there is a need for a special program to halt the growing buildup of wheat stocks.

The most recent figures issued by the Department of Agriculture show that wheat carryover stocks at the end of the 1976–77 marketing year will exceed 1.1 billion bushels. This is up dramatically from 664 million bushels in 1975–76. Even more ominous are estimates that—even with normal growing conditions and expected export sales—the carryover stocks for 1977–78 will approach 1.7 billion bushels—as I said earlier, much of this will wind up in government ownership.

Should this happen, a disastrous drop in farm prices is certain, and a burdensome cost to the Treasury is likely to follow.

Mr. President, the special program authorized by S. 650 will be beneficial to the wheat producer, the rancher, and the taxpayer.

With prospects of a 1.1 billion bushel carryover of wheat for this year, and prospects of an even larger carryover next year, S. 650 will permit a wheat producer to use acreage for food production but not promote the continued destruction of markets through the excess production of wheat for harvest as grain.

The program will open up a new supply of hay and pasture, which will aid beef producers, especially in the drought areas of the Midwest and the Great Plains.

In addition to achieving a better market balance between supply and demand, the program could result in significant savings to the Government. This would result from lower storage costs, loan outlays, and target price payments which would occur under existing law in the case of continued oversupply.

Substantial outlays in target prices for the 1977 wheat crop are likely in the absence of an improvement in the price that farmers receive for their wheat.

The Secretary of Agriculture has announced a target price of $2.47 per bushel for 1977 crop wheat. The February farm level price for wheat was $2.44. Since then, there has been some improvement in the weather, which could tend to further depress farm prices.

Under existing law, if the national weighted average market price received by farmers, as determined by the Secretary, is below the $2.47 per bushel target price during the first 5 months of the marketing year—June through October 1977—payment will be made to eligible producers. This payment will be the difference between the target price and the higher of the 5-month average price received by all farmers or the national loan level, and will be based on an amount of bushels determined by multiplying the farm allotment times the projected yield for the farm.

In its report on the 1973 Farm Act establishing the current target price program for wheat, the Agriculture Committee estimated that target price payments would be $16 million for each 1 cent the 5-month average price received by farmers is below the target price.

Mr. President, the program authorized by S. 650 offers an opportunity to provide needed assistance to wheat producers and avoid unnecessary costs to the Treasury.

Under S. 650, a producer would not be eligible for any target price payments—or disaster payments—on the portion of the wheat allotment placed in the special program.

Mr. President, I urge the adoption of S. 650 and ask unanimous consent to have printed in the RECORD at this point a section-by-section analysis of this bill.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

S. 650 amends the Agricultural Act of 1949 by adding at the end of title I a new section 108.

Paragraph (1). Special wheat program for 1977:

Paragraph (1) requires that the Secretary of Agriculture carry out a special wheat acreage grazing and hay program for the 1977 crop. A producer would be permitted to designate an acreage of cropland on the farm not to exceed 40 percent of the wheat acreage allotment.

The acreage placed in the program must have been planted to wheat prior to January 1, 1977, and would be available for use by the producer only for grazing purposes or hay production.

Paragraph (2). Identification of acreage; restriction on harvesting:

Paragraph (2) requires any producer electing to participate in the special program to designate the specific planted wheat acreage on the farm which is to be used for grazing or hay production.

No crop other than hay may be harvested from the designated acreage.

Paragraph (3). Special payment:

Paragraph (3) provides that the Secretary of Agriculture shall pay any producer who elects to participate in the special program (and who otherwise complies with the provisions of the program) an amount determined by multiplying the number of acres placed in the program times the projected yield established for the farm times $1.

The producer shall be ineligible for any other payments or price support (including deficiency payments and disaster payment under section 107 of the Agricultural Act of 1949) on the portion of the wheat allotment placed in the special program.

Paragraph (4). Wheat acreage history:

Paragraph (4) provides that wheat acreage placed in the special program shall be deemed to have been planted for harvest for the purposes of wheat acreage history.

Paragraph (5). Issuance of regulations:

Paragraph (5) authorizes the Secretary of Agriculture to issue such regulations as may be necessary to carry out the special program.

Paragraph (6). Use of the funds, facilities, and authorities of the Commodity Credit Corporation:

Paragraph (6) provides that the Secretary of Agriculture shall carry out the special program through the Commodity Credit Corporation. The bill is effective October 1, 1977, but would be retroactive to cover payments to participating producers for 1977 crop wheat planted prior to January 1, 1977. The effective date of the bill would not, however, prevent the Secretary from using funds of the Corporation for necessary administrative expenses in conducting a sign-up of producers and otherwise carrying out the program during the period beginning on the date of enactment.

Mr. BELLMON. Mr. President, I yield to the distinguished senior Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota.

UP AMENDMENT 80

Mr. YOUNG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The amendment is as follows:

The Senator from North Dakota (Mr. YOUNG) proposes an unprinted amendment No. 80.

Mr. YOUNG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, lines 2 and 3, strike out "which was planted to wheat prior to January 1, 1977, and".

On page 5, line 9, strike out "planted prior to January 1, 1977".

Mr. YOUNG. Mr. President, I commend the distinguished Senator from Oklahoma for the excellent statement he has made.

The bill he is introducing will be of help to the drought-stricken, both wheat and cattle farmers, and will help in reducing the burden from expenses of the huge carryover of wheat. It should help both the farmer and the consumer.

Mr. President, the amendment I offer simply makes the special program authorized by S. 650 applicable to all of the 1977 wheat crop, regardless of the date it was planted. As reported by the Committee on Agriculture, Nutrition, and Forestry, the program would only apply to wheat planted prior to January 1, 1977.

Winter wheat acreage has been increasing in recent years and is now produced in about one-fourth of the State of North Dakota. Much the same thing is true of South Dakota and Montana. It seems unfair to me that a farmer producing hard red spring wheat is not eligible to participate in this program, but another farmer in the same area that plants hard red winter wheat is eligible to participate. Both farmers should have the same opportunity.

Mr. President, I do not think that producers of spring wheat will participate in the program to any great extent. However, it is only fair that the program be made available to them. A reduction in the amount of spring wheat harvested for grain would, of course, help achieve a better market balance between the supply of wheat and demand—the primary purpose of S. 650.

I urge the adoption of the amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter by Alice M. Rivlin, Director of the Congressional Budget Office, estimating cost of the amendment I offered at $25 million, that is, if 1 million acres of spring wheat were placed in the program.

My own view is that the spring wheat producers will not make much use of it and the cost will be far less than the estimate she has made.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 7, 1977.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 650, an amendment to the Agricultural Act of 1949, as amended.

In response to your request, the Congressional Budget Office has also estimated the cost of a possible amendment to this bill, which would permit producers of spring wheat to be eligible for the special grazing and haying program authorized by S. 650. Such an option is estimated to increase the cost of the bill in fiscal year 1977 by $25.0 million. This assumes that 1 million additional acres would be enrolled in the program.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

Mr. BELLMON. Mr. President, I yield myself an additional 2 minutes.

Mr. President, I have had the opportunity to examine the amendment offered by the distinguished senior Senator from North Dakota (Mr. YOUNG). I have also discussed the matter with him.

I believe his amendment has great merit and that the inclusion of spring wheat in this program is appropriate. In fact, as the bill was originally introduced by me, spring wheat was included, but the bill was changed in subcommittee.

I believe this amendment is a great improvement. A reduction in the amount of spring wheat that would otherwise be harvested for grain must balance between supply and demand.

On behalf of the committee, I am prepared to accept the amendment and urge its adoption by the Senate.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I yield myself 2 minutes.

I ask the distinguished Senator from Oklahoma as to whether or not there is, to his knowledge, any opposition within the committee on this side of the aisle to the amendment by Mr. YOUNG?

Mr. BELLMON. Mr. President, this amendment was discussed in committee and most of us thought the committee had agreed to the amendment. There was some mix-up in the recordkeeping.

I have talked with Senator TALMADGE and he is totally in agreement and I know of no opposition.

Mr. ROBERT C. BYRD. Does the distinguished Senator from North Dakota know of any opposition to this amendment?

Mr. YOUNG. No, I do not.

As the Senator from Oklahoma explained, we thought the amendment was approved by the committee. But with open hearings and a room full, approval of my amendment was not heard by all Members, so the committee later decided I should offer the amendment on the floor.

Mr. ROBERT C. BYRD. I see.

Mr. President, Mr. TALMADGE is away from the city because of a death in the family. He is not here to manage this bill at this time.

I have had some difficulty in getting other Senators at this point to the floor, Senators who are members of the Agriculture, Nutrition, and Forestry Committee.

I am advised by my staff that the chief counsel of the committee states that there is no opposition in the committee to the amendment by Mr. YOUNG.

Therefore, I will interpose no objection or opposition at this point.

I wonder if we can have a quorum call first so that I may explore the matter further. I simply would like to ascertain further if there is any objection.

Mr. BELLMON. Mr. President, will the Senator be agreeable to allowing Senator DOLE to be recognized at this time for the purpose of making a statement?

Mr. ROBERT C. BYRD. Yes.

Mr. BELLMON. Mr. President, I yield 5 minutes to the Senator from Kansas.

Mr. DOLE. I thank the distinguished Senator.

Mr. President, I say to the distinguished Senator from West Virginia that I know of no opposition. In fact, we felt that the amendment offered by the distinguished Senator from North Dakota (Mr. YOUNG) was included in the measure. The chairman of the com-

mittee had scheduled a meeting to consider the amendment, after some mixup. The bill already had been reported to the floor, so it was decided to offer the amendment, and the Senator has done that. This Senator knows of no objection.

The Presiding Officer of the Senate, the Senator from Alabama (Mr. ALLEN) is a member of the Committee on Agriculture. He might be able to shed light on whether or not there may be opposition on the other side.

Mr. President, I join the Senator from Oklahoma in support of this bill. In the past 3 weeks I have had ample opportunity to discuss the legislation with farmers from Kansas and throughout the Nation.

The fact remains that our wheat farmers are facing disastrous market prices, coupled with drought conditions throughout much of the winter wheat producing areas.

The price currently offered to wheat producers in my home county of Russell, Kans., is about $2.20 per bushel. This is far below the cost of production.

Moreover, the drought has damaged hay producing pasture and rangeland throughout Kansas. The U.S. Soil Conservation Service estimates that since January 1, 1977, nearly 6,000 acres of pasture has been critically damaged in Kansas as a result of the drought conditions. The almost certain shortage of hay this spring and summer lends additional justification to this legislation.

Under the terms of this legislation, the wheat farmer will be limited to the amount of wheat he may place under the program to 40 percent of his allotted acres, and receive $1 per bushel payment for either grazing out that acreage or making hay from the growing wheat. In any event, USDA estimates this will take approximately 4 million acres of wheat out of production.

It should provide some stimulus to the prices being paid to wheat farmers.

It will give the farmers the benefit of the feed value of what wheat is left, either through grazing livestock or by haying it for livestock feed.

The payment will replace the disaster payment which would amount to one-third of the target price—$2.50—or 84 cents per bushel, so actual cost will be little more than the current disaster payment program.

In recent House hearings, the Department of Agriculture testified that the cost of this program would be $115 million. The Congressional Budget Office puts the cost at $100 million. However, unofficial estimates indicate that the program would cost no more than $80 million, minus the offsetting saving from the disaster payments that would otherwise have been made.

I understand that the Kansas Livestock Association has given this bill qualified support since the measure is restricted to calendar year 1977. KLA does not support a multiyear program, and neither do I. However, the limitation to a single year makes the program acceptable as an emergency measure to provide some assistance to the wheat producers of this Nation.

I strongly urge my colleagues to join Senator BELLMON and I in support of this bill. The bill has been discussed thoroughly. So far as I know, it has the unanimous support of Republicans and Democrats on the committee, and I urge its passage.

I yield back the remainder of my time.

Mr. ROBERT C. BYRD. I yield myself 1 minute.

Mr. President, I have ascertained—I think to my satisfaction—that there is no opposition on this side of the aisle to the amendment by Mr. YOUNG.

Mr. BELLMON. Mr. President, I urge the adoption of the amendment, and I yield back the remainder of my time on the amendment.

Mr. ROBERT C. BYRD. I yield back the remainder of the time on the amendment, on this side.

The PRESIDING OFFICER (Mr. METZENBAUM). The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BELLMON. Mr. President, I yield back the remainder of the time on the bill, and I urge its approval.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senator withhold yielding back his time for the moment.

Mr. BELLMON. Mr. President, I withdraw the request.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged against both sides on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from South Dakota such time as he may desire.

Mr. McGOVERN. Mr. President, the measure that the Senator from Oklahoma has brought to the floor today makes eminently good sense. It is a proposal to deal with a critical shortage of hay that exists in the country as a consequence of the rather widespread drought.

The Senator's bill would authorize the grazing of allotted wheat acreage up to 40 percent to offset the critical shortage of hay and to compensate the wheat farmers for the resulting loss in income. In that sense, it not only makes sense from the standpoint of the producer but also from the standpoint of the consumer, in that it assures us of at least some relief from the shortage of hay for livestock, cattle and farm animals of all kinds.

I assure the Senate that there is no objection to the measure in the Agriculture Committee. The chairman of the commitee is unable to be here today, but he has authorized me to say that he hopes the Senate will accept this measure in the public interest.

Mr. BELLMON. Mr. President, I yield myself 2 minutes.

I appreciate the statement by the distinguished Senator from South Dakota. He was present in the committee when we discussed the bill and fully understands the impact of it. His endorsement is extremely important.

Mr. President, I have no special desire for a rollcall vote. I have no opposition to one, if it is desired. There seems to be no opposition to the bill, and I would just as soon have a voice vote, unless the distinguished majority leader wants a rollcall vote.

Mr. GOLDWATER. Mr. President, how much money are we talking about?

Mr. BELLMON. It is difficult to determine precisely the cost, because no one knows how many farmers will participate or what the total effect will be on the cost of the disaster program or the cost of the target price program. But if the amount of participation is as estimated by CBO, the cost will be somewhere in the range of $100 million. The USDA has estimated the cost to be about $84 million. So it is somewhere in that range. It is one of those programs about which we cannot be precise.

Mr. ROBERT C. BYRD. Mr. President, I am advised that a rollcall vote is desired on the passage of the bill.

Mr. BELLMON. Mr. President, I ask for the yeas and nays.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum at this point, and I ask that the time be taken out of my time.

The PRESIDING OFFICER (Mr. ALLEN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, in view of the fact that a rollcall vote will be requested, I ask unanimous consent that the vote occur today at 12:30 p.m. Is that agreeable?

Mr. GOLDWATER. Mr. President, reserving the right to object, there is a meeting of newspaper people here about lunchtime. I do not know how many of us will be there, but 12:30 would mean breaking up a lunch. Not that I mind breaking up a Senate lunch; it is not worth that.

Mr. ROBERT C. BYRD. Would the Senator suggest 12 o'clock, then?

Mr. GOLDWATER. I think 12 o'clock would be fine.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a vote on final passage of this measure occur at 12 o'clock noon today.

The PRESIDING OFFICER. And that the provision of rule XII be waived?

Mr. ROBERT C. BYRD. And that the provision of paragraph 3 be waived.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there will be a rollcall vote.

I suggest the absence of a quorum at this time, hoping we can get enough Senators to support the demand for the yeas and nays.

The PRESIDING OFFICER. The clerk will please call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator such time as he wishes, 3 minutes.

Mr. METZENBAUM. Mr. President, I cannot claim that I know all of the specifics about this legislation, but it concerns me because it appears to be another one of those Government subsidy programs we find coming to the floor of the Senate on such a routine basis.

We talk about budget controls, we talk about holding down the Federal budget, and then there is a drought. I understand the problem of the drought, and suddenly we talk about there being a 1 billion bushel surplus of wheat in this country. I am not certain I am accurate with respect to that figure.

Then we are told this measure may cost $100 million or possibly more. That concerns me, Mr. President. If concerns me that day in and day out we talk about holding down the Federal budget, and then there is an exception made. One day it is for wheat subsidies, and the next day it is for some other kind of program that is of special interest to a particular group.

We have wheat farmers in Ohio, and I am certain they would like to receive the $1 a bushel subsidy as provided for in this legislation.

But, be that as it may, I have difficulty in accepting this legislation, first, without knowing the specific amount that is involved, whether it is $100 million or some figure in excess of that.

I would be very happy to yield to the distinguished Senator from Oklahoma if he can tie down that figure with greater accuracy than I find it in the summary of the scheduled bill which was distributed and put on the desk of each of the Members I think earlier today.

Does the Senator from Oklahoma have a specific figure as to how much this bill will impact on the Federal Treasury?

Mr. BELLMON. Mr. President, I yield myself 2 minutes to respond.

May I say to the distinguished Senator from Ohio that it is not possible in a situation like this to nail down a specific cost. The reason is it is impossible to know how many producers will opt to participate in this program. Also it is impossible to know how much the cost of the disaster program which is already on the books or the cost of the target price program which is a part of our present law will be reduced by virtue of the fact that there will be substantial reduction in the amount of surplus wheat as a result of S. 650.

As the law now stands, if the market price is lower than the target price then wheat producers will be paid an amount by the Treasury to make up for that difference.

The difficulty is—and I am sure the Senator from Ohio knows this—that wheat produced in this country is largely marketed abroad. Roughly two-thirds of all the wheat we grow here is sold in the export market. When the export embargoes were put in place a couple of years ago they interfered with the sale of this commodity, and the result is we have had a very substantial buildup in our surpluses so that much of that wheat is going to wind up in Government ownership.

The farmers take CCC loans on the wheat, and then when the price at the market place is below the loan, the Government takes title. So here is the case where it is impossible to know what the total impact on the Treasury will be.

In my own personal opinion this bill will actually save the Treasury money. The estimate of costs by the USDA is around $87 million, and by the Congressional Budget Office around $100 million. But those do not take into account the anticipated saving in the disaster program or what the Treasury will enjoy because of the smaller outlays due to the target price in Government loans.

Mr. METZENBAUM. Am I correct in my understanding that there is something in the nature of a 1 billion bushel surplus in this country at this time?

Mr. BELLMON. The Senator is correct. The surplus will be between 1 billion and 1.2 billion.

Mr. METZENBAUM. Would the Senator from Oklahoma be good enough to explain to me how if 40 percent of that is to be converted or could be converted, in accordance with the provisions of the bill, into hay how the figure would be as low as $87 million to $100 million? Why would it not approach something in the area, the possible figure of, 40 percent of 1 billion, which would obviously be $400 million or 40 percent of 1.2 billion?

Mr. BELLMON. Mr. President, will the Senator suspend while we ask for the yeas and nays?

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BELLMON. I thank the Senator from Ohio.

In response to the question, the anticipated production of wheat in this country for this current crop year is about 2 billion bushels. If all the wheat that is presently planted goes ahead and produces, as is presently forecast, we will have a 2-billion-bushel crop. Under the terms of this bill much of that production comes from acres planted in excess of the allotment program which is presently not in effect, so under the terms of this bill a producer is limited to grazing out or making hay of from 40 percent of his allotment, and in many areas of the country using wheat for grazing or for haying is not a common practice. It is only in the Great Plains where it is happening. So it is based upon those understandings of past practices that the figures of $87 million by the USDA and $100 million by the CBO are arrived at.

Mr. METZENBAUM. The figure could be substantially in excess of that.

Mr. BELLMON. And it could also be substantially less than that.

Mr. METZENBAUM. Could it be an amount as high as between $200 million and $300 million?

Mr. BELLMON. In my judgment, no.

Mr. METZENBAUM. But it could?

Mr. BELLMON. If the Senator wants to make that assertion he may, but that is not the best understanding of those who know how these programs work.

Mr. METZENBAUM. Let me ask the distinguished Senator from Oklahoma whether he feels he might not better approach this problem of wheat shortages and wheat surpluses by establishing a food reserve, a wheat reserve, in this country that might be available to purchase wheat in times of surplus and might be a balancing factor in times of shortage.

Mr. BELLMON. Mr. President, the Agriculture Committee is presently working on a new farm bill which will be before the Senate in a matter of a few weeks. In that bill, in my judgment, we will have provision for a 3- or a 5-year storage program under which producers will be able to build up stocks against the years when there may be a shortage of production or when there may be an excess export demand.

So to answer the Senator's question the whole program fits together, and this is an important part of it.

Here is a case where we have a surplus of one commodity which can be converted into beef, which will be needed, and at the same time save the Treasury a substantial amount of money.

Mr. McGOVERN. Mr. President, will the Senator from Ohio yield to me for just a moment?

Mr. METZENBAUM. I yield.

Mr. McGOVERN. I think we can appreciate the Senator's concern about the uncertainty of the cost factor in this program. It is a fact that nobody really knows, because you cannot predict how many farmers are going to sign up for the program. But the agency that is in the best position to give us a prediction on that is the Department of Agriculture. They have the statisticians, and they know the crop history. They know the pattern of agriculture better than anyone else, and their predictions are that the bill as reported by the Senator from Oklahoma from the Agriculture Committee would cost $56 million. Their estimate is that the amendment that the Senator from North Dakota added to the bill, and that was accepted on the floor a while ago, would increase that by $28 million, so that the total cost, as nearly as the Department can estimate it, would be $84 million.

It is my own personal judgment that that is on the high side. But in any event, I think the Senator can have some reasonable assurance that it is not going

to go above the figures submitted by the Department of Agriculture.

The same Department estimates savings of some $20 million on the program as a consequence of reductions in what would otherwise have to be paid out in disaster and deficiency payments. So they have revised their original estimates of the cost downward, and what we now end up with, with the action taken here on the floor today, is an estimate by the Department that this program could cost as much as $84 million.

I will just say to the Senate, as a Senator from a wheat State, that I would be very surprised if this estimate does not turn out to be on the high side, rather than too low.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. METZENBAUM. Without yielding the floor, I yield to the Senator from North Dakota.

Mr. YOUNG. One thing that has not been mentioned here is the widespread drought in North Dakota, South Dakota, Wisconsin, and Colorado. Farmers in South Dakota, for example, are hauling hay from as far away as Canada, paying a huge price for the hay in addition to the cost of hauling it, just to keep a foundation herd.

As I said before, I doubt that many farmers in my State would take part in the program. The reason why I offered the amendment was that some of our farmers raise winter wheat and some spring wheat, so it is hard to put one class of farmers in and the other out. That was the reason for offering it.

Mr. METZENBAUM. Mr. President, let me say to the Senators from Western Plains States that I sympathize with those farmers who have been hard hit by the drought. I think it is a national responsibility to be concerned with that problem.

In 1974, when I was in this body, I proposed a world food reserve, because I thought that at that time wheat prices were rising at a tremendous rate. We were talking about exporting wheat, and we were concerned with the cost to American consumers.

The entire farm community rose up in opposition to any American food reserve, and were not particularly supportive of a world food reserve.

I think the problems of the farmers cannot be handled on a partisan, individualistic basis. I think they are national problems. I do not think we can have one solution in 1974 and another in 1977. I do not think we can have some rules that apply when there is an overage and the Government, intervening, provides a subsidy as provided in this bill, and then not have other kinds of Government intervention to protect the consumer when there is a shortage and wheat prices rise.

Mr. BELLMON. Mr. President, will the Senator yield on that point?

Mr. METZENBAUM. Not at this point. I will in a moment, when I finish my thought.

I can understand a concern at this moment concerning the drought, but I think it is high time we tried to put the pieces together with respect to the consumers of this country and the farmers of this Nation, and that we not just have a separate policy applicable only when a subsidy is needed, and then, when wheat prices are rising, the farmers say that the Government has no interest and the rest of the people of this country ought to keep their noses out of the farmers' business.

I want the farmers to be successful. I want them to be economically well off. I want them to continue, so that this Nation may be the most productive farm nation in all of the world. But I also want to be able to attempt to reach a balanced budget in this country. I also want to be concerned about the Federal tax dollar, and about what happens to the consumers of America.

I am afraid that this bill talks only about the problems of the farmers, concerns itself only with this specific situation arising by reason of the drought, and does not have that broad-based approach I think is so imperative if we are going to have a national farm policy to create a food reserve for all of the people of this country.

Mr. McGOVERN. Mr. President, I yield myself 5 minutes.

I think the Senator from Ohio has expressed a concern here that all of us share, but I do not think there are objections to this bill. I happen to favor the development of a food reserve policy, and I think it is in our interests that our agricultural programs be geared in such a way as to take into consideration the consumer interests.

This legislation does that. We are faced with a situation now, because of the drought in large parts of the country, where farmers are being forced to liquidate livestock herds and are being forced to liquidate dairy herds because of the lack of hay, the lack of feed, in many parts of the country.

I suppose no State has been hit any harder by the drought than my own, but it is not confined to South Dakota; it is, in large part, the Nation.

The consumer interest in this legislation comes at this point: If farm producers are forced to liquidate their herds, and they are being forced to do so on a large scale, we do not have to look very far down the road to the point where we are going to be confronted with shortages of meat and shortages of dairy products, and that will mean higher prices. We may get a temporary sag in prices while this liquidation process is going on, but sooner or later the consumer will pay the price of reduced numbers of beef cattle and reduced numbers of dairy herds. Inevitably sharp price increases will flow from those shortages.

One of the purposes of Senator BELLMON's legislation is to enable farmers in these areas where there are critical hay shortages to convert some of their wheat acreage to grazing purposes to sustain their herds. I submit to the Senator from Ohio and others who are concerned about the consumer interest that this legislation is a constructive step in protecting the long-range interest of the consumer. A stable supply of meat and dairy products will be accomplished, at least in a small way, by the passage of this legislation. It is not in any way special interest legislation, that benefits one group to the detriment of another.

It will help, in my opinon, both our farm producers and also the consumers.

Mr. METZENBAUM. Mr. President, will the Senator from South Dakota yield for a question?

Mr. McGOVERN. I yield.

Mr. METZENBAUM. Did we not have this same persuasive argument made, that it was in the interests of the consumer, with respect to the shortage of available hay for the cattle producers, when wheat prices were high and when the availability of hay was in short supply, just 2 or 3 years ago, when the market conditions were absolutely reversed from those which we have at the moment?

Mr. McGOVERN. I do not know that we did have the same argument. I think conditions were different at that time. I will say to the Senator I have no objection to his point that we need to think through the long term implications of the grain reserve. I am for that. I do not have any quarrel with him. I am simply making the point that we are faced with an emergency here in 1977 because of the drought which in some cases has persisted now for 2 or 3 years. This bill relates only to the 1977 crop. It does not pretend to be a long-term answer to some of the problems the Senator is raising here this morning.

I would join with him in efforts to try and develop a long-term reserve policy. It seems to me that is a somewhat different problem than we are faced with here today, which is the question of how we are going to sustain our livestock and dairy herds in an area where there is a critical shortage of hay. This is one way to meet that temporary situation.

Mr. METZENBAUM. Will not conversions to hay take place regardless of whether or not there is $1.50 subsidy by the Federal Government?

Mr. McGOVERN. They may take place in an area where farmers are already going bankrupt because of the squeeze which is on them as a consequence of the drought and as a consequence of an over supply of wheat. It was not the farm producers of this country who instigated the embargo on the shipment of wheat 2 years ago. That was done by an arbitrary executive action, but it had a devastating impact on the wheat producers of this country. It is another reason why the Senator's basic point is a good one, that we need to be looking down the road to the development of long-term guidelines, both in the development of a reserve policy and also in the development of guidelines on trade, so that our producers know what the market conditions are likely to be and can plan for the future.

Mr. METZENBAUM. I thank the distinguished Senator from South Dakota.

This colloquy and the questions I raise today are not raised because I believe they will defeat the legislation, because I

am well aware of the fact that the legislation will pass overwhelmingly. But these questions are raised because I have a genuine concern about development of a national farm policy which is just not a policy for the farmers of the country but which has more broader concerns. I hope in some way it might move us ahead more rapidly in developing a national food reserve, a national wheat reserve, and reserves, as well, in other areas. They are so much needed. I believe such a policy will help the farmers. There will be farm groups which will oppose that type of a program, but it is in our national interest. I hope our discussion today will move us forward along that line.

Mr. BELLMON. Mr. President, in response to the comment earlier by the Senator from Ohio, about the consumers needing protection, let me remind him that one reason we are in this crisis is that largely to protect consumers—and I think it was a misguided action because at that moment we did have adequate grain supplies—largely due to consumer pressures, the recent administration imposed an embargo limiting the export of grain in an attempt to lower food prices. At that time we had the largest wheat crop in history. All that resulted was that it caused the prices of grain to fall and put farmers in the financial situation where they are now getting far less than the cost of production for their grain.

Consumers are adequately protected in our present law because the administration can embargo the export of grain any time they feel the situation so demands. This is not a one-way bill. It is a result of a bad action which never should have been taken.

Also, Mr. President, I would like to suggest to the Senator from Ohio that we are in the process of trying to work out a farm program which will be comprehensive and which, at least in my judgment, will provide for adequate food reserves for the country. We are in the process of considering these suggestions. I feel the Senator has made a valuable contribution to our efforts this morning.

Mr. President, I yield back the remainder of my time.

Mr. McGOVERN. Mr. President, I yield back the remainder of the time on this side.

Mr. BARTLETT. Mr. President, I congratulate my distinguished colleague from Oklahoma, Senator BELLMON, for introducing S. 650 and bringing it to the floor of the Senate so early in the 95th Congress. This bill is extremely important for the hard-stricken agricultural area of this Nation.

The price of wheat and other grains continues to decline, and it is imperative that some relief be provided immediately. Senator BELLMON's bill, S. 650, provides authorization for farmers to select up to 40 percent of their allotted acres for conversion to pasture or hay production. The Secretary of Agriculture is authorized to pay $1 per bushel based on the established average yield of these lands.

This bill has a number of beneficial aspects. It provides additional cheap feed at a time when feed costs have drastically increased and are continuing to spiral upward. This is particularly beneficial to the "cow-calf man" who has been hardest hit.

Traditionally and rationally, the land that is taken out of production in this type of program is the least productive. This land is in the most need of being restored, and therefore, production would not be cut in a direct proportion to the total reduction in acreage.

The 1969 estimate of total pasture acreage is 890 million, which has decreased for a number of reasons, not the least of which has been the Federal Government's encouragement to plant "fence to fence."

Total hay production decreased by 11,853,000 tons between January 1, 1975, and January 1, 1976. This is at a time when hay is running at $3 per bale and $85 per ton in my own State of Oklahoma and higher in other areas. The need for the reduction in total acres and production is also apparent through the figures of wheat carryover. The carryover of wheat from the 1976 crop year ending June 1, was 664 million bushels. Another 2.1 billion bushels will be harvested in 1977 with an estimated carryover of 1.1 billion bushels. The estimates indicate that there will be a carryover of 2 billion bushels from the next harvest season.

Not only is this carryover affecting the price of wheat, but it is also affecting our grain storage capacity. As of January 1, 1976, the total "off farm" storage capacity was 6,103,000,000 bushels. This is an increase of only 174 million bushels, and even though a large number, it is obviously far below the estimated carryover of 1.1 billion bushels.

S. 650 obviously does not resolve the plight of American farmers, but it is a step in the right direction, and when coupled with the more comprehensive farm legislation to be forthcoming from the Agricultural Committee, should provide some of the much needed relief from drought and rising prices.

Again, I congratulate my colleague for his efforts on this legislation, and I encourage my fellow Senators to lend their support to this bill.

Mr. ROBERT C. BYRD. Mr. President, may we have a third reading?

The PRESIDING OFFICER (Mr. METZENBAUM). If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

RECESS UNTIL 11:55 A.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess for 20 minutes.

There being no objection, the Senate, at 11:35 a.m. recessed until 11:55 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. METZENBAUM).

SBA LOAN LIMITATIONS AND SURETY BOND AUTHORIZATIONS—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, at the request of Mr. NELSON, I submit a report of the committee of conference on H.R. 2647 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. METZENBAUM). The report will be stated by title.

The second assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2647) to amend the Small Business Act and the Small Business Investment Act of 1958 to increase loan limitations and to increase surety bond authorizations, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the proceedings of the House of Representatives on March 8, 1977.)

The conference report was considered and agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. GRIFFIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SPECIAL GRAZING AND HAY PROGRAM FOR WHEAT ACREAGE

The Senate continued with the consideration of the bill (S. 650) to provide temporary emergency assistance to wheat producers by permitting such producers to utilize a portion of their farm wheat acreage allotments for grazing purposes or for hay rather than for commercial production.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HASKELL). Without objection, it is so ordered.

The question is, Shall the bill pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Nevada (Mr. CANNON), and the Senator from Montana (Mr. METCALF) are necessarily absent.

I further announce that the Senator from West Virginia (Mr. RANDOLPH) is absent on official business.

I also announce that the Senator from Georgia (Mr. TALMADGE) is absent because of death in the family.

I further announce that if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

Mr. STEVENS. I announce that the Senator from Vermont (Mr. STAFFORD) is necessarily absent.

The result was announced—yeas 72, nays 22, as follows:

[Rollcall Vote No. 60 Leg.]

YEAS—72

Allen	Goldwater	Morgan
Anderson	Gravel	Moynihan
Baker	Hart	Muskie
Bartlett	Haskell	Nelson

Griffin	Packwood	

NOT VOTING—6

Abourezk	Metcalf	Stafford
Cannon	Randolph	Talmadge

So the bill (S. 650), as amended, was passed as follows:

S. 650

An act to provide temporary emergency assistance to wheat producers by permitting such producers to utilize a portion of their farm wheat acreage allotments for grazing purposes or for hay rather than for commercial production

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Agricultural Act of 1949, as amended, is amended by adding at the end of title I a new section as follows:

"SPECIAL GRAZING AND HAY PROGRAM FOR WHEAT ACREAGE

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall administer a special wheat acreage grazing and hay program for the 1977 crop. Under the special program, a producer shall be permitted to designate a portion of the wheat acreage allotment for the farm, not in excess of 40 per centum thereof, which shall be made available for use by the producer for grazing purposes or for hay production rather than for grain production. A producer who elects to participate in the special program shall be paid a payment as provided in paragraph (3) of this section.

"(2) Any producer who elects to participate in the special program shall designate the specific acreage on the farm which is to be used for the purposes prescribed in paragraph (1) of this section. No crop other than hay may be harvested from acreage included in the special program.

"(3) The Secretary shall pay any producer participating in the special program an amount determined by multiplying the projected yield for wheat established for the farm times the number of acres included in the special program times $1. The producer shall be ineligible for any other payments or price support on the portion of the wheat acreage allotment for the farm which the producer elects to include in the special program.

"(4) Acreage included in the special program shall be deemed to have been planted for harvest for the purposes of wheat acreage history.

"(5) The Secretary is authorized to issue such regulations as may be necessary to carry out effectively the provisions of this section.

"(6) The Secretary shall carry out the special program authorized by this section through the Commodity Credit Corporation. This section shall become effective October 1, 1977, and the provisions thereof shall be retroactive to cover payments for 1977 crop wheat.".

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I shall call up Senate Resolution 110.

Mr. FORD. Mr. President, could we have order?

The PRESIDING OFFICER. The Senate will be in order.

The Senator will proceed.

Mr. ROBERT C. BYRD. Mr. President, may I say that it is my intention to call up Senate Resolution 110 under the order previously entered. But it is also my intention that once it is before the Senate to recess until 1 p.m. so that the managers of the measure and other Senators may have an opportunity to get their lunch, meet constituents, and fill appointments that are already made. But at 1 p.m. the Senate will proceed to the consideration of that measure.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. With that understanding, I now call up Senate Resolution 110.

The PRESIDING OFFICER. The resolution will be stated.

The second assistant legislative clerk read as follows:

A resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the United States Senate; and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the resolution.

Mr. ROBERT C. BYRD. Mr. President, I think it is a good time to emphasize that, as the distinguished minority leader pointed out this morning, objections will be made to the meeting of committees except those committees which have standing authority from the Senate, of course, Appropriations and Budget, but objection will be made to permission for committees to meet at any time during a day when the Senate is considering the code of official conduct.

In view of the fact that the Senate will be on that code this afternoon, and is on it now, as a matter of fact, the committees, of course, cannot meet beyond this point today.

Mr. FORD and Mr. BAKER addressed the Chair.

Mr. ROBERT C. BYRD. I yield first to the minority leader.

Mr. BAKER. Mr. President, on a point of clarification, I thank the majority leader for making the statement he just did, and I might reiterate that I intend to object, after today, to the meeting of any committees during the time that the Senate is in session, and during the remainder of today. I did not object to the meeting of any committees prior to the consideration of this measure, but I wish to make clear that after today I shall object to committee meetings during the Senate session until after we dispose of the ethics resolution.

Mr. ROBERT C. BYRD. Of course, the Senator realizes that under the rules no objection can be made to committees meeting until the pending business is taken up, or some business has been transacted.

The PRESIDING OFFICER. The Chair might clarify that, that under the provisions of Senate Resolution 4 as agreed to, the first 2 hours of every day the committees may meet. The Parliamentarian informs the Chair that the first 2 hours of each day any committee may meet up to 2 p.m. I would refer the distinguished leaders to section 402(a) of Senate Resolution 4.

Mr. ROBERT C. BYRD. Mr. President, I had forgotten the Stevenson resolution provision. I was going by the old rules.

Mr. BAKER. Mr. President, I will revise my advice to the Members of the Senate, then, to say that I am going to do whatever I can to avoid having the attention of the Senate diverted from the ethics package under the present rules of the Senate, whatever they may be.

Mr. FORD. Mr. President, did the minority leader say this applies only to ethics, or from now on, period?

Mr. BAKER. It applies only during the consideration of the ethics measure. Beyond today there would be objection to the meeting of any committees not in conformity with the rules.

Mr. ROBERT C. BYRD. I do not believe the distinguished minority leader means, though, after the ethics matter has been disposed of.

Mr. BAKER. No, after the ethics measure has been disposed of I do not intend to object.

Mr. FORD. That was my question.

Mr. BAKER. During the time that the ethics measure is the pending business of the Senate, I intend to object to committee meetings insofar as I can under the Senate rules.

Mr. FORD. We already have a unanimous consent agreement under a previous motion for a Senate committee to meet tomorrow afternoon. Do I understand that is being revoked?

Mr. ROBERT C. BYRD. If there was an order entered some days ago——

Mr. FORD. It has been. It is in the RECORD this morning.

Mr. ROBERT C. BYRD. Then that order would prevail, unless and until it was vitiated. If there is such an order, it has not been vitiated up to now.

Mr. FORD. It was entered yesterday, for the Space Subcommittee of the Committee on Commerce. The request for that was made by the Senator from New Mexico.

Mr. BAKER. Mr. President, it must have been the day before yesterday. The Senate was not in session yesterday.

Mr. FORD. I beg the Senator's pardon, the day before yesterday.

Mr. ROBERT C. BYRD. Mr. President, I was not aware of that. It would obviously require unanimous consent to vitiate that order. If there is an order for the Space Subcommittee to meet tomorrow afternoon——

Mr. FORD. At 2 o'clock, yes.

Mr. ROBERT C. BYRD. I would not ask unanimous consent to vitiate that order.

Mr. FORD. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the recess I am about to request not count against the time on either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess until 1 p.m. today.

There being no objection, at 12:28 p.m. the Senate took a recess until 1 p.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. SARBANES).

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session for 2 minutes to consider a nomination that has been cleared on both sides of the aisle.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I withhold my request, and I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR— S. RES. 110

Mr. GRIFFIN. Mr. President, on behalf of the Senator from South Carolina (Mr. THURMOND), I ask unanimous consent that the following staff members be accorded the privileges of the floor during the debate and votes on Senate Resolution 110: John Napier, Eric Hultman, Jim Schoener, Jim Bennett, Tony Payton, and Larry Smith.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that Alan Holmer, of my staff, have the privilege of the floor during the debate on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HATHAWAY). The clerk will call the roll.

The assistant legislative clerk called the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum No. 13 Leg.]

Allen	Griffin	Ribicoff
Baker	Hansen	Sarbanes
Bartlett	Hathaway	Sasser
Bentsen	Helms	Schmitt
Byrd, Robert C.	Javits	Sparkman
Case	McClure	Stone
Chafee	Morgan	Thurmond
Chiles	Nelson	Williams
DeConcini	Packwood	
Garn	Pearson	

The PRESIDING OFFICER. A quorum is not present.

Mr. ROBERT C. BYRD. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. MELCHER), the Senator from Nevada (Mr. CANNON), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HART), and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

I further announce that the Senator from West Virginia (Mr. RANDOLPH) is absent on official business.

I also announce that the Senator from Georgia (Mr. TALMADGE) is absent because of death in family.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Vermont (Mr. STAFFORD), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

The result was announced—yeas 85, nays 2, as follows:

[Rollcall Vote No. 61 Leg.]

YEAS—85

Allen	Gravel	Morgan
Anderson	Griffin	Moynihan
Baker	Hansen	Muskie
Bartlett	Haskell	Nelson
Bayh	Hatch	Nunn
Bellmon	Hatfield	Packwood
Bentsen	Hathaway	Pearson
Biden	Hayakawa	Pell
Brooke	Heinz	Percy
Bumpers	Helms	Proxmire
Burdick	Humphrey	Ribicoff
Byrd, Harry F., Jr.	Inouye	Riegle
	Jackson	Roth
Byrd, Robert C.	Javits	Sarbanes
Chafee	Johnston	Sasser
Chiles	Kennedy	Schmitt
Church	Laxalt	Schweiker
Clark	Leahy	Scott
Cranston	Long	Sparkman
Culver	Lugar	Stennis
Curtis	Magnuson	Stevens
Danforth	Mathias	Stevenson
DeConcini	Matsunaga	Stone
Dole	McClellan	Thurmond
Durkin	McClure	Tower
Eagleton	McGovern	Williams
Ford	McIntyre	Young
Garn	Metcalf	Zorinsky
Glenn	Metzenbaum	

NAYS—2

Huddleston	Weicker

NOT VOTING—13

Abourezk	Goldwater	Stafford
Cannon	Hart	Talmadge
Case	Hollings	Wallop
Domenici	Melcher	
Eastland	Randolph	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is present.

The PRESIDING OFFICER. The Senate will be in order. The Senator from West Virginia is recognized.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session for not to exceed 3 minutes to take up a nomination, which has been reported today from the Committee on Foreign Relations, of Mr. Gale W. McGee, of Wyoming, to be the Permanent Representative of the United States of America to the Organization of American States, with the rank of Ambassador.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will state the nomination.

ORGANIZATION OF AMERICAN STATES

The assistant legislative clerk read the nomination of Gale W. McGee, of Wyoming, to be Permanent Representative of the United States of America to the Organization of American States, with the rank of Ambassador.

Mr. HANSEN. Mr. President, I will take just a few moments to express my high regard for the President's nominee

for this post. I think there are few people that I know of who are better qualified than is he to represent the United States.

I have known our former colleague for many years, since he first became a member of the faculty of the University of Wyoming. His field has been history. He is a highly accomplished speaker. I respect him as a person most knowledgeable in the field of foreign affairs, and I am certain that he will bring expertise and understanding as well as great ability to this post. I applaud the President for the nomination, and assure him of my complete support.

Mr. ROBERT C. BYRD. I thank the Senator from Wyoming.

Mr. McGOVERN. Mr. President, I am pleased and proud to support the confirmation of our former colleague Gale McGee as the U.S. Ambassador to the Organization of American States. The President could not have chosen more wisely.

Gale McGee has been a treasured friend of mine for many years. He and I have in many respects followed parallel paths in our careers. Both of us went through graduate school and earned doctoral degrees in history. Both of us were professors of history. Both of us have had a longtime interest in foreign relations.

Our country is fortunate to have a man of his intelligence and stature to represent us in this important post.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination .

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

VISIT TO THE SENATE BY MAJORITY LEADER OF THE PARLIAMENT OF LIECHTENSTEIN

Mr. PELL. Mr. President, I would just like to draw attention to the fact that we have with us in the Chamber the Majority Leader of the Parliament of Liechtenstein, a small country but a country with high values, a tradition of peace, a tradition of carrying its own burdens in the world, and a country from which we could all learn a great deal I just wanted to say he is in the back of the chamber so that Senators may meet him.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I yield myself such time as I may require from the time under my control on the resolution itself.

The PRESIDING OFFICER. The Senator is recognized.

Mr. ROBERT C. BYRD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin (Mr. NELSON) for a unanimous-consent request.

Mr. NELSON. Mr. President, I ask unanimous consent that during the consideration of Senate Resolution 110 and votes on amendments thereon and on the resolution itself, the following staff members, who worked with the committee in the preparation of this resolution, be accorded the privilege of the floor: Ira Shapiro, David Schaefer, Andy Loewi, Brian Conboy, Charles Warren, Mildred Lehmann, and Bob Harris.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Also Steve Gordon and Mann Cool.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield to the Senator from Colorado.

Mr. HASKELL. Mr. President, I ask unanimous consent that F. Engstrom of my staff have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield to the Senator from Connecticut.

Mr. WEICKER. I ask unanimous consent that Robert Tobin, Mike Scully, and Claudia Ingram of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I ask unanimous consent that Tony Peyton of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield to the Senator from Utah.

Mr. McCLURE. Mr. President, I ask unanimous consent that Mr. Jim Streeter of my staff be given the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I ask unanimous consent that Caroline Randel and/or Perry Pendley of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I make the same request for Dick Friedman of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. I make the same request for Dick Rosen of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the Senate finds itself today embarking on a debate which will focus public attention on how this body perceives the obligations and responsibilities that are placed upon U.S. Senators. I believe that the Senate will pass a strong and enforceable code of ethics. But it must also be viewed as such by the American people.

In the report of the Commission on Executive, Legislative, and Judicial Salaries, the Peterson Commission, in its recommendation for a code of public conduct, states it this way, in part:

> We believe it an exercise in political futility (a judgment Congress has confirmed more than once) to propose any significant increase in executive, legislative, and judicial salaries unless you are satisfied that the leaders of the other branches of government will join you in a commitment to major reform. (Speaking for ourselves, we would not have proposed significant salary increases except in the context of such reform.) Such a reform must be sufficiently tangible to persuade a substantial majority of Americans that the post-Watergate era has truly begun. Such a majority is by no means persuaded now.

Mr. President, as all Senators know, I strongly supported the recommendations that were submitted by President Ford and supported by President Carter, which were based on the Peterson Commission's report with respect to an increase in salaries for certain high level, policymaking people in the executive branch, members of the judiciary, and members of the legislative branch. In doing so, I said that whether or not the salary increase went into effect, the Senate was committed, in my judgment, to enact a Code of Official Conduct.

The salary increase went into effect. I know that a good many Members have taken considerable heat, and are still getting the heat, from that salary increase, which, as I say, did not apply just to Members of Congress, but also applies to 2,496 high-level policymaking people in the executive branch, 20,300-plus other employees in the executive branch whose salaries are tied, at least indirectly, to the salaries of Members of Congress, and it went to Federal judges, who, by the way, pay nothing into a retirement fund, but who, when they retire, retire at full salary.

I strongly supported that salary increase, for reasons which I stated at that time. Since that salary increase went into effect, I have offered a resolution, which was cosponsored by the distinguished minority leader, Mr. BAKER, the distinguished Senator from Connecticut (Mr. RIBICOFF), the distinguished majority whip Mr. CRANSTON, Mr. RANDOLPH, and other Senators, which provided that the comparability pay increase scheduled for October of this year would not go into effect for any of the persons in the three co-equal and coordinate branches of the Government who had received the February 20 salary increase.

We stated at that time that we did not look beyond this year, but it was only

the October 1977 comparability pay increase which should be denied to those persons who had received the February 20 increase.

Mr. President, having taken a strong position of support for the salary increase—and, by the way, I have a feeling that the great majority of the people of this country do not yet fully realize that that salary increase went to anyone other than to Members of Congress, at least based on my mail—I feel it my duty to strongly support a code of official conduct.

The distinguished minority leader and I introduced a resolution setting up the Special Committee on Official Conduct. Mr. NELSON was named chairman of that committee. That committee has worked many, many hours; many days; many evenings; late into the nights, and on weekends to develop a Code of Ethics under the mandate that that committee report such a code.

The committee did not utilize any funds for the employment of additional personnel. Committee members used their own staff people and staff members from committees. They were able, of course, to take advantage of some of the facts and figures that had been developed by the Obey commission and which have been very helpful to the Nelson committee.

They have brought back a code. While it is not perfect, while it will be subject to, change—undoubtedly, there will be changes proposed, some of which perhaps will be approved—on the whole, I believe the committee has performed an exemplary piece of work and it is entitled to the thanks of the Senate and of the American people. I congratulate the committee.

I supported the salary increases, as I say, and I support this Code of Conduct. Perhaps there are modifications that will improve the Code of Conduct to make it more workable, to make it a better code, and I may support some of them.

I call attention in this instance to an advertisement which appeared in the Wall Street Journal of Wednesday, February 16, 1977—sponsored by the Citizen's Committee for Restoring Public Trust in Government—addressed as follows:

To the Congress & the American People—

President Carter, former President Ford, and Chief Justice Burger agree:

Only if a strict "Code of Public Conduct is enacted should the salaries of senior government officials be increased.

I ask unanimous consent that this advertisement in its entirety be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ROBERT C. BYRD. To take one extract from the advertisement, "The response of congressional leaders has been prompt and strong."

Senate Majority Leader Robert C. Byrd said the pay raise would be justified if put into effect with a requirement for complete financial disclosure by members of Congress and clear and substantial limitations on outside earned income.

Speaker Thomas P. O'Neill Jr. prodded a House commission to "go all the way," in writing a tighter code of ethics, and urged the commission to make its recommendations for reform by February 8th. (N.Y. Times). That Commission has now made its recommendations.

President Carter put a code of ethics into effect for the Executive Branch even before he took office. And Chief Justice Burger showed leadership earlier by instituting judicial reforms.

Mr. President, what I am saying is that in my judgment, the Senate is committed to enact a code of ethics. The House of Representatives has enacted a code of ethics. Attention has been called to the fact that the President has implemented a code of ethics for the people in his top Cabinet positions. I feel that the American people expect the Senate now to follow suit with a strong code of conduct.

The question in my judgment is not whether or not we should have a code of official conduct, but what form it should take. The Nelson committee substitute amendment to Senate Resolution 110 is a reflection of careful consideration of that form. Unfortunately, in my judgment, and in the judgment of the committee, time has come and gone when total public disclosure would be enough. I know that many Senators feel that public disclosure is a sufficient deterrent to potential abuse and that that concept is as far as we need to go.

Does my friend wish me to yield?

Mr. BAKER. After the majority leader has finished, Mr. President. As I previously indicated, I would withhold my statement until later. But after the majority leader has concluded, I would like to speak briefly.

Mr. ROBERT C. BYRD. Very well.

I believe, Mr. President, we are deluding ourselves as to public confidence in this body if we accept the proposition that public disclosure is a sufficient deterrent to potential abuse and that that is as far as this committee and this Senate should go.

Senate Resolution 110 requires public disclosure. But, as I say, I do not think financial disclosure is enough. There are serious areas of possible abuse that should and must be considered by Senate rules. There are areas in which the Senate has been criticized by the media and by the public many times in the past.

Without going into further detail as to what the committee resolution and the Nelson substiute provides, however, I would like to go quickly to one particular area of the Code of Conduct. I will limit my further remarks to that area at this point.

The new proposed rule 44 limits the outside earned income of Senators to 15 percent of their salary—roughly $8,625 a year. I recognize that restrictions on honoraria, both as to the total allowable under the rule and the individual restriction of $1,000 per appearance, are controversial. Nevertheless, I believe that honoraria pose a particular problem that justifies a tight limitation.

In this regard, quoting again from the advertisement which appeared in the Wall Street Journal to which I have earlier alluded, I quote one paragraph titled, "The Code of Public Conduct."

Rigorous restrictions on outside earned income. (Pay full-time public officials enough to meet their normal obligations without the need for outside earned income and eliminate or rigorously restrict honoraria, legal fees, gifts, proceeds of testimonial dinners and so on for personal use.)

Mr. President, I doubt that there is any single abuse of the public trust that has received more attention in the media and more criticism from the public than the earning of large sums of money by elected officials for making public speeches. The appearance of conflict of interest in many of these cases is one that cannot be avoided. It is true that some forums for such speeches, such as educational institutions, may raise no apparent conflict of interest. However, the greater danger lies in those cases where various business interests, unions, or other pressure groups and special interest groups affected by legislation pay extremely large sums of money for a short speech by a Senator to their group.

Even if there is no hint of impropriety surrounding the honorarium between the Senator and the group, it is obvious that the public reception of such action is that the group is attempting to influence that Senator's vote in areas of interest to the group.

I personally would prefer an outright ban on honoraria. I argued for a higher salary than $57,500 in my discussions with the Peterson Commission and with others who were working with the Commission and that all outside earned income then be eliminated. The House has placed a limitation of 15 percent on outside earned income. That is a level that appears to be generally acceptable at this time outside the Senate, and the Nelson committee has recommended a 15-percent limitation. I support that figure.

I recognize that some Senators have been able to make an extensive number of speeches in Washington and throughout the country without missing many Senate votes, but that is not always the case. A Senator must go to where the group wants him to speak, and that is, oftentimes, not in Washington, D.C. Even if large numbers of votes have not been missed by the Senators who do extensive speaking, the Senate schedule has, from time to time, had to be readjusted to try to accommodate them. We are all familiar with votes that have been delayed to a certain time, upon occasion, because of the efforts of the leadership to facilitate such schedules.

Unfortunately, the honoraria circuit presents the image to the American people that a Senator is not a full-time public servant. We all know that this has long since become a full-time job, whether we are working in Washington or in our respective States. The public expects no less.

It is said that this type of speechmaking by Senators contributes to the public dialog in areas of national im-

portance. Obviously, a Senator's speech can be an important part of such an interplay of ideas in our Government. Therefore, the 15-percent limitation on outside earned income is a compromise on the part of the committee to try to recognize that there is merit in some of the arguments of the opponents to restrictions in this area.

I believe that the committee's recommendation of a 15-percent limitation is the absolute ceiling on what should be allowed in the form of outside earned income. Any lifting of that ceiling will cause serious doubts in the public perception as to the intent of the Members of this body to be full-time Senators and public servants.

The present situation which allows Senators to earn up to $25,000 a year in honoraria is intolerably high, and contributes to doubts in the minds of the public as to why individual groups give so much money to a Senator for his speeches when he is being paid by his constituency to represent their best interests in the Senate.

I call attention to the fact that, when tied to the pay raise which has recently gone into effect, the addition of the 15 percent with respect to outside earned income would raise a Senator's salary to $66,125 a year. This would place a Senator in the top 1 percent among Americans in earning. So, if the Senate were to eliminate this 15-percent limitation, Mr. President, what the Senate will be saying in effect, is that we want to have our cake and eat it, too. I think the Senate will be, in effect, proclaiming to the public that not even $66,125 is enough; we want more; we want more.

Mr. President, when large fees are paid to Senators for short speeches before pressure groups—and I have received such honoraria in the past—we must ask ourselves whether, as private citizens, we would have been able to command such a fee for an equivalent amount of time and effort. I am under no illusions. I do not think any group of citizens would pay me $1,000 or $2,000 to play that fiddle of mine for 5, 10, or 15 minutes if I were still a meatcutter or a welder in a shipyard, or if I were practicing law. It is because I am a U.S. Senator that I get those invitations, and I feel that the same must undoubtedly apply to the invitations that are extended to others in the legislative branch. I do not think that, otherwise, we would be able to command that kind of fee for an equivalent amount of time and effort. So I repeat, I believe that the 15-percent limitation is the absolute ceiling which should be allowed for outside earned income.

I am also aware that there are those who believe that if we are to put a 15-percent limitation on outside earned income, we should have a similar limitation on outside unearned income. I submit, Mr. President, that by the very definition of the terms, the problems we are attempting to deal with in this Code of Official Conduct are caused by "earned" income, not "unearned." Webster's Third New International Dictionary defines "earned income" as "income that results from the personal labor or service of an individual," while Webster defines "unearned income" as "income * * * that is not derived from personal labor or service, but usually merely from ownership of property * * *"

So, the point is that by definition, "earned" income requires personal service to produce it, while "unearned" income does not. The potential for conflict of interest is much greater where a Senator must perform personal services for the income rather than where his role is one of being a passive recipient of dividends or income from personal holdings. There is little potential for abuse of public office from a wealthy man who is elected and who receives unearned income from his previous holdings; the potential abuse we are trying to avoid is the situation where a Senator could attempt to become a wealthy man by the use of his official position. While some Members may have accumulated large investments since attaining high office, most of them, if they have accumulated large investments, did so before.

Also, while some Members may spend a little time managing their investments, most of them do not, but earned outside income takes time away from the public business in all too many instances.

I urge my colleagues to consider carefully our actions on this resolution and, in particular, our action on the restrictions on outside earned income. Our actions, in a large measure, will determine the future public perception of the integrity of our institution and our commitment as individual Senators in recognizing areas of abuse that have existed in the past, which constitutionally, we ought to police ourselves. This resolution and the limitations which it places upon us as individuals is not an easy remedy for the wounds that we have suffered in the past, but I believe that we have no choice but to pass a code of official conduct which will be a matter of pride in the future to those of us who participated in its adoption and to those who will serve here in the future who will benefit from the renewed public confidence in the U.S. Senate. It is not our duty to find ways to equalize the income of Senators.

Ours is a higher duty. We have a duty to the institution, rather than to ourselves.

We have received the benefit of the salary increase—to every penny of which I say Members of this body were entitled. I took that position and I shall continue to take that position.

I must confess that I feel a little resentment when I read hatchet job headlines which refer to a "billion-dollar Congress," or to "the same old gang," which were two characterizations of Congress I recently noted in a well-known periodical.

My examination of those and similar articles has led me to conclude that they do not present an accurate reflection of the facts.

But the time has come now; we have gotten our salary increase. I shall continue to defend it in any forum because I believe in my heart that it was right.

But we cannot have our cake and eat it, too.

Mr. President, I believe that every Member of this body will put the Senate first as we reach our decisions from day to day in connection with this proposed code of ethics. It is not we who are to be considered in the last analysis; it is the institution, the U.S. Senate, a body to which Aaron Burr referred as "a sanctuary, a citadel of law, of order and of liberty." A body to which Gladstone referred as "that remarkable body, the most remarkable of all the inventions of modern politics."

Mr. President, let us consider the Senate—not ourselves—as we deliberate from day to day, and may we govern our decisions accordingly. I urge the Senate to support the committee's recommendation placing a limitation of 15 percent on outside earned income.

I thank the Members for their patience, and their kindness in listening.

I wish to call attention at this time to a telephone call from the Senator from Nevada (Mr. CANNON) who has asked me to state for the record that he is very interested in Senate Resolution 110, the Code of Official Conduct of the Senate. He is very pleased the special committee has adopted some of his specific recommendations. He deeply regrets his inability to participate in the Senate's deliberation of Senate Resolution 110, but is absent due to the death of his mother.

EXHIBIT 1

[From the Wall Street Journal, Feb. 16, 1977]

TO THE CONGRESS AND THE AMERICAN PEOPLE—PRESIDENT CARTER, FORMER PRESIDENT FORD AND CHIEF JUSTICE BURGER AGREE: ONLY IF A STRICT "CODE OF PUBLIC CONDUCT" IS ENACTED SHOULD THE SALARIES OF SENIOR GOVERNMENT OFFICIALS BE INCREASED

On January 17th, just a few days before he turned the reins over to President-Elect Carter, President Ford sent a message to Congress containing an unusual "Siamese Twin" pair of recommendations:

On the one hand, President Ford recommended an increase in salaries for the Federal judiciary, Congress and senior officials in the Executive Branch. (Such an increase had been recommended unanimously by a special statutory Commission as being long overdue.)

"At the same time," President Ford told Congress, "I am also strong endorsing the recommendation of the Commission that new and strengthened codes of conduct be adopted by each branch. Like the Commission, I would not recommend the salary increases if there is not a firm commitment to a new code of conduct.

"I have personally discussed this matter with President-Elect Carter and he authorized me to say that he fully supports my recommendations concerning salary levels and the need for stronger codes of conduct for all three branches as recommended by the Commission. Thus, the Executive Branch has made the commitment to the improved code of conduct. I have also spoken to the Chief Justice of the United States and he too supports the recommendations of the Commission and is committed to the code of conduct principles in the report.

"If the Congress commits itself to adoption of the proposed code of conduct reforms, then I believe the Congress should permit their salary increases to take effect. This will not only restore public confidence in national leaders, but it will permit the country to be able to attract the most qualified citizens to these important posts."

THE CODE OF PUBLIC CONDUCT

Rigorous restrictions on outside earned income. (Pay full-time public officials enough to meet their normal obligations without the need for outside earned income and eliminate or rigorously restrict honoraria, legal fees, gifts, proceeds of testimonial dinners and so on for personal use.)

Create tight and sensible conflict of interest provisions on investments that would eliminate or minimize both real and apparent conflicts.

Provide for public disclosure of financial affairs.

Impose consistent and explicit restrictions throughout government on post-government-service employment.

Establish appropriate expense allowances and make them accountable.

Establish vigorous, consistent and publicly reported auditing of this Code and appropriate oversight bodies which would include public members.

THE RESPONSE OF CONGRESSIONAL LEADERS HAS BEEN PROMPT & STRONG

Senate Majority Leader Robert C. Byrd said the pay raise would be justified if put into effect with a requirement for complete financial disclosure by members of Congress and clear and substantial limitations on outside earned income.

Speaker Thomas P. O'Neill Jr. prodded a House commission to "go all the way" in writing a tighter code of ethics, and urged the commission to make its recommendations for reform by February 8th. (N.Y. Times). That Commission has now made its recommendations.

President Carter put a code of ethics into effect for the Executive Branch even before he took office. And Chief Justice Burger showed leadership earlier by instituting judicial reforms.

WHO ARE WE?

This advertisement is the third in a series sponsored by a group of private citizens who would like to see a fresh start made in restoring public trust in government.

(As you run your eyes over the list of signers, you will notice that this is an unusually varied group; we think it is representative of the diverse points of view that have joined together in this effort.)

In our first message, several weeks ago, we pointed out that the Federal government was afflicted with a hidden crisis; that senior executives—particularly in the fields of health, science and the judiciary—were prematurely leaving government service en masse because their salaries had been frozen for nearly eight years, except for a 5% adjustment enacted in 1975; that key positions remained vacant because high-caliber executives could not be recruited and retained; that public officials were regarded with widespread cynicism in America today, and consequently that there is a reluctance to reward them with increased compensation.

We said, "Here then is a profound crisis made up of four interlocking parts: The government has a desperate need for outstanding executives; it will not get and keep them unless the salary freeze is unfrozen; Congress does not dare to take such action until the public is in a more receptive mood, and this will not happen until the people's trust in government is restored."

NOW IT IS UP TO THE CONGRESS

According to law, the salary recommendations will go into effect on February 20th if neither the Senate nor the House disapproves.

However, while the salary increases require no action on Congress' part to become effective, the Code of Public Conduct requires initiative and energetic support if it is to become law—especially if it is to be enacted in undiluted form.

A realistic target for such enactments is by March of this year. Any delay, any attempt to water down the provisions of the code—while allowing the pay increases to take effect—would shatter all hopes among the people for a fresh start in Washington, and leave them more cynical than ever.

If you agree with us, if you feel that a strict Code of Public Conduct must accompany the pay raises, then please write to your Congressman and your Senators and let them know what you expect of them.

NEWSPAPER COMMENTS

"The Commission's logic is impeccable . . . The strategy as well as the logic is just right. It is now up to the Congress and the Executive Branch, acting in concert, to work out the details."

—*The Washington Post.*

". . . There could be no more propitious time for reform. Initiation of such an action would be a fitting farewell gesture by the Ford Administration and support for it would seem to be natural for Jimmy Carter."

—*The New York Times.*

". . . The proposal deserves Presidential and Congressional support, but only if the new Code of Conduct is approved along with the higher salaries. What the Commission is proposing—and this makes sense—is a carrot-and-stick approach . . . The main problem in all of this is to make sure that Congress doesn't simply take the money and run, leaving the proposed Code of Conduct to quietly wither on the vine."

—*The Cincinnati Post and Times-Star.*

". . . We think the recommendations should be followed . . . In implementing the new salaries, the reform must not be forgotten."

—*Los Angeles Times.*

"Higher federal pay, yes, but higher ethics, too . . ."

—*Philadelphia Inquirer.*

". . . The Commission's case for a Code of Conduct as an indispensable prelude to a popular aceptance of a general pay increase is convincing."

—*Washington Star.*

". . . We particularly like the idea of combining raises with ethics . . . The public should let the lawmakers know it doesn't want one without the other."

—*Omaha World Herald.*

Walter B. Wriston, Chairman, Citicorp/Citibank.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator from Tennessee.

Mr. BAKER. Mr. President, it has been only a few weeks since the distinguished majority leader and I announced on the floor of the Senate that we would support the proposal of the pay commission for an increase in salary for Members of Congress and others.

At that time, Mr. President, we assured the Senate that two things would occur.

First, that the matter would be addressed by the Senate and that there would be a vote—and there was, indeed, a vote. It was voted on a motion to table the resolution of disapproval of the recommendation of the pay increase, and the first of those two commitments was redeemed.

The second commitment that was made on the same day was that regardless of the outcome of the debate on the increase in salary for Federal officials, including Members of Congress, in the House and the Senate, that the Senate would turn its attention, if we were able to contrive it, to the matter of considering and hopefully adopting a code of conduct, a code of ethics. That matter is now the pending business under a previous unanimous-consent order that provides a generous 50 hours of debate, as well as additional time for amendments, and amendments in the second degree, and other procedural devices.

So the Senate is now considering the second of those two commitments that were made by my distinguished colleague from West Virginia, the majority leader—to consider a code of ethics.

Mr. President, I commend the members of the special ad hoc committee that were appointed from the majority and minority in order to consider this undertaking: to recommend to Congress and to the Senate a new Code of Ethics. I commend them for a diligent job well done, with careful attention to competing, different points of view, and with an effort to reconcile, where it was possible to reconcile, different opinions and conflicts.

I pay respect as well to the distinguished members of the Standing Committee on Ethics, particularly to the Senator from Illinois (Mr. STEVENSON), who is the chairman of that committee, and the Senator from New Mexico (Mr. SCHMITT), who is the ranking Republican on that committee, for their contribution to this formula of suggestions and ideas.

Having done that, Mr. President, I think I owe it to our colleague to say now on this occasion that I intend to support a code of conduct and a code of ethics for the Senate.

I intend to reserve my judgment, as I am sure most, if not all, of our colleagues will reserve judgment, on the exact terms of that code. But I intend to support a strong code of conduct.

It is my view that the ad hoc committee, as supplemented and augmented by the suggestions of the Ethics Committee, has done a good job.

I think, by and large, their suggestions are good and appropriate to these times, and most of them I can support. Some of them I will disagree with, and I reserve my right in that respect, as does everyone else.

I intend to support, for instance, the proposal for a limitation on outside earned income. Clearly, it is arbitrary. Clearly, it works injustice in some cases. But I intend to support it, not because I think it is the best solution, but because I think it is the best solution at this moment. There will be others debated and I will abide by the final determination of the Senate, of course, in each regard; and will in no way discourage any Member

from expressing his agreement or disagreement on any of the provisions of the code or any of the amendments that may be submitted.

Having said these things, Mr. President, I would conclude with only one general further observation.

Notwithstanding my professed support for this measure; notwithstanding my praise for the members of the ad hoc and ethics committees who worked diligently on this measure; and notwithstanding my belief that the tenor of the times requires that we adopt a code of ethics, I still think we are headed in the wrong direction. I think we are headed right straight in the direction of a corps of professional legislators who are virtually totally dependent on the salary and expenses that we may be allowed from the Federal Treasury.

Add to that the prospect that we may some day have our campaigns financed from the Federal Treasury, as well, and then we very well may have both feet in the Treasury trough.

Mr. President, I think that is the wrong direction. I think we ought to give careful attention to returning to the concept of citizen legislators.

It would be my preference, for example, to see Congress meet for 3 months or 6 months or even 9 months, if need be, but for a briefer period of time, and to return to our districts and to involve ourselves in the mainstream of our communities' activities.

I would like to see us do that and have a decrease in salary. I would like to see us have an opportunity to participate fully in the public and private affairs of our Nation and have a less generous salary than we now have.

I would like to see those things, Mr. President; but, in all candor and honesty, I cannot say that I expect to see these things happen in the next year or so. I do not expect to see them happen as the result of the debate that is about to ensue here.

If those fundamental changes in the nature and the personality of the legislative initiative are to take place, if there is to be a change in that, it is going to take a great deal more effort, a great deal more debate, a great deal more attention, a great deal more exposure, and a great deal more commentary from the press before we can come to that decision.

In the meantime, I think we should go ahead with this code of conduct or something similar to it.

So, Mr. President, I intend to support the code generally. I intend, however, to do one other thing. At some point appropriate to these proceedings, I intend to offer a sunset provision. I intend to provide an amendment that will cause this whole code to self-destruct in 2 or 3 years, so that we can attempt to require that Congress, once again, focus its attention on the general personality and legislative responsibility of Congress, rather than continuing our drift in the wrong direction.

ADDITIONAL STATEMENT SUBMITTED ON SENATE RESOLUTION 110

Mr. CASE. Mr. President, the Senate today begins consideration of a code of official conduct which, if adopted, can do much to restore public confidence in our Government.

We must not falter at this juncture. The canons of conduct which our special committee has developed have received high marks, generally. We must make them our rules and do so with dispatch and as little dilution as is possible in a deliberative body.

My view is that we cannot err in requiring full financial disclosure by our Members, officers, and top staff people. And certainly, the proposed code, founded on requirements for full public disclosure of financial matters, is launched in a commendable direction.

For many years, in fact since about 1958, I have advocated that we deal with the issue of conflict of interest by making public disclosure of financial matters and let the voters—the public which is our ultimate employer—make the decision as to our fitness to hold the public trust.

I would not limit financial disclosure to Members of our Chamber and the House, but would require it of all top employees in the executive branch, including the President and Vice President and all members of the Federal judiciary, including Supreme Court Justices. Once our own code of official conduct is in place, I hope we will proceed to enact legislation to impose similar restrictions on the other branches.

When I appeared before the special committee, I urged that the problem of unofficial office accounts be reviewed and I am pleased that new rule XLVI prohibits the use of privately subsidized office accounts.

It is certain that there have been a number of abuses arising from the use of these unofficial funds. And at this time it is proper that we take steps to stop the abuses and insure that every Senator—regardless of his wealth or lack of it or that of his friends—be equally well equipped to discharge his duties as a Senator.

One other point which I would like to make relates to the enforcement of the official rules. It is necessary to provide a means for enforcement or our other actions in strengthening our rules are hollow and meaningless. It would be wrong to come as far as we have in drawing up a code of official conduct and leave out the essential ingredient of enforcement.

Mr. ROBERT C. BYRD. Mr. President, for the remainder of the day, I yield such time on the resolution itself as I control to the distinguished Senator from Wisconsin (Mr. NELSON).

Mr. BAKER. Mr. President, in a similar vein, I yield control of my time temporarily, under the standing order, to the distinguished senior Senator from South Carolina.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

AMENDMENT NO. 65

Mr. NELSON. Mr. President, before making an opening statement on the resolution, I call up an amendment in the nature of a substitute, amendment No. 65.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON), for himself and others, proposes an amendment in the nature of a substitute, numbered 65.

The amendment in the nature of a substitute is as follows:

On page 1, strike all after *"Resolved"* and insert in lieu thereof the following:

That this resolution may be cited as the "Official Conduct Amendments of 1977".

TITLE I—CODE OF OFFICIAL CONDUCT

SEC. 101. The Standing Rules of the Senate are amended—

(1) by striking out rules XLI, XLII, XLIII, and XLIV; and

(2) by renumbering rule XLV as rule XLI, and by adding after such rule the following new rules which shall be known as the "Senate Code of Official Conduct":

"RULE XLII

"PUBLIC FINANCIAL DISCLOSURE

"1. (a)(1) Each individual who for a period in excess of ninety days during a calendar year is a Senator, or an officer or employee of the Senate who is compensated at a rate in excess of $25,000 a year, shall file a report containing a full and complete financial statement for that calendar year.

"(2) Each employee designated under rule XLIX to handle campaign funds during any calendar year shall file a full and complete financial disclosure statement for that calendar year.

"(b) Each individual described in subparagraph (a) who during any calendar year ceases to occupy an office or position described in such subparagraph shall file a report containing a full and complete financial statement for that portion of such year beginning on January 1 and ending on the date on which he ceases to occupy such office or position.

"(c) Any individual who seeks nomination for election, or election, to the office of United States Senator shall file in any year in which such individual has—

"(1) taken the action necessary under the law of a State to qualify for nomination for election, or election, or

"(2) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election, or election, to such office,

a report containing a full and complete financial statement for the preceding calendar year.

"(d) The Secretary of the Senate shall submit annually to the Select Committee on Ethics (hereinafter referred to as the "Select Committee") a complete list of Members, officers, and employees of the Senate who are required to file a report under this paragraph and shall submit at the close of each calendar quarter a list of individuals required to file such report who have begun or terminated employment with the Senate or been designated pursuant to rule XLIX.

"2. Each individual shall include in each report for each calendar year for which he is required to file a report under paragraph 1 a full and complete statement, in such manner and form as the Select Committee shall prescribe, which contains the following:

"(a)(1) the amount and the identity of each source of earned income (exclusive of honoraria) received during such calendar year which exceeds $100 in amount or value:

"(2) the identity of the source, the amount, and the date, of each honorarium received during such calendar year and an indication of which honoraria, if any, were donated to a charitable organization pursuant to paragraph 2(c) of rule XLIV; and

"(3) the identity of each source of income

(other than earned income) received during such calendar year which exceeds $100 in amount or value, and an indication of which the following categories the amount of value of such item of income is within:

"(A) not more than $1,000,

"(B) greater than $1,000 but not more than $2,500,

"(C) greater than $2,500 but not more than $5,000,

"(D) greater than $5,000 but not more than $15,000,

"(E) greater than $15,000 but not more than $50,000,

"(F) greater than $50,000 but not more than $100,000, or

"(G) greater than $100,000.

"(4) For purposes of clauses (1) and (3), any gift described in subparagraphs (b) and (c) of this paragraph shall not be considered as income.

"(b) The identity of the source, a brief description of, and the value of any gifts of transportation, lodging, food, or entertainment aggregating $250 or more provided by any one source other than a relative during the calendar year except that any food, lodging, or entertainment received as part of the personal hospitality of any individual need not be reported.

"(c) The identity of the source, a brief description of, and the value of all other gifts aggregating $100 or more from any one source other than a relative during the calendar year.

"(d) Gifts with a fair market value less than $35 need not be aggregated for the purposes of subparagraphs (b) and (c) of this paragraph.

"(e) (1) The identity and category of value of each item of real property held, directly or indirectly, during such calendar year which has a fair market value in excess of $1,000 as of the close of such calendar year; and

"(2) the identity and category of value of each item of personal property held, directly or indirectly, during such calendar year in a trade or business or for investment or the production of income which has a fair market value in excess of $1,000 as of the close of such calendar year.

"(f) The identity and category of value of each personal liability owed, directly or indirectly, which exceeds $2,500 at any time during such calendar year.

"(g) The identity, date, and category of value of any transaction, directly or indirectly, in securities or commodities futures during such calendar year exceeding $1,000, except that (1) any gift to any tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code of 1954 involving such a transaction need not be reported, and (2) any transaction solely by and between the reporting individual, his spouse, and dependents need not be reported.

"(h) (1) The identity, date, and category of value of any purchase, sale, or exchange, directly or indirectly, of any interest in real property during such calendar year if the value of the property involved in such purchase, sale, or exchange exceeds $1,000 as of the date of such purchase, sale, or exchange.

"(2) For the purposes of subparagraph (e)(1) of this paragraph and clause (1) of this subparagraph the identity of an item of real property shall include the number of acres of property (if there is more than one acre), the exact street address (except with respect to a personal residence of a reporting individual), the town, county, and State in which the property is located, and if there are substantial improvements on the land, a brief description of the improvements (such as "office building").

"(i) Any patent right or any interest in any patent right, and the nature of such patent right, held during such calendar year.

"(j) The identity of all positions held as an officer, director, trustee, partner, adviser, proprietor, agent, employee, or consultant of any corporation, company, firm, partnership, or other business enterprise, any nonprofit organization, and any educational or other institution.

"(k) A description of, the parties to, and the terms of any contract, promise, or other agreement between such individual and any person with respect to his employment after such individual ceases to occupy an office or position described in paragraph 1, including any agreement under which such individual is taking a leave of absence from an office or position outside of the United States Government in order to occupy an office or position described in paragraph 1, and a description of and the parties to any agreement providing for continuation of payments or benefits from a prior employer other than the United States Government.

An officer or employee of the Senate required to file a report under paragraph 1 shall include in such report the identity of any person, other than the United States Government, who paid such individual compensation in excess of $5,000 in any of the two calendar years prior to such calendar year and the nature and term of the services such individual performed for such person. The preceding sentence shall not require any individual to include in such report any information which is considered confidential as a result of a privileged relationship, established by law, between such individual and any person nor shall it require an individual to report any information with respect to any person for whom services were provided by any firm or association of which such individual was a member, partner, or employee unless such individual was directly involved in the provision of such services.

"3. (a) For purposes of subparagraphs (e) through (h) of paragraph 2, an individual need not specify the actual amount or value of each item required to be reported under such subparagraphs, but such individual shall indicate which of the following categories such amount or value is within:

"(1) not more than $5,000,

"(2) greater than $5,000 but not more than $15,000,

"(3) greater than $15,000 but not more than $50,000,

"(4) greater than $50,000 but not more than $100,000,

"(5) greater than $100,000 but not more than $250,000,

"(6) greater than $250,000 but not more than $500,000,

"(7) greater than $500,000 but not more than $1,000,000,

"(8) greater than $1,000,000 but not more than $2,000,000,

"(9) greater than $2,000,000 but not more than $5,000,000, or

"(10) greater than $5,000,000.

"(b) For the purposes of subparagraph (e) of paragraph 2, if the current value of an interest in real property (or an interest in a real estate partnership) is not ascertainable without an appraisal, an individual may list the purchase price of the interest in the real property at the time of purchase and the date of purchase instead of specifying a category of value pursuant to subparagraph (a) of this paragraph. If the current value of any other item required to be reported under subparagraph (e) of paragraph 2 is not ascertainable without an appraisal, such individual may list the book value of a corporation whose stock is not publicly traded, the net worth of a business partnership, the equity value of an individually owned business, or with respect to other holdings, any recognized indication of value but such individual shall include in his report a full and complete description of the method used in determining such value.

"(c) (1) For the purposes of subparagraphs (a) through (j) of paragraph 2, a reporting individual shall, subject to clauses (2) and (3) of this subparagraph, also report the interests of the spouse or dependents of that individual.

"(2) For the purposes of subparagraphs (a) through (c) of paragraph 2, the individual need only report the source, not the amount, of any earned income over $1,000 or gifts over $100 ($250 in the case of transportation, lodging, food, or entertainment) received solely by his spouse or dependents, but with respect to earned income, if his spouse or dependents are self-employed in his or her own business or profession, only the nature of such business or profession need be reported.

"(3) No report shall be required with respect to the interests of a spouse living separate and apart from the reporting individual.

"(d) (1) the holdings of and income from a trust or other financial arrangement, whether 'blind' or not, whether or not created by or under the control of the reporting Senator, officer, or employee or the spouse or dependents of such reporting individual must be publicly reported according to the provisions of paragraph 2, except that the identity of the holdings and the sources of a trust's income need not be disclosed if—

"(A) the trust was not created directly or indirectly by the reporting individual, his spouse, or dependents,

"(B) the reporting individual, his spouse, and dependents have no knowledge of the contents or sources of income of the trust, and

"(C) the reporting individual has requested the trustee to provide information with respect to the holdings and sources of income of the trust and the trustee refuses to disclose the information.

However, where the identity of the holdings and the sources of income of a trust need not be disclosed, the reporting individual must list the category of the net cash value of his interest in the total trust holdings under subparagraph (e) of paragraph 2, and must list the category of the amount of the income from the trust under subparagraph (a)(3) of paragraph 2.

"(2) Since it is the policy of the United States Senate that Senators, and officers and employees of the Senate make full and complete public financial disclosure of financial holdings, it is the sense of the Senate that trusts established for the purpose of being 'blind trusts', whether revocable or irrevocable, shall be dissolved by the creating party to permit the disclosures required by this rule.

"(e) An individual only is required to report information within his knowledge; however, it is the responsibility of a reporting individual to exercise reasonable diligence to obtain the information necessary to comply with this rule.

"4. (a) Each individual required to file a report under paragraph 1(a) for any calendar year shall file such report with the Secretary of the Senate not later than May 15 of the next year.

"(b) Each individual required to file a report under paragraph 1(b) for a portion of a year shall file such report with the Secretary of the Senate on the last day he occupies an office or position described in paragraph 1 during such year.

"(c) Each individual required to file a report under paragraph 1(c) shall file such report with the Secretary of the Senate not later than the thirtieth day following the day on which such individual first fulfills the filing requirements of such paragraph during such year or May 15 of that year, whichever is later.

"(d) A copy of each report filed under subparagraphs (a), (b), and (c) shall be provided to the Select Committee by the Secretary of the Senate.

"(e) Each Senator and each individual required to report under paragraph 1(c) shall

cause his financial disclosure statement to be filed as a public document with the Secretary of State (or, if there is no Office of Secretary of State, the equivalent State offices) in the State which the Senator represents or in which he is a candidate for the position of Senator.

"(f) The Select Committee may grant one or more reasonable extensions of time for filing any report but the total of such extensions shall not exceed ninety days.

"(g) The Comptroller General shall provide assistance in completing any reports required under this rule when requested by a Member, officer, or employee of the Senate.

"5. (a) Except as provided in this paragraph, the Secretary of the Senate shall make each report filed with him under this rule available to the public within fifteen days after the receipt of such report, and shall provide a copy of any such report to any person upon a written request.

"(b) The Secretary of the Senate may require any person receiving a copy of any report under subparagraph (a) to supply his name and address and the name of the person or organization, if any, on whose behalf he is requesting such copy and to pay a reasonable fee in any amount which the Secretary of the Senate finds necessary to recover the cost of reproduction or mailing of such report excluding any salary of any employee involved in such reproduction or mailing. The Secretary of the Senate may furnish a copy of any such report without charge or at a reduced charge if he determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the public.

"(c) Any report received by the Secretary of the Senate shall be held in his custody and made available to the public for a period of seven years after receipt by the Secretary of the Senate of such report. After such seven-year period, the Secretary of the Senate shall destroy any such report.

"(d) The Select Committee shall review all financial statements filed pursuant to paragraph 1 to determine whether such statements are filed in a timely manner and are complete and in proper form.

"(e)(1) The Comptroller General shall, under such regulations as he may prescribe, and which are approved by the Select Committee, conduct, on a random basis, audits of approximately 5 per centum of the reports filed with the Secretary of the Senate (other than those filed by a Member of the Senate).

"(2) The Comptroller General shall, during each six-year period beginning after the date of enactment of this Act, audit at least one report filed by each Member of the Senate except that no such audit shall take place during the calendar year such Member is up for reelection.

"(3)(A) In conducting an audit under clause (1) or (2), the Comptroller General is authorized to request that the Select Committee issue a subpena to require the production of books, papers, and other documents.

"(B) the Comptroller General may use outside consultants to assist him in his responsibilities under this subparagraph.

"(4) The Comptroller General shall transmit the findings of each audit to the Select Committee and the individual being audited.

"6. (a) Each individual who is required to file a financial statement under paragraph 1 for any calendar year shall file with the Comptroller General, in a sealed envelope, a report containing a copy of the returns of taxes, declarations, statements, other documents, and amendments thereto, which he, or he and his spouse jointly, or any fiduciary (regarding income received on behalf of such individual), made for such year in compliance with the income tax provisions of the Internal Revenue Code of 1954. Such report shall be filed not later than the date on which such individual is required to file a financial statement under paragraph 1.

"(b) Except as otherwise provided by this paragraph, all papers filed with the Comptroller General under this paragraph shall be kept by the Comptroller General for not less than seven years, and while so kept shall remain sealed. Upon receipt of a resolution of the Select Committee, adopted by a recorded majority vote of the members of the Select Committee, requesting the transmission to the Select Committee of any of the reports filed by an individual under this rule, the Comptroller General shall transmit to the Select Committee the envelopes containing such reports. Within a reasonable time after such recorded vote has been taken, the individual concerned shall be informed of the vote to examine and audit, and shall be advised of the nature and scope of such examination. When any sealed envelope containing any such report is received by the Select Committee such envelope may be opened and the contents thereof may be examined only by members of the Select Committee in executive session. If, upon such examination, the Select Committee determines that further consideration by the Select Committee is warranted and is within the jurisdiction of the Select Committee, it may make the contents of any such envelope available for any use by any member of the Select Committee, or any member of the staff of the Select Committee, which is required for the discharge of his official duties. The Select Committee may receive the papers as evidence, after giving to the individual concerned due notice and opportunity for hearing in a closed session. The Comptroller General shall report to the Select Committee not later than the 1st day of June in each year the names of Senators, officers, and employees who have filed a report. Any paper which has been filed with the Comptroller General for longer than seven years, in accordance with the provisions of this paragraph, shall be returned to the individual concerned or his legal representative. In the event of the death or termination of service of a Member of the Senate or an officer or employee of the Senate, such papers shall be returned unopened to such individual, or to the surviving spouse or legal representative of such individual within one year of such death or termination of service unless the Select Committee directs that such papers be returned at a later date.

"(c) Notwithstanding the provisions of subparagraph (b), the Comptroller General, after giving notice to the individual being audited, may examine the material filed pursuant to this paragraph for the purpose of conducting an audit as required under paragraph 5(e).

"(d) Whenever in any criminal case pending in any competent court in which a Member, officer, or employee of the Senate is a defendant, or in any proceeding before a grand jury of any competent court in which alleged criminal conduct of the Member, officer, or employee of the Senate is under investigation, a discovery order of such court is served upon the Comptroller General directing him to appear and produce any reports filed pursuant to this rule, the Comptroller General shall—

"(1) within a reasonable time prior to appearing in response to such discovery order of such court, notify the individual whose report is requested of the receipt of the discovery order of such court,

"(2) if such report is in a sealed envelope, unseal the envelope containing such report and have an authenticated copy made of such report, replace such report in such envelope and reseal it, and note on such envelope that it was opened pursuant to this clause in response to a discovery order of such court, a copy of which shall be attached to such envelope, and

"(3) appear in response to such discovery order of such court and produce the authenticated copy so made.

For purposes of this subparagraph, the term 'competent court' means a court of the United States, a State, or the District of Columbia which has general jurisdiction to hear cases involving criminal offenses against the United States, such State, or the District of Columbia, as the case may be; and the term 'discovery order' includes a subpena approved by a competent court.

"7. As used in this rule—

"(a) the term 'commodity future' means commodity future as defined in sections 2 and 5 of the Commodity Exchange Act as amended (7 U.S.C. 2 and 5);

"(b) the term 'Comptroller General' means the Comptroller General of the United States;

"(c) the term 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954;

"(d) the term 'earned income' means outside earned income (as defined in rule XLIV) and any salary disbursed to an individual by the Secretary of the Senate;

"(e) the term 'employee of the Senate' has the same meaning given to such term in paragraphs 2, 3, and 4 of rule XLIX;

"(f) the term 'gift' means a payment, subscription, advance, forebearance, rendering, or deposit of money, services, or anything of value, including food, lodging, transportation, or entertainment, and reimbursement for other than necessary expenses, unless consideration of equal or greater value is received, but shall not include (1) a political contribution otherwise reported as required by law, (2) a loan made in a commercially reasonable manner (including requirements that the loan be repaid and that a reasonable rate of interest be paid), (3) a bequest inheritance or other transfer at death, or (4) anything of value given to a spouse or dependent of a reporting individual by the employer of such spouse or dependent in recognition of the service provided by such spouse or dependent;

"(g) the term 'income' means gross income as defined in section 61 of the Internal Revenue Code of 1954;

"(h) the term 'political contribution' means a contribution as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431);

"(i) the term 'political expenditure' means an expenditure as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431);

"(j) the term 'relative' means, with respect to a person required to file a report under this rule, an individual who is related to the person as father, mother, son, daughter, brother, sister, uncle, aunt, great uncle, great aunt, first cousin, nephew, niece, husband, wife, grandfather, grandmother, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaugther, stepbrother, stepsister, half brother, half sister, or who is the grandfather or grandmother of the spouse of the person reporting;

"(k) the term 'security' has the meaning set forth in section 2 of the Securities Act of 1933, as amended (15 U.S.C. 77b); and

"(l) the term 'transactions in securities and commodities futures' means any acquisition, transfer, or other disposition involving any security or commodity.

"RULE XLIII

"GIFTS

"1. No Member, officer or employee of the Senate, shall solicit or accept a present or future gift, favor, service, or anything of value from any person, business, or other entity under circumstances where he knows by the exercise of ordinary care that such gift, favor, service, or thing of value will,

might tend to, or is intended to affect the present or future performance of official duties.

"2. (a) No Member, officer, or employee of the Senate, or the spouse or dependent thereof, shall knowingly accept or knowingly permit his spouse or dependent to accept, directly, any gift or gifts having an aggregate value exceeding $100 during a calendar year directly or indirectly from any person, organization, or corporation having a direct interest in legislation before the Congress or from any foreign national.

"(b) For purposes of subparagraph (a), only the following shall be deemed to have a direct interest in legislation before the Congress:

"(1) a person, organization, or corporation registered under the Federal Regulation of Lobbying Act of 1946, or any successor statute, a person who is an officer or director of such registered lobbyist, or a person who has been employed or retained by such a registered lobbyist for the purpose of influencing legislation before the Congress; or

"(2) a corporation, labor organization, or other organization which maintains a separate segregated fund for political purposes (within the meaning of section 321 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441b)), a person who is an officer or director of such corporation, labor organization, or other organization, or a person who has been employed or retained by such corporation, labor organization, or other organization for the purpose of influencing legislation before the Congress.

"(c) The prohibitions of this subparagraph do not apply to gifts—

"(1) from relatives;

"(2) with a value of less than $35;

"(3) of personal hospitality of an individual.

"3. For purposes of this rule—

"(a) the term 'gift' means a payment, subscription, advance, forebearance, rendering, or deposit of money, services, or anything of value, including food, lodging, transportation, or entertainment, and reimbursement for other than necessary expenses, unless consideration of equal or greater value is received, but shall not include (1) a political contribution otherwise reported as required by law, (2) a loan made in a commercially reasonable manner (including requirements that the loan be repaid and that a reasonable rate of interest be paid), (3) a bequest, inheritance, or other transfer at death, (4) a bona fide award presented in recognition of public service and available to the general public, (5) a reception at which the Member, officer, or employee is to be honored, provide such individual receives no other gifts that exceed the restrictions in this rule, other than a suitable memento, or (6) anything of value given to a spouse or dependent of a reporting individual by the employer of such spouse or dependent in recognition of the service provided by such spouse or dependent; and

"(b) The term 'relative' has the same meaning given to such term in paragraph 7(j) of rule XLII.

"4. If a member, officer, or employee, after exercising reasonable diligence to obtain the information necessary to comply with this rule, unknowingly accepts a gift described in paragraph 2, such Member, officer, or employee shall, learning of the nature of the gift and its source, return the gift or, if it is not possible to return the gift, reimburse the donor for the value of the gift.

"RULE XLIV

"OUTSIDE EARNED INCOME

"1. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year (unless hired on a per diem basis), the aggregate amount of the outside earned income of such individual for such period shall not exceed 15 per centum of—

"(1) the aggregate amount of the salary of such an officer or employee disbursed by the Secretary of the Senate during such period; and

"(2) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"2. (a) A Senator shall not receive honoraria in excess of $1,000 for each appearance, speech, or article.

"(b) An officer or employee of the Senate covered by paragraph (1) shall not receive honoraria in excess of—

"(1) $300 for each appearance, speech, or article, and

"(2) $1,500 in the aggregate in any one calendar year.

"(c) Notwithstanding the limitations under paragraph 1 or 2(b)(2), any Senator, officer, or employee may accept honoraria in excess of the amount allowed in paragraph 1 or 2(b)(2) but not in excess of $25,000, if he immediately donates such honoraria to an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954 and if no tax benefits accrue to such Senator, officer, or employee for such donation.

"3. (a) For purposes of this rule, the term 'outside earned income' shall, subject to the provisions of subparagraphs (b) and (c), mean any income earned by an individual which is income received as a result of personal services actually rendered if such services are material income-producing factors.

"(b) Outside earned income shall include, but is not limited to—

"(1) honoraria and stipends, and

"(2) advances on books other than from an established trade publisher under usual contract terms, or advances on other creative or artistic works.

"(c) Outside earned income does not include the following: (1) royalties from books; (2) income from family enterprises if the services provided by the Senator or officer or employee of the Senate are not a material income-producing factor; (3) gains derived from dealings in property or investments; (4) interests; (5) rents; (6) dividends; (7) alimony and separate maintenance payments; (8) annuities; (9) income from discharge of indebtedness; (10) distributive shares of partnership income if the services provided by the Senator, or officer or employee of the Senate, are not a material income-producing factor; (11) income from an interest in an estate or trust; (12) proceeds from the sale of creative or artistic work; and (13) any 'buy-out' arrangement from professional partnerships or businesses which is reasonably related to the fair market value of his interest in the enterprise at the time of the severance, payable within a reasonable period of time, and not related to future profitability of the enterprise.

"RULE XLV

"CONFLICT OF INTEREST

"1. A Member, officer, or employee of the Senate shall not receive any compensation, nor shall he permit any compensation to accrue to his beneficial interest from any source, the receipt of which would occur by virtue of influence improperly exerted from his position as a Member, officer, or employee.

"2. No Member, officer, or employee shall engage in any outside business or professional activity or employment for compensation which is inconsistent or in conflict with the conscientious performance of official duties.

"3. No officer or employee shall engage in any outside business or professional activity or employment for compensation unless he has reported in writing, when such activity or employment commences and on May 15 of each year thereafter so long as such activity or employment continues, the nature of such activity or employment to his supervisor. The supervisor shall then, in the discharge of his duties, take such action as he considers necessary for the avoidance of conflict of interest or interference with duties to the Senate.

"4. No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a principal purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class.

"5. A Member, notwithstanding the provisions of Rule XII of the Standing Rules of the Senate, may decline to vote, in committee or on the floor, on any matter when he believes that his voting on such a matter would be a conflict of interest.

"6. No Member, officer, or employee of the Senate compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year (unless hired on a per diem basis) shall provide professional services for compensation. For the purposes of this paragraph, 'professional services' shall include services as an engineer, real estate agent, insurance agent, attorney, physician, architect, consultant, or activties of a similar character.

"7. No Member, officer, or employee shall serve as an officer or member of the board of any publicly held or publicly regulated corporation, financial institution, or business entity. This prohibition shall not apply when a Member, officer, or employee serves without compensation as an officer or member of a board of an organization exempt from taxation under section 501(c) of the Internal Revenue Code of 1954 or institutions or organizations that are principally available to Members, officers, or employees of the Senate, or their families.

"8. An employee on the staff of a committee who is compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year (unless hired on a per diem basis) shall divest himself of any holdings which may be directly affected by the actions of the committee for which he works, unless he has received permission in writing from his supervisor and the Select Committee on Ethics to retain such holdings.

"9. If a Member, upon leaving office, becomes a registered lobbyist under the Federal Regulation of Lobbying Act of 1946 or any successor statute, or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, he shall not lobby Members, officers, or employees of the Senate for a period of one year after leaving office.

"10. If an employee on the staff of a Member, upon leaving that position, becomes a registered lobbyist under the Federal Regulation of Lobbying Act of 1946 or any successor statute, or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, such employee may not lobby the Member for whom he worked or that Member's staff for a period of one year after leaving that position. If an employee on the staff of a committee, upon leaving his position, becomes such a registered lobbyist or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, such employee may not lobby the members of the committee for which he worked, or the staff of that committee, for a period of one year after leaving his position.

"11. For purposes of this rule—

"(a) 'employee of the Senate' has the same meaning given to such term in paragraphs 2, 3, and 4 of rule XLIX;

"(b) an individual who is an employee on the staff of a subcommittee of a committee shall be treated as an employee on the staff of such committee; and

"(c) the term 'lobbying' means any oral or written communication to influence the content or disposition of any issue before Congress, including any pending or future bill, resolution, treaty, nomination, hearing, report, or investigation; but does not include—

"(A) a communication (i) made in the form of testimony given before a Committee or office of the Congress, or (ii) submitted for inclusion in the public record, public docket, or public file of a hearing; or

"(B) a communication by an individual, acting solely on his own behalf, for redress of personal grievances, or to express his personal opinion.

"12. For purposes of this rule—

"(a) a Senator or the Vice President is the supervisor of his administrative, clerical, or other assistants;

"(b) a Senator who is the chairman of a committee is the supervisor of the professional, clerical, or other assistants to the committee except that minority staff members shall be under the supervision of the ranking minority Senator on the committee;

"(c) a Senator who is a chairman of a subcommittee which has its own staff and financial authorization is the supervisor of the professional, clerical, or other assistants to the subcommittee except that minority staff members shall be under the supervision of the ranking minority Senator on the subcommittee;

"(d) the President pro tempore is the supervisor of the Secretary of the Senate, Sergeant at Arms and Doorkeeper, the Chaplain, the Legislative Counsel, and the employees of the Office of the Legislative Counsel;

"(e) the Secretary of the Senate is the supervisor of the employees of his office;

"(f) the Sergeant at Arms and Doorkeeper is the supervisor of the employees of his office;

"(g) the Majority and Minority Leaders and the Majority and Minority Whips are the supervisors of the research, clerical, or other assistants assigned to their respective offices;

"(h) The Majority Leader is the supervisor of the Secretary for the Majority and the Secretary for the Majority is the supervisor of the employees of his office; and

"(i) the Minority Leader is the supervisor of the Secretary for the Minority and the Secretary for the Minority is the supervisor of the employees of his office.

"RULE XLVI

"PROHIBITION OF UNOFFICIAL OFFICE ACCOUNTS

"1. No Member may maintain or have maintained for his use an unofficial office account. The term 'unofficial office account' means an account or repository into which funds are received for the purpose, at least in part, of defraying otherwise unreimbursed expenses allowable in connection with the operation of a Member's office. An unofficial office account does not include, and expenses incurred by a Member in connection with his official duties shall be defrayed only from—

"(a) personal funds of the Member;

"(b) official funds specifically appropriated for that purpose;

"(c) funds derived from a political committee (as defined in section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)); and

"(d) funds received as reasonable reimbursements for expenses incurred by a Member in connection with personal services provided by the Member to the organization making the reimbursement.

"2. No contribution (as defined in section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) shall be converted to the personal use of any Member, or any former Member who is defeated for reelection or does not seek reelection. For the purposes of this rule 'personal use' does not include reimbursement of expenses incurred by a Member in connection with his official duties.

"RULE XLVII

"FOREIGN TRAVEL

"1. Unless authorized by the Senate (or by the President of the United States after an adjournment sine die), no funds from the United States Government (including foreign currencies made available under section 502 (b) of the Mutual Security Act of 1954 (22 U.S.C. 1754(b))) shall be received for the purpose of travel outside the United States by any Member of the Senate whose term will expire at the end of a Congress after—

"(a) the date of the general election in which his successor is elected; or

"(b) in the case of a Member who is not a candidate in such general election, the earlier of the date of such general election or the adjournment sine die of the second regular session of that Congress.

"2. No Member, officer, or employee engaged in foreign travel may claim payment or accept funds from the United States Government (including foreign currencies made available under section 502(b) of the Mutual Security Act of 1954 (22 U.S.C. 1754(b))) for any expense for which the individual has received reimbursement from any other source; nor may such Member, officer, or employee receive reimbursement for the same expense more than once from the United States Government. No Member, officer, or employee shall use any funds furnished to him to defray ordinary and necessary expenses of foreign travel for any purpose other than the purpose or purposes for which such funds were furnished.

"3. A per diem allowance provided a Member, officer, or employee in connection with foreign travel shall be used solely for lodging, food, and related expenses and it is the responsibility of the Member, officer, or employee receiving such an allowance to return to the United States Government that portion of the allowance received which is not actually used for necessary lodging, food, and related expenses.

"RULE XLVIII

"FRANKING PRIVILEGE AND RADIO AND TELEVISION STUDIOS

"1. A Senator or an individual who is a candidate for nomination for election, or election to the Senate, may not use the frank for any mass mailing (as defined in section 3210(a)(5)(D) of title 39, United States Code) if such mass mailing is mailed at or delivered to any postal facility less than sixty days immediately before the date of any primary or general election (whether regular, special, or runoff) in which the Senator is a candidate for public office or the individual is a candidate for Senator.

"2. A Senator shall use only official funds of the Senate to purchase paper, to print, or to prepare any mass mailing material which is to be sent out under the frank.

"3. (a) When a Senator disseminates information under the frank by a mass mailing (as defined in section 3210(a)(5)(D) of title 39, United States Code), the Senator shall register annually with the Secretary of the Senate such mass mailings. Such registration shall be made by filing with the Secretary a copy of the matter mailed and providing, on a form supplied by the Secretary, information as to the number of pieces included in the mass mailing and a description of the group or groups of persons to whom the mass mailing was mailed.

"(b) The Secretary of the Senate shall promptly make available for public inspection and copying the copy of the mail matter registered, the description of the group or groups of persons to whom the mass mailing was mailed, and the number of pieces mailed.

4. Nothing in this rule shall apply to any mailing under the frank which is in direct response to inquiries or requests from persons to whom the matter is mailed, is addressed to colleagues in Congress or to government officials (whether Federal, State, or local), or consists entirely of news releases to the communications media.

"5. The Senate computer facilities shall not be used to store, maintain, or otherwise process any lists of categories of lists of names and addresses identifying the individuals included in such lists as campaign workers or contributors, as members of a political party, or by any other partisan political designation, or for producing mailing labels or computer tapes for use other than in the service facilities maintained and operated by the Senate.

"6. (a) The radio and television studios provided by the Senate or by the House of Representatives may not be used by a Senator or an individual who is a candidate for nomination for election, or election, to the Senate less than sixty days immediately before the date of any primary or general election (whether regular, special, or runoff) in which that Senator is a candidate for public office or that individual is a candidate for Senator.

"(b) This paragraph shall not apply if the facilities are to be used at the request of, and at the expense of, a licensed broadcast organization or an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954.

"RULE XLIX

"POLITICAL FUND ACTIVITY; DEFINITIONS

"1. No officer or employee of the Senate may receive, solicit, be the custodian of, or distribute any funds in connection with any campaign for the nomination for election, or the election of any individual to be a Member of the Senate or to any other Federal office. This prohibition does not apply to one assistant to a Senator in Washington, District of Columbia, and one assistant in the Senator's home State wo have been designated by that Senator to perform any of the functions described in the first sentence of this paragraph (except solicitation) and who are compensated at an annual rate in excess of $10,000, if such designation has been made in writing and filed with the Secretary of the Senate and if such assistant files a financial statement in the form provided under rule XLII for each year during which he is designated under this rule. The Secretary of the Senate shall make the designation available for public inspection.

"2. For purposes of the Senate Code of Official Conduct—

"(a) an employee of the Senate includes any employee whose salary is disbursed by the Secretary of the State; and

"(b) the compensation of an officer or employee of the Senate who is a reemployed annuitant shall include amounts received by such officer or employee as an annuity, and such amounts shall be treated as disbursed by the Secretary of the Senate.

"3. Before approving the utilization by any committee of the Senate of the services of an officer or employee of the Government in accordance with section 202(f) of the Legislative Reorganization Act of 1946 or with an authorization provided by Senate resolution, the Committee on Rules and Administration shall require such officer or employee to agree in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate. Any such officer or employee shall, for purposes of such Code, be treated as an employee of the Senate re-

ceiving compensation disbursed by the Secretary of the Senate in an amount equal to the amount of compensation he is receiving as an officer or employee of the Government.

"4. No Member, officer, or employee of the Senate shall utilize the full-time services of an individual for more than ninety days in a calendar year in the conduct of official duties of any committee or office of the Senate (including a Member's office) unless such individual—

"(a) is an officer or employee of the Senate,

"(b) is an officer or employee of the Government (other than the Senate), or

"(c) agrees in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate.

Any individual to whom subparagraph (c) applies shall, for purposes of such Code, be treated as an employee of the Senate receiving compensation disbursed by the Secretary of the Senate in an amount equal to the amount of compensation which such individual is receiving from any source for performing such services.

"RULE L

"EMPLOYMENT PRACTICES

"No Member, officer, or employee of the Senate shall, with respect to employment by the Senate or any office thereof—

"(a) fail or refuse to hire an individual;

"(b) discharge an individual; or

"(c) otherwise discriminate against an individual with respect to promotion, compensation, or terms, conditions, or privileges of employment

on the basis of such individual's race, color, religion, sex, national origin, or state of physical handicap.".

TITLE II—PROVISIONS RELATING TO THE SELECT COMMITTEE ON ETHICS

SEC. 201. Section 2(a) of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by inserting after "violations of law," in paragraph (1) "violations of the Senate Code of Official Conduct.".

SEC. 202. Section 2 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by redesignating subsection (b) as (k), and by inserting after subsection (a) the following new subsections:

"(b)(1) Each sworn complaint filed with the Select Committee shall be in writing, shall be in such form as the Select Committee may prescribe by regulation, and shall be under oath.

"(2) For purposes of this section, 'sworn complaint' means a statement of facts within the personal knowledge of the complainant, alleging a violation of law, the Senate Code of Official Conduct, or any other rule or regulation of the Senate relating to the conduct of individuals in the performance of their duties as Members, officers, or employees of the Senate.

"(3) Any person who knowingly and willfully swears falsely to a sworn complaint does so under penalty of perjury, and the Select Committee may refer any such case to the Attorney General for prosecution.

"(4) For the purposes of this section, 'investigation' is a proceeding undertaken by the Select Committee after a finding, on the basis of an initial review, that there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(c)(1) No investigation of conduct of a Member, or officer, and no report, resolution, or recommendation relating thereto may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee.

"(2) No other resolution, report, recommendation, interpretative ruling, or advisory opinion may be made without an affirmative vote of a majority of the members of the Select Committee voting.

"(d)(1) When the Select Committee receives a sworn complaint against a Member or officer of the Senate, it shall promptly conduct an initial review of that complaint. The initial review shall be of duration and scope necessary to determine whether there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(2) If as a result of an initial review under paragraph (1), the Select Committee determines by a recorded vote that there is not such substantial credible evidence, the Committee shall report such determination to the complainant and to the party charged, together with an explanation of the basis of such determination.

"(3) If as a result of an initial review under paragraph (1), the Select Committee determines that a violation is inadvertent, technical or otherwise of a de minimus nature, the Select Committee may attempt to correct or prevent such a violation by informal methods.

"(4) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence but that the violation, if proven, is neither of a de minimus nature nor sufficiently serious to justify any of the penalties expressly referred to in section 2(a)(2), the Select Committee may propose a remedy it deems appropriate. If the matter is thereby resolved, a summary of the Committee's conclusions and the remedy proposed shall be filed as a public record with the Secretary of the Senate and a notice of such filing shall be printed in the Congressional Record.

"(5) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence, the Select Committee shall promptly conduct an investigation if (A) the violation, if proven, would be sufficiently serious, in the judgment of the Select Committee, to warrant imposition of one or more of the penalties expressly referred to in section 2(a)(2), or (B) the violation, if proven, is less serious, but was not resolved pursuant to paragraph (4) above. Upon the conclusion of such investigation, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(6) Upon the conclusion of any other investigation respecting the conduct of a Member or officer (as defined in subsection (b)(4)) undertaken by the Select Committee, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(e) When the Select Committee receives a sworn complaint against an employee of the Senate, it shall consider the complaint according to procedures it deems appropriate. If the Select Committee determines that the complaint is without substantial merit, it shall notify the complainant and the accused of its determination, together with an explanation of the basis of such determination.

"(f) The Select Committee may, in its discretion, employ hearing examiners to hear testimony and make findings of fact and/or recommendations to the Select Committee concerning the disposition of complaints.

"(g) Notwithstanding any other provision of this section, no initial review or investigation shall be made of any alleged violation of any law, the Senate Code of Official Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred. No provision of the Senate Code of Official Conduct shall apply to or require disclosure of any act, relationship or transaction which occurred prior to the effective date of the applicable provision of the Code. The Select Committee may conduct an initial review or investigation of any alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occurred while such rule or law was in effect and the violation was not a matter resolved on the merits by the predecessor Select Committee.

"(h) The Select Committee shall adopt written rules setting forth procedures to be used in conducting investigations of complaints.".

SEC. 203. The first section of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by adding after subsection (d) (as added by section 102 of Senate Resolution 4, Ninety-fifth Congress) the following new subsection:

"(e)(1) A member of the Select Committee shall be ineligible to participate in any initial review or investigation relating to his own conduct, or relating to any complaint filed by him, and the determinations and recommendations of the Select Committee with respect thereto.

"(2) A member of the Select Committee may, at his discretion, disqualify himself from participating in any investigation pending before the Select Committee and the determinations and recommendations of the Select Committee with respect thereto. Notice of such disqualification shall be given in writing to the President of the Senate.

"(3) Whenever any member of the Select Committee is ineligible under paragraph (1) to participate in any investigation or disqualifies himself under paragraph (2) from participating in any investigation, another Member of the Senate shall, subject to the provisions of subsection (d), be appointed to serve as a member of the Select Committee solely for purposes of such investigation and the determinations and recommendations of the Select Committee with respect thereto. Any Member of the Senate appointed for such purposes shall be of the same party as the Member who is ineligible or disqualifies himself.".

SEC. 204. Section 3 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended—

(1) by inserting after "fix the compensation of" in subsection (a)(7) the following: "a staff director, a counsel, an assistant counsel, one or more investigators, one or more hearing examiners, and"; and

(2) by amending subsection (b) to read as follows:

"(b)(1) The Select Committee is authorized to retain and compensate counsel not employed by the Senate (or by any department or agency of the executive branch of the Government) whenever the Select Committee determines that the retention of outside counsel is necessary or appropriate for any action regarding any complaint or allegation, which, in the determination of the Select Committee is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee.

"(2) Any investigation conducted under section 2 shall be conducted by outside counsel as authorized in paragraph (1), unless the Select Committee determines not to use outside counsel.".

SEC. 205. Section 2(a) of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by inserting after "disciplinary action" in paragraph (2) the following: "(including, but not limited to, in the case of a Member: censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility; and, in the case of an officer or employee: suspension or dismissal)".

SEC. 206. Section 3 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by adding at the end thereof the following new subsection:

"(e)(1) The Select Committee shall prescribe and publish such regulations as it feels are necessary to implement the Senate Code of Official Conduct.

"(2) The Select Committee is authorized to issue interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction.

"(3) The Select Committee shall render an advisory opinion, in writing within a reasonable time, in response to a written request by a Member or officer of the Senate or a candidate for nomination for election, or election to the Senate, concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(4) The Select Committee may in its discretion render an advisory opinion in writing within a reasonable time in response to a written request by any employee of the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(5) Notwithstanding any provision of the Senate Code of Official Conduct or any rule or regulation of the Senate, any person who relies upon any provision or finding of an advisory opinion in accordance with the provisions of paragraphs (3) and (4) and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate.

"(6) Any advisory opinion rendered by the Select Committee under paragraphs (3) and (4) may be relied upon by (A) any person involved in the specific transaction or activity with respect to which such advisory opinion is rendered: *Provided, however,* That the request for such advisory opinion included a complete and accurate statement of the specific factual situation; and (B) any person involved in any specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which such advisory opinion is rendered.

"(7) Any advisory opinion issued in response to a request under paragraphs (3) or (4) shall be printed in the Congressional Record with appropriate deletions to assure the privacy of the individual concerned. The Select Committee shall to the extent practicable, before rendering an advisory opinion, provide any interested party with an opportunity to transmit written comments to the Select Committee with respect to the request for such advisory opinion. The advisory opinions issued by the Select Committee shall be compiled, indexed, reproduced, and made available on a periodic basis.".

TITLE III—MISCELLANEOUS; EFFECTIVE DATES

SEC. 301. The Committee on Rules and Administration and the Committee on Appropriations shall, within one hundred and twenty days after the day on which this resolution is agreed to, report to the Senate legislation to adjust the amounts and permissible uses of Senatorial allowances so that such allowances will be adequate to defray the necessary and appropriate expenses incurred in connection with the operation of a Member's office.

SEC. 302. (a) The Committee on Rules and Administration and the Committee on Appropriations, in consultation with the Committee on Finance, shall review the provisions of the Internal Revenue Code of 1954 relating to the tax status of funds raised and expended to defray ordinary and necessary expenses of a Member, the regulations prescribed thereunder, and the rulings made with respect thereto.

(b) The committees shall report the results of their review under subsection (a), together with their recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 303. (a) The Committee on Rules and Administration shall review the desirability of promulgating rules and regulations providing for—

(1) periodic audits by the General Accounting Office of the accounts of all committees and offices of the Senate;

(2) a centralized system of recordkeeping and comprehensive reporting relating to the accounts, allowances, expenditures, and travel expenses of all committees and offices of the Senate;

(3) suggested accounting procedures for the handling of the accounts of all committees and offices of Members; and

(4) public disclosure and availability of information on the accounts of all committees and offices of the Senate, which shall be available in a form which segregates the allowances and expenses of each committee and office.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 304. (a) The Committee on Rules and Administration shall review the desirability of requiring that only official Senate funds may be used to pay for any expenses incurred by a Senator in the use of the radio and television studios provided by the Senate.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 305. (a) The Committee on Foreign Relations shall review the problem of travel, lodging, and other related expenses provided to Members, officers, or employees of the Senate paid for by foreign governments in the situation where it is not possible to procure transportation, lodging, or other related services or to reimburse the foreign government for those purposes.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within ninety days after the day on which this resolution is agreed to.

SEC. 306. (a) The Committee on Governmental Affairs shall review whether it is desirable to permit—

(1) a Senator to mail franked mail with a simplified form of address for delivery within the State for which he was elected; and

(2) a Senator to mail franked mail with a simplified form of address as provided under paragraph (1) which is—

(A) to be prepared as directed by the Postal Service, and

(B) to be delivered to—

(i) each box holder or family on a rural or star route,

(ii) each post office box holder, and

(iii) each stop or box on a city carrier route.

(b) The committee shall report the results of its review under subsection (a) together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 307. The Committee on Rules and Administration shall study laws relating to contributions solicited from or made by officers or employees of the Senate and report the results of their review, together with their recommendations, to the Senate within one hundred and eighty days after the day on which this resolution is agreed to.

SEC. 308. The Committee on Rules and Administration shall, within one hundred and eighty days after the day on which this resolution is agreed to, report proposals to prohibit the misuse of official staff by holders of public office in campaigns for nomination for election, or election, to Federal office.

SEC. 309. (a) The Committee on Governmental Affairs shall conduct a study of the subject of handling employment discrimination complaints.

(b) The Committee shall report the results of their study under subsection (a), together with their recommendations, to the Senate within one hundred and eighty days after the day on which this resolution is agreed to.

(c) The recommendation of the Committee on Governmental Affairs shall be referred to the appropriate committee for a period not to exceed sixty days.

SEC. 310. (a) Except as provided in this section, the amendments to the Standing Rules of the Senate made by title I and the provisions of title II shall take effect on the day after the day on which this resolution is agreed to.

(b)(1) Rule XLII of the Standing Rules of the Senate (as amended by title I), relating to Public Financial Disclosure, shall take effect on October 1, 1977, and the statement required to be filed thereunder on or before May 15, 1978, shall cover the period October 1, 1977, through December 31, 1977, except that, at the option of any individual required to file such statement, it may cover the calendar year 1977.

(2) Rule XLIV of the Standing Rules of the Senate (as such rules existed prior to the amendments made by title I) shall remain in effect for the period through September 30, 1977, and the statement required to be filed thereunder on or before May 15, 1978, shall cover the period January 1, 1977, through September 30, 1977, except that, at the option of any individual required to file such statement, it may cover the calendar year 1977.

(c) Rule XLIV of the Standing Rules of the Senate (as amended by title I), relating to Outside Earned Income, shall take effect on January 1, 1978.

(d) Paragraphs 6, 7, 8, 9, and 10 of rule XLV of the Standing Rules of the Senate (as amended by title I), relating to Conflict of Interest, shall take effect on April 1, 1978.

(e) Rule XLVI of the Standing Rules of the Senate (as amended by title I) relating to Prohibition of Unofficial Office Accounts, shall take effect as follows:

(1) On the day after the day on which this resolution is agreed to, no contributions to an official office account may be received.

(2) Expenditures from unofficial office accounts shall terminate on December 31, 1977.

(f) Rule XLVIII of the Standing Rules of the Senate (as amended by title I), relating to Franking Privilege and Radio and Television Studies, shall take effect on August 1, 1977.

(g)(1) Paragraph 1 of rule XLIX of the Standing Rules of the Senate (as amended by title I) shall take effect thirty days after the day on which this resolution is agreed to.

(2) Rule XLIII of the Standing Rules of the Senate (as such rules existed prior to the amendments made by title I) shall remain in effect for the period through the

thirtieth day after the day on which this resolution is agreed to.

(h) Rule L of the Standing Rules of the Senate (as amended by title I), relating to Employment Practices, shall take effect on January 3, 1979.

(i) The amendments to Senate Resolution 338 contained in sections 202 and 203 of title II of this resolution shall take effect thirty days after the day on which this resolution is agreed to.

Mr. NELSON. Mr. President, the Special Committee on Official Conduct ordered Senate Resolution 110 reported on February 24. Because the members of the Select Committee on Ethics were recently selected, the special committee was unable to benefit, prior to close of the markup sessions, from the advice of the committee which would actually be responsible for implementing the code. Consequently, after February 24, while the committee was preparing its report the ad hoc drafting subcommittee held several meetings with Senators STEVENSON and SCHMITT, chairman and ranking minority member, respectively, of the Ethics Committee, as well as the joint leadership, to discuss the implementation of the code as drafted, since that would be the responsibility of the Ethics Committee.

The concerns expressed by Senators STEVENSON and SCHMITT were valuable and well founded. It is the belief of the members of the drafting subcommittee that those concerns can be accommodated without altering the basic scope, character, and objectives of the resolution. For that reason, the special committee sent to every Senator a copy of this amendment in the form of a substitute, which has been prepared and unanimously agreed to by the members of the drafting subcommittee, Senators THURMOND, RIBICOFF, JAVITS, CLARK, PACKWOOD, and myself. Notice has been given of my intention to seek unanimous consent to have this substitute be considered as original text and I am aware of no objection to it.

Mr. President, I ask unanimous consent that the amendment in the nature of a substitute be agreed to and considered as original text for the purpose of further amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. NELSON. Mr. President, I send to the desk a number of technical amendments and ask that they be considered en bloc. They have been checked with Senator THURMOND, who is cochairman of the Special Committee on Official Conduct, and they have been approved by both Senator THURMOND and myself.

The PRESIDING OFFICER. The amendments will be stated.

UP AMENDMENT NO. 81

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes certain technical amendments, unprinted amendment No. 81.

The technical amendments are as follows:

On page 21, line 1, after "grandmother," insert "grandson, granddaughter,"

On page 26, line 11, after "(3)" insert "capital".

On page 28, line 20, after "employee" insert "employed for more than ninety days in a calendar year (unless hired on a per diem basis)".

On page 38, line 7, delete "State" and insert in lieu thereof "Senate".

On page 46, after line 23, insert the following:

"(3) by amending subsection (c)(1) to read as follows:

"'(c) With the prior consent of the department or agency concerned, the Select Committee may (1) utilize the services, information, and facilities of any such department or agency of the Government, and'."

On page 47, line 19, delete the first "of" and insert in lieu thereof "or".

On page 25, line 14, delete the word "immediately".

The PRESIDING OFFICER. Is there objection to the consideration of the amendment en bloc?

Mr. DURKIN. Mr. President, reserving the right to object, I gather that there will be an explanation of what these technical amendments are.

Mr. NELSON. They are technical. Some of them are typographical errors. If the Senator would like to be entertained by a reading of the typographical errors, I will be glad to do so.

Mr. DURKIN. No. I am not necessarily here for entertainment. That has been proscribed by the code, anyway. [Laughter.]

I would like to know what we are going to adopt and why.

Mr. NELSON. The first one reads:

On page 21, line 1, after "grandmother," insert "grandson, granddaughter,".

Mr. DURKIN. What is the effect of that?

Mr. NELSON. In the definition of relatives on page 21, inadvertently——

Mr. DURKIN. Mr. President, will the Senator yield? Perhaps if we could suggest the absence of a quorum, we could solve this in 2 minutes.

Mr. NELSON. I will have the staff deliver a copy to the Senator.

Mr. President, I suggest the absence of a quorum.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator withhold that request for a moment?

Mr. NELSON. Yes.

Mr. HARRY F. BYRD, JR. Will the Senator yield for a unanimous-consent request?

Mr. NELSON. I yield.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that J. Philip Reberger, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator yield for a similar request?

Mr. NELSON. I yield.

Mr. JAVITS. Mr. President, I ask unanimous consent that Don Kellerman, of my office, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Richard Arnold, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, for the purpose of making a unanimous-consent request, I would ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection to considering the amendments en bloc?

Several Senators addressed the Chair.

Mr. DURKIN. If, in the middle of the explanation, I am going to listen to the Senator request to consider it en bloc, then I will object to it.

Mr. NELSON. The purpose was simply to permit a Member to ask unanimous consent for the presence on the floor of one of his staff.

Mr. DURKIN. I have no objection to that, if the Senator will give me 2 more minutes.

Mr. NELSON. We will not transact any business.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. CASE. Mr. President, I ask unanimous consent that during the consideration of this measure my assistant Nancy Talmont be accorded the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I ask unanimous consent that Mark McConaghy and Don Ricketts be permitted the privileges of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

Mr. McCLURE. Mr. President, will the Senator withhold that?

I wonder if the Senator might explain, take this time while the others are looking at these amendments, and would answer a question with respect to the amendments.

Mr. NELSON. To the technical amendments?

Mr. McCLURE. So-called. They are technical, but I am not sure they are simply typographical. For instance, No. 2 on this list given to me reads:

On page 26, line 11, after No. 3, insert the word "capital".

Can the Senator tell me what is intended to be effected by that changed language? What is the difference between a gain from the sale or exchange of property and a capital gain derived from the sale or exchange of property?

Mr. NELSON. May I say to the Senator that the respective majority and minority staffs worked out the technical amendments, and agreed upon them. However, they did not agree on item 5,

so we have stricken it. Staff advises me that No. 2 should be stricken also, at least until we get a description of what it is about.

I ask unanimous consent that item 2 on the amendment sent to the desk be stricken from the amendment.

Mr. McCLURE. Item No. 2 and item No. 5 are both being stricken from this list?

Mr. NELSON. Yes.

Mr. McCLURE. I have no objection.

The PRESIDING OFFICER. The amendment is so modified.

Mr. McCLURE. Would the Senator perhaps answer a question in regard to item No. 3?

Mr. NELSON. I have not looked at any of the items. I was advised by staff, minority and majority, that these were technical amendments worked out. I assume that is what they were, but if the Senator would ask me I would respond to his questions.

Mr. McCLURE. Surely. Certainly, because it seems to me they are not just technical in the sense that they are typographical errors; for instance, item No. 4 is certainly a typographical error, technical in nature.

Mr. NELSON. I did not say they were all typographical.

Mr. McCLURE. Item No. 3 to which I direct attention, what is rationale for excluding employees who are hired on a per diem basis?

Mr. BUMPERS. Mr. President, will the Senator say again what page and what item he is talking about?

Mr. McCLURE. On this list of modifications of amendment No. 65 to Senate Resolution 110, item No. 3, where it says:

On page 28, line 20, after "employee" insert "employed for more than ninety days in a calendar year (unless hired on a per diem basis).

That seems to me to have the effect of excluding someone who is hired on a per diem basis, and I wondered if the proponents of the modification can tell me what the rationale is for excluding someone who may be working more than 90 days per year but is hired on a per diem basis.

Mr. NELSON. The staff advises me that, it is to make that paragraph conform to the paragraph above and the handling of the problem throughout the resolution because we do not wish to cover temporary employees.

Mr. McCLURE. But would it not be possible under this amendment to pay someone on a per diem basis even though he is a full-time employee, and he would thus be exempt from coverage?

Mr. NELSON. Is the Senator suggesting that permanent employees may be paid on a per diem basis?

Mr. McCLURE. Yes, I have seen a lot less artful dodgers around here.

Mr. NELSON. I do not think that that ingenious idea occurred to anybody.

Mr. McCLURE. Well, for instance, the reorganization statute requires that the minortiy be given one-third of the staff of committees. The majority has artfully avoided that by hiring consultants, and consultants are not counted as employees and, therefore, are not subject to the one-third limitation.

I suspect somebody at least as ingenious as the Senator from Idaho is going to say, "Well, we do not have to cover these employees. We will just pay them on a per diem basis. We will pay them for 340 days per year on a per diem basis, and they are not covered."

Mr. BUMPERS. Mr. President, will the Senator yield for a question? Maybe the floor manager will tell us whether there are such persons now employed on a per diem basis and, if so, who they are.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. STEVENSON. Mr. President, will the Senator yield for a unanimous-consent request, and also for an observation in response to the question of the Senator from Idaho and the Senator from Arkansas?

Mr. NELSON. Yes, I would be glad to yield, without losing the floor, to the Senator from Illinois.

Mr. STEVENSON. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the consideration of Senate Resolution 110: James B. Moran, Kenneth E. Gray, Thomas Wagner, and Sherry Towell.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENSON. Mr. President, I think the reason for this provision is evident. The Senate does from time to time have to retain the services of consultants. As a matter of fact, the Ethics Committee of the Senate is doing so now, and those consultants may be distinguished lawyers in the country, they might be a scientist, they might be a writer, and to require such persons, especially those of stature in the country, to divest themselves of all their outside interests, all directorships, for example, in corporations would effectively mean the Senate would be depriving itself of the opportunity to be served by some of the most accomplished persons in the United States. That is the purpose.

Mr. McCLURE. Mr. President, will the Senator yield on that point, because I agree with the desirability of availing ourselves of the help of various experts, whether they be a professor from an institution, an economist attached to an oil company, any of the various types of consultants. But why, if they are going to be on the payroll for an extended period of time, should they be exempt simply because they are paid on a per diem basis rather than a salary?

Mr. STEVENSON. That is how consultants are paid.

Mr. McCLURE. But if they are going to be around for more than 90 days why should they not be covered?

Mr. STEVENSON. I think if they are going to be around for a lot longer than 90 days they should not be paid as consultants and probably would not.

The Senator seeks perfection but will not find it.

Mr. RIBICOFF. Mr. President, will the Senator yield for further clarification?

Mr. STEVENSON. The Senator from Wisconsin has the floor.

Mr. RIBICOFF. Will the Senator yield for clarification?

Mr. NELSON. I yield.

Mr. RIBICOFF. This is what we will often find. For example, when the Government Operations Committee was required to go into the problems of regulatory reform, we called upon experts from law officers and law schools that had considerable experience. They were men who were high-salaried and had high earning capacity but very specialized knowledge. Generally, they do not work continuously. They work intermittently throughout the year.

As a further protection, it is my understanding that no Senator or no committee can hire an expert on a per diem basis without first going through the Rules Committee and getting specific permission from the Rules Committee to put someone on a per diem basis.

So when we go to the Rules Committee to put someone on a per diem basis, the Rules Committee has an opportunity to check the credentials and to check to see if this is justifiable.

We do not wish to deprive the Senate of experts who are only there for a limited purpose and for a limited period. Otherwise, we could not get them if the experts had to give up all connection with their prior employment. That is on item No. 3.

On item No. 2 concerning capital, what the committee was trying to do was instead of gains they were trying to conform with the Internal Revenue Code which talks about capital gains and through error of the staff they left out the word "capital." So what we are trying to do is when we are talking about gains that would go on one's income tax return it is a phrase of art consistent with the Internal Revenue Code which refers to capital gains.

Mr. McCLURE. I thank the Senator for the explanation.

Further reserving my right to object, I am concerned, however, with the provisions that No. 3 would seek to exempt consultants even though they may be paid more than 90 days a year. The Senator certainly is correct when he says that as to the consultants to be hired there has to be presentation to the Rules Committee. It is pretty largely pro forma that the minority is not consulted. There is no requirement that those consultants' background, associations, conflicts of interest, income, expenditures, or interest in the legislation be revealed. There is no provision at all that applies in any way at all to the minority staffing within the Senate.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. RIBICOFF. I do not think that is the case. I know when we had the problem of hiring consultants in the Committee on Governmental Affairs I consulted with Senator PERCY and we both agreed on a group of men who were completely bipartisan. If one goes to the Rules Committee I am sure it would be a surprise to Senator HATFIELD to say Senator HATFIELD was not consulted by Senator CANNON and their staff concerning consultants. My understanding is it is the full Rules Committee and not just a chairman of the Rules Committee. This is a matter subject to the full Rules Commit-

tee in which the minority and majority have an input, and most staffing then is done with experts. We do not have only majority experts.

I see the Senator from New York who is on the Governmental Affairs Committee. When we hire experts we try to make it as bipartisan as possible to serve the entire committee and never only the majority.

Mr. McCLURE. Let me say again, without simply repeating myself, that the consultants are not always hired on the basis of any bipartisanship. I know that as a matter of fact. Maybe they sometimes are. But there is no requirement in the rule that it be done. Indeed, the able Senator from Connecticut exercises his hiring in that manner. I commend him and I am sure that is why he enjoys the kind of representation he does in this body. But it is not done uniformly and there is no such requirement.

But if we are really going to get at the question of the ethics of the Senate with regard to possible conflict of interest, then certainly those consultants who are on board for extended periods of time ought not to be exempted from the same rules that apply to other employees of the Senate. Maybe we do not wish to enforce the divestiture requirement, but certainly it seems to me we ought to at least require the disclosure that is required of other employees of the Senate.

Mr. DURKIN. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield for a question.

Mr. DURKIN. I thank the Senator.

I commend this to the distinguished Senator from Wisconsin. I guess I started this. But No. 2, No. 3, and No. 6 would appear not to be technical amendments. I think it would be in order to lay those aside and the committee bring those up as regular amendments with a full explanation as to what is going on. I wish to suggest that. Then we can go on to more important things, and we can take a look at this and find out the full ramifications because, even though they may be entertaining, I think they are more than technical. I object.

Mr. NELSON. I think that the Senator from New Hampshire is correct. It would save some time to withdraw them.

I withdraw all of these amendments and direct the staff to reach agreement with the minority side on which are in fact technical, and the rest of them will be offered separately.

The PRESIDING OFFICER. The amendments are withdrawn.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. JAVITS. At what point does the Senator wish to get into a technical explanation of these various sections? Does the Senator prefer to do that after he has made his presentation to the Senate?

Mr. NELSON. I had intended to do that. I think it is necessary to make a long statement which explains the substitute on a section-by-section basis.

Mr. JAVITS. I think that is very desirable because I think, if I read the feeling of the Senate, we desire to adopt the code of ethics. I think we wish to adopt, generally speaking, this code; but I think Members wish to have before them some basic background concerning the proposal. Remember we spent long days and nights, with a tremendous amount of work on this. I am rather sympathetic with, for example, Senator DURKIN. I think we ought to wait with our amendments and everything until we have laid out the plan to be followed with the concepts we had. The code must not only provide for full financial disclosure but also certain restrictions and certain restraints.

I also say, if I may make this suggestion, that we have some very basic issues of principle contained in the code, for example, very strong statements about conflict of interest. This is our own home. We will have a Committee on Ethics. That committee will decide whether what a Member, officer, or employee is doing shows an attitude or course of conduct to the outside world which is incompatible with the performance of his duty here in the Senate.

I beg Members to bear that in mind. The underlying foundation of the code is the power of the Ethics Committee to arraign anyone for a violation of the code of conduct, even if it is not specifically included in this particular code, which is incompatible in a serious way with his responsibilities as a Senator, officer, or employee.

That has two points to it. First, it is an ultimate protection; that is, in this particular case we do have a rather open mandate with respect to our conflict of interest section, which is general. Second, Members should know how to conduct themselves, and that is where we try to be as specific as possible.

I would hope, therefore, that Members would hear the whole debate carefully, and study it, and, even if we delayed a day or two in getting to the finite detail, a grasp of what we were trying to do and how we were trying to do it with regard to the Members, including the residual safeguards to which I refer. These include, I think, a very democratic procedural safeguard as to how the Members should be charged. I think that it is essential before we get into the details of it, that Members have the whole rationale before them and I think the Members will be less inclined to get into detail as to this specific or that specific word.

Mr. NELSON. Mr. President, let me say to the distinguished Senator from New York that I join him in the statement that he has just made. As everyone here is aware, the resolution was adopted on January 18. It passed unanimously, and carried a set of instructions to the committee, and we had a very good bipartisan committee, but we were required to perform the task charged to be done in the resolution in a very short period of time.

We did have the benefit of 6 or 7 months of work that had been done on the same issues in the House of Representatives, and Representative OBEY and his staff were very helpful to us. However, as the majority leader mentioned, we did not hire outside staff. We did not have the necessary time to do so. Ira Shapiro of my staff became staff director, and he and other staff members worked together, day and night, and weekends, and did a very good job.

Senator JAVITS is correct; there are a number of important principles involved in the resolution. There are a number of positions taken in the resolution which are open to valid debate, and I think that we will get a valuable contribution from other Members who were not on the committee, and that the resolution can be improved. It is not a work that is beyond improvement by amendment.

I might say also that while the resolution came out of the committee with a unanimous vote of 15 to nothing, this does not mean that each and every member endorsed in toto each and every provision in the resolution, because they did not. We had votes, on which there were, as always, a majority and a minority; but when it was all over with, the members felt that on the whole it was a good resolution.

Those who were members of the committee all have the right and reserved the right to offer amendments on those specific provisions in the resolution with which they disagreed. That is their right. There will be other Senators who will have amendments to offer to the resolution, which should be carefully considered, debated, and voted upon.

There are some changes that I would be happy to accept without any debate so far as I am concerned, because I think they are improvements. But Senator JAVITS is correct that everyone should have an opportunity, now that the issue is before us, and the substitute amendment and a full explanation of the substitute will be furnished for the RECORD today.

I wish to point out that we ordered reported a resolution, and after the resolution was ordered reported, the ad hoc bipartisan subcommittee of six members was given the benefit, in a series of meetings, of the viewpoints of the members of the Ethics Committee. We did not have time, under the constraints under which we were operating, to go back to the full committee and make the changes that we thought ought to be made, and send out a new committee resolution. So the subcommittee unanimously agreed, in 2 days of meetings, on a substitute, which changed some provisions and postponed the implementation of others to later dates, to be studied by the appropriate committees.

That substitute then was offered as an amendment to the committee resolution, sponsored by myself, Senator THURMOND, Senator CLARK, Senator JAVITS, Senator PACKWOOD, and Senator RIBICOFF.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. NELSON. Yes, I yield.

Mr. RIBICOFF. First, just a comment. I want to pay special tribute to the Senator from Wisconsin (Mr. NELSON) for his leadership and dedicated work on a very complex subject, that took so much of his time. Senator NELSON gave everyone an opportunity for input, and the substitute is derived, really, as a re-

sult of serious questions raised by individual Members as well as by the Ethics Committee. The joint leadership, Senator ROBERT C. BYRD and Senator BAKER, had raised a number of rather fundamental questions that had been brought to them by various Members on both sides of the aisle, and as a result of that continuous scrutiny from various Members of the Senate and the leadership in the Ethics Committee, the so-called ad hoc drafting subcommittee felt an obligation to again review the work that we had achieved, to see if we could arrive at greater clarification and greater meaning for the rule that we had worked so hard to achieve.

Mr. NELSON. I thank the Senator.

Mr. President, I think it is appropriate at this point in the RECORD to call special attention to the staff members who worked long hours during the day, at night until midnight, and every weekend once we got started. They are Ira Shapiro, who is of my staff, and acted as chief counsel and staff director; John Napier, chief counsel to the minority; David Schaefer, deputy chief counsel; Andrew Loewi, counsel; Eric Hultman, counsel; Charles Warren, counsel; Brian Conboy, counsel; and Mildred Lehmann, staff consultant. They did especially good work and hard, dedicated work for the past several weeks, and the the Senate is in debt to them for their conscientiousness and their dedication in working on this resolution.

Mr. President, we are now dealing with the substitute amendment.

The substitute amendment proposes changes upon which the bipartisan ad hoc subcommittee agreed. So the remarks I will be making here in more detail than I really wish I had to do, are addressed to the substitute amendment, which is the pending business before the Senate.

Senate Resolution 110 contains three titles. Title I includes proposals for new Standing Rules of the Senate numbered XLII through L which would become the Code of Official Conduct of the Senate. While some of the rules include material which is restated from existing Senate rules, most of the provisions of the proposed rules are new.

Title II proposes amendments to the Senate Resolution 338, the basic charter of the Select Committee on Ethics, to set forth procedures for enforcing the Code of Official Conduct and other rules, regulations or laws within the jurisdiction of the Ethics Committee. Title II is designed to preserve for the Ethics Committee the discretion and flexibility needed to handle minor complaints as they see fit, while insuring accountability to the Senate and to the public when a serious charge is made.

Title III proposes a number of studies by other committees of the Senate on issues touched upon by this committee which the committee did not have the time or jurisdiction to fully resolve. Some of the reforms which the committee considered suggesting required a change in Federal law, rather than Senate rules; some of the steps which the committee proposes in Senate Resolution 110 will necessitate further action.

With this overview in mind, I would like to turn now to a more detailed summary of the contents of the resolution.

Proposed rule XLII mandates full public financial disclosure by Senators, officers and employees of the Senate earning more than $25,000 per year. This rule is at the heart of the code of conduct. At present, Senate rule XLIV, "Disclosure of Financial Interests" requires all Senators declared candidates for the Senate, and employees compensated at a rate in excess of $15,000 a year to file an annual financial statement with the Comptroller General. Only a very small portion of the information required to be filed is made available to the public for inspection, namely gifts or aggregates of gifts from a single source exceeding $50 in value, and the amount and source of each honorarium of $300 or more. All other financial information required to be reported is sealed and held by the Comptroller General and is not available to the public. The special committee agreed that this limited degree of public disclosure was not sufficient.

Proposed rule XLII would require complete financial disclosure of all income, assets, holdings, transactions and liabilities of Members, officers, and employees of the Senate, earning $25,000 or more. With respect to earned income, proposed rule XLII would require the reporting individual to list each source of earned income over $1,000, and the amount received from that source. A gift or gifts from one source with an aggregate value over $100 would also have to be reported, except that all gifts from relatives are exempt from disclosure. Gifts of food, lodging, transportation, or entertainment received from one source, having a value of more than $250 would also have to be reported. Gifts of personal hospitality from an individual, in his residence or in other facilities owned by him, need not be disclosed, because of the difficulty inherent in placing a value on personal hospitality. Because the proposed rule would require reporting of a number of gifts if their aggregate value exceeds $100, the committee realizes that the Members, officers, and employees will necessarily be required to keep records of gifts received. However, in order to avoid onerous or trivial recordkeeping, it would not be necessary to aggregate gifts with a value less than $35.

For disclosure of investment or "passive" income or holdings, assets, or liabilities, proposed rule XLII utilizes the category of value approach. In using categories of value, the committee is following the approach taken by the Carter administration and the House which is endorsed by Common Cause. The use of categories serves the purpose of disclosing one's financial interests without requiring an expensive and burdensome annual appraisal and evaluation of assets. The purpose of financial disclosure is simply to provide information to the public concerning the financial interests of elected officials. Disclosure involves, quite simply, questions of openness and confidence in our public institutions.

Under the category of value approach, a reporting individual would describe an asset or a holding, and place it in the appropriate category of value. For example, if a reporting individual owned stock in XX company, the reporting individual would list: stock in XX company, in the category from $15,000 to $50,000. These categories of value would be used to list all income, other than earned income; holdings of real property; each item of personal property held in trade or business or for the production of income; each liability incurred during the year exceeding $2,500; and each transaction in real estate or securities or commodities exceeding $1,000.

Senate officers and employees would also have to list any agreements they have made concerning employment after they leave the Senate, and identify any person who had paid them compensation in excess of $5,000 in either of the 2 calendar years previous to coming to the Senate.

In setting forth the requirements for disclosure, the special committee has sought to avoid imposing an undue financial or time burden on the individuals required to report. Under the proposed rule, an individual could report a holding of real property by describing the holding, size and location, and listing the purchase price and the date of purchase. For personal property, in which the fair market value cannot be accurately estimated, such as the value of a small business, the reporting individual can list the net worth, if it is a partnership; the equity value, if it is an individually owned business; the book value of a close corporation, or any other recognized indication of value. Each of these methods of valuing an enterprise was chosen because it is a calculation which can easily be arrived at from information the business will have on hand for accounting purposes or for the purposes of obtaining ordinary business loans. It is understood that the valuations arrived at by these procedures will not necessarily equal fair market value, but they sufficiently identify one's economic interests for our appropriate public purpose.

With respect to holdings or assets of personal property, the crucial issue is whether they are held in trade or business or for the production of income. If they are not, such as automobiles, jewelry, works of art, or furniture, they would not have to be reported. Similarly, a life insurance policy, even with a cash surrender value, would not have to be reported because it is not an asset held in trade or business or for the production of income.

In striking the balance between public disclosure and personal privacy, the committee spent significant time discussing the issue of disclosing the income and assets of the spouse of a reporting individual. To request a Member, officer or employee of the Senate to report information about his spouse's income or holdings presents a serious question of invasion of privacy concerning any person who is not working for the Senate. Nevertheless, the committee did not feel that the legitimate governmental interests in public financial disclosure could be accomplished without some reporting with respect to the interests of a spouse. As a general proposition

it is unrealistic to believe that one spouse does not have an interest in investments or other holdings in the name of another spouse or dependent, or that one spouse does not have a continuing interest in the other's ability to earn his or her income.

In light of these very complex problems, the committee attempted to strike a delicate balance which protects to the fullest extent possible the public interest and the interest of the spouse and dependents of a reporting individual. Under the proposed rule, the reporting individual would simply list the identity of any employer which paid the spouse or dependent over $1,000. The amount would not be listed. With respect to investment holdings, liabilities and transactions of the spouse or dependent, the committee concluded that the reporting individual should report these items with the same degree of specificity he reported his own.

The committee also paid careful attention to the issue of blind trusts. A number of Senators have established blind trusts in order to shield themselves from knowledge of their investment holdings. This is an accepted and long established traditional practice. However, the committee concluded that public disclosure is still the best method of securing that public confidence so vital to the effectiveness of all public institutions.

For this reason, the committee has chosen to rely on disclosure, rather than blind trusts. The committee has recognized one exception to the rule that the holdings of a trust must be disclosed. Disclosure is not required if the trust was not created by the reporting individual, his spouse or dependents; if they have no knowledge of the contents or source of income; and they have requested the trustee to furnish information about the holdings of the trust, and the trustee has refused. In all other cases, disclosure is required, and proposed rule XLII includes a statement that it is the sense of the Senate that blind trusts shall be dissolved to permit the disclosure required by this rule. While a Senate rule cannot require the dissolution of an irrevocable trust, the committee feels that this statement of policy will permit anyone who has set up an irrevocable trust principally for the purpose of creating a blind trust to request that the appropriate authority permit him to dissolve that trust.

The proposed rule also provides for "spot" auditing of financial disclosure statements by the General Accounting Office. A Senator would be audited once during a 6-year term. The audit would not occur during an election year. Five percent of the statements filed by officers and employees will be audited each year, on a random basis.

The Committee intends that the Comptroller General to the extent practicable, should pattern such audits after the audits of Federal income tax returns presently performed by the Internal Revenue Service. An audit by the General Accounting Office should generally include a review of the reporting individual's Federal income tax return and other supporting documentation which the auditor requests. The auditor, however, need not certify the accuracy of every figure on the public financial disclosure statement. The auditor should use reasonable means to spot check the accuracy of the disclosure statement, but in the final analysis, the auditor may accept a figure on the disclosure statement, unless in his review of the statement, a doubt is raised.

To facilitate the audits, the proposed rule also provides for the continuation of the current Senate practice of a sealed filing of an individual's tax returns, now required by Senate rule XLIV. The tax return is an indispensible document for the conduct of the audit.

Proposed rule XLII also requires disclosure by candidates for the Senate, once they have taken the steps required under the Federal Election Campaign Act to become a candidate. In any year that a person is a candidate, he must file a financial disclosure statement for the previous year. In this way, the public will have access to the same financial information about candidates for the Senate as they have about incumbent Senators.

This rule takes effect on October 1, 1977. Those required to file under proposed rule XLII will have to do so by May 15, 1978, for the last quarter of 1977. For this year, the requirements of current rule XLIV remain in effect; the reporting individual will have to file for the first 9 months of the year under that rule. In both cases, the reporting individual can report for the whole year if that would be more convenient.

Proposed rule XLII deals with gifts. Under the present rule of the Senate, all gifts in the aggregate value of $50 or more received by a Senator from a single source during a year must be reported, but the reporting is sealed and held by the Comptroller General. As with financial disclosure, the committee concluded that sealed reporting does not adequately promote public confidence. In proposed rule XLIII, the committee has placed a $100 aggregate limit on a gift or gifts from an individual or an organization having a "direct interest in legislation" or a foreign national. However, gifts of less than $35 need not be aggregated toward the $100 limit.

The term "direct interest in legislation" is defined to cover registered lobbyists; officers and directors of such lobbyists and those employed by or retained by such lobbyist to influence legislation; and those corporations, unions or other organizations which have established political action committees under the Federal Election Campaign Act; the officers and directors of such organizations, and those employed or retained by them to influence legislation. The committee's intent was to place a low ceiling on gifts which could be received from certain individuals, organizations, or corporations which are in the business of trying to influence legislative process and have far more regular direct contact with the Members of the Senate and their staff, and the committee believes that there will be little serious dispute that registered lobbyists and organizations establishing PACS fall clearly into this area.

In defining "direct interest in legislation" in this matter, the committee has considered—and rejected—an alternative approach used by the Obey Commission in the House. While also prohibiting gifts from those having a "direct interest in legislation," the Obey Commission defines direct interest in legislation broadly as "including, but not limited to" registered lobbyists. The committee concluded that this definition could pose insoluble problems. If "direct interest in legislation" were not carefully defined, it could be without much imagination stretched to cover every American. The committee felt it preferable to tie the definition to two groups of people and organizations whose distinct interest in influencing legislation is generally recognized.

Exempted from the prohibition on receipt of gifts aggregating over $100 from a single source are all gifts from relatives and gifts of personal hospitality. The "personal hospitality" exemption, however, extends only to entertainment in a residence or facilities owned by an individual. If a residence or boat were owned by the corporation, the gift would have to be valued and subject to the $100 ceiling if the corporation had "a direct interest in legislation."

This proposed rule defines gifts and also spells out certain things which are not "gifts." Not treated as gifts under the rule are: political contributions otherwise reported under law; commercially reasonably loans; bequests, inheritance or other transfers at death; bonafide awards in recognition of public service and available to the general public; receptions at which an individual is honored, provided that the individual receives no other gifts that exceed the restrictions of the rule other than a suitable memento; and something of value given to a spouse of a reported individual by his or her employer in recognition of services performed.

Under this rule, Members, officers, and employees or their spouses or dependents are prohibited from knowingly accepting gifts of an aggregate value of over $100 from an organization or person with a "direct interest in legislation," or knowingly permitting their spouse or dependents to accept such gifts. The requirement of "knowing" acceptance is intended to avoid placing Members, officers, and employees at their peril and to insure against inadvertent acceptance of prohibited gifts. If an individual mistakenly takes a gift, no violation of the rule can occur until the individual knows of the source and value of the gift. If upon finding out that the gift should not have been taken, the individual keeps the gift, only then is the individual in violation of the rule. However, this section is governed by the requirement of "reasonableness" which underlies the whole rule. An individual cannot accept a gift simply by intentionally remaining ignorant as to the source of the gift.

The rule also contains a general admonition against accepting present or future gifts from a person or business under circumstances where the Member,

officer, or employee knows by the exercise of ordinary care that the gift will have, might have, or is intended to have the effect of influencing his present or future performance of official duties. It is not the intention of this provision of the rule to require Members, officers, or employees to imagine from the giving of a gift every possible motive that a donor might have. The "ordinary care" standard affords protection to the recipient. A reasonable person exercising ordinary care would not be surprised to receive a generous gift from a family member or a close personal friend. However, the same gift from a stranger or a casual acquaintance would clearly be suspect. It is the intention of the committee that Members, officers, and employees should not accept gifts which they know or should have reason to know are given with the intention of influencing their performance.

Proposed rule XLIII on gifts interrelates with the provision of the financial disclosure rule XLII relating to gifts. Where the gift rule places a prohibition on gifts over $100 from a class of persons or organizations with a "direct interest in legislation," the disclosure rule requires disclosure of the source and value of all gifts—except from relatives—in the aggregate amount of over $100 in a calendar year. Transportation, lodging, food and entertainment aggregating more than $250 in a year from one source also must be disclosed, with exemptions for personal hospitality and gifts with a value of less than $35.

Proposed rule XLIV would limit the outside earned income of Senators, officers and employees of the Senate compensated at a rate exceeding $35,000 a year to 15 percent of their annual salaries. This rule would apply to full-time employees. The committee intends that consultants or other outside professionals hired on a per diem basis or similar arrangement should not be subject to the 15 percent outside earned income limitation. Under this proposed rule, a Senator cannot receive honoraria in excess of $1,000 per appearance, speech, or article published. At the present time, the Federal Election Campaign Act Amendments of 1976 place a limit on honoraria of $2,000 per appearance, speech or article, and $25,000 on total honoraria for the year. The effect of this rule would be to limit a Senator to honoraria of $1,000 for each appearance, speech, or article and a maximum of $8,625 per year, if the Senator earned no other outside income. The honorarium amount listed is the net honorarium, excluding reimbursements for travel expenses or agent's fees. However, a Senator, officer or employee may accept honoraria in excess of the limit, up to $25,000, if the individual donates such honoraria to a charitable entity and no tax benefits accrue.

Under this rule, outside earned income is defined as any income received as a result of personal services actually rendered if such services are material income-producing factors, and the active and actual participation of the individual is involved.

Outside earned income that falls into this category is income such as wages, salaries, professional fees, bonuses, commissions on sales or on insurance premiums, tips, prizes, or awards in recognition of personal services.

Several matters warrant particular attention. Honoraria have been discussed above. Stipends, according to FEC regulations, are any payments for services on a continuing basis, including a salary or other compensation paid by news media for commentary on events other than the campaign of the individual compensated. Because of the continuing nature of the services involved, stipends are not subject to the $1,000 limitation per appearance which applies to honoraria. However, they are covered by the overall 15 percent limit on outside earned income.

The committee has also excluded from the earned income limitation advances on books from established trade publishers under usual contract terms. In making this distinction, the committee recognized that most book contracts involve a sizable advance against royalties to cover the expenses of research, drafting and printing of an original manuscript. The committee does not wish to discourage advances against royalties from bona fide publishers for serious projects. In contrast, if a corporation or trade association promoted a cash advance arrangement knowing that they could control the number of books sold, the advance would not be "from an established trade publisher under usual contract terms," and it would be treated as within the 15 percent limitation.

While some advances on books, as noted above, are included in outside earned income, royalties actually received from the sale of books are not to be included in outside earned income, since such royalty income is not directly or necessarily related to actual personal services rendered. If an individual writes a book, and it becomes a bestseller, any royalties received based on the sale of the book are, for the most part, beyond his direct control. It is income which is, in effect, a return on a prior investment of time and energy.

Proposed rule XLIV also sets forth a list of sources of income which would ordinarily not be included in outside earned income. Besides royalties, already discussed, the list includes income from family enterprise if the services provided by the Senator, officer or employee are not material income-producing factors; gain derived from dealing in property or investments; interest; rents; dividends; alimony; separate maintenance payments; annuities; income from discharge of indebtedness; a distributive share of partnership gross income if the services provided are not material income-producing factors; income from an interest in an estate or trust; and any reasonably buy out arrangement from a professional partnership or business. Because the decisive factor is whether income results from personal services which have actually been rendered during a calendar year, disability benefits, veterans' benefits, and income from various pension and most deferred compensation plans would not be included under the outside earned income ceiling. However, the key is whether the Member, officer or employee is presently rendering personal services. If a Member is receiving compensation for personal services rendered during the calendar year, he cannot escape the outside earned income ceiling merely by deferring the receipt of compensation.

The committee recognizes that it is not uncommon for a Senator or employee to come to the Senate after having a substantial financial interest in a family enterprise such as a family farm, ranch or business. It is also not uncommon for that individual to maintain some involvement in that business while serving in or employed by the Senate. This is also true of any partnerships of two or more individuals where a distributive share of gross income is received by the Senator or employee. The committee intends that income derived from a family enterprise should be considered as earned income, subject to the 15 percent limitation, if the Senator or employee is providing personal services which are material income producing factors.

Proposed rule XLV contains a series of provisions specifically designed to prevent conflict of interest or the appearance of such conflicts of interest, which can be equally damaging to public confidence. This rule contains a prohibition against a Member, officer or employee receiving compensation or allowing compensation to his beneficial interest from the use of influence improperly exerted from his position. For example, this provision of the rule prohibits Members, officers or employees from intervening with Federal agencies for the purpose of furthering their financial interest or receiving compensation from a constituent for the purpose of furthering the interest of a constituent. The rule also provides, as with current Senate rule XLI, that no Member, officer or employee of the Senate shall engage in any outside business activity or professional activity or employment for compensation which is inconsistent or in conflict with the conscientious performance of official duties. In connection with this prohibition, officers or employees of the Senate are obligated to file a report in writing with their supervisors and to obtain their supervisors' permission to engage in outside activity.

The committee received testimony from witnesses who advocated that procedures be established to insure that Members not be able to serve on committees or vote on issues if they had financial holdings which could be affected by these actions. The committee has carefully considered these suggestions and rejected them. We have found that it is one thing to describe cases which could pose a disturbing conflict of interest, and quite another to formulate a rule which meets the worst case without becoming unreasonable. A rule designed to prevent conflict of interest can easily result instead in depriving the Senators' constituents of full representation and depriving the Senate of valuable expertise.

One section of rule XLV provides that no Member, officer or employee of the Senate shall knowingly use his official

position to introduce or aid the progress and passage of legislation, a principal purpose of which is to further his pecuniary interest, the pecuniary interest of his immediate family, or the pecuniary interest of a limited class of people or enterprises, when he, his family or enterprises controlled by them are part of the affected class. By "limited class," the committee means a class which resembles closely the class of people affected by a private bill, rather than a class making up an economic interest group. The committee recognizes that in many cases, legislation advancing through the Senate will have some impact on the financial situation of a Member, officer or employee. Ordinarily, however, the impact on an individual's holdings is likely to be quite minimal in comparison to the impact of the legislation on the public and the public interest served. This provision addresses itself to the rare case when the relationship between the legislator's private interest and the public interest is dramatically different from the ordinary situation.

Another provision of this rule provides that a Member, notwithstanding the provisions of Senate rule XII, may decline to vote, in committee or on the floor, on any matter where he believes that such a vote could represent a conflict of interest, or the appearance thereof. This provision deals with both committee and floor voting and removes the consent of the Senate required by rule XII in the case of abstention from voting on the floor.

It is not the intent of the committee to encourage abstentions from voting but it is the committee's intention to make it procedurally easier to abstain in those cases where the Member believes that abstention is advisable, because of a conflict of interest, or the appearance of a conflict. In such a case, the Senator would have to state that he was abstaining because of a conflict of interest.

Rule XLV also provides that no Member, officer or employee of the Senate compensated at a rate in excess of $25,000 per year and employed for more than 90 days in a calendar year—unless hired on a per diem basis—shall provide professional services for compensation.

This provision reflects the committee's belief that the practice of a profession usually requires substantial amounts of personal involvement and time and may also present conflicts of interest or in some cases an appearance of such conflicts. While the practice of law poses special difficulties and conflicts because of the obligations imposed by the attorney-client privilege, the committee felt that other professional services also demanded a substantial time commitment and could pose conflict of interest problems. This paragraph reaches the major professions in addition to law, such as medicine, engineering, architecture and similar types of activities. The committee also intends the ban to reach service as a real estate or insurance agent or consultant but it is not intended to deal with jobs such as plumbers, auto mechanics, or hairdressers, which may be considered professional services but rarely pose potential conflict of interest problems. Engaging in part-time teaching or study in a professional field does not constitute practicing a profession or rendering professional services and is therefore not affected by this paragraph.

This proposed rule also provides that no Member, officer, or employee shall serve as an officer or member of the board of any publicly held or publicly regulated corporation, financial institution, or business entity. The prohibition does not apply to service without compensation as officers or directors of entities exempt from tax under section 501(c) of the Internal Revenue Code of organizations that are principally available to Members, officers, or employees of the Senate or their families.

Service on corporate boards or in corporate office may entail an unavoidable conflict of interest or the appearance thereof. The association of the bar in the city of New York in "Congress and the Public Trust" observed that—

> When a Member accepts a corporate office or directorship, he takes on a whole new set of relationships and duties beyond those of a stockholder. Mere ownership of interests carries considerably less potential for impairing independence. As a director or officer, he actually becomes a fiduciary for the corporation and for its stockholders charged with the duty to further their interest. He obviously will find it difficult to do this at times because he is also charged with the duty of furthering the public interest, and the two interests may well be in conflict.

In treating tax exempt organizations differently, the committee recognized that the public would not be and is not equally troubled about a Member, officer, or employee who serves on a board of a nonprofit organization. Consequently, if a Member, officer, or employee wishes to hold office in such an enterprise or be on the board of directors, it would be permissible, except that no compensation could be received for such services.

Rule XLV next provides that full-time employees of Senate committees paid at a rate in excess of $25,000 per annum shall divest themselves of any investment holdings which may be affected by the work of the committee served on by such employees, unless written permission is received from a supervisor, as defined in this rule, and the select committee.

The committee recognizes that this section treats committee staff differently than it treats Senators with regard to investments. However, it is our view that unlike Senators, committee staff are not publicly accountable, and despite public financial disclosure, their affairs are unlikely to get the same kind of scrutiny from the public and the press as Senators. At the same time, committee staff members hold responsible positions. For these reasons, the committee believes that staff holdings should be treated with particular care.

The proposed rule next provides that if a Member upon leaving office becomes a registered lobbyist or is retained by a registered lobbyist under such a statute, that former Member may not lobby Members, officers, or employees of the Senate for a period of 1 year after leaving office.

This provision is designed to prohibit Senators from coming back immediately after leaving the Senate to use their personal relationships with the Senators or Senate staff to influence the course of legislation as a paid lobbyist. It is not our intention to prohibit former Senators from becoming registered lobbyists for the 1-year period. They would still be permitted to carry on lobbying activities directed at members of the executive branch or the House of Representatives. However, if lobbying was directed at Senators or officers and employees of the Senate, the prohibition would apply.

A similar lobbying prohibition applies to employees on personal staffs and committee staffs. An employee on a personal staff of a Senator who becomes a registered lobbyist or an agent or employee of such a lobbyist may not lobby the Member or his staff for a period of 1 year after leaving that office. Employees of committees in the same situation may not lobby any members of the committee or the staff of the committee for a period of 1 year.

The committee recognizes that some staff people can obtain from their Senate service access to influencing future Senate decisions which the general public does not have. Nevertheless, it is necessary to balance possible conflicts of interest against the rights of individuals who have served in the Senate to go out and make a living in the way that they choose. Thus, a 1-year post-service restriction in the area where the individual could have the most influence was agreed upon as a fair resolution of the problem.

Proposed rule XLVI deals with the subject of unofficial office accounts. Many Senators currently spend funds, in addition to the official funds provided by the Senate, to defray expenses incurred in connection with their official duties. Such additional funds are used for food and lodging within the Member's State; for videotaped and recorded messages to the Member's constituents; for business lunches; for assistance rendered by academic, professional, and other expert consultants; for seminars conducted by a Member for constituents; for newspaper subscriptions; for stationary; office supplies and equipment; and for other purposes.

Generally, there are three sources for such funds; the Senator's personal resources; the Senator's official campaign committee, registered with the Federal Election Campaign Commission; or an unofficial office account, maintained by excess campaign contributions and by other contributions specifically designated for the account.

The Federal Election Campaign Act (2 U.S.C. 439a) provides that excess campaign contributions and any other contributions to unofficial office accounts may be used to defray any ordinary expenses incurred as a holder of Federal office. Section 439a further provides that contributions to and expenditures from unofficial office accounts

must be fully disclosed, although Federal Election Commission regulations for such disclosure have yet to take effect.

The present Senate rule XLII limits the use of campaign contributions to certain specified expenses related to official duties. Under present rule XLII, campaign contributions may not be converted to personal use, even though such conversion would be legal under section 439a.

The committee believes there are a number of serious problems with the present situation. No disclosure requirements are yet in force for the accounts. Contribution limits, both as to amount and source, do not exist, and the tax consequences of unofficial office accounts are uncertain. For these reasons, on balance, the committee decided to recommend, in rule XLVI, a prohibition of unofficial office accounts.

Under the rule as proposed, contributions to unofficial office accounts would cease the day after the day the resolution was agreed to. Until December 31, funds previously collected in unofficial office accounts could be expended. After that time, under the committee's proposal, unofficial office accounts would be banned. However, because the committee recognized that certain expenditures will not be eligible for reimbursement by the Senate and at the same time will not be directly related to a campaign for election to public office, the committee provided that funds derived from a political committee—fully disclosed and regulated under the Federal Election Campaign Act—may be used to defray expenses incurred by a Member in connection with official duties.

Since the markup session, at which the proposed rule XLVI was approved by the committee, some members of the committee have given the problems of unofficial office accounts considerable additional thought. While I believe that proposed rule XLVI would represent a significant step forward from the present situation, because of the FECA disclosure and reporting requirements and the limits on accounts and sources of contributions, difficulties remain with this approach.

In the House, the Obey Commission recommended—and the full House adopted—a flat ban on the use of unofficial office accounts and political funds to pay for unreimbursed ordinary and necessary business expenses: in effect, building an absolute wall between political expenses and official expenses. This approach has been widely acclaimed. As a recent Louis Harris Survey makes clear, "the people do not want private funds to be used to pay for the public's business." This approach may also be more satisfactory to the IRS than our proposed rule. An amendment has been prepared, which will ban not only unofficial office accounts to defray ordinary and necessary business expenses, but also the use of campaign or political contributions for this purpose.

Because unofficial office accounts have filled a void for some Senators created by the inadequacy of official allowances, both in terms of permissible uses and amounts, the committee has recommended that the Rules Committee study the problem of the sufficiency and flexibility of official allowances and report back to the Senate within 120 days. For example, it does not seem reasonable that Senators traveling in their State on official business may not be reimbursed for expenses of food and lodging.

Proposed rule XLVI would also prohibit the conversion of campaign contributions to personal use. This provision continues the policy of current Senate rule XLII and extends the prohibition to any former Senator who retires or is defeated for reelection.

Proposed rule XLVII deals with foreign travel.

The committee is recommending the abolition of so-called lameduck travel. If a Member is a candidate for reelection and loses, he may not receive U.S. Government funds for travel outside the United States. If a Senator's term will expire at the end of a session of Congress, and the Senator is not seeking reelection, he may not receive U.S. Government funds for travel after the general election in which his successor is elected or the adjournment sine die of that session of Congress, whichever is earlier.

The committee recognizes that there can be value to foreign travel by a Member in certain instances, even though the Member is not returning to the Senate for the next Congress. The trip by Senator Mansfield last year to China is a recent example. A Member might be requested by the President to represent this country on a diplomatic mission or a Member's knowledge and insight might be desired by the Senate on a factfinding mission even though that Member will not be returning to the Senate. For this reason, rule XLVII provides that in special circumstances, the Senate may authorize the use of U.S. Government funds for that purpose. This would be done by the passage of a resolution by the Senate. If the Senate has adjourned sine die, the rule permits the President to authorize such travel.

Proposed rule XLVII would prohibit a Member, officer or employee engaged in foreign travel from accepting funds from the U.S. Government to cover any expense for which that individual has received reimbursement from any other source, and from receiving reimbursement for the same expense more than once from the U.S. Government. It also prohibits a Member, officer or employee from using any funds furnished to him to defray ordinary and necessary expenses of foreign travel for any purpose other than the purpose or purposes for which such funds were furnished.

Proposed rule XLVIII deals with the franking privilege and the use of the Senate radio and television stations. The purpose of the rule is to preserve the frank as a vital instrument for communicating with constituents, while at the same time attempting to insure that the advantages which the frank gives to incumbents over potential challengers will not be excessive. Therefore, proposed rule XLVIII would extend from 28 to 60 days the period before a primary or general election during which no mass mailing could be sent out under the frank. The rule would also limit the use of the frank for mass mailings, at all times, to material which is prepared or printed at Government expense, eliminating the possibility that an incumbent could absorb the cost of printing a newsletter and then mail it at public expense. Unless such a rule is adopted, a relatively small amount of private funds can lever enormous amounts of public funds to pay for postage.

Proposed rule XLVIII also contains a requirement that mass mailings be filed annually with the Secretary of the Senate and a prohibition against the use of the Senate computer facilities to store, maintain or otherwise process any list or categories or lists for names and addresses identifying individuals as campaign workers or contributors, or by any other such political designation.

Finally, proposed rule XLVIII applies the same 60-day restriction applied to franked mail to use of the radio and television studies in the Senate and House of Representatives. The rationale is the same as in the franking case: The use of a Government-subsidized facility during an election period provides an incumbent with an unfair advantage. However, there is an exception to cover situations where the recording studio may be used for interviews by local broadcast organizations who pay for any expense incurred and for use at the request of tax-exempt organizations such as charities in situations where Members are asked to make fund appeals for those charities.

Proposed rule XLIX prohibits any officer or employee of the Senate from receiving, soliciting, holding or distributing funds in connection with campaign for nomination or election to any Federal office. From this blanket prohibition, two individuals designated by each Senator are exempted, one to be located in Washington, D.C. and the other in the home State of the Senator. These individuals must be compensated at an annual rate in excess of $10,000 and their designations must be filed in writing with the Secretary of the Senate's Office. Because of their designation, these individuals must also file a financial disclosure statement, even if they would not otherwise be required to file.

The proposed rule amends present Senate rule XLIII. The basic intent of the rule is to prohibit Senate employees from getting involved in the process of raising funds for a political campaign. However, the rule also reflects the fact that a Senator's office cannot be fully insulated from the fund raising process. For example, political contributions or payments for tickets may often come to the Senator's office mistakenly. However, the present rule would seem to permit the designation of as many people as the Senator desired; the new rule would limit each Senator to two designees, one in the District of Columbia and one in the home State. Unlike the present rule, the new rule would also prohibit even those designated people from "soliciting" funds or contributions; they could only hold or accept contributions or deposit

them with the appropriate campaign organization.

Proposed rule XLIX also deals with a definitional problem which has recurred throughout the drafting of these rules. It was the committee's intention to define "employee of the Senate" as "any employee whose salary is disbursed by the Secretary of the Senate." However, the committee realized that this definition would be too restrictive to accomplish the purpose of this legislation. There are some people working in the Senate in important policymaking positions whose salaries are not disbursed by the Secretary of the Senate. Some are reemployed annuitants, whose salaries from the Senate may be minimal but are supplemented by their annuities; others are on leave from other Government agencies, but are still receiving their salaries from those agencies. Still other people work in the Senate while on leave from private enterprise or while sponsored by some outside organization. The committee intends that coverage by the Code of Conduct should depend on the fact that the person is working in the Senate, rather than on whether the Senate is actually disbursing the person's salary. For this reason, rule XLIX defines "employee of the Senate" to include retired annuitants. Additionally, this rule would require that before any committee of the Senate could utilize the services of an officer or employee of another agency of the Government, the Rules Committee shall require that individual to agree in writing to comply with the Code of Conduct to the same extent as an employee of the Senate. To insure that such an individual is covered by the proper rules of the code, individuals borrowed or detailed from other Government agencies shall be treated as receiving a salary from the Senate equal to the salary the individual is receiving from another Government department. Individuals who are working in the Senate while on leave from private enterprise would have to agree in writing to comply with the Code of Official Conduct in the same manner and to the same extent as an employee of the Senate.

Proposed rule L would prohibit Members, officers or employees from engaging in discriminatory employment practices—with respect to hiring, firing, promotion, compensation, or terms, conditions, or privileges of employment—on the basis of race, color, religion, sex, national origin, or state of physical handicap. The language of rule L is taken verbatim from paragraph (a) of Senate Resolution 534, 94th Congress, agreed to September 8, 1976.

Because of the complex questions connected with the implementation of this rule, the effective date of the rule has been put off until January 3, 1979. In section 309 of the resolution, the Government Affairs Committee has been asked to fully study the issues relating to the adoption of the rule, and to report back to the Senate in 180 days. That committee's recommendations will be referred to other committees of the Senate as necessary.

Title II of the resolution consists of proposed amendments to Senate Resolution 338, which constitutes the basic charter of the Select Committee on Ethics. As written, Senate Resolution 338 grants the Ethics Committee broad discretion to "receive complaints and investigate allegations of improper conduct which may reflect upon the Senate—and in violations—relating to the conduct of the individuals in the performance of their duties." Title II is intended to preserve for the Ethics Committee the discretion to initiate investigations as it sees fit and to handle all unsworn complaints and sworn complaints against employees by procedures it deems appropriate while at the same time insuring that sworn complaints against Members and officers of the Senate will be handled so as to insure accountability to the Senate and the Public.

Under the proposed amendment set forth in title II, if a sworn complaint is filed against a Member or an officer, the Ethics Committee shall promptly conduct an initial review of length and scope necessary for the Ethics Committee to determine whether there is substantial credible evidence which provides substantial cause for the committee to conclude that a violation within its jurisdiction has occurred.

If, as a result of the initial review, the Ethics Committee determines, by a recorded vote, that there is not such substantial credible evidence, it shall notify the complainant and the accused of its finding and an explanation of the basis for the determination.

If the initial review points to the conclusion that a technical, inadvertent or otherwise de minimis violation has occurred, the Ethics Committee shall notify the complainant, and the Member or officer may correct the violation.

If, as a result of their initial review, the Ethics Committee finds that substantial credible evidence points to a violation which is more than de minimis, but not sufficiently serious to justify the most serious penalties, the Ethics Committee may propose a remedy it deems appropriate. If the matter is resolved, a summary of the committee's conclusions and the remedy proposed shall be filed as a public document with the Secretary of the Senate and a notice of such filing shall be printed in the CONGRESSIONAL RECORD.

If, as a result of an initial review, the Ethics Committee determines that there is substantial credible evidence pointing to a violation which would justify censure, expulsion or a recommendation to the party conference concerning seniority, if a Member is involved; or suspension or dismissal, if an officer is involved, the Ethics Committee must undertake an "investigation."

"Investigation" is used in this title as a term of art with a specific, narrow meaning. Many activities which would ordinarily be called an investigation will not fit within the definition used here. The committee may inquire into a matter and begin collecting information without voting to conduct an "investigation." An "investigation" is the formal part of the committee proceeding which takes place only after the committe has concluded that there is substantial credible evidence which, if true, would constitute a serious violation within the jurisdiction of the committee. By requiring "substantial credible evidence" before an investigation can begin, the committee intended to require a high standard of proof, comparable to "probable cause," without the overtones of criminal activity that probable cause carries with it. If an "investigation" is mandated, the Ethics Committee must report to the full Senate on the matter, together with any recommendations it may have. If an investigation is undertaken, the presumption is that outside counsel will be used, unless the Ethics Committee decides not to.

The committee believes that if an individual files a sworn complaint against a Senator or officer of the Senate, subject to the pains and penalties of perjury, that individual is entitled to be informed of the disposition of the complaint. The committee, after consultation with Senators STEVENSON and SCHMITT, has formulated this proposal outlining the possible avenues by which the Ethics Committee should handle sworn complaints. Of course, the Ethics Committee has total discretion to weigh the evidence and decide the degree of severity of a violation which may have occurred.

Because the Ethics Committee inherits the responsibility of enforcing the Code of Conduct, title II provides them with authority to issue regulations to implement the code and interpretative rulings to clarify its meaning and applicability on difficult issues. The Ethics Committee is also authorized, in its discretion, to issue written advisory opinions in response to a request by an employee and required to issue such opinions in response to requests by Members, or officers of the Senate, of candidates for the Senate. However, these requests for advisory opinions must apply to the personal situation of the individual requesting the advisory opinion. Any individual who receives an advisory opinion and relies on it in good faith cannot be subject to any sanction by the Senate for actions in connection with the advisory opinions, unless the request for an advisory opinion did not include a complete and accurate statement of the factual situation. Advisory opinions can also be relied upon by any other person whose situation is factually indistinguishable in all material aspects from the transaction or activity about which the advisory opinion is rendered. The Ethics Committee is obligated to compile and index the advisory opinions and make them available on a periodic basis, with appropriate deletions to preserve the privacy of the individual involved.

Title III of the resolution mandates certain studies by other committees of the Senate on issues touched upon by the special committee which the committee could not fully resolve.

Sections 301 and 302 concern the implications of proposed rule XLVI, banning unofficial office accounts. Section

301 directs the Committees on Rules and Appropriations to study the adequacy of the amounts and permissible uses of senatorial allowances and make recommendations to the Senate about needed adjustments, in light of proposed rule XLVI. As noted earlier, if the Senate bans unofficial office accounts, there is a serious question whether the existing official allowances are sufficient or flexible enough.

Section 303 of this title provides that the Committee on Rules and Administration shall review the desirability of promulgating regulations providing for first, periodic audits of the accounts of all committees and offices of the Senate; second, a centralized system of record-keeping and reporting relating to the accounts, allowances, expenditures, and travel expenses of committees and Senate offices; third, accounting procedures for the handling of accounts of committees and Senate offices, and fourth, public disclosure of information on the accounts of committees and Senate offices in a form which segregates the allowances and expenses of each committee and office.

Section 304 provides for the Committee on Rules and Administration to consider the desirability of requiring that only official Senate funds be used to pay for expenses incurred by a Senator in the use of the radio and television studio provided by the Senate.

Section 305 of this title provides that the Committee on Foreign Relations shall review the problem of travel, lodging and related expenses of Members, officers or employees of the Senate, paid for by foreign governments when it is not possible to procure such transportation, lodging, or related services, or to reimburse the foreign government. At present, there is a question whether acceptance of travel from a foreign government can violate the Foreign Gifts and Decorations Act, 5 U.S.C., section 7342. In certain countries, however, such as China, only official Government transportation can be used and it is not possible to reimburse the Government for such transportation. The committee believes that this situation should be clarified by a determination of whether the Foreign Gifts and Decorations Act was intended to cover this kind of situation.

Section 306 provides that the Committee on Governmental Affairs shall consider the desirability of permitting Senators to use the postal patron form of address for franked mail and report to the Senate. The use of the postal patron method of mail delivery, whereby the mail is delivered to boxholders or stops or boxes on a city carrier's route, is presently allowed for House Members under the franking statute and results in much less expense being incurred through mailing.

Section 307 requires the Rules Committee to study laws relating to contributions solicited from or made by officers or employees of the Senate. At present, Federal law apparently prohibits Senate employees from making a political contribution to any Senator, Congressman, or candidate for the Senate or House (18 U.S.C. §§ 602, 607). These laws have been honored mostly in the breach, but they remain on the books. There was considerable feeling in the committee that these laws were overbroad and could infringe unreasonably on first amendment rights. At the same time, however, there was considerable sentiment in the committee that employees should be prohibited from contributing to their supervisors, because they will sometimes feel obligated to do so.

Section 308 requires the Rules Committee to study the issue of use of official staff by holders of public office in campaign for nomination for election, or election to Federal office, and report to the Senate on this issue.

In the resolution as reported, the committee had included a prohibition against Senate employees who were substantially engaged in campaign activities remaining on the payroll. The committee found it was extremely difficult to write such a rule without making all political activity related to official duties look suspect. The committee concluded that to the extent a problem exists in this area, it could apply equally to the employees of a House Member or a Governor seeking Federal office, and that it was most appropriately a matter within the jurisdiction of the Federal Election Commission. For all these reasons, the committee has recommended that the Rules Committee, which has jurisdiction over the FECA, to study the problem in the context of its review of the FECA later this year and report proposals dealing with this subject.

Section 309, as noted above, provides for the study of the subject of handling employment discrimination complaints in the Senate.

Section 310 sets forth the effective dates of titles I and II. The effective dates of most of the rules in the Code of Conduct have been delayed for some period of time in order to permit the Senators, officers, and employees to study them, and to allow the Ethics Committee to promulgate regulations and issue interpretive rulings in perceived problem areas. The effective date for rule XLII, pertaining to Public Financial Disclosure, is October 1, 1977, with the first filing taking place on May 15, 1978. The limitation on outside earned income takes effect on January 1, 1978. Those provisions of the Rule of Conflict of Interest, which require some reordering of present financial arrangements, will take effect on April 1, 1978.

Mr. President, in proposing this resolution, particularly the Rules encompassed in title I, the committee is recommending action which it believes will serve the public interest. The committee unequivocally rejects the view of some critics that implies that all Senators, most Senators, or even many Senators or their employees, have engaged in unethical practices or have sought or used their public positions for the purpose of furthering private economic interests. I have frequently stated my belief, based on my political experience, that the ethical standards of public officials are as high, if not higher, than in any other walk of life and that is as it must be. We are dealing with the public interest, not private interests. Improper practices of a few have reflected on the image of the Congress as an institution. Many people who think highly of their own Representatives or Senator lack confidence in the Congress as an institution. A code of official conduct is needed, not to deter or expose the very few who may engage in wrongdoing, but to reassure the public that the vast majority of the Senate, and its employees, are committed public servants.

The public perception of this instituton is not always accurate. But perceptions are vitally important in a democracy; they are the basis for public confidence or a lack of it. If public confidence is reinforced by a strong code, the Senate should adopt one. There is no arbiter of right or wrong in this area; there is only the overriding question of whether the people trust their Government.

We know that "Congress-hating" has long been one of the favorite national pastimes. Nevertheless, we cannot accept public skepticism about Congress, simply because it periodically recurs; the Senate's concern should be addressed to the problem of public disillusionment with all public institutions, including Congress. More than ever before, the decisions of Members of Congress have a direct and daily effect on the lives of virtually all Americans. In this era, perhaps more than any other period in history, major difficult decisions have to be made, and the real issues involved are extremely divisive. Under such circumstances, it is vital that the public understand and believe, whether they agree or disagree with congressional decisons, that all decisions represent the Congress' perception of how the public interest would best be served.

Mr. NELSON. Mr. President, I ask unanimous consent that a staff-prepared section-by-section analysis of the substitute amendment be printed in the RECORD so that it will be available to the Members tomorrow.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 65 TO S. RES. 110: SECTION-BY-SECTION ANALYSIS

TITLE I—CODE OF OFFICIAL CONDUCT: RULES XLII, XLIII, AND XLIV

Except for technical amendments, Rule XLII, Public Financial Disclosure, Rule XLIII, Gifts, and Rule XLIV, Outside Earned Income, are identical to the provisions of S. Res. 110 as reported. (A section by section analysis of these rules is to be found in the report, No. 94-59, on pages 15-40.)

RULE XLV—CONFLICT OF INTEREST

Except for technical amendments and the amendment to paragraph 9 discussed below, Rule XLV, Conflict of Interest, is identical to the provisions of S. Res. 110, as reported. (Report, pages 40-45.)

Paragraph 9 of Rule XLV of the amendment does not include the language appearing in the resolution which prohibits former Senators from seeking access to the Senate floor for a period of one year after leaving office for the purpose of influencing the consideration of legislation. The sponsors believe that the language of paragraph 9, prohibit-

ing former Members from lobbying the Senate for one year, clearly would prohibit the more narrow case of seeking access to the floor for purposes of lobbying. In addition, the sponsors were concerned that, by negative implication, paragraph 9 of the resolution could be construed as *sanctioning* floor lobbying after a year had expired. The sponsors believe that lobbying by former Members on the Senate floor would be improper at any time, but feel that an explicit rule prohibiting this practice is unnecessary.

RULES XLVI, XLVII AND XLVIII

Except for technical amendments, Rule XLVI, Prohibition of Unofficial Office Accounts, Rule XLVII, Foreign Travel, and Rule XLVIII, Franking Privilege and Radio and Television Studios, are identical to the provisions of S. Res. 110 as reported. (Report, pages 46–50.)

RULE XLIX—POLITICAL FUND ACTIVITY; DEFINITIONS

Paragraph 1 of Rule XLIX, Political Fund Activity; Definitions, is identical to paragraph 1 of Rule XLIX in S. Res. 110 as reported.

Paragraphs 2, 3 and 4 of Rule XLIX are new provisions which describe who will be covered by the Senate Code of Official Conduct in addition to Senators and officers of the Senate. Paragraph 2 states that for the purposes of the Senate Code of Official Conduct, an employee of the Senate includes any employee whose salary is disbursed by the Secretary of the Senate. In the case of an officer or employee of the Senate who is a re-employed annuitant, the compensation of that person, for the purposes of this Code, includes amounts received by that person as an annuity and those amounts are treated as if they are disbursed by the Secretary of the Senate. Thus, if a person is a re-employed annuitant and is receiving an annuity of $20,000 and a salary of $10,000, then for the purposes of the Code of Official Conduct, that person is treated the same as an employee who is earning a salary of $30,000 all of which is disbursed by the Secretary of the Senate.

Paragraph 3 requires the Committee on Rules and Administration to require an individual to agree in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate if that individual is an officer or employee of some other department or agency of the Federal Government and is being used by a committee in accordance with Section 202(f) of the Legislative Reorganization Act of 1946 or with an authorization provided by Senate resolution. Any officer or employee in such a position will be treated for the purposes of the Code of Official Conduct as an employee of the Senate receiving compensation disbursed by the Secretary of the Senate in an amount equal to the compensation he is receiving as an officer or employee of the government. This provision is intended to apply the Senate Code of Official Conduct to employees on assignment to the Senate in the same manner as the Code applies to Senate employees. There are presently employees on assignment from Executive Branch departments, the Library of Congress and the General Accounting Office working for Senate committees in the same way as any other committee staff member. Thus, for example, for the purposes of the rule on financial disclosure, if an employee of an Executive Branch agency is assigned to a Senate committee for a period in excess of 90 days in a calendar year and that employee earns over $25,000 in salary from that agency, then the employee would have to file a financial disclosure statement under Rule XLII.

Paragraph 4 applies the same principle to individuals who are working full time for the Senate but whose salary is paid for by someone other than the Federal Government. This paragraph prohibits a member, officer or employee of the Senate from utilizing the full-time services of an individual for more than 90 days in the calendar year in the conduct of the official duties of any committee or office of the Senate (including a Member's office) unless such individual (a) is an officer or employee of the Senate; (b) is an officer or employee of the government (other than the Senate); or (c) agrees in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate. An individual who is not paid by the government but agrees in writing to comply with the Code of Conduct, would for the purposes of the Code be treated as an employee of the Senate receiving compensation disbursed by the Secretary of the Senate in an amount equal to the amount of compensation which that individual is receiving from any source for performing his services for the Senate. Thus, if a person is on a fellowship for a one-year period which is financed by a private company and that person provides full-time services to a Senate committee, that person would have to file a financial disclosure statement if the person is paid more than $25,000 by the corporation sponsoring the fellowship. Again, such individuals are serving as employees of the Senate just like any other employee and should be subject to the same ethical standards as an employee of the Senate even though their salary is paid for by someone other than the government. For the purposes of this paragraph, only those providing fulltime services for more than 90 days in a calendar year are covered. The term full-time services refers to the nature of the services the person is providing for the committee and not whether that person is providing services only for the committee and not doing other personal services in his spare time. For example, a person who performs substantially the same amount of services and puts in substantially the same amount of time as full-time employees on the staff of a committee paid for by the Secretary of the Senate should be considered to be providing full-time services. This would be true even if the individual had another source of outside earned income such as a job at night or on the weekend. The committee intends a rule of reason to apply in determining what full-time services are and not a literal interpretation which would circumvent the purpose of this rule. Thus, if a person works one-half hour a day less than any other employee on a committee's staff and is, therefore, working 95% of full time, the intent of the committee is that such a person is substantially providing full-time services and should, therefore, be covered.

RULE L—EMPLOYMENT PRACTICES

Rule L, Employment Practices, is identical to Rule L in the resolution as reported. (Report, page 53.) However, in subsection (1) of section 310, the effective date of this rule has been deferred to January 3, 1979. In the interim, the amendment (in section 309, discussed below) directs the Committee on Governmental Affairs to study the subject of handling employment discrimination complaints and report recommendations to the Senate within one hundred and eighty days.

TITLE II—PROVISIONS RELATING TO THE SELECT COMMITTEE ON ETHICS

Title II consists of amendments to the charter of the Select Committee on Ethics (Senate Resolution 338, Eighty-eighth Congress, as amended by Senate Resolution 4, Ninety-fifth Congress). In Title II of the amendment, the sponsors have sought to incorporate many constructive recommendations offered by Senator Stevenson and Senator Schmitt, the newly-appointed Chairman and Ranking Minority Member, respectively, of the Select Committee on Ethics. The sponsors believe that Title II of the amendment gives the Select Committee more flexibility in conducting its business than was provided in the resolution as reported, while preserving the basic principles of the original proposal.

Because Title II of the amendment is substantially different than Title II in S. Res. 110, a section by section analysis of the entire Title, even those provisions identical to those in S. Res. 110, is provided below. Thus, while there will be some repetition of material presently found in the report on S. Res. 110, it is easier to understand Title II if the entire Title is explained in one place. In the parts of this section by section taken word-for-word from the report on S. Res. 110, the interpretation of the "Committee" is referred to meaning the Special Committee on Official Conduct. In the parts of the section by section covering new or revised provisions, the interpretation of the sponsors of this amendment in the nature of substitute are referred to.

Section 201 provides that any violations of the Senate Code of Official Conduct shall be under the jurisdiction of the Select Committee and gives the Select Committee the authority to prescribe and publish such regulations as the committee feels are necessary to implement the Senate Code of Official Conduct.

Section 202 provides certain new guidelines for the Select Committee in handling complaints, investigations, and other matters, as follows:

Paragraph (1) of subsection (b) provides that any sworn complaint with the Select Committee shall be in writing, shall be in such form as the Select Committee determines by regulation, and shall be made under oath.

The Committee believes that there are a number of statutory provisions which would permit the Select Committee on Ethics to require that sworn complaints be under oath and subject to the pains and penalties of perjury. There are existing statutes which provide for the giving of oaths by the Secretary of the Senate or his designee (2 U.S.C. 24). There are provisions providing authority for judges and clerks of Federal district courts to administer oaths, and there is a recently passed statute which permits the pains and penalties of perjury to attach to certain unsworn statements in the place of the administration of an oath, 28 U.S.C. § 1745. The Committee believes that the Select Committee on Ethics after studying this area should prescribe regulations describing the manner in which a complaint must be sworn so that the complaint is not unreasonably inconvenienced and any false statement on the complaint will subject the complainant to the pains and penalties of perjury.

Paragraph (2) of subsection (b) defines a "sworn complaint" as a statement of facts within the personal knowledge of the complainant alleging a violation of any rule, regulation, or law within the jurisdiction of the Select Committee. The Committee does not intend to limit the meaning of the term "personal knowledge" to situations where the complainant has personally witnessed or participated in the transaction or activity which is the basis of the violation alleged. The Committee does intend to require the complainant to swear to the truth of facts alleged and his belief in the information contained in the complaint and that such information was obtained under circumstances where the complainant has sufficient personal knowledge of the source of the information to reasonably conclude that the facts or information are true. A complainant would not have the requisite personal knowledge simply

because he read an article in a newspaper and believed the article to be true. However, a complainant would have the requisite personal knowledge if the complainant personally inspected public records such as a document filed with a registry of deeds, a government agency or a document executed under oath. If a person directly involved in the alleged violation communicated to the complainant information about the violation, the complainant would have sufficient personal knowledge to file a sworn complaint if the complainant had basis for believing the participant to be telling the truth. Also, the complaint may be comprised or based upon sworn statements from a number of individuals; not all the key sworn statements setting forth the facts which form the basis of the complaint must be made by the complainant.

A sworn complaint must contain enough facts and information to provide a reasonable basis for concluding that a violation has occurred if the information is true. The complaint need not contain sworn personal knowledge of every fact necessary to prove that a violation has occurred.

The Committee recognizes that allegations not presented in the form of a sworn complaint may still require an initial study or investigation; the Committee believes that the decision to undertake such an initial study or investigation should lie in the discretion of the Select Committee.

Paragraph (3) of subsection (b) provides that any person who knowingly and willfully swears falsely to a sworn complaint does so under penalty of perjury, and that the Select Committee may refer any such case to the Attorney General for prosecution. Section 1621 of Title 18, United States Code, provides a criminal penalty for perjury of a fine of $3,000 or imprisonment for not more than five years or both.

Paragraph (4) of subsection (b) defines "investigation" as a proceeding undertaken by the Select Committee after a finding, on the basis of an initial review, that there is substantial credible evidence which if true would constitute a violation within the jurisdiction of the Select Committee. It is important to recognize that the "investigation" is used in this Title as a term of art with a specific, narrow meaning. Many activities which would ordinarily be called an investigation will not fit within the definition used here. By defining "investigation" in this manner, the Committee seeks to do several things. First, the Committee intends to emphasize the clear distinction between an initial review, undertaken by the Select Committee on any complaint, and an investigation. The Committee may inquire into a matter and begin collecting information without voting to conduct an "investigation." An "investigation" is the formal part of the committeee proceeding which takes place only after the Committee has concluded that there is substantial credible evidence which, if true, would constitute a violation within the jurisdiction of the Committee. By requiring "substantial credible evidence" before an investigation can begin, the Committee intended to require a high standard or proof, comparable to "probable cause," without the overtones of criminal activity that probable cause carries with it. It should be emphasized that once an investigation is mandated, a full report will have to be filed with the Senate and the matter will become public, with potentially grave adverse consequences for the person under investigation.

For this reason the rules and regulations of the Select Committee should provide for strict procedural protections to safeguard the interests of the individual under investigation.

Subsection (c) has been changed from the similar provision in S. Res. 110 as reported to loosen the requirements for recorded votes by the Select Committee. Paragraph (1) would require, as did S. Res. 110 as reported, that no investigation of conduct of a Member or officer of the Senate, and no report, resolution, or recommendation related thereto may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee. Given the composition of the Select Committee, (3 Democrats, 3 Republicans), the sponsors believe this provision is necessary to insure that any action taken by the Select Committee relating to the conduct of a Member or officer will have bipartisan support, and will be accounted for to the Senate and the public. Paragraph (2), however, requires only an affirmative vote of a majority of the members of the Select Committee voting to approve any resolution, report, recommendation, interpretive ruling, or advisory opinion. The sponsors believe that paragraph (2) will provide a sufficient safeguard without unnecessarily hamstringing the Select Committee with potentially endless series of recorded votes on relatively minor matters.

Paragraph (d) of the amendment is a total revision of paragraph (d) of S. Res. 110 as reported and creates a procedure designed to give added flexibility to the Select Committee in the handling of sworn complaints against Members and officers.

Paragraph (1) of subsection (d) provides that the Select Committee shall promptly conduct an initial review of each sworn complaint against a Member or officer. The sponsors believe that the procedure for conducting an initial review is a matter to be left to the discretion of the Select Committee, and notes that the only implicit direction provided for conducting an initial review is that such review should provide the information the Select Committee will need to decide whether or not to undertake an investigation—namely, whether there is substantial credible evidence which provides substantial cause for the Committee to conclude that a violation has occurred. The sponsors recognize that in some cases the initial review may be quite cursory: a telephone call may prove that the complainant is misinformed or the complaint is frivolous. On the other hand, the initial review could entail a more exhaustive examination, following up leads and talking to witnesses.

The sponsors emphasize that while an initial review is required in response to a sworn complaint, nothing in this resolution deals with the great bulk of allegations and evidence which will come to the attention of the Committee by means other than through sworn complaints. Therefore, nothing in this resolution should be construed as limiting in any way the authority of the Select Committee to pursue any evidence that comes to its attention, or to investigate any matter on its own initiative.

Paragraph (2) provides that, upon conclusion of an initial review, if the Select Committee determines by a recorded vote not to conduct an investigation, it shall notify the complainant and the party charged of its decision and the basis for the decision.

In calling for the basis of the Select Committee's decision not to investigate, the sponsors do not intend that the explanation need include any discussion of the evidence collected by the Select Committee or any evaluation of the character or credibility of the complainant. However, the sponsors do intend that the Select Committee state that it did not conduct an investigation because it felt that there was no truth to the allegations made; that there was a parallel on-going criminal investigation and the Committee decided to defer to that investigation until it was completed; that the person against whom the allegations were made is not within the jurisdiction of the Committee; or some other similarly specific reason. The sponsors are well aware of the potential for doing damage to people's reputations by the revelation of evidence collected in an informal investigating process which those charged have not had a chance to refute. The sponsors believe that evidence presented to the Select Committee is analogous to evidence presented before a grand jury and should be treated with similar confidentiality and can unless the Select Committee makes a decision to make such evidence public.

Paragraph (3) provides that, upon conclusion of an initial review, if the Select Committee determines that a violation is inadvertent, technical or otherwise of a de minimus nature, it may attempt to correct or prevent such a violation by informal methods. The sponsors intend that, just as when the Select Committee decides not to proceed, the complainant and the party charged would be informed of any such Committee determination and the basis thereof.

The sponsors recognize that because of the complex nature of the proposed new Code of Official Conduct, there inevitably will be cases involving typographical errors on financial disclosure statements, confusion over filing dates, and other violations of a similar character. The sponsors do not believe that in such cases the Select Committee should be held to strict criteria for investigations of complaints set forth in this title. The sponsors recognize that if a Member is charged with violating the Code of Conduct, and an investigation ensues indicating that the charge has merit, the political consequences can be severe. For this reason, the sponsors believe that violations of the Code which would entail an investigation (as defined above) should be knowing violations, or violations characterized by a willful or reckless disregard for whether the Code was violated or not.

Paragraph (4) provides the Select Committee with additional flexibility to handle cases involving violations which, if proven, are neither of a de minimus nature nor sufficiently serious to justify, in the case of Members, censure, expulsion, or recommendations to the appropriate party conference; or, in the case of officers, suspension or dismissal. In such cases, when the Select Committee believes there is substantial cause to believe that a violation has occurred, the Select Committee may propose on its own initiative a remedy it deems appropriate. If the case is resolved in this fashion, a summary of the Committee's conclusions and remedy must be filed as a public document with the Secretary of the Senate, and notice of such filing must be printed in the Congressional Record. Again, the sponsors intend that the complainant and the party charged would be informed of the Committee's determinations.

The sponsors believe that this procedure will give additional latitude to the Select Committee to handle cases which are neither minor nor of such a grave nature as to require the full investigation process provided in the resolution. At the same time, accountability to the Senate and the public, and the rights of the party charged, would be preserved.

Paragraph (5) provides that, upon conclusion of an initial review, if the Select Committee determines that there is substantial cause to believe that a violation has occurred, the Committee shall conduct an investigation if:

The violation, if proven, would be sufficiently serious to warrant imposition of one or more of the specific penalties referred to in the discussion of paragraph (4) above (such as censure); or

If a violation which the Committee attempted to handle under paragraph (4) could not be resolved in that fashion.

Paragraph (5) further provides that, upon the conclusion of the investigation, the Select Committee must promptly report to

the Senate the results of the investigation and any recommendations for disciplinary action which the Committee deems appropriate.

In addition, paragraph (6) provides that the Select Committee must similarly report to the Senate upon the conclusion of any investigation (as defined in subsection (b)(4)), undertaken by the Committee.

The sponsors believe that, on any matter which the Select Committee finds so serious as to necessitate an investigation, a full report to the Senate on the results of the investigation must be required, both for the protection of the subject of the investigation and to insure that the Select Committee is accountable to the Senate and the public. This report will necessarily contain more detail and information than the explanation of a Committee decision not to conduct an investigation. If a report is filed after an investigation is completed, it means that the Select Committee initially thought that there was substantial cause to conclude that a violation had occurred. Presumably too, the Committee has given all parties involved an opportunity to be heard with respect to the evidence the Committee is considering. If the Committee is requesting that the Senate take some kind of disciplinary action, the findings of its investigation will have to be spelled out in considerable detail. However, even if the findings are that no disciplinary action is required, a fairly detailed report is justified in order to vindicate the subject of the investigation and satisfy the public, since it will more than likely be a matter of public knowledge that a full investigation by the Select Committee has been undertaken.

The provisions of paragraph (e) of S. Res. 110 as reported, providing for a privileged appeal procedure to the full Senate in cases where the Select Committee has decided not to conduct an investigation, have not been included in this amendment. The sponsors believe that, given the safeguards for accountability provided throughout the enforcement process, the appeal procedure is unnecessary and cumbersome. In addition, there would be nothing to prevent any Senator from introducing a simple resolution directing the Select Committee to conduct a particular investigation. Passage of such a resolution by the full Senate would, of course, be binding on the Select Committee.

The new paragraph (e) contained in this substitute amendment provides that the Select Committee may handle sworn complaints filed against employees of the Senate according to any procedures the Committee deems appropriate. If the Committee determines that a complaint is without substantial merit, it shall notify the complainant and the subject of the complaint of its determination. In any event, however, the sponsors intend that the complainant and the subject of the complaint will be informed of the disposition of a complaint.

Paragraph (f) authorizes the Select Committee to employ hearing examiners to hear testimony and make findings of fact and/or recommendations to the Select Committee concerning the disposition of complaints. The sponsors believe that such hearing examiners, used at the discretion of the Committee, may serve to considerably ease the burden on the Committee members by preventing the need for Senators to sit through evidentiary hearings on relatively minor matters.

Paragraph (g) expands upon the retroactivity provision included in paragraph (f) of S. Res. 110 as reported. Paragraph (g) provides that the Select Committee may not take any action with respect to an alleged violation which was not in effect at the time the alleged violation took place. In addition, subparagraph (g) provides that no provision of the Senate Code of Official Conduct (as proposed in this resolution) applies to, or requires disclosure of any act, relationship or transaction which occurred prior to the effective date of the applicable provision of the Code. For example, proposed Rule XLII includes a provision requiring disclosure by Senate employees of certain prior employment. Under subparagraph (g), however, no disclosure would be required if the employment occurred prior to October 1, 1977.

Section 204 amends section 3 of Senate Resolution 338 to provide additional staffing authority to the Select Committee, as follows:

Paragraph (1) of section 204 provides for the hiring of a staff director, a counsel, assistant counsel and one or more investigators and one or more hearing examiners, in addition to such other assistants as it may require, as already is provided for under S. Res. 338.

Paragraph (2) amends section 3 by providing for the hiring of outside counsel, as follows:

Paragraph (1) of subsection (b) authorizes the Select Committee to retain and compensate counsel not employed by the Senate (or by any department or agency of the Executive Branch of the Government) whenever the Select Committee decides that retention of outside counsel is necessary or appropriate for any action it may wish to undertake.

Paragraph (2) of subsection (b) provides that any investigation undertaken by the Select Committee shall be conducted by outside counsel unless the Select Committee specifically decides not to use outside counsel. The Committee believes that in the relatively rare cases which necessitate an investigation, the interests of justice are most often served by having outside counsel conduct it. It is reasonably likely that the staff of the Select Committee will know personally the Member or officer or employee being investigated. If any personal relationship exists, whether positive or negative, it is not conducive to a full and fair investigation. Given the usual relationship between Senators and officers and employees of the Senate, the Committee has particular doubts whether the staff of the Select Committee can be expected to adequately investigate the case of a Member of the Senate. For these reasons, when an investigation is needed, outside counsel, unencumbered by personal relationships and secure in the knowledge that he or she can return to a position outside the Senate, is probably preferable. Therefore paragraph 2 establishes a presumption that the Select Committee will employ outside counsel in the conduct of an investigation.

Clause (3) amends section 3(c)(1) of Senate Resolution 338 to permit the Select Committee, with the prior consent of the department or agency concerned, to utilize the services, information, and facilities of that department or agency of the government.

Section 205 amends section 2(a) of Senate Resolution 338 to provide for specific sanctions which may be recommended by the Select Committee in calling upon the Senate to take disciplinary action against a Member, officer, or employee. In the case of a Member, such sanctions would include but would not be limited to censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility. In the case of an officer or employee, such sanctions would include but not be limited to suspension or dismissal.

Section 206 amends Section 3 of Senate Resolution 338 by adding at the end of that Section a new subsection (e).

Subsection (e)(1) requires the Select Committee to prescribe and publish whatever regulations it feels are necessary to implement the Senate Code of Official Conduct. It is expected that there will be a number of regulations necessary to implement the Code. For example, procedures must be established with respect to the manner and timing of the registration of mass mailings. Upon promulgating such regulations, it is expected that the Select Committee will publish those regulations so that those subject to the regulations will have notice of them.

Subsection (e)(2) authorizes the Select Committee to issue interpretive rulings explaining and clarifying the application of any law, the Code of Official Conduct or any rule or regulation of the Senate within its jurisdiction. There will inevitably arise questions under the Code of Official Conduct which will require interpretation by the Select Committee. As will be described below, the Select Committee is authorized to issue advisory opinions. However, this provision gives the Select Committee the authority to issue a general interpretive ruling rather than simply being able to respond to requests by individuals for advisory opinions.

Subsection (e)(3) requires the Select Committee to render an advisory opinion in writing within a reasonable amount of time in response to a written request by a Senator or officer of the Senate or a candidate for the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within the Select Committee's jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion. The Select Committee is not required to give advisory opinions in response to hypothetical situations or with respect to factual situations pertinent to someone other than the person requesting the advisory opinion. Therefore, a candidate cannot ask an advisory opinion about the conduct of an opponent. However, this provision does require the Select Committee to give advisory opinions where a Senator, candidate or officer of the Senate is faced with a specific factual situation and that person wants advice on how the Code of Conduct would apply to their proposed conduct.

Subsection (e)(4) authorizes the Select Committee in its discretion to render an advisory opinion in response to a written request by an employee of the Senate. The requirements with respect to when an advisory opinion may be issued are identical to those in subsection (e)(3) above except that when an employee requests an advisory opinion it is within the discretion of the Select Committee whether it renders an advisory opinion. The Committee may decide not to render an advisory opinion in a situation where the Committee feels that an existing interpretive ruling gives sufficient guidance or, for some other reason, the Committee feels an advisory opinion should not be rendered.

Subsection (e)(5) states that, notwithstanding any provisions of the Senate Code of Official Conduct or a rule or regulation of the Senate, any person who relies upon the provisions or findings of an advisory opinion issued in accordance with the provisions of paragraphs (3) and (4) above and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate. Once an advisory opinion is issued, a person meeting the requirements of subsection (e)(5) described below may rely on that opinion. If at a later time the Select Committee determines to change its policy, it may rescind an advisory opinion or revise the advisory opinion or supercede the advisory opinion by an interpretive ruling or regulation, but those who relied on the advisory opinion before the change in the Committee's policy is made public may still rely on the advisory opinion.

Subsection (e)(6) states that any advisory opinion rendered by the Select Committee under paragraphs (3) and (4) described above may be relied upon by any person involved in the specific transaction or activity with respect to which the advisory opinion is rendered; provided, however, that the request for the advisory opinion included a complete and accurate statement of the specific factual situation. Thus, if the person failed to provide the Select Committee with all the relevant facts, and the facts omitted would have changed the position taken by the Select Committee in the advisory opinion, then the person may not rely on the advisory opinion.

In addition, any person involved in a specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which an advisory opinion was rendered for another can rely on that advisory opinion. So, for example, if one individual asks for an advisory opinion as to whether a ticket to a testimonial dinner is a gift, another person invited to that same dinner may rely on the advisory opinion even though the advisory opinion was not requested by him or issued for his direct benefit. The same rule applies with respect to someone invited to another dinner where the material aspects of the occasion are indistinguishable from those of the original testimonial dinner with respect to which the advisory opinion was issued.

Subsection (e)(7) states that an advisory opinion issued in response to a request under paragraphs (3) or (4) of subsection (e) must be printed in the Congressional Record with appropriate deletions to assure the privacy of the individual concerned. Thus, a full description of the factual situation involved, without reference to the name of any individual or other details which would identify the individual, would be made public. The Select Committee is also required, to the extent practicable, before rendering an advisory opinion, to provide any interested party with an opportunity to transmit written comments to the Select Committee with respect to a request for an advisory opinion. Some advisory opinions will have a significant impact on the way the Code of Official Conduct is interpreted and administered. Also an advisory opinion issued to one person may have very different and significant impacts on other people faced with similar but distinguishable problems. Therefore, whenever it is possible, the Select Committee should give public notice of the request for a significant advisory opinion and permit written comments on the request prior to issuing an advisory opinion. Finally, this subsection requires that the advisory opinions issued by the Select Committee be compiled, indexed, reproduced and made available on a periodic basis. It is the intention of the Committee that there be one pamphlet, notebook or publication which Senators and officers and employees of the Senate can turn to to find all the advisory opinions applicable to a given provision or rule of the Code of Official Conduct in one location.

TITLE III—MISCELLANEOUS; EFFECTIVE DATES

Except for technical changes, and except for the changes specifically referred to below, Title III of the amendment is identical to Title III of S. Res. 110 as reported. (In the report, see pages 61–64.)

Section 301 of the amendment directs the Committees on Rules and Appropriations to report legislation to adjust the amounts and permissible uses of Senatorial allowances so that such allowances will be adequate to defray the necessary and appropriate expenses incurred in connection with the operation of a Member's office. Such legislation must be reported to the Senate within one hundred and twenty days.

The amendment strengthens somewhat the language of S. Res. 110 as reported with regard to this matter. The sponsors believe that neither the amounts nor the permissible uses of Senatorial allowances are sufficient at the present time. With the abolition of unofficial office accounts provided in proposed Rule XLVI, the sponsors believe that appropriate adjustments are necessary, although the nature and amounts of such adjustments should be left to the Rules and Appropriations Committees to determine, in the form of proposals to the Senate.

Section 307 of the amendment directs the Rules Committee to study laws relating to contributions solicited from or made by officers or employees of the Senate, and to report the results of their study, together with their recommendations, to the Senate within one hundred and eighty days. This new section was added to replace paragraph 2 of Rule XLIX as it appeared in S. Res. 110 as reported. That provision sought to prohibit Senators from soliciting political contributions from their employees and to prohibit employees from making political contributions to Senators who are their supervisors. The sponsors have deleted those provisions because of possible conflict with sections 602 and 607 of Title 18 of the United States Code. It is possible to construe those sections to prohibit Senators from soliciting political contributions from any government employees and to prohibit Senate employees from making contributions to any Senator or Representative. The sponsors were concerned that the more narrow prohibitions contained in S. Res. 110 as reported might be read to encourage violations of existing criminal statutes. The sponsors believe, however, that sections 602 and 607 may be unnecessarily broad, and note that there appears to have been little, if any, enforcement of these provisions. Therefore, section 307 directs the Committee on Rules and Administration to review these and other related statutes and report recommendations to the Senate within one hundred and eighty days. The sponsors believe that Senate employees should be free from coercion or the appearance or threat of coercion with regard to making political contributions to their employers. Nevertheless, the sponsors do not believe that provisions to prevent such coercion should be so broad as to restrict unnecessarily the political rights of Senate employees.

Section 308 of the amendment directs the Rules Committee to report proposals to prohibit the misuse of official staff by holders of public office in campaigns for nomination for election, or election, to Federal office. Such proposals must be reported to the Senate within one hundred and eighty days. This section was added to replace parargaph 3 of Rule XLIX as it appeared in S. Res. 110 as reported.

That provision sought to prohibit Senate employees from engaging substantially in campaign activities. The sponsors have deleted that provision for three reasons:

1. *Concern over the effectiveness of the proposed language.* The Special Committee had little time to review this area, and the problem of drafting a rule in this area was formidable. There might be, for example, considerable difficulty in distinguishing between "Substantial campaign activity" which was prohibited in the provision, on the one hand, and "political activity related to official duties" which was permitted, on the other.

2. *Concern over the politicization of the Select Committee on Ethics.* Especially given the perceived vagueness of the language, the Select Committee might have been confronted with numerous complaints alleging violations of the rule in the period immediately before an election. The sponsors were concerned that the Select Committee might not be the best forum for resolving disputes between incumbents and challengers in the heat of a campaign.

3. *Concern over the narrow applicability of the provisions.* The practice of public officials using their staffs for campaign activities is not restricted to Members of the Senate. The sponsors believe that this problem should be addressed in a more comprehensive manner than was attempted in the resolution. The problem may be handled more effectively in the context of possible amendments to the Federal Election Campaign Act.

Deletion of these provisions should in no way be construed as representing a retreat from the sentiment expressed in the report accompanying S. Res. 110 "that the advantages of incumbency not be abused." Therefore, Section 308 of the amendment directs the Rules Committee to report proposals to the Senate, within one hundred and eighty days, to prohibit the misuse of official staff by holders of public office in campaigns for election to Federal office.

Subsection (a) of Section 309 directs the Committee on Governmental Affairs to conduct a study of the subject of handling employment discrimination complaints. Were proposed Rule L to take effect immediately, (its effective date is delayed to January 3, 1979), enforcement of this provision, for lack of any other procedure, would fall to the Select Committee on Ethics. The sponsors do not believe that it would be in the best interest either of the Senate or its employees for a committee of six Senators charged with the responsibility of enforcing all the other provisions of the proposed Code of Official Conduct to be responsible for handling such discrimination complaints. Therefore, this provision directs the Governmental Affairs Committee to consider alternative means for handling employment discrimination complaints.

Subparagraph (b) provides that the Committee shall report the results of their study and their recommendations to the Senate within one hundred and eighty days.

Subsection (c) provides that the recommendations of the Governmental Affairs Committee will be referred to the appropriate committee (that is the committee with jurisdiction over whatever recommendations the Governmental Affairs Committee makes), for a period not to exceed 60 days. If the appropriate committee did not act on the recommendations, that committee would be discharged of its responsibilities with regard to the matter and the recommendations would come before the full Senate at the end of the 60-day period.

Section 310 of the amendment, relating to effective dates, is identical to Section 307 of S. Res. 110 as reported, with the following two exceptions:

(1) In new subsection (h), the effective date of Rule L is set at January 3, 1979, in order that the subject of handling of employment discrimination complaints may be studied in the interim period; and

(2) Subsection (i) (formerly subsection 307(h)) which delays the effective date of many of the enforcement provisions for thirty days, does not contain any reference to section 206, relating to the issuance of regulations, interpretative rulings, and advisory opinions by the Select Committee on Ethics. Section 206 would, therefore, take effect immediately so that the Select Committee would be in a position to provide guidance on those provisions of the Code of Official Conduct which likewise take effect immediately.

Mr. MUSKIE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. NELSON. I yield to the Senator

from Maine without losing my right to the floor.

Mr. MUSKIE. Mr. President, I ask unanimous consent that Madeleine Albright and Charles Micoleau of my staff and Robert Rackleff and Al From of Governmental Affairs be permitted access to the Senate floor during consideration of Senate Resolution 110.

The PRESIDING OFFICER (Mr. SARBANES). Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I send five amendment to the desk for printing.

Mr. NELSON. This might be an appropriate time to inquire whether any of the Senators on the floor have any amendments that they wish to call up and vote on today or an amendment they wish to lay down today before we conclude the session.

The Senator from Maine?

Mr. MUSKIE. May I put a question to the distinguished Senator? As the Senator knows, I have some amendments, one or two of which are controversial and will require some discussion. I am reluctant to call them up and have the time start running on the amendments, because we are limited to 2 hours, which means 1 hour to make the case for amendments that obviously will take a lot more time. Is there a possibility that we might begin discussing the amendments before they are called up and maybe exhaust some of the questions and discussion before I call up the amendment and begin time running on them? Would the Senator like to discuss that in private?

Mr. NELSON. I would think so.

I do not know what the five amendments are. I am assuming that there will be an amendment by the Senator from Maine respecting the earned income limitation. Is that one of the Senator's amendments?

Mr. MUSKIE. As a matter of fact, four of them deal with that in different forms. I may not call them all up.

There are two basic thrusts, I say to the Senator. I have no objection to making this clear for the record. The first amendment would apply the 15-percent limitation on all income across the board. I have three forms of that amendment to try to anticipate some of the objections that might be offered and that I might be able to respond to in different form. It may well be that I will call up only one of those three, or I might see fit to debate the three.

The second amendment is the one that will apply the disclosure discipline across the board——

Mr. NELSON. The disclosure what?

Mr. MUSKIE. The disclosure discipline across the board to all incomes, leaving the present limits in the law. Those are the two basic amendments.

The third amendment is an interesting one that I shall send the Senator a copy of in due course. I think he might find it amusing. In any case——

Mr. NELSON. I would like to hear something amusing. Would the Senator like to describe it now?

Mr. MUSKIE. I do not think I ought to interrupt the Senator's description of a serious subject at this point. I shall be glad to call attention to it later.

Mr. NELSON. May I say to the Senator from Maine that I know that other Members intend to propose important and serious amendments. I believe there is an intent by one or more Members to offer a substitute at some stage which would simply provide for disclosure and eliminate all other aspects of the bill. It was my understanding that the Senator from Maine intended to offer amendments respecting the earned-income limitation. I would like to say to the Senator that I am perfectly happy for time to be granted off the bill to let us begin the discussion, or, if the amendment were laid down, to take time from the bill. But let me say, it is my expectation that, however we handle that, we shall not vote on the major question of earned income or variations of it until Monday or Tuesday or sometime next week.

We have many issues to take care of but, obviously, I consider that a major issue.

I think the Members ought to have a chance to look at the Senator's proposals. So it would be my wish that we not vote until next week on income limitation amendments.

Is that any problem for the Senator from Maine?

Mr. MUSKIE. Not at all. It could give us each time to mobilize some votes.

But does the Senator know what the schedule is for tomorrow, are we coming in?

Mr. NELSON. I believe we are coming in at 12 noon tomorrow.

Mr. MUSKIE. I suggest to the Senator that perhaps tomorrow afternoon we might engage in a discussion of the principles of my amendments so that Senators who are interested might have the benefit of the RECORD over the weekend of what we have to say, and that dialog might continue the first of the week.

As far as a day for voting, any time next week is fine for me.

Mr. NELSON. I do not know how long we will be in or what other amendments Senators might want to make up. But I am in general agreement with what the Senator says.

The majority leader may not have granted me control of the time, so I do not wish to say what time would be given on the resolution until I check it.

But it is the intent of the leader, I believe, as well as my intent, that on any major amendment, time from the bill can be added to our time limitation on the amendment.

Mr. MUSKIE. That is fine.

Why do I not check with the Senator some time before tomorrow and tentatively see if we can get together in a discussion on the floor that would give us each a chance to bounce off each other our arguments and exceptions?

Mr. NELSON. And those five amendments will be printed by tomorrow, so they will be available.

Are they brief amendments?

Mr. MUSKIE. One is about three pages, the other two are each one page.

Mr. NELSON. If they are brief, would it not be helpful to print them in the RECORD?

Mr. MUSKIE. Yes.

Mr. President, I ask unanimous consent that the amendments be printed at this point in the RECORD.

Mr. DURKIN. Reserving the right to object, Mr. President.

The PRESIDING OFFICER (Mr. SARBANES). Objection is heard.

Mr. DURKIN. Merely a question.

There has been no agreement with respect to what time the Senator's amendment would be brought up, or any amendment will be brought up?

Mr. MUSKIE. Not at all.

What we are talking about is maybe discussing my amendment tomorrow. In an agreement, we would not be voting on my amendment this week, but, rather, some day early next week, along with other major amendments.

So that there is no agreement at this point and we are not in a position to arrive at an agreement until we have consulted with the majority leader.

Mr. DURKIN. Fine. I have no objection to that end.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Without objection, it is so ordered.

(Mr. MUSKIE's amendments are printed in today's RECORD under Amendments Submitted for Printing.)

Mr. MUSKIE. I thank my good friend.

Mr. DURKIN. I thank the Senator from Wisconsin.

Mr. President, in an effort to facilitate matters as the floor manager suggested, that any amendments that may be lurking about be offered today so they can be printed, I have six technical amendments that the distinguished floor manager may be willing to accept.

Mr. NELSON. Are they as technical as the ones we had previously?

Mr. DURKIN. About 50 percent.

Does the Senator want me to give a brief description of the amendments as I offer them?

Mr. NELSON. No, but the Senator is free to do so if he wishes.

Mr. DURKIN. The first amendment would strike the family business exception.

The second amendment would strike the family bsuiness exception, except for a family-owned farm of no more than 10 employees.

The third amendment would, on page 28, line 1, strike the word "principal" and make it unethical for a Senator to introduce and take a position on legislation that the purpose would be to benefit interests of his.

The fourth amendment would be to impose upon the Senators, impose upon the U.S. Senate, the same conflict-of-interest requirements as are imposed upon Federal judges, namely, that they could not vote if they had a stock interest, or they could not vote if they had a substantial benefit, or allies and associates had substantial benefit.

It applies the same conflict of interest to Senators as required of our Federal bench.

The fifth amendment would require that all Members of the Senate make public an assets-and-liabilities statement and turn over full copies of tax returns as part of the disclosures.

The sixth amendment would enable the newsletters, and so forth, the franked mail, to be sent out either by individual addresses, as is now the practice, or, in the alternative, a newsletter could be sent out as the House Members do, to the occupant or the boxholder.

Mr. NELSON. I thank the Senator from New Hampshire.

Mr. DURKIN. Mr. President, I ask unanimous consent that the amendments be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Mr. DURKIN's amendments are printed in today's RECORD under Amendments Submitted for Printing.)

Mr. DURKIN. Mr. President, the confidence of the American public in Congress remains at a low ebb. Congress is attempting to restore and reshape its image by pledging the adoption of a tough new code of ethics. As written, however, our new code of ethics is weakest where it should be strongest. We have pledged to the Nation that we will eliminate all real and potential conflicts of interest. Yet the proposed code of ethics fails to include any direct, clear, prohibition of voting on the interests of a Member's financial involvements.

When the ethics resolution is brought to the floor, I will submit five amendments which are intended to resolve this void by stressing that, ethically, Members of the Senate should not vote on any matter where he has a direct financial interest or any other interest that could be substantially affected by the outcome of the vote. Members of the Senate must be made to vote the interests of the people and not the interests of his financial portfolio.

The code of ethics, as presently written, contains a limitation on outside income but excludes from that restriction the dividend income received from stocks or other investments and income from family enterprises if the services provided are not a material income producing factor. In order to close some obvious loopholes, I intend to introduce the following amendments:

My first amendment will emphasize that no Senator should vote, either in committee or on the floor, where he or his immediate family has a direct financial interest or any other interest that could be substantially affected by the outcome of the vote. Financial interest is defined to mean ownership of a legal or equitable interest, no matter how small. Excluded from the term financial interest is ownership in a mutual or common investment fund that holds securities, office in an educational, religious, charitable, fraternal, or civil organization, and ownership of Government securities. The Congress has emphasized its agreement with these restrictions by imposing them as qualifications for Federal judges of the United States.

My second amendment will delete the word "principal" from paragraph 4 of rule 25. As presently written, a Senator is prohibited from using his official position "to introduce or aid the progress or passage of legislation" when a principal purpose is to further only his pecuniary interest or the pecuniary interest of his immediate family, or the pecuniary interest of a limited class of persons or enterprises.

The report language makes it clear that a Senator can sponsor or urge the passage of legislation even though it has a "significant financial effect" on his personal holdings. This is wrong. No person should be allowed to aid the passage or progress of legislation when that legislation will have a significant personal financial impact. Accordingly, my amendment would prohibit a Senator from aiding the progress of any legislation when in doing so one of his purposes is only the furtherance of his or his family's financial interest.

My third amendment would close another loophole—the family enterprise. If Congress seeks to end potential conflict of interest created by outside-earned income, then the door should be firmly shut. By allowing an exception for the family enterprise, Members and employees are still allowed to devote their time and energy to outside pursuits. We have said that serving in Congress is a full-time job. There should be no exceptions to this rule. Accordingly, my amendment would subject income received from the family enterprise to the 15-percent limitation.

I will also offer two other additional amendments. One would require each reporting individual to file with his disclosure statement a copy of his or her tax return filed with the Internal Revenue Service for the preceding tax year and a copy of a net worth financial statement setting forth the current fair market value of each asset and liability owned or owed by the reporting individual. The second amendment would allow the Senators, pending the recommendations of the Governmental Affairs Committee, to mail franked mail with a postal patron form of address.

If we are to restore the confidence of the American people in the institutions of government, we must exhibit ourselves as guiding moral forces. We must take concrete steps to eliminate even the appearance of a potential conflict of interest. But how is faith to be restored when the American public learns that a Senator with personal financial interest in Exxon, Gulf, Mobil, or Standard Oil votes against oil divestiture? Failure to restrict the ability of Members to vote on matters where they have a direct or substantial interest will result in the Senate's new Code of Ethics being viewed by the people of the Nation as simply another unfulfilled promise. And our governing institutions cannot continue to function effectively without faith and support of its people.

Mr. ROTH. Mr. President, will the Senator yield for a unanimous consent?

Mr. NELSON. I yield to the Senator without losing my right to the floor.

Mr. ROTH. I ask unanimous consent that Ted Farfaglia and Charles Morrison be granted privilege of the floor during the debate and voting on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Is there any Member who wishes to call up any amendments this afternoon?

I am asking for my information as well as that of the Members.

Is there any Member who wishes to lay an amendment before the Senate for action tomorrow?

Mr. STEVENSON. Mr. President, I have an amendment which I could offer at any time.

I would like, if it were possible, to have just a few minutes in which to make a statement this afternoon.

Mr. NELSON. Mr. President, may I say to the Senator from Illinois that Senator THURMOND, who is cochairman of the special committee, has a statement he wishes to make. I will yield the floor, so that Senator THURMOND can present his statement. There are some other Members who wish to make statements. Thereafter, we could take up the amendment of the Senator from Illinois.

I yield the floor.

Mr. THURMOND. Mr. President, I supported Senate Resolution 110 in committee, and intend to do so on the floor.

The resolution contains some excellent provisions. I have reservations about the wisdom and practicality of others, but, on the whole, the thrust is good, and I support the purpose for which it is designed.

Fashioning a balanced, realistic code has been a difficult task. Some of the provisions we adopted in committee will not be popular. The product of our committee work will be pleasing to some, and displeasing to others.

We cannot afford, however, to view standards of conduct simply as they affect each of us personally. More importantly, we should debate the proposed code with the public interest as our paramount consideration. If the code is fair and strong, it will endure longer than the service of any individual Senator, and thus, the debate we are about to begin can serve to strengthen and clarify the standards we and our successors will be called upon to meet.

Without question, Mr. President, these standards are stringent, but I do not hesitate to apply stringent ethical standards to Congress nor to accept them personally.

It is our solemn duty to set an example for honesty and integrity in our Nation. If the Congress, the President, and the judiciary do not bear this responsibility, then, our national leadership will cease to be a leadership based on institutional trust and respect.

Mr. President, under the concept of the public trust, we are expected to hold a fiduciary position in regard to our constituency and thereby to maintain higher standards of official and personal conduct than most individuals.

John C. Calhoun, who was from my home State of South Carolina, one of the great Senators to serve this body, ably defined this aspect of the public trust in an 1835 speech when he wrote:

. . . the very essence of free government consists in considering offices as public trusts, bestowed for the good of the Country and not for the benefit of an individual or party.

Mr. President, it is in this spirit that I support the proposed code.

Mr. President, I shall now briefly review the most important provisions contained in the resolution. The resolution amends the Standing Rules of the Senate by rules 41, 42, 43, and 44, and replacing them with strict rules which lend themselves toward effective enforcement and assure public accountability.

Proposed rule 42 will provide for full, complete, public financial disclosure by Senators, officers, and employees of the Senate who earn in excess of $25,000 per year.

Second, proposed rule 43 will prohibit one from knowingly accepting a gift or gifts having an aggregated value of over $100 during a year from any individual or oranization having a "direct interest in legislation."

Third, proposed rule 44 will impose on Senators, officers, and employees of the Senate earning over $35,000, a 15-percent limitation—based on their salaries—on outside earned income. This is a controversial provision, but I stand firmly for it.

Fourth, proposed rule 45 will prohibit a Senator, officer, or employee earning over $25,000 from practicing a profession for compensation. This is another controversial provision, but greatly strengthens the code.

Fifth, proposed rule 46 will prohibit the so-called unofficial office accounts.

Sixth, proposed rule 47 will limit so-called "lame-duck" travel and will prohibit the practice of "double-dipping," where one may be reimbursed twice for the same expense.

Seventh, proposed rule 48 will place restrictions on the use of the frank and the radio-TV studios.

Eighth, proposed rule 49 will provide that no officer or employee of the Senate may solicit, receive, have custody of, or distribute funds in connection with a political campaign except for one assistant in the Washington office and one assistant in the home office. In any event, solicitation of funds is barred for both individuals.

Ninth, proposed rule 50 will provide that no Member, officer, or employee shall engage in discriminatory employment practices. Rule 50 will take effect January 3, 1979. and in the meantime, the Governmental Affairs Committee will study how to handle employment discrimination complaints.

Title II of the resolution provides for a strong procedural mechanism for enforcement of the code.

Title III of the resolution lists a number of studies recommended by the committee and the effective dates of the various rules.

Mr. President, I believe the code recommended by the committee is a strong, viable one which sets standards for which the most ethical, conscientious men can aspire.

Certain provisions are less well-refined than others, and I am sure amendments will be offered and suggestions will be made in colloquies on the floor.

I shall support any amendment which makes the code more practical and workable, but I shall oppose any amendment designed to weaken the thrust of it.

Finally, Mr. President, as vice chairman of the Special Committee on Official Conduct, I want to state that the resolution is a bipartisan effort. The original resolution mandating our committee effort was jointly introduced by the Democratic and Republican leaders, and the substantive resolution was reported unanimously by Democrats and Republicans alike on the committee. I urge my colleagues to debate the resolution in this bipartisan spirit, and, to paraphrase John C. Calhoun, in the interest of the country, not in the interest of the individual or political party.

In closing, Mr. President, I express my sincere appreciation to the chairman of the committee, the distinguished Senator from Wisconsin (Mr. NELSON), for the capable manner in which he conducted hearings and his zeal and interest in reporting a fair and just measure to the Senate for its consideration.

I also commend the various members of the staff who served without compensation. Some are on the regular payroll of the Senate, and they helped and were of tremendous benefit in this matter.

The PRESIDING OFFICER (Mr. SARBANES). Who yields time?

Mr. THURMOND. Mr. President, I am not sure it has been mentioned for the record as to who the members of this committee are.

I ask unanimous consent that the membership of the Special Committee on Official Conduct and the staff members who assisted them be printed in the RECORD following my remarks.

There being no objection, the Members and staff were ordered to be printed in the RECORD, as follows:

SPECIAL COMMITTEE ON OFFICIAL CONDUCT

Gaylord Nelson, Wisconsin, Chairman.
Strom Thurmond, South Carolina, Co-chairman.
Abraham Ribicoff, Connecticut.
Daniel K. Inouye, Hawaii.
Thomas F. Eagleton, Missouri.
Sam Nunn, Georgia.
Dick Clark, Iowa.
John Glenn, Ohio.
John Melcher, Montana.
Jacob K. Javits, New York.
Robert P. Griffin, Michigan.
Bob Packwood, Oregon.
Robert T. Stafford, Vermont.
Paul Laxalt, Nevada.
John H. Chafee, Rhode Island.
Ira S. Shapiro, Chief Counsel and Staff Director.
John Napier, Chief Counsel to the Minority
David R. Schaefer, Deputy Chief Counsel.
Andrew W. Loewi, Counsel.
D. Eric Hultman, Counsel.
Charles Warren, Counsel.
Brian Conboy, Counsel.
Mildred Lehmann, Staff Consultant.

Mr. THURMOND. Mr. President, does anyone care to speak at this time? If not, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, the Senator from Iowa (Mr. CLARK) wishes to make some remarks on the resolution.

I understood that Senator BROOKE wanted to make some remarks. When remarks on the resolution in general are concluded, then Senator STEVENSON wishes to offer an amendment.

Mr. STEVENSON. Mr. President, I do not have any present intention to offer an amendment this evening. The amendment to which I alluded earlier is one I believe the Senator from Wisconsin is interested in also. I am not sure who will offer that amendment, but what I would like to do, as I mentioned earlier, is just to make a few remarks about this resolution.

Mr. NELSON. I thought the Senator earlier had said he had an amendment.

Mr. STEVENSON. The Senator is correct. I do have an amendment, but I am not sure who is going to offer it. It might be the Senator from Wisconsin. I have no intention of laying that amendment down unless the Senator from Wisconsin would like me to do so, in which case I would be happy to.

Mr. NELSON. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. I yield time on the bill to the Senator from Illinois.

Mr. STEVENSON. Mr. President, I thank the Senator for yielding, and I associate myself with the words earlier of the distinguished majority leader and, in particular, his commendations of Senator NELSON and all the members of his committee for their prodigious labor under severe time constraints and for the Senator's and committee's effective response to the Senate's mandate.

The draft resolution of the committee has been a moving target, changing daily to conform to new insights and suggestions. But in Senate Resolution 110, as amended by the substitute, the target has largely, but not entirely, come to rest.

As chairman of the Senate Ethics Committee, I and other members of that committee have been part of the process which produced Senate Resolution 110. We recognize that we will have a responsibility to enforce not only the vague but long-accepted concepts of appropriate conduct in this body, but also the specific Code of Official Conduct set forth in Senate Resolution 110. The rules of conduct there stated must be feasible and capable of enforcement. The procedures for enforcement must make effective enforcement possible.

We intend, after all, that the Code of Official Conduct be fairly and effectively enforced. I do not welcome that responsibility, but I do not shrink from it. All of us recognize that a spurious complaint or a minor transgression unfairly pursued can destroy the public career of an honorable man. But let us also recognize that if we gloss over abuses of the public trust through an instinctive urge to protect our own, we demean the deliberative body in which we serve. We make more difficult the task of shaping policy for the Nation. Why, after all, should the public trust our judgment on

the issues facing us as a people if it has reason to distrust our response to matters of personal ethics and conduct?

Senate Resolution 110 is not a perfect document. There could be no expectation of perfection. There is no perfection. There is no way to legislate morality or close off every means by which the ingenuity of man can evade the purpose of the most carefully drawn law. No code of conduct for the Senate will materially alter the conduct of men who are honorable.

I am troubled by the emphasis on prohibitions and restrictions. There remains unresolved for me the question whether full disclosure to the public is not the most appropriate restraint in an open democracy where the people choose. A restraint appropriate to the circumstances of one Member may be unreasonable in the circumstanes of another.

Objective standards can be the refuge of the creative scoundrel. But we made a compact with the public some weeks back, and we cannot act in a manner which violates that compact. Our purpose is not to alter conduct already honorable; it is to give the public confidence in our conduct. So I do not question the concept of prohibitions and restraints; I do question the wisdom and feasibility of some of them.

I question whether prohibiting a physician from practicing his profession at all, when there is a ceiling on outside earned income of slightly over $8,000, has any justification. A physician who does not practice will soon be no physician at all. Inherent in that prohibition is a concept of full-time political professionalism repugnant to the notion that citizens can serve in their legislatures and then return to private life.

Some of the concepts in Senate Resolution 110 will be difficult to implement in practice. Particularly troublesome are the prohibitions against earned income. I may be faced with deciding whether to reroof my house or my barn. If I decide to put a new roof on my barn—it is a managerial decision. It is an innocent decision which may depend upon which roof leaks the most. But if I chose to roof the barn, am I then rendering a material income-producing service? What if I prefer, as I do, to spend a summer Saturday getting the hay in instead of playing golf? Does that make me any less a full-time Senator? Or more susceptible to the influence of a conflicting economic interest? Must I be censured or give up my home and farm to serve in the Senate?

Despite such reservations, I support Senate Resolution 110. I believe in disclosure. It is an invasion of privacy. But it is an invasion of privacy which we and senior staff, influencing national policy, implicitly accept. We ask the public to learn about us and to trust us. Each of us becomes a living, breathing prospectus—and that means disclosure of all information which can reasonably be expected to be relevant to the public's judgment. Senate Resolution 110 mandates that disclosure, and it does so in a manner which can be accomplished without undue difficulty.

The enforcement provisions were at first a source of concern. The substitute meets my objectives. It requires the Ethics Committee to act when there may be serious abuses of the public trust. It gives the Ethics Committee considerable latitude in minor matters. It provides a structure but not a straitjacket.

The process of drafting Senate Resolution 110 has required Members to take a hard look at certain practices. Some of these have been referred to other committees, quite properly, for further study. Others, such as unofficial office accounts, have been abolished. And still others, such as the use of political funds for official expenses, have undergone a transformation during discussion.

I spoke in the beginning of Senate Resolution 110 as a moving target, not yet entirely at rest. One amendment will be offered with which I wholeheartedly concur. That amendment would prohibit the use of political funds for expenses related to official duties. Its corollary is an adequate allowance for official expenses. Like most things touching upon a representative, and therefore political, body, the problems are more complex than observers believe. It is time, however, that political funds no longer be used for public expenses, and that a wall be erected between funds for use as a Senator and funds for use as a political figure.

Finally, we should recognize that the Code of Official Conduct is not written in stone. It is a bold, and I believe necessary, experiment. It is imperfect. And it is capable of change. One of the responsibilities of the Senate Ethics Committee is to recommend changes. Ongoing experience will require changes. Some standards or disclosure requirements may be incomplete, impractical, or unfair. I am confident that the Ethics Committee will not shrink from recommending the changes that experience requires.

What we are seeking, after all, is not a passing exercise in self-righteousness or a trap for the unwary. We seek to articulate public standards of conduct which have been inarticulated for too long and then insist upon adherence to them, as we have not in the past. So I commend to the Members Senate Resolution 110, as amended—and as a brave beginning.

The PRESIDING OFFICER. Who yields time.

Mr. ALLEN. Mr. President, will the Senator yield me 7 minutes?

Mr. NELSON. I yield to the Senator from Alabama whatever time he may need.

Mr. ALLEN. I thank the distinguished Senator.

Mr. President, I support Senate Resolution 110 and particularly the amendment in the nature of a substitute, amendment No. 65 by Mr. NELSON and others.

Mr. President, I think it is a sad commentary on the state of affairs in Congress that it is even necessary to have a code of ethics. I feel that the Members of the House of Representatives and the Senate, elected by the people to represent them in the Halls of Congress, should be of such high type and should be so conscientious and dedicated that they would voluntarily follow the highest possible concepts of service and actions both officially and unofficially. But we know, Mr. President, that this lofty concept is not realistic and it is necessary to establish a strong code of ethics.

Mr. President, I do not subscribe to the view that because a salary increase was given to Members of Congress that, therefore, quid pro quo we need to adopt a code of ethics. I believe we need a code of ethics irrespective of whatever action was taken on the pay increase.

I opposed the pay increase. I felt that in this time of unemployment, high prices, and inflation, now is not the time to greatly increase the salaries of the Members of Congress. But I do not believe it ought to be put on any basis that the salary was raised, therefore, we have to establish a code of ethics.

The code of ethics apparently is needed irrespective of the action by Congress on the pay increase. So I favor this resolution.

There are a number of items or one or two items that I wish to see changed possibly. But I have tried since coming to the Senate to conform in general to the principles set forth in Senate Resolution 110.

I wish to see a complete ban on outside earned income, but I realize that is not practical and that what we are going to have to do is to retain the 15-percent limit. I think if we hold that that will be good. But my personal preference is to have a complete ban on outside earned income.

My own policy, since I have been in political life, has been not to accept any honoraria or expense money of any sort. During all of my service both in Alabama State government and in the U.S. Senate, I have never accepted an honorarium from anyone at any time for any purpose, and that is going to continue to be my policy.

Ever since I have been in the Senate I have each year filed a full and complete disclosure, even in greater detail than is required by Senate Resolution 110, of my assets, such as they are, liabilities, and income.

So this Senate Resolution 110 as sought to be amended by amendment No. 65 in my judgment is in the public interest, and I plan to give my full support to the resolution.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. CLARK. Mr. President, will the Senator yield 10 minutes?

Mr. NELSON. I yield 10 minutes from the bill to the Senator from Iowa.

Mr. CLARK. I thank the Senator.

Mr. President, we are about to begin what undoubtedly will be a very difficult and heated debate on the proposed Senate Code of Official Conduct. As a member of the special committee that drafted the code, I know firsthand that many of our colleagues find some of its provisions to be punitive, picayune, overly broad, or entirely unnecessary.

And from a certain perspective, Mr. President, they may be right.

I have had the privilege of serving in the Senate for a little more than 4 years, but it has not taken me that long to realize that the levels of integrity, honesty, diligence, and dedication to public service in this body are among the highest of any institution in the land.

But there have been cases, as there are in any profession, where these high levels have not been maintained, and each such case has served to further erode the already declining confidence of the public in the Senate and in Government as a whole.

To a certain extent, it is true that the code we have proposed will limit our income, invade our privacy, and restrict our actions. But it is time that our high level of performance was matched by a high set of standards, standards our people will know are being adhered to and enforced.

That is what we propose to accomplish in Senate Resolution 110 under the able leadership of Senator GAYLORD NELSON—and using as a starting point the recommendations of the Obey Commission, which recently passed the House by an overwhelming margin—we have set forth what we believe are the essential elements of a strong code of conduct:

Strict public financial disclosure;

A ban on expensive gifts from lobbyists;

A limitation on outside earned income;

Elimination of unofficial office accounts—or, as they have often been called, "slush funds";

An end to foreign travel by lame duck Members;

Safeguards against abuse of the franking privilege;

Restrictions on political fund-raising activity by Senate staff; and

A bar to discrimination in employment practices.

But we did not stop there, because a code of conduct would have little meaning without a credible and effective mechanism to guarantee that its standards are maintained. Working from the outstanding proposals developed by the Senator from Massachusetts (Mr. BROOKE), and with considerable assistance from Senators STEVENSON and SCHMITT, chairman and ranking minority member, respectively, of the Select Committee on Ethics, the committee has constructed an enforcement procedure in which the Senate—and the public—can have real confidence.

Those are the essential elements of the resolution now before us. Perhaps it would be worthwhile to take a moment to recall why the Senate is faced, at this particular time, with a proposed code of official conduct. What were the events that brought us to this debate?

Late last year, the Peterson Commission on Executive, Judicial, and Legislative Salaries proposed a substantial pay raise for high-level Government officials—so long as it was accompanied by a tough code of conduct. The majority leader has just spoken of this.

President Ford supported the Commission's proposals and included the pay raise in his budget request—again, with a concurrent request for a tough code of conduct.

President Carter endorsed President Ford's request—for a pay raise, and for a tough code of conduct.

Last month, the Senate and House approved a very substantial salary increase for ourselves and other high-level officials.

The House, to its credit, then passed, by a vote of 402 to 22, a code of conduct that is nearly identical in its major provisions to the proposal now before us.

So the choices we face today are simple, and the consequences of our actions easy to foresee. Public confidence in Government— and in the Congress, in particular—could hardly be lower.

Every public opinion poll tells the same story. Adopting this code of conduct will not by itself restore people's confidence in the Senate. But it will help, and help is desperately needed.

On the other hand, we can weaken this proposal, whittle it down to where it is nothing but a hollow shell. And if we do, we will further weaken our own credibility, and the credibility of this institution.

Mr. President, no matter what the polls show, I believe our people can be proud of the Senate of the United States. In this proposal, we have a chance to show them why they can be proud.

Let me add, Mr. President, the Special Committee on Official Conduct was formed only a few short weeks ago. Its job, by anyone's estimation, was a very difficult one. But that job has been completed, and a lion's share of the credit must go to the distinguished chairman of our committee, GAYLORD NELSON. He has guided the committee with great efficiency and good humor. He has worked long hours, amidst heavy pressures, on a thankless task; and the Senate and the Nation owe GAYLORD NELSON a deep debt of gratitude.

The same can be said, with equal force, of the distinguished majority leader. Along with Senator BAKER, it was he who established the special committee; and at every turn Senator ROBERT C. BYRD has shown that he is a leading voice in the Senate for a strong code of conduct.

Others have made significant contributions as well—Senator RIBICOFF and Senator STEVENSON have been especially helpful. Several Members on the Republican side have also worked long and hard—particularly Senators THURMOND and JAVITS. The Senator from Montana (Mr. MELCHER) has spent many hours working to improve the code.

But we would be particularly remiss, I think, in failing to mention the monumental effort put forth by the staff that has assisted us from the beginning. We have had no separate committee staff; we have borrowed a handful of people from several offices, and they worked every night and every weekend for more than a month to help bring this resolution before the Senate.

Special credit must go to Ira Shapiro of Senator NELSON's office, who has served as staff director, and Dave Schaefer of the Governmental Affairs Committee. Their work on this committee truly has been exemplary.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BAKER. I yield 15 minutes to the Senator from Massachusetts.

Mr. BROOKE. Mr. President, I am very pleased and proud to support Senate Resolution 110, the proposed Senate Code of Conduct. It is an outstanding legislative document.

At the outset I want to commend and thank the distinguished chairman and cochairman of the Special Committee on Official Conduct Senators NELSON and THURMOND, and the other members of the special committee. In just 6 weeks they have drafted a comprehensive Code of Conduct and the means to enforce that Code of Conduct. We are all indebted to them for their hard work and dedication.

Strengthening the Senate's disciplinary process has long been of deep concern to me. As a member of the Senate Select Committee on Standards and Conduct for the past several years, I have been acutely aware of the need for substantial reform. Based upon my experience on that committee, I introduced on January 10 this year Senate Resolution 26, a comprehensive Ethics Committee reform package. This legislation provided for the procedural reform of the Ethics Committee, the enactment of financial disclosure provisions, and the establishment of a Senate Code of Conduct.

Thus I was pleased that the Senate acted promptly on the Code of Conduct proposal and established the Special Committee on Official Conduct. I was also pleased that the Senate Rules Committee, during the consideration of the reorganization proposal, recommended several of the procedural reforms which I had proposed in my legislative package. These reforms which were later adopted by the Senate provided that no Member say serve on the Ethics Committee for more than 6 years and that there must be a balance between veterans and younger Members.

But other reform measures contained in Senate Resolution 26 were not included in the reorganization proposal. Although Senator CLARK, who has been an effective advocate of ethics reform, and others argued eloquently on behalf of the reforms, a majority of the Senate Rules Committee agreed that the committee did not have jurisdiction. However, the Senate Rules Committee indicated in public session that it was the committee's opinion that although these matters were not in the Rules Committee mandate, they would be considered by the new Special Committee on Official Conduct.

Thus on February 2, I testified before the new Official Conduct Committee. I asked the committee to adopt the procedural reforms of Senate Resolution 26. These reforms included broadening the jurisdiction of the Ethics Committee, improving the procedures for investigation of complaints, allowing the disqualification of members in certain proceedings, and providing for additional committee staff.

At that time I emphasized the importance of restructuring and reforming the Ethics Committee itself. For without an

effective enforcement mechanism, the enactment of a code of conduct and comprehensive financial disclosure requirements will be meaningless.

I also made several recommendations which I hoped would be considered and included in the proposed Senate Code of Conduct.

First, and consistent with Justice Brandeis' insightful statement that "sunlight is the best disinfectant," I recommended strict and comprehensive financial disclosure for all Senators and employees and officers of the Senate who earn more than $25,000 per year. My own financial disclosure proposal, modeled after title III of the Watergate Reform Act which passed the Senate last year, would require the annual public disclosure of income, assets, liabilities, business transactions in securities or in commodities futures, purchase or sale of real property, patent rights, and various other financial items.

Second, I recommended that certain outside earned income be banned, including legal fees and gifts of more than $100 in a year from persons with direct interests before Congress. In addition, I recommended that there be restrictions on other outside earned income.

Third, I recommended the abolition of lame duck travel. In my judgment, it is inappropriate for Senators to travel at official expense once they can no longer participate in the legislative process. A Member would be in this category if he or she has not been reelected in November to the succeeding Congress, or once the Senate has adjourned sine-die, whichever day comes first.

Fourth, I recommended that we end unofficial office accounts.

Fifth, I recommended that we prevent the misuse of public funds regarding staff employment. Senators should employ with public funds no one who does not perform duties commensurate with his or her compensation and should utilize employees only for the official purposes for which they are employed.

And sixth, I recommended that conflict-of-interest provisions be drafted. Strict but reasonable provisions should be developed in order to eliminate—or at the very least, minimize—those conflicts that necessarily arise when the economic investment interest of a Senator falls within the scope of his public responsibility.

I am pleased that Senate Resolution 110 incorporates many of the procedural reforms and code of conduct provisions which I recommended. In addition the special committee has added a number of sound amendments and important new sections.

In title II, the enforcement section, there is a provision which authorizes the Ethics Committee to issue interpretative rulings and requires the committee to render advisory opinions to Senators, officers, or candidates upon request. This is an excellent proposal. It will greatly facilitate the implementation of the new Code of Conduct, allowing individuals to quickly obtain guidance on matters of concern to them.

In addition, the special committee, while retaining the necessary procedural reforms, has made title II more flexible. The enforcement section establishes the rules which will serve as guidelines for the Ethics Committee. But the Ethics Committee will still be, of course, responsible for promulgating procedures to implement these rules.

Some Members of the Senate have suggested that title II should not be in the Code of Conduct resolution. They argue that the consideration of an enforcement mechanism is not within the charter of the special committee and that the Senate Ethics Committee should have an opportunity to develop and report out its own rules and procedures.

I must vigorously dissent from this point of view.

First, the prompt establishment of an effective enforcement unit is absolutely essential. Without a viable and strong Ethics Committee, the successful and effective implementation of a code of conduct could be put in serious jeopardy.

Second, there has been more than enough time to consider and debate title II. These proposals have been before the Senate since January 10. Two Senate committees have heard testimony regarding them. And the special committee on official conduct in particular has spent considerable time studying and debating these proposals.

Third, several members of the Senate Ethics Committee have already studied the enforcement section. Initially these members had many reservations. But working with the special committee, they helped draft a reasonable and workable compromise.

And finally, the special committee has already recommended Senate Resolution 110 by a 15–0 vote. To delete title II now will be rightfully perceived as a major retreat by the Senate in its commitment to a strong, comprehensive and effective code of conduct.

The Senate can be rightfully proud of the code of conduct provisions contained in title I of Senate Resolution 110. While many of us could, I am sure, suggest certain modifications, title I is an excellent start for our Senate code of conduct.

In addition to the code of conduct provisions which I discussed previously, title I contains several other important rules. Included are restrictions on gifts, the franking privilege, the use of radio and television studios, and political fund activity.

I am particularly pleased that title I includes a rule which prohibits employment discrimination with respect to promotion, compensation, terms, conditions or privileges on the basis of race, color, religion, sex, national origin, or physical handicap. And I am confident that the appropriate committees will expeditiously report back to the Senate on the implementation of this necessary and important new rule.

Perhaps the most controversial section in title I is the new rule on outside earned income. This provision would limit Senators, officers, and employees making over $35,000 to outside earned income not to exceed 15 percent of their salary.

Mr. President, over the past several weeks, I have listened with interest and sympathy to those opposing this limitation. They argue that there would be a discriminatory impact on those who, by accident of birth, were not born wealthy. It is also argued that comprehensive financial disclosure is sufficient protection against financial conflicts of interest.

As attractive as some of those arguments are, I must support the committee provision. I believe that the limitation on outside earned income is consistent with the principal thrust of the legislation. We are attempting to restore the confidence of the American people in the integrity of their elected officials.

By establishing a limitation on outside earned income we are insuring that being a member of Congress is a full-time job. That is what the public expects. And that is what the public deserves.

We are also eliminating possible sources of financial impropriety. And this is particularly important when we add the factor of the recent pay raise. Of course there were a number of considerations, principally economic, which justified the pay raise. But a major consideration was that by providing reasonable and equitable salaries, while at the same time restricting or eliminating sources of outside earned income, we would be substantially reducing the possibility of financial conflicts of interests.

Mr. President, this is a sound proposal and it merits the support of the Senate.

By adopting Senate Resolution 110 the Senate will go a long way toward restoring public confidence in Congress as an institution. And as we all know this confidence has been appallingly low. Indeed, according to one national survey taken last year, only 9 percent of those polled gave Congress a favorable rating.

The causes for public disenchantment are many. But, in my judgment, a principal cause is the widespread belief that Congress has been unable or unwilling to investigate and, if necessary, discipline, those Members of Congress who have been accused of illegal or unethical conduct. For the truth is that while Congress is always more than eager to investigate members of the executive branch or the activities of the business community, it has been remiss in its constitutional responsibility to tidy up its own Houses.

We must respond now to the legitimate criticisms that have been levelled at our congressional disciplinary procedures. But a perfunctory response will not suffice. We must demonstrate to the American people our resolve, not just our rhetoric, to accomplish comprehensive reform. Just as the enactment of the Budget Reform Act in the last Congress demonstrated our commitment to fiscal discipline, we must now demonstrate our commitment to ethical discipline.

Mr. President, Senate Resolution 110 is such a commitment. I urge my colleagues to vote overwhelmingly for its passage.

I yield the floor.

Mr. BAKER. Mr. President, I yield temporarily the control of time on our side to the distinguished Senator from Michigan.

I thank the Senator for yielding.

UP AMENDMENT NO. 82

Mr. ALLEN. Mr. President, I call up my second unprinted amendment at the desk.

The PRESIDING OFFICER (Mr. SASSER). The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes unprinted amendment No. 82.

Mr. ALLEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend amendment numbered 65 as follows:

On page 35, lines 24 and 25 strike the following words: "information as to the number of pieces included in the mass mailing and"

On page 36, line 6 strike the comma at the end of such line and insert a period.

On page 36, strike all of line 7.

Mr. ALLEN. Mr. President, rule XLVII of Senate Resolution 110 has some very desirable provisions having to do with regulating mass mailing to assure that no advantage is given to an incumbent over a possible challenger through the use by a Senator of mass mailing. In the first instance, it provides that no mass mailing shall take place by a Senator within 60 days of any primary or runoff or general election, which I think is a very fine provision.

Second, it provides that only official funds of the Senate can be used to purchase paper and to print or prepare any mass mailing of material which is to be sent out under the frank, which is a good provision in that it will put a definite limit on the amount of mass mailing that a Senator can engage in, because he cannot use personal funds or campaign funds for the purpose of getting out a newsletter. It can only be appropriated funds; that is, in a Senator's allowances or the paper allowances given to him by the Rules Committee based on the size of his State.

Then provision is made for a Senator, each year, to file with the Secretary a copy of each item of mass mailing that he has sent out during the year, annual reports. He is to file a copy of the newsletter or other item that is mailed in mass, and mass mailing is described as being any mailing of as many as 500 items.

Also, it provides that a description shall be given of the group or groups of persons to whom the mass mailing was mailed, such as to state whether it was to environmentalists or bankers or farmers, or whatever classification.

It goes one step further and requires that the number of the items of the mass mailing should be included in this report. This goes further than the House provision on this subject and is really an unnecessary burden, in view of the other limitations imposed on the mass mailing requirement. What this amendment would do is leave all the reforms in, but eliminate the necessity of giving the actual number included in the mass mailing.

Mr. NELSON. Mr. President, on that amendment, I think it would have been better to leave that this subject out of the resolution to deal with later. The House of Representatives postponed dealing with that question. However, I have no objection to the amendment and am prepared to accept it if nobody else objects.

I understand there is no objection.

Mr. ALLEN. It has also been cleared with the other side.

Mr. WEICKER. If the Senator will yield, I still do not understand the thrust of his amendment.

Mr. ALLEN. The amendment eliminates the requirement that the number of the mass mailing be specified.

Mr. WEICKER. Are you proposing that the matter of mass mailings, be referred to the Rules Committee or the Ethics Committee for further study?

Mr. ALLEN. No, it does not make any requirement. I do have an amendment requiring the whole subject of mass mailing to be sent to the Committee on Rules, but an agreement was made with the committee that this provision would be accepted and not sent to the Rules Committee, the overall subject. Of course, any Senator who desires to may have this amendment be sent to the Rules Committee; that can be done.

Mr. WEICKER. It is my understanding that the Senator is saying is that this in no way changes the thrust of this portion of the bill, which, in effect, eliminates the option of using the franking privilege for mass mailings 60 days before election?

Mr. ALLEN. No, sir, that all stays in. The only change in this amendment is that the number included in the mass mailing is not specified.

Mr. WEICKER. I feel very strongly that there should not be any mass mailings under the franking privilege at any time, never mind 60 days before the election.

This clause is just eliminated and in essence, does not change the thrust of the section as it now stands in the bill; is that right?

Mr. ALLEN. It makes no change other than what I have said.

Mr. WEICKER. I also want to take this occasion to say, because I know it is going to come up during the debate that I notice the distinguished Senator from Wisconsin makes the point that the House did not address franking abuses in its reforms. I want the record straight now that I do not care what the House does. It is going to have no bearing on what we do here. I feel what they did over there is an inane as what we have before us.

I accept the amendment if it is as the Senator stated.

Mr. ALLEN. I thank the Senator.

Mr. NELSON. Just in brief response to that: Without the extensive hearings and work that the Obey commission in the House had done, we would not be here on the floor with a resolution now. They had the benefit of working from July until now and held extensive hearings. As the Senator is well aware, we followed a procedure which is not a good procedure. If we were handling this kind of measure in the normal fashion, the resolution introduced a week ago would now be referred to committee and we would start extensive hearings, and then proceed to draft the final bill. So without the hearings they had going in depth on a number of matters, we would not have been able to have come to this point in such a short time.

Mr. WEICKER. I only respond to my distinguished colleague that that is what gives me pause about this legislation. That is one of the reasons that I am slightly concerned, the fact that the work has been done by the House. This is not to say that the distinguished Senator and my colleagues have not put a certain amount of their time into these deliberations and this product before us. I think what worries me is that apparently, what we have before us is as much the work of the House of Representatives and of Common Cause and other entities, rather than our own work. But now we shall have a chance to go over these matters in the hours ahead.

Mr. NELSON. Let me correct the Senator. It is the work of the committee of 15 members, Republicans and Democrats, who sat there. We had the benefit of the hearings the House conducted and the testimony that was taken on a number of complicated issues. Because of the benefit of those hearings on precisely the same issues, we were able to move much more rapidly than we could have otherwise.

Mr. WEICKER. I think this is a good point to bring up, though. Here is a situation where, as far as I am concerned, the American people are being ripped off. That is the use of the frank for newsletters for mass mailings. I tell the Senator what the House has done in this "ethics" resolution: They have postponed it to some time in the future. I think franking is an issue that should be addressed now, and, in my own opinion—and others may disagree—eliminated now, if indeed this is an "ethics" bill. So here is an area where, far from wanting anything weaker, very frankly, I would hope for something considerably stronger.

But here, as I see it, for those who think all this good work was done, I advocate that they take a close look at what is in this resolution and what is not in this resolution.

This could not be a better example of the real abuse that exists in the franking privilege, in both House and Senate, and this abuse has not been addressed in any way by this resolution.

Mr. NELSON. I say, in some generalized agreement with the Senator, that there are a number of things that are not in the bill that I would like to see taken up and considered and made a part of the rules of the Senate and the law at a future date.

We took up everything that we were specifically requested to take up in the resolution which passed the Senate unanimously, supported by the distinguished Senator. We even went beyond what this body asked us to do. Mr. President, I yield back the remainder of the time.

Mr. ALLEN. I yield back the remainder of time on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ALLEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 91

(Formerly UP amendment No. 83)

Mr. STEVENSON. Mr. President, I have an amendment at the desk which I call up and ask to have made the pending business. I ask unanimous consent that the remainder of this discussion not be taken out of the time of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. STEVENSON) for himself, Mr. NELSON, Mr. RIBICOFF and Mr. CLARK, proposes an amendment numbered 91.

The amendment is as follows:

On page 32, strike lines 11–24, and on page 33, strike lines 1–13, and insert in lieu thereof the following:

RULE XLVI—PROHIBITION OF UNOFFICIAL ACCOUNTS

1. No Member may maintain or have maintained for his use an unofficial office account.

2. The term "unofficial office account" means an account or repository into which funds are received for the purpose of defraying otherwise unreimbursed expenses allowable under Section 162(a) of the Internal Revenue Code of 1954 as ordinary and necessary in the operation of a Senatorial office.

3. No funds derived from a political committee (as defined in Section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. § 431)) can be used for the purpose of defraying otherwise unreimbursed expenses allowable under Section 162(a) of the Internal Revenue Code of 1954 as ordinary and necessary in the operation of a Senatorial office.

4. No contribution (as defined in Section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) shall be converted to the personal use of any Member, or any former Member who is defeated for reelection or does not seek reelection. All proceeds from testimonial dinners or other fund raising events or activities shall be treated as campaign contributions.

Mr. GRIFFIN. Mr. President, I yield 10 minutes to the distinguished Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, as the ranking Republican member of the Ethics Committee, I intend today to make an opening statement and then participate fully in the remainder of the debate on the proposed code of conduct for the U.S. Senate, Senate Resolution 110.

I first would like to make sure that I and my colleagues distinguish between a code of conduct and a code of ethics. Conduct is something we can, in fact, write a code about. Ethics is something that I do not believe can be codified. It is something we either have or do not have, we either do or do not do, and that is about the size of it.

The code of conduct, hopefully, that results from these debates and our votes, will improve the quality of the Republic and will improve the quality of the U.S. Senate, which is such an integral and important part of the Republic.

I think we must evaluate the resolution before us on its merits. We should not evaluate or consider this code as a price for a salary increase. I think that is demeaning to the American people. I think it is demeaning to the Members of Congress.

I, personally, can comply with the code and have already complied with all the provisions applicable within the code because I believe it is most appropriate in my particular case that I do so.

However, we must look at the broad implications of this code.

Mr. President, I believe there are five questions that we must ask ourselves as we evaluate the proposed code of conduct: What should the code do? Does the proposed code, in fact, do it? What should the code not do? Does the code, in fact, do those things that it should not? Finally, is the code enforceable?

First of all, what should the code do? I think there are only a few fundamental things that are absolutely necessary. No. 1, it must require the information to be disclosed that is necessary for the voter to judge the performance of his elected representative. The essential ingredient of such information comes from a full financial disclosure.

From such a disclosure, the voter must evaluate the ethical conduct of his representative, the conduct relative to law of that representative, and finally, whether that representative is devoting adequate attention to the job of being U.S. Senator.

Second, the code must provide guidelines to avoid conflicts of interest, which are easily recognizable and easy to enforce.

Finally, it must insure there is no unfair advantage accruing to an incumbent running for the office of U.S. Senator.

And does the proposed code do these things; does it, in fact, give the voter the information required to exercise the judgment that is necessary to either elect or not elect a Senator?

Full disclosure, I think, should, in addition to what has been recommended by the committee, include a net worth statement, complete and under standard procedures, and also some indication, some solid and factual indication of the tax situation of the Senator, such as the disclosure of the total income, the adjusted gross income, the taxable income, the total deductions and then the taxes paid.

Those five major items can be considered as part of full disclosure without any significant invasion of privacy that would come from a full publication of a tax return.

The proposed code, therefore, does not go far enough in the area of full disclosure, the essential ingredient for voter judgment.

In the guidelines on conflict of interest, full disclosure again is really the only check that can be made by the voter on his or her representative.

I believe that the code as proposed in Senate Resolution 110 does provide, with a little additional information, sufficient disclosure for any conflict of interest to be discerned.

However, with respect to the question of the accruing of unfair advantages to an incumbent running for reelection as U.S. Senator, I am afraid that the code does not go far enough.

The restriction on the franking privilege and on those of radio and television studios is limited to only 60 days prior to an election. If there is anyone here who thinks that a mass mailing, whether 500 or any other number, has no effect 61 days from an election and would have an effect 59 days from an election, he is fooling himself.

So I think we should seriously consider limiting the use of the frank for mass mailings and the use of radio and television studios to a full 1 year prior to the general election, rather than just 60 days prior to an election.

There is an issue that has not been treated by the code which probably should be; and I hope that, in the course of offering amendments, we will adopt one that will at least relegate to a study the question of domestic travel privileges and the possibility of double dipping on expenses on Senatorial business travel.

Now, what should the code not do? I believe, Mr. President, that the code should not limit the categories of citizens who would seek election to Congress and particularly the U.S. Senate. I am a firm believer in the concept of the civilian politician, in contrast to the professional politician.

In this context, I have cosponsored with Senator DANFORTH and others a proposed constitutional amendment that would limit the terms in the U.S. Senate to two, so that there would be a greater accessibility to running for office by other members of our society.

Also, I do not think that it is necessary that we institutionalize a full-time Congress, which I am afraid certain aspects of the proposed Code of Conduct would do. I realize that there is considerable disagreement in this body as to whether we are or should be full-time legislators. I do not think we should be. I think we should spend a great deal more time with our constituents, living and working in the real world of New Mexico or Connecticut or any other State from which we come.

As Senators, we should be concentrating on policy and the oversight of that policy, not on telling the administration and the executive branch how to implement policy. Unfortunately, in my short time in this body, it seems that I spend most of my time evaluating details of implementation of policy, without spending any significant amount of time sitting back and weighing what should be the great directions in which this country should go in many critical areas.

In this regard, does the proposed code do these things that it should not do? Namely, does it eliminate categories of citizens from consideration of running for the elective office of the U.S. Senate,

and does it institutionalize a full-time Congress? I believe that it does, and this happens in two important provisions: in the limit on the earning of outside income and in the prohibition of professional services.

In the limitation of outside earned income, we are telling a broad category of citizens of this country that once they have been successful in a career, in order to consider running for the U.S. Senate, they must divest themselves of——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SCHMITT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. SCHMITT. If the Chair will permit, I will yield myself another 5 minutes.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for an additional 5 minutes.

Mr. SCHMITT. Mr. President, the limit on outside earned income and the limit on professional services tells individuals in our society that once they have been successful in their career, they must eliminate almost all contact with that career in order to be in the U.S. Senate. I believe that is wrong, and we must take steps to eliminate such a prohibition on this group of our citizens. For in this group is some of the greatest talent that could be utilized in the conduct of the Government of the United States, and we should do nothing to eliminate the potential of that talent from this body.

The final question I pose in these introductory remarks is this: Is the code enforceable? As the ranking minority member of the Select Committee on Ethics, I compliment the committee, particularly its distinguished chairman, Senator NELSON, for having worked out during the last 2 weeks the difficulties that many of us foresaw in the enforcement of the proposed amendment, however it is adopted, and for now having a code which appears, at least from the surface, that we can enforce. Time will tell whether that belief is correct.

Since there is some uncertainty as to the total workload and the mechanisms by which a code of this kind can be enforced, I will support the recommendation of the distinguished minority leader that we institute a sunset amendment that would cause the code to be reevaluated at an appropriate time in the future and that would enable the Ethics Committee—present and future—to determine whether certain aspects of the code are in fact unenforceable. I hope that none of it is; but, again, I think time will tell.

However, I am not quite so sanguine about the capability of individuals representing this body to enforce their own requirements under the Code of Conduct. The individual recordkeeping and the inception of problems is extremely important, and it will be very tough. We should not underestimate that.

Finally, Mr. President, I should like to caution my colleagues, if I may, with respect to overreacting to special interests that have surrounded the whole question of ethics and tough ethics codes. There is some tendency for these special interests to try to impose on the Senate their own ideas of what our Government should be like. There is some effort on the part of these special interests to impose their own ideas as to who should be elected or who should hold political office.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GRIFFIN. Mr. President, I yield the Senator an additional 5 minutes.

Mr. SCHMITT. I thank the Senator.

In the final analysis, as I said when I commenced, the voter is the only judge, and it is the voter to whom we should look for our answers. With full disclosure, complete and unequivocal, the voter is the only judge, and it is the voter to whom we should look for our answers. With full disclosure, complete and unequivocal, the voter will have the information upon which to judge our conduct. The American voters are extremely discriminating, and in no way should we stand between the voters and the judgment they will offer on election day.

Mr. President, I commend Senator NELSON, Senator THURMOND, Senator STEVENSON, and the staffs of the various Senators who participated in the drafting of this resolution. It clearly has been a Herculean task. It has not met with complete agreement—certainly not on my part—but I think we owe them a debt of gratitude for trying to reach the appropriate compromises and for bringing this very important matter to the floor for debate.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. STEVENSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENSON. What is the pending business, Mr. President?

The PRESIDING OFFICER. The pending amendment is No. 91 proposed by the Senator from Illinois and others.

Mr. STEVENSON. Mr. President, this amendment would prohibit all so-called unofficial office accounts. It plugs a large hole in Senate Resolution 110.

Mr. President, many of the problems we face in the Senate, which we will be debating in the next few days, are rooted in the high cost of service in Congress.

In addition to all of the personal expenses incurred by a Member of Congress, including two homes, travel for his family, and the like, a Member is compelled to absorb substantial official expenses, expenses associated directly with the conduct of his official duties.

Those expenses include his expenses of travel, lodging, food in his State. It may include supplements for salaries of staff, it may include expenses for nongovernmental publications, taxi or bus fares for staff to and from Government offices. They are manifold, and they are not by any means all covered by official allowances.

To meet these substantial expenses in public office for service in Congress, Members have accepted private contributions not reportable as political funds. These are the unofficial office accounts which are attacked as slush funds.

Others have used political funds for that purpose, a use which is permitted by the Federal Election Campaign Act and by Standing Rule XLII of this body.

Others have used personal income received primarily from services related to our senatorial position. By that I mean honoraria and the like, which are earmarked for expenses related to official duties and not for personal use.

The problem of covering these expenses is real, and none of the present ways of dealing with the problem is, in my judgment, satisfactory. It is wholly inappropriate that private and unreported contributions should be expended for the discharge of the public's business. Both Senate Resolution 110 and this amendment ban the further use of such unofficial accounts after their orderly liquidation.

But Senate Resolution 110 legitimizes the use of political funds for these purposes. In doing so it comes perilously close to condoning the kind of conduct for which this body once censured a Member.

The use of political funds raises serious tax questions also. If political contributions are used for official as opposed to political purposes, they may be taxable to the Member, and the use of those funds for such purposes may not be deductible.

Mr. President, I believe it is time we got private and political money out of the public's business. There should be a wall between political and public money. That means expenses related to official duties should be funded from official funds, and political contributions should be used solely for political purposes. That is what this amendment would do.

This amendment, in conjunction with section 301 of title III of Senate Resolution 110, accomplishes that result. Senate Resolution 110 directs the Committee on Rules and Administration and the Committee on Appropriations to report legislation within 120 days authorizing adequate allowances to cover the necessary and appropriate expenses of our office.

So, Mr. President, this amendment, if adopted, would eliminate all the sleight-of-hand financing of the public's business which we have been witness to and been criticized for in the past. For once and for all, the Checkers funds, the slush funds, whatever they may be called, these uses of political and private contributions, will be ended. They will not be available to defray the expenses of Members, those expenses which are necessary and appropriate for the conduct of Members' official business.

Instead, Mr. President, those necessary, ordinary, reasonable expenses, official expenses, will be paid for by public

funds, as is the practice in industry, and as is the practice in all the other branches of Government, including the other body of Congress. The House has recently afforded itself adequate allowances with which to cover official expenses.

So, Mr. President, if adopted, there will be no more slush funds, no more Checkers funds, no more so-called unofficial office accounts. The official expenses of the Members would have to be defrayed out of their personal expenses, including honoraria, and out of adequate allowances of public funds for those purposes.

With this amendment Senate Resolution 110 will be greatly improved. A major weakness will be corrected, and a major source of criticism of this body will be eliminated.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. NELSON. Mr. President, will the Senator Yield?

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. STEVENSON. I first yield to the Senator from Alabama.

Mr. ALLEN. I have no objection at all if the Senator yields to the distinguished floor manager of the bill.

Mr. NELSON. I intended to ask a question at some stage.

Mr. ALLEN. Yes.

I state that I feel that I am in complete support of this amendment, because I have personally never had an official office account, slush fund, or fund by any other name that might be used.

I might state to the Senator and to the Senate that I do have a special fund to which I contribute my own personal funds, and I am sure that the prohibition here would not be directed against the use of personal funds in an account set aside for defraying these expenses.

Mr. STEVENSON. If the prohibition is directed at such an account of the Senator from Alabama, it would also be directed to such an account maintained by the Senator from Illinois.

Mr. ALLEN. Yes.

Mr. STEVENSON. We seem to follow the same practice. I do not maintain an unofficial office account with private or political contributions in it. But I do maintain—I think it is a laudatory practice—a bank account into which I make deposits of my own personal funds.

Mr. ALLEN. That is exactly my situation.

Mr. STEVENSON. And they are earmarked in that account for the defrayal of official expenses, and in my case, also, charitable expenses.

Mr. ALLEN. Yes.

I think that is quite obvious but I wished to have the legislative history indicate that.

Mr. STEVENSON. I thank the Senator from Alabama for the opportunity to clarify that important point.

Mr. ALLEN. On item 3 here, no funds derived from a political committee can be used for the purpose of defraying otherwise unreimbursed expenses.

That carries out the Senator's statement that political contributions are to be used only for political purposes. Is that correct?

Mr. STEVENSON. That is the intention of paragraph 3 of this amendment, yes.

Mr. ALLEN. This would not have reference, as I understand it, to any funds that a Senator might possibly have left over from past political campaigns.

Mr. STEVENSON. Yes, it would. This amendment would prevent the use of accumulated political funds, campaign funds, surplus from a past campaign, for the use of Senators to defray their official expenses. And for all the reasons I have mentioned, and we have mentioned the tax implications, those political funds under this amendment even though collected in the past would in the future have to be used for political purposes.

As a matter of fact, since we were discussing personal practices, after my last campaign I found I had a small surplus of campaign contributions and to keep faith with my political contributors I turned that surplus over to the Democratic National Committee.

So there are other possibilities. Those funds could be used for political purposes. They would not have to be used for the campaign of the Member, but under this amendment they would have to be used for political as opposed to personal or official needs and purposes of the Senator.

Mr. ALLEN. I have no objection to whatever the Senator is trying to do under this amendment. But would not the effect of this section, section 3, be to, in effect, amend the Federal election campaign law?

Mr. STEVENSON. No. That is not the intention. We cannot, of course, amend that without the concurrence of the House of Representatives. Its intent is to prohibit Members of this body, the Senate from using political funds which are permitted to be used by the Federal Election Campaign Act for political purposes. They would still under that act be permitted to use them for official expenses, but not under the rules of the Senate.

Mr. ALLEN. In other words, this then would restrict the construction that the Federal Election Commission has placed on the use of these funds, is that not correct?

Mr. STEVENSON. That is another way of putting it. But I do not think this is going to change the construction placed on the act by the Federal Election Commission. This is the Senate adopting a rule wholly apart from the act. The act will still permit the use of political funds for official purposes, but the rules of the Senate will not.

Mr. ALLEN. I see. In effect, then, it does circumscribe the Federal Election Commission policy and rulings?

Mr. STEVENSON. That is the effect, yes.

Mr. ALLEN. What would the Senator define as "political uses"? Would use of such funds for radio and television be permitted?

Mr. STEVENSON. I am not attempting to get into definitions of all political uses for political funds. That would still, I assume, be largely within the purview of the Federal Election Commission and, of course, the responsibility of the Members. But, yes, the use of political funds for political advertising would be an appropriate use of this funds.

Mr. ALLEN. I am not talking about political advertising. I am talking about constituent reports through the Senate radio and TV studios.

Mr. STEVENSON. That would not be regarded, in my judgment, as an ordinary official expense.

Mr. ALLEN. I know it is not an official expense. But is it not politically oriented?

Mr. STEVENSON. If it is not an official expense, then regardless of its political orientation, the political funds could not be used for it.

Mr. DURKIN. They can go out today.

Mr. STEVENSON. Yes; and we are saying they will not be under this rule. Political funds will not be available for official expenses. If I understand the Senator's question, he is asking what I would regard as official as opposed to political expense.

Mr. ALLEN. The Senator is saying a Senator could use these funds to go out and buy radio and TV advertising, and I assume newspaper advertising, but he cannot use them to make a report to his constituents; is that not correct?

Mr. STEVENSON. If they are political funds and he is campaigning for reelection, we can get into some lengthy discussions about when a campaign begins. If he wishes to advertise himself, he can use his political funds for that political purpose.

But that seems to me to be perfectly legitimate. If a Member wishes to advertise himself with mass mailings and newsletters, those political funds could be available for that purpose.

Mr. ALLEN. Of course, rule XLVIII says you cannot use any funds other than Senate-appropriated funds for getting out mass mailings. So you could not use such funds if you were going to use the frank.

I wonder if this is not confusing the present situation, under section 3. I would agree with everything else in the amendment, but I believe this is going to muddy the water instead of clarifying anything, in my judgment.

Mr. SCHMITT. Mr. President, will the Senator from Alabama yield at that point?

Mr. ALLEN. I yield.

Mr. STEVENSON. Wait, Mr. President, who has the floor?

Mr. ALLEN. I am sorry; the Senator from Illinois has the floor.

Mr. STEVENSON. The Senator from Alabama started by saying he supported the amendment. Now he is opposing the amendment.

The thrust of the amendment is in section 3. That is where the prohibition is for the use of political funds for official expenses, notwithstanding that that use is, as he acknowledges, permitted now by the Election Campaign Act.

Mr. ALLEN. Is radio and TV in the Senate studios covered by official funds?

Mr. NELSON. Mr. President, will the Senator yield for a comment?

Mr. ALLEN. Yes; I am glad to yield to the Senator from Wisconsin.

Mr. NELSON. There is, as the Senator knows, a difference between that proposal and what current rule XLII now

says, authorizing certain specified expenses which are clearly delineated and quite limited.

Presently, you also have the statute, the Federal Election Campaign Act, which is much broader. Under the statute, a member could convert campaign funds to personal use or expend them for "any other lawful purpose"; I believe is the language. So we have rule XLII, which limits expenditures to:

To defray expenses for travel to and from each Senator's home State; for printing and other expenses in connection with the mailing of speeches, newsletters, and reports to a Senator's constituents; for expenses of radio, television, and news media methods of reporting to a Senator's constituents; for telephone, telegraph, postage, and stationery expenses in excess of allowance; and for newspaper subscriptions from his home State.

Then we have the statute, which is in conflict with the rule in the sense that it allows for conversion to personal use; and use for any lawful purpose.

In looking at that, the committee, after careful consideration decided to abolish unofficial office accounts, but to permit the use of political contributions to meet ordinary and necessary unreimbursed expenses.

The author of this amendment concluded that there ought to be a complete separation between expenses related directly to official business and expenses that might be called "political," and that all expenses relating directly to official business should be paid for solely from official accounts.

Now, the problem, as the Senator well knows, is that many expenses directly related to official business are in fact not reimbursed from official accounts.

Mr. ALLEN. That is true.

Mr. NELSON. One is travel. For example, if a Member goes to his home State on official business, the Member must pay from his personal funds for the cost of the room in a hotel or motel, or meals. So we have the anomoly that if a Senator is on an official trip, in his State with a staff member, and they check into a hotel, that staff member is reimbursed on a per diem basis for expenses for the room and all other official expenses, but the Member is not, though that expense is now deductible on a tax return as reimbursement for business expenses. Unlike all the other Federal employees. Senators cannot be reimbursed for expenses directly related to official business.

I think it important to draw a line between official expenses and political expenses. Political expenses may be reimbursed from a campaign fund. The problem is what interpretation the IRS will make as to what constitutes a political expenditure and what expenditures are proper from a political fund, whether 5, 4, 3, 2, or 1 year from the election.

When a Member goes to his State to a political meeting, that is not official business, it is political, and you can pay for those expenses from a political campaign fund. There is no doubt about that. IRS is considering a ruling; we do not know yet what that ruling will be, and we have referred that question as to what expenses should be allowed from campaign funds to the Rules and Appropriations Committees, in consultation with Finance, for the purpose of evaluating the question.

What this amendment is attempting to do is make a clean break, so that we would not use campaign funds to pay for official expenses in the course of performing one's duties. That is what the amendment seems to do.

Mr. ALLEN. I understand the Senator. I would like to pose this practical question: Many Senators, I suppose most Senators, send from time to time TV clips or radio reports back to the people. They are not reimbursed under any Senate account. Now the Senator is abolishing slush funds. I have never maintained a slush fund, and I approve of doing that, but now the Senator is saying that, under this proposal, any surplus funds we might have from past campaigns or any other purpose, for that matter; I assume you are not allowed to pay that out of the political funds. Who is going to pay it?

Mr. NELSON. The Senator is correct. On that point, the resolution recommends that the Rules Committee address itself to the question of permitting the payment for TV from official funds.

But, if the theory is sound, which I think it is, that there should be a wall between expenditures for official responsibilities and duties of a Member, then you would have to apply it to TV and radio, and prohibit reimbursement from campaign funds for hotels in the course of official business. Those matters ought to be reimbursed from official funds: so we attempted to begin to draw that line, and then recommended to the appropriate committees that they address themselves to reimbursement. This amendment would draw the line completely.

Mr. ALLEN. What is going to happen in the meantime?

What is going to happen prior to the time the Rules Committee comes up with a policy?

Mr. McGOVERN. One would have to hold his breath, I suppose.

I might say the amendment concerning the official accounts provides for the abolition of unofficial accounts and on the adoption of the rule no further contributions could be made to an unofficial account. Unexpended funds in unofficial accounts could be expended for the balance of this calendar year. Meantime, the appropriate committees are charged with addressing themselves to the question. On this question the Rules Committee has 120 days.

Mr. HART. Will the Senator yield for a question?

Mr. McGOVERN. Yes.

Mr. HART. The key phrase there is "in the meantime." My concern is the same as the concern of the Senator from Alabama. I have noted from the limited time I have been here that it is much easier for wealthy Senators to hold their breath than it is for nonwealthy Senators.

Mr. McGOVERN. I am sure the Senator has had as much practice as I have in that regard.

Mr. GRIFFIN. Will the Senator from South Dakota yield?

Mr. STEVENSON. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Illinois has the floor.

Mr. STEVENSON. Mr. President, if the intention is not clear it can be made clear. It was to make this prohibition against the use of political funds for official expenses effective at the end of the year. The amendment not only requires the Committee on Rules and Administration, as is required under section 304(a), to review the question about the use of radio and television studios raised by the Senator from Alabama, but to make a report to the Senate. It is mandated to report within 120 days.

Also, of course, the bill affords Senators an opportunity to put their questions to the Ethics Committee. If they cannot make that judgment about where the wall is, where to draw the line, and they make it every time they use the franking privilege, they could come to the Ethics Committee and get an advisory opinion or an interpretive ruling. It should not be too hard to figure out what is political and what is official. If it is difficult, there will be opportunities for Senators to obtain assistance.

Mr. ALLEN. Is the report to the people through the Senate radio and TV official or unofficial, in the judgment of the Senator?

Mr. STEVENSON. It depends on what the Senator is saying. If the Senator is saying, "I am running for re-election and I urge you to vote for me," it seems that would be political.

Mr. ALLEN. Very few Senators make such statements in the Senate studio.

Mr. STEVENSON. The only question in my mind, as the Senator from Wisconsin indicated, is what happens when it is an official expense, because it has to be paid for.

Mr. BUMPERS. Will the Senator permit me to pursue that?

Mr. STEVENSON. That is why the Committee on Rules and Administration is mandated to report the legislation which addresses that question. It may be that that would be reimbursed as an official expense. As I contemplate in this amendment, the hole gets filled by allowances out of the Treasury for official expenses instead of coming out of political contributions.

Mr. ALLEN. I just wonder if the Senator thinks it logical to allow expenditures out of surplus campaign funds for commercial political announcements and then not to allow such payments to be used for radio and TV reports made through the Senate recording studio facilities. Does that make sense? Commercial ads can be run out of such a fund, but reports cannot be made to the people?

Mr. STEVENSON. Commercial ads presumably would be political expenditures, advertising for some political purpose. I do not see what difference it makes where that advertisement is put together, whether it is in a broadcast studio in Alabama or here on the Hill. A political expense ought to be defrayed by political funds.

Mr. ALLEN. Would the Senator argue that is nonpolitical, then, to make such reports?

Mr. STEVENSON. I have been trying to suggest to the Senator that it seems to me the question of what is and what is not political goes to the content of the message.

Mr. BUMPERS. Who will make the determination? What kind of a Senator would have to pass on it?

Mr. STEVENSON. That is a judgment every Senator in this body makes every time he uses the frank. He cannot use the frank for political purposes. Sometimes there are gray areas. Sometimes Senators stray into those gray areas. I think most Senators err on the side of being prudent.

Mr. BUMPERS. Will the Senator allow one observation?

Mr. STEVENSON. Even so, if by being prudent they have doubts, this resolution does establish, as I indicated earlier, the Ethics Committee, the members of which do not relish their responsibility, which will have the responsibility of rendering advisory opinions upon the request of any Member. Those Senators who obtain those opinions can rely upon them.

Mr. BUMPERS. Will the Senator yield?

Mr. STEVENSON. I yield.

Mr. BUMPERS. First of all, we have certain criteria. We are not allowed to mention our names, to say "Senator" or use a personal pronoun more than five times on a page, which is almost laughable. In any event, it lends itself to diminishing the political content. When one walks into the television studio of this building to make a 5-minute tape to report to the people, there are no such restraints. In determining whether or not a television report to the people is political or official, the Senator says that is a judgmental decision each Senator would have to make. But what if he makes a wrong decision? He has committed a criminal act, has he not?

Mr. STEVENSON. If there is any doubt in his mind, he should protect himself with an advisory opinion.

Mr. BUMPERS. Who would he take with him to the studio to make that judgment?

Mr. STEVENSON. I see the senior Senator from Illinois in the Chamber. For several years he and I delivered joint television messages to the people of our State and they were not political. They were broadcast by stations all over the State. Just as soon as one of us would get into a campaign, we would discontinue that practice. At that point it came close to the edge.

Mr. BUMPERS. What the Senator is saying about what is or is not proper is based upon the time at which he runs for reelection. If he says one thing 2 years before election, it is not political, but 1 year before reelection it would be political.

Mr. STEVENSON. That is one factor to be considered.

Mr. BUMPERS. But this amendment would not go to that decision. The amendment says it is a judgmental thing at all times, maybe 2 months before the election.

Mr. STEVENSON. That is correct. Maybe it is a political expense in connection with a campaign of some other Member of the body or a Presidential candidate. It could be a pure political expense at any time during the term of a Member of this body.

Mr. BUMPERS. Last week, I cut a 5-minute radio tape, the first one I have ever done since I have been here. I have been here a little over 2 years now. I sent it home to the Arkansas Radio Network, and they said they would be happy to run it. My question is, who would pass on whether or not any of the content of that 5-minute radio tape is political?

Mr. STEVENSON. There would not be anybody, unless the Senator wanted to protect himself with an advisory opinion from the Ethics Committee. Based on all the situations that I can remember, I suggest it will not happen. The Senator's message is innocent, just as were the messages that the other Senator from Illinois and I used to send back to Illinois. That is communication with one's constituents.

Mr. BUMPERS. But what if somebody decides that it is not and raises the issue with whatever committee—Rules, Ethics, whatever—and says, "This tape is patently political and a violation of the law"?

I felt quite sure when I cut it that it was a report to the people, that it was not political. But somebody who wants to take me on in 1980 decides otherwise. They raise the issue with the Ethics Committee.

Mr. PERCY. If the Senator will yield for a comment on that.

Mr. STEVENSON. If the Senator will wait a minute, this Senator from Illinois has the floor.

There are procedures available to people now, anybody in the country, if they feel that a Senator has abused his office—has, for example, used the frank for political purposes. They can file their complaint and they can file it with the Ethics Committee. That is exactly what will happen in the future, except that the procedure under the pending resolution is a little more explicit. If there is an abuse by a Senator of this code of conduct or of the statute and regulations with regard to the franking privilege, they can file a complaint with the Ethics Committee and that committee, under the procedures established here, will have to decide if it is a frivolous complaint. If so, it can be dismissed. They can decide it is not and, if not, they will have to decide in time what action to take.

That is one of the reasons that I suggest to the Senator that if, in such situations in the future, there is any real doubt—and I do not think there need be in most situations—about what is political and what is not, then there are opportunities to obtain advisory opinions which the Senator will have.

Mr. DURKIN. Will the Senator yield?

Mr. STEVENSON. Yes.

Mr. DURKIN. Then there is, in fact, a prior restraint on communications with your constituents? If you do not get an advisory opinion, then you run the risk of having someone who is either running against you or planning to run against you, or is a straw for somebody who is running against you, file an official complaint. Unlike the grand jury, the Ethics Committee will have to explain why it does not indict you and make that explanation public as well. That is a chilling effect on communicating with constituents.

Mr. STEVENSON. I am afraid the Senator misunderstands the amendment. This amendment and the resolution do not require any Senator in any circumstance to obtain an advisory opinion.

Mr. DURKIN. But the Senator said if he were smart, he would.

Mr. STEVENSON. I said if he were in doubt. I doubted that there would be many circumstances in which he was, and that he could protect himself by getting an advisory opinion. There is no chilling effect.

The manager of the Senate studio is now under an obligation to refrain from permitting the use of those facilities for political purposes. This is a judgment every Senator has to make, day in and day out. Every time he uses the frank, he has to make that judgment. Every time he uses the studios now, that judgment has to be made. This process will require a Senator to make the same judgment, permit him, if in doubt, to protect himself with an advisory opinion.

That, of course, can be done now, too, and it is done by Senators who are in doubt.

Mr. DURKIN. So the reasonable, prudent Senator will not hazard any communication with his constituents 1, 2, or 3 years before an election to stave off indictment by the Senate Ethics Committee. Or, failing to do that——

Mr. STEVENSON. Reasonable, prudent Senators do this day in and day out, and scarcely a day passes that I do not receive, as chairman of that committee, requests for opinions about what is proper, what is not, what is political and what is not.

That is an old practice and it is a practice that has not been disturbed. It is a practice that continues and the prudent Senator takes advantage of it. He has taken advantage of it in the past; he will have an opportunity to take advantage of it in the rare case where there is doubt, and there are such cases, in the future.

Mr. PERCY. Will the Senator yield?

Mr. STEVENSON. Yes.

Mr. PERCY. One check and balance that does seem to exist and, in our own case, has existed for 8 years is the fact that the station itself has to be a judge. The Senator knows that the station will not run things that are propaganda. They jeopardize the public service time they are using, they jeopardize their own position. So a Senator would be very foolish indeed to send programs back that are sheer propaganda. They are not going to be used. The station is for information purposes and the test is you are up against the editorial board, you are up against the news department of radio stations and television stations that are protected.

Will the Senator from Illinois answer a question while we are on it?

Mr. STEVENSON. Yes.

Mr. PERCY. Because of the importance of this amendment, is there any intention to press forward for a vote on it tomorrow, or could it be held until Monday. I think that we would like, really, a little more time to think about this and vote intelligently on it. I hope there will be no pressure to press forward for a vote on it.

Mr. STEVENSON. There is certainly no intention on my part, and I do not believe there is any likelihood of a vote today. But time is running. Most of it is running on my time.

I think it is the intention of the leadership to wind up the debate and to vote on this amendment tomorrow afternoon.

Mr. ALLEN. Will the Senator yield for a question?

Mr. STEVENSON. Yes; I yield to the Senator from Alabama.

First of all, Mr. President, how much time do I have remaining on this amendment?

Mr. ALLEN. The Senator can get more on the bill. There is no problem.

The PRESIDING OFFICER (Mr. DECONCINI). There are 17 minutes remaining.

Mr. STEVENSON. I yield to the Senator for a short question.

Mr. ALLEN. Mr. President, I ask unanimous consent that 30 minutes be taken from the time for the bill and applied to this amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withdraw his request, and I shall see that he gets his time?

Mr. ALLEN. I thank the distinguished leader.

I was asking a question, if I may.

Mr. ROBERT C. BYRD. I yield 30 minutes to the Senator from the time on the resolution.

Mr. STEVENSON. I thank the Senator.

Mr. ALLEN. I thank the Senator.

For a Senator who does not maintain a slush fund and never has, who wishes to send a TV message back to the TV stations in the State, stating his stand on an issue—for example, he states that he is strong for this ethics resolution. Would the Senator advise me what sources could legally and ethically be used to pay for that television message if the amendment of the distinguished Senator from Illinois is adopted?

Mr. STEVENSON. I would regard that as a nonpolitical communication with one's constituents.

Mr. ALLEN. Payable from what source?

Mr. STEVENSON. As such, it would be payable, if this amendment is approved, from sources that the Senator, as I understood him, now uses. He could use honoraria, he could use his personal funds.

Mr. ALLEN. I do not charge honoraria.

Mr. STEVENSON. In the near future, it is my hope, as I indicated, because this as an official expense, that it ought to be compensated by official funds. The Committee on Rules and Administration and the——

Mr. ALLEN. But there is no provision at this time for payment other than the Senator's own funds, is that correct?

Mr. STEVENSON. The Senator is correct.

Not everything can be done tomorrow. That is one of the difficulties. The Nelson committee was not the Appropriations Committee. All it could do was report a resolution which, if approved, will mandate those committees to adjust the allowances available now to Senators so they can cover their official expenses.

Mr. ALLEN. But pending that action, a Senator would have to pay this out of his own funds; is that correct?

Mr. STEVENSON. No, because I mentioned earlier, and this is the intent, I will make certain it is carried out, if it is not now; my amendment would not become effective until the end of this year. During that time, as is now permitted by the Federal Elections Commission, political funds could be used, though I should underscore, as the Senator from Wisconsin mentioned earlier, that the use of those political funds for such purposes can create serious complications with the Internal Revenue Service for a Senator.

Mr. DURKIN. Not attempting to solve those problems in the resolution itself?

Mr. STEVENSON. Yes, in this amendment, because political funds will not be used for expenses.

Mr. ALLEN. In other words, the Senator is saying political funds can be used for TV and radio reports for the rest of this year; is that correct?

Mr. STEVENSON. That is the intention.

Mr. ALLEN. Then if the Rules Committee makes some provision, then a Senator would resort to such provision as the Rules Committee makes, but if the Rules Committee makes no provision, a Senator would be deprived of reporting to his constituents in that fashion if he did not want to pay for it out of his own funds; is that correct?

Mr. STEVENSON. After the end of the year.

Mr. ALLEN. Yes, the first of the year.

Mr. STEVENSON. But then, of course, the Senate will have an opportunity to reconsider this issue in light of what the Rules Committee and the Appropriations Committee do.

Mr. ALLEN. I see. I thank the Senator.

Mr. DURKIN. Will the Senator yield?

Mr. STEVENSON. Yes, I yield to the Senator for a question.

Mr. DURKIN. Assuming that some form of public financing will pass and assuming there will be a limitation on how much a person can spend from his own funds in a political election or reelection effort, would the items that are political in nature, that are paid from the Senator's own funds, go against that limit?

Mr. STEVENSON. That are paid from his personal funds?

Mr. DURKIN. Say the Kennedy-Clark-Cranston public financing bill; I think it has a limit that, if we accept the Federal funds is $35,000; what we could put in as personal, from our own personal assets.

If the communication, either by radio or TV tape, was political and could not be put out under the official allowance which is yet to appear, would that be using up the $35,000 allowance as provided for and contemplated by the public financing bill?

Mr. STEVENSON. That is going to depend on what legislation the Senate acts on in the future. I cannot tell what the effect or result will be in that situation because I do not know whether the Senate is going to pass any campaign legislation. That is a question that can be addressed when we do.

But it is not my intention to have personal funds used for official purposes counted towards the limit on contributions to political campaigns.

Mr. DURKIN. I have not used a TV tape. We do not use the radio tapes. I have never solicited or accepted funds for a so-called office slush fund. But if the Senator's amendment is adopted, for example, in the State of New Hampshire we have a very extensive constituent service, as has Senator CHILES in Florida, and others, who have a very extensive constituent service office. The allowance now is that they provide us with 4,800 square feet of space for a State the size of New Hampshire, but they do not provide allowance large enough to have telephones for people who would occupy that 4,800 square feet.

In both of the years I have been here, we have had to use excess campaign funds, not for anything political, not for what a great job we are doing for the Republic, but just to pay telephones.

Mr. STEVENSON. Yes.

Mr. DURKIN. I gather that under the Senator's amendment that would be unethical.

Mr. STEVENSON. I do not regard that as unethical; I regard it as a necessity.

Now, the public does not begin to see the expenses of service in the Senate. Not only the personal expenses of maintaining two homes, the extra automobiles, travel for the family, but Senators are also put to the kind of official expenses that the Senator has mentioned, and there are many other such official expenses, expenses that must be absorbed by the Senator if he is to do his duty to his constituents.

So, what my amendment contemplates is that Senators treat themselves the way everybody else in the Government gets treated. The way the Members of the House get treated.

When we have reasonable, ordinary, official expenses, such as the Senator has just enumerated, they are paid for, not out of campaign contributions, political funds, or a fund——

Mr. DURKIN. Let me understand, these are not the type——

Mr. STEVENSON. They ought to be paid out of the public treasury.

Mr. DURKIN. Let me state, this is not the type account I am talking about. This is contributions that were received in a campaign and reported in complete accord with the FEC. Excess campaign funds which went to pay for telephones in the State office has nothing to do with Checkers, unless they call on our citizen toll-free hot line.

I gather what the Senator says is that if this amendment passes—I am not a gambler, they told us we do not bet on the next card—but if this resolution is agreed to today or when finally agreed

to, it would be unethical to pay something as necessary to an office as telephones in a State office from excess campaign funds that have been accounted for and reported, above and beyond the requirements of the Federal Election Commission?

Mr. STEVENSON. This amendment would put up the wall between the political funds and the official funds.

Official expenses would, after this amendment became effective at the end of the year, be defrayed, and only defrayed out of official funds, public funds, or out of the Senator's personal funds, including such earned income as is permitted, namely, honoraria.

Mr. DURKIN. So I gather the answer is, if the Senator's amendment passes and the Rules Committee and the Appropriations Committee do not come up with an additional allowance, then if we run over on telephones, say in the State office, there is only one source they can come from and that is the Member's own pocket.

I might add here that the competition to be the poorest man in the Senate is almost as severe as it was for the leadership on both sides of the aisle in January. But I submit for the record that I am the only Senator that has been able to avail himself of the income averaging provisions in the Internal Revenue Code for his first 2 years in the U.S. Senate.

So we are not talking hypothetical situations, they are not necessarily hypothetical.

Mr. STEVENSON. Mr. President, I think the Senator has put his finger on a serious problem. It is certainly one that I sympathize with him about.

Perhaps there is some way of putting to rest some of the anxieties. It would, of course, be possible for the Senate, if the Rules Committee and the Appropriations Committee did not act, to go back to the old way of conducting business, to permit the use of political funds for official purposes. But it also might be worth considering—and I intend to do so—a modification of this amendment which would only make it effective as of such time the Rules Committee and the Appropriations Committee and the Senate itself have acted to adjust the allowances in order to cover reasonable official expenses associated with the conduct of one's office.

As has been mentioned earlier, that would conform the practices of the Senate to those in the executive branch and to those already adopted in the other body, in the House of Representatives.

Mr. DURKIN. Let me make it very clear. I do not object to the thrust of Illinois. I think it is a long-needed solution to what have been a problem or may well be a problem in the future.

My only concern is that we accepted Common Cause's suggestion that we would put in a citizen toll-free hot line so that anybody in the State could call the Manchester office toll-free. It takes five, six, or seven people just to handle the work generated by that citizen hot line.

I do not think any one wants to be in the position of having to go back and saying that we will cut off this service because the increase in the telephone rates and the Senate allowances do not allow what I think is an extremely successful and excellent method of communication with the constituents I represent.

I do not want the Senator to misunderstand me. I am not opposed to the thrust of his amendment. I hope we are not betting on the next card and that then the Rules Committee will come up with no money, because it will disillusion some people if we have to cut back on some services. I am not talking about sending reports home about what great services I have performed for the public. I am talking about telephone service.

Mr. STEVENSON. Serving the Senator's constituents.

Mr. DURKIN. Yes.

Mr. STEVENSON. The Senator could be worse off. He could represent 20 million constituents.

Mr. DURKIN. Or more fortunate.

Mr. STEVENSON. No.

Mr. DURKIN. It is the greatest public service.

Mr. STEVENSON. I cannot accept the proposition that the allowances go up in proportion to all the burdens of service in the Senate.

The Senator has put his finger on a serious problem, and I share his concern. He has pointed out the risk of prohibiting the use of the only funds that, as a practical matter, are available to a Member of Congress, and he might not later get the official funds to which he is entitled.

I hope we can accomplish the purpose by putting up a wall, eliminating all the unofficial accounts for campaign funds, private funds, surplus funds, Checkers funds.

Mr. DURKIN. That would solve many of the problems.

Mr. STEVENSON. And at the same time assure ourselves that other funds—namely, official funds for official expenses—are available. There should be some way in which we can accomplish that purpose without taking that risk.

I would welcome the opportunity to work with the Senator from New Hampshire to develop a way to do that. Perhaps to make the amendment effective upon action by the Rules Committee and the Appropriations Committee and the Senate in adjusting the allowances is the way. I hope we can do that.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. STEVENSON. I yield to the Senator from Alaska for a question.

Mr. STEVENS. I am interested in paragraph 3 of the Senator's proposed amendment.

I can see a reason for paragraphs 1 and 2, the unofficial office accounts, and certainly agree with him with regard to those two provisions.

Subparagraph 4 certainly meets with my approval, although it is contrary to existing law, in terms of the Federal elections law we passed, which says that the surplus funds that exist after election could be used for any lawful purpose. Just 18 months ago, we passed that law. But if the Senate wishes to restrict the use of the funds left over after the election, I would not object, and I see no problem about that.

However, paragraph 3 bothers me in terms of its interpretation, in view of what I heard as I walked into the Chamber, when the Senator said he wanted to put up a wall with regard to the use of political funds. Did I understand the Senator correctly?

Mr. STEVENSON. Yes. The Senator from Illinois is attempting to put up a wall between the use of political funds on the one hand, for political purposes, and official funds or personal funds for official expenses on the other. That is the line I am trying to draw between political funds for political purposes and other funds for official expenses.

Mr. STEVENS. Let me pursue that a little, in view of my own situation. In view of the limits on official funds that exist today, I do not see us expanding those in the near future. In the resolution before us, we have a prohibition against gifts, with some limitations—either $100 or $250, depending on what the circumstances are.

Let me outline for the Senator a little trip I might take—and it is not hypothetical. I have taken this trip. I go from here to Anchorage by commercial airline, and it is reimbursed from official funds.

I then want to go to take a look at the construction of the Alaska pipeline, where there is a weld problem, and I find that the only access to that area is by company plane. I have gone on company plane, or private plane, to these construction camps.

As I understand the resolution before us, it would bar me from accepting that transportation if it is in excess of $100, if the company has a registered lobbyist or has a PAC.

I assume that I am correct in my interpretation of this resolution. I do have surplus funds from my last campaign. I have a limitation in terms of my transportation. If my campaign committee decided to pay for the private plane to take me to that place, where I could carry on my official duties, is the Senator telling me that I should not take that from the funds left over from my last campaign but that I must pay them out of my own personal money and cannot use this fund for that purpose?

Mr. STEVENSON. I say to the Senator that that is an official expense, not a political expense. Therefore, political funds should not be used for it.

This prohibition would not take effect until the end of the year. I refer the Senator to section 301, on page 49 of Senate Resolution 110, which mandates the Committee on Rules and Administration and the Committee on Appropriations, within 120 days, to report to the Senate legislation to adjust the amounts and uses of senatorial allowances so that they are adequate to defray all the necessary and appropriate expenses, such as the one to which the Senator just referred.

The effort here is to substitute official funds for official expenses, for the political funds.

I think the Senator has a very legitimate concern, as does the Senator from New Hampshire. The conditions in his

State are unique. I am not unfamiliar with the problem, having visited parts of that pipeline. Exactly how to meet the Senator's concern, I do not know. But it is mandated to the Committee on Rules and the Committee on Appropriations to come up with adjustments in the allowances that will make it possible for the Senator from Alaska to use official funds for those official duties instead of political funds.

As the Senator from New Hampshire and I were saying, in order not to take the risk of being left without the official funds after adoption of this amendment or resolution, it might be worth considering making the effectiveness of the amendment contingent upon the adoption or approval of adequate allowances so that the expenses can be covered.

Mr. STEVENS. I can see the point of saying we shall not use, and most of us do not use, official funds for political purposes. But to say when my funds are not sufficient to carry out my responsibilities in my official duties that my constituents cannot pay for that by contributing to a political account I find very strange.

Now, the Senator is on the majority side and he is the chairman of subcommittees, and he has control of committee funds, travel funds. If he wants to go to a meeting in my State all he needs to do is approve them as a committee or subcommittee chairman. If I want to go to Los Angeles for a meeting with people who are working on a project in my State I have no funds I can use. My funds that are in my official travel allowance are available for travel to Alaska or within Alaska.

I might say I have used political funds to go to meet with Alaskans in other places throughout the country to confer on Alaska problems, knowing that the official funds under the system that the Senate has adopted are not available to me. There is no committee meeting there. This is an official business function so far as I am concerned, and the people who have contributed to my campaign—the funds have been reported, reported every quarter, as to what my campaign committee spends. I do not spend it, they spend it. The bill goes directly to them. If they say, "There is nothing there that would further your career as a Senator," they do not pay for it. If they say, "It would further your career as a Senator and, therefore, it has a political impact on your constituency," they pay it.

My question to the Senator is, What is wrong with that? That is not misuse of official funds; it is the use of funds of people who want to keep me in office doing the things I must do to stay in office. Now that is a political purpose.

If my wife goes—and she has gone—up to Point Barrow to go ice fishing and whale hunting with my Eskimo friends, it has a political impact on my future, and my campaign committee has paid that transportation. It is not reimbursable from official funds, and that is part of being a politician, to maintain his contacts with his constituents and to maintain their confidence in what he is doing.

Whether it is wrong in terms of the constituents and the people who contribute is for them to decide. If they see that my committee is spending money to do things they think are frivolous they will stop contributing, No. 1. If my people decide I am doing things I should not be doing I will not be back here in 1979.

But I think the Senator is taking too much of the judgment away from my constituents. I would support him wholeheartedly if he said that official funds shall not be used for any political purpose, and we should have some way to have a firm dividing line there. But I cannot see paragraph 3 that says that my committee that raised the funds for my campaign and to further my career as a Senator cannot make the judgment of what is, in fact, in furtherance of that career. That is what that says.

The Senator from Illinois' wall is like the Berlin wall because, as a practical matter, in the long run only those who are very, very rich will stay here. I can not pay those costs, and there is no way I can pay those costs personally.

You go from here to Point Barrow and you are spending $1,000 plus to go round trip. If I go to Adak, it is probably $1,400 round trip.

There are times when those funds that are provided me by the Senate run out, and there are other times when some of the mixture of what is official business and what is political business comes to be a nice judgment.

I have relied on my campaign committee to tell me whether I should seek reimbursement from the Federal Government or whether I should let them pay that cost out of the political campaign funds we raised for that purpose.

I thought I was protecting the taxpayers in doing it. Now the Senator is telling me he is going to put up a wall and tell them they cannot do that, that I cannot go unless I can get reimbursed from the Federal Government. Where is the advantage of that to the taxpayers of this country?

In our great haste to respond to what some consider "public pressure," we may make this body a body of only multimillionaires.

I am being sincere with my friend from Illinois. The rest of the amendment I would endorse wholeheartedly, but I think the Senator is wrong to make judgment as to what I do with political funds on the advice of my campaign committee.

Mr. STEVENSON. I do not make that and the Senator's contributors do not make that either. He makes that judgment——

Mr. STEVENS. No; I tell the Senator they make that judgment.

Mr. STEVENSON. To go to the pipeline when he proposes, and I am not proposing any additional burdens on the Senator from Alaska. On the contrary, what I am proposing is to relieve him of the burden of going around, tambourine in hand, to the oil companies and everybody else asking for money—maybe it is during a campaign—and it is money with which to defray not only his political expenses but even after serving constituents——

Mr. STEVENS. I am going to make a little analysis of that "oil company money." I take a little affront at that. I have not seen a lot of that money. But, as a practical matter, I do not go around with a tambourine in my hand, holding out my hat. I really have never had to ask for money in my campaigns because it is there from the people who want me to stay there, and if it is not there I will not stay here.

But what the Senator is saying is that unless the Senate is prepared to reimburse what I consider to be an expense necessary to stay here that I cannot seek any help in getting that expense reimbursed. Is that not what the Senator is saying? I agree with him on the unofficial office accounts, and I believe they ought to be outlawed.

Mr. NELSON. Mr. President, I wonder if the Senator would yield at that point?

Mr. STEVENSON. I would be happy to yield to the Senator from Wisconsin.

Mr. NELSON. I am not sure I understand that point. This amendment only says, in essence, that only official funds may be used to defray expenses in the ordinary course of business under the IRS rule. It does not prohibit the expenditure of political funds for political purposes.

So when the Senator from Alaska says he refers this to his committee to make a judgment, if they make a judgment that whatever activity was involved was for a political purpose, the funds can be spent for that.

Mr. STEVENS. I beg the Senator's pardon. That is not what it says. These would be allowable under 162(a) if I had an income to charge them against or if I had the expenses already. But the limitation on expenses is not there.

If the Senator from Wisconsin wants me to start chartering jets and charge them to the Senate, I suggest that the Senate will have to increase the expenses a whale of a lot.

I am talking about this amendment in view of what is in the rest of the resolution because the Senator says I can no longer fly with a company that has a plane that is going into an area where no commercial service goes, and the Senators both know that, that that exists in my State, and I cannot get on if they have a registered lobbyist or if they have a PAC, except to the extent of $100 or $250. So that means it becomes a trip that I must take, and someone must pay for it, and the Senator says I am going to take it out of reimbursable allowances. My reimbursable allowances are like his. For travel they are figured on the basis that I can make so many trips—I think it is 24 now a year—so many round trips to Anchorage.

I can use that money also within my State, and I do so by flying, making certain that I fly, you know, tourist class. These are first-class round trip tickets, and whatnot, and we stretch that money out, and we use it within the State.

All right, now what the Senator is saying is if I want to look at that pipeline the next time, and I flew from Anchorage to the pipeline camp, and then

took a helicopter and went down the pipeline and saw what the problem was, that helicopter would cost me $350 an hour, and I was there 2½ hours; the jet would cost me $650 an hour, and it was about 45 minutes each way, and the Senator is telling me that I am going to have to take that out of my allowance, and what that says is, "Senator, you just lost two round trips from Anchorage to Washington."

Unless we start realizing what we are doing in relation to the other portion of this bill and the arbitrary limitations that are based on them from the point of view of others of us with our own experience and our own lifestyle, I do not think this is going to make any sense.

The Senator may not fly on company planes; he may not fly with people who have private planes. I do it all the time. My people in Alaska know that, and I have been returned and I think will be returned again if I continue to do it. But what the Senator is saying with the other portion of the section is I cannot use that type of transportation any more; I must use official funds. The official funds will not stretch that far, and I am telling the Senator if we pass this I am going to use political funds and I am going to use them because I want to do my job right and my people want me to do it right.

As a matter of fact, we have several organizations that are formed for the express purpose of assisting us with issues that are going on down here. One of them is the Organization for the Management of Alaskan Resources—OMAR—involved in the gas pipeline situation. They have, in fact, paid expenses for me in connection with official duties because I felt they had the money and they ought to do it. I do not see any reason why the Senator should say I cannot. If the Senator from Illinois wants to live according to this third paragraph, he should do it, but I think the Senator is wrong to put that on those of us who are living according to the best judgment of our people and trying to do the job right. That section will not work for the Senator from Alaska. How it will work for the Senator from Hawaii or somewhere else I do not know. Unless the Senate is prepared to increase my allowances to a staggering amount, the Senate will have to leave it to me and my constituents to decide how to raise the money to do the things that we think are necessary to represent Alaska in this Senate and not use official funds.

I object very strenuously to this reference to 162 in the Internal Revenue Code as ordinary and necessary expenses in the operation of a senatorial office. What the Senator is really putting—involved in my life there is the IRS, and someone down at IRS, who has never run for dog catcher, is going to tell me whether it really is a political function, whether it is a political, justifiable political, expense for me to ask my committee to use the funds left over from my campaign to defray the cost of going to Adak, Point Barrow, Kotzebue, or somewhere to go to a basketball game or to go to a combination political and civic function. I think the Senator is wrong. I tell him I think we are going too far and, my friend, if we do not start trusting ourselves the country is never going to trust us.

Again I tell the Senator if he takes this out of there, he makes the judgment about his life, I will make the judgment about mine in consultation with the committee on whom I rely and my people will decide whether I come back here next year or the year after next and I think we will on a different basis. That goes too far, and I am being sincere. I want the Senator to have a good strong tough code of ethics as far as the use of official funds. The use of unofficial funds in terms of office accounts should be barred. The use of political funds should be governed by the concepts of politics and what furthers a Senator's career politically.

That judgment should be made by him and by his committee in terms of the administration of that account. If the Senator wants to strengthen that and require a Senator to rely on the judgment of his committee that manages the funds, fine, and I will tell the Senator that I will show him that I send the bills to them monthly, and they pay the ones they think have a political impact and they send back to me the ones they think are personal or the ones I should pay because they do not have a political impact.

I think that is the best possible way to live within the scope of the existing rules, and I urge the Senator not to change it as I think he is just basically wrong.

If the Senator wishes to build a wall and say that political funds should be used for political purposes, official funds should be used for official purposes, personal funds should be used for the personal expenses of a Senator, then say it.

But do not refer it and put it in the Internal Revenue Service which is what the Senator is doing with 162(a) with the limitations that are there now and that would leave the judgment with my committee as to what is political. It would leave the judgment with the disbursing office as to what is official and leave the judgment to this Senator as to what he must pay personally. I think that would be a significant division of responsibility for these funds and would not be a wall that would mean that if you were very, very rich, Senator, you would not worry about any of the things in this rule.

I will have something to say about other defects in the basic resolution as far as the very, very rich and what they can do under this resolution. But this one invades my lifestyle and I think that lifestyle is necessary to represent the people of Alaska. I urge the Senator to reconsider that reference there and to spell out what he is saying he intends it to do, rather than going into the Internal Revenue Code and leaving to the IRS to decide what is political instead of leaving it to my committee. That is what the Senator is doing. He is deferring to the IRS to decide what is political. I am sorry for the time I consumed.

Mr. STEVENSON. Mr. President, I shall respond briefly, and I see the distinguished majority leader in the Chamber.

Mr. President, I do not doubt the problems the Senator from Alaska has. It is necessary in order to travel in Alaska to obtain gifts and those gifts in this resolution would be prohibited not by my amendment but by other parts of this resolution.

I say to my good friend from Alaska that he is into the IRS right now, and one of the purposes of this amendment is to get him out from under the IRS. Those gifts can be taxable to the Senator. It is possible that his own expenses, if they are expenses from gifts of political funds, may not be deductible. The IRS has already decided what is political and what is not political.

Mr. STEVENS. I might say I wanted to do that, and the IRS and my staff went through it. What the Senator is really talking about is the previous practice some followed where we paid the expenses and the committees reimbursed us. That clearly raises the problem where we had income. Where the expenses are paid directly from the committee out of committee funds I do not see how IRS can compute income to me unless the Senator from Illinois is doing what he is doing here—and I accepted the gracious comment of the majority leader personally here that I have been in error, and I apologize to the distinguished Senator from Illinois. But the Senator from Illinois has, through his amendment, given a greater duty to the IRS than it has right now because he has tied this future conduct of the Senate and every Senator in it to section 162(a) of the Internal Revenue Code which might be amended next month, for all we know.

I want that judgment to be made by the people who maintain my political account. I do not want that judgment to be made by the Internal Revenue Service. If the Senator from Illinois would accept that distinction, I think we can go down the road together, if he lets the disbursing office decide for the Senator from Illinois what is official, let the campaign committee decide what is political, and let the Senator absorb personally the balance, which he must do in any event, and we all do to a certain extent. The difference is the Senator from Illinois, as I understand it, ties us in to section 162(a) of the Internal Revenue Code in terms of their definition of what are ordinary and necessary expenses in the operation of a senatorial office, and I think that is wrong.

Mr. STEVENSON. Mr. President, the Senator from Alaska, is making a reasonable suggestion and maybe we can work something out.

My main purpose is to defray official expenses, and I grant you they are very large in the Senator's State from official funds to put that wall between the political and the official funds. Maybe we can do it without creating all the problems that he raised.

Mr. STEVENS. I thank the Senator from Illinois.

Mr. STEVENSON. I thank the Senator.

ADDITIONAL STATEMENT SUBMITTED ON SENATE RESOLUTION 110

Mr. HASKELL. Mr. President, I shall speak only briefly at this point in the debate on Senate Resolution 110.

I commend the distinguished chairman of the Special Committee on Official Conduct, Mr. NELSON, and the distinguished cochairman, Mr. THURMOND, and the other members of the committee who have worked so hard during the past few weeks to produce this outstanding piece of legislation. I am honored to be a cosponsor of this measure, which in some ways is one of the most important the Senate will consider in this entire Congress.

It is clear that no greater task faces both the President and the Congress than that of restoring faith and confidence in the basic political integrity of America's governmental institutions and in the men and women who hold positions of public trust.

If we fail to meet the challenge of putting our own house in order, then I fear that anything else we might do will seem pale and hollow by comparison.

A few weeks ago, I noted that a great many Americans were very skeptical of all talk of a new code of ethics for the Congress. They have heard such talk for quite some time, and many quite rightly were inclined to believe that all talk of ethics would fade once that pay raise was on the books.

But the ethics code has not quietly faded away. The Special Committee on Official Conduct has reported a bill which provides us with the elements to get on with the business of restoring public confidence in the honesty and integrity of this body.

The most significant aspect of the report of the Peterson Commission on Salaries which was issued last December, was the very deep concern expressed about the widespread loss of faith in Washington found throughout the country.

Citing a long list of scandals involving public officials, the Commission asked:

Is it any wonder that public confidence in Government has never been lower?

The sorry result of that widespread loss of faith is that all public officials have come under the same general civic indictment. They are commonly believed to be taking advantage of their positions of public responsibility in a host of ways unavailable to the ordinary citizen.

However wrong that belief may be with respect to the great majority of officeholders and public officials, it is a belief firmly entrenched in the public mind, and one not without a certain basis in fact.

I think we have to understand that in adopting a code of ethics for the Senate, we are dealing with perceptions as well as objective reality.

And perceptions are in some ways the lifeblood of public and political life. The appearance or suspicion of conflict of interest or of personal aggrandizement is often just as damaging as the reality.

If we are going to counter prevailing perceptions, as well as deal with the many real problems which have been exposed over the past few years, then I think we are going to have to adopt the rather stringent measures advocated by the Special Committee on Official Conduct.

I recognize that there are many Senators who take issue with this legislation, and who have serious objections to aspects of it. I respect their views and their sincerity in articulating them, but I firmly believe that Senate Resolution 110 speaks to very basic principles which must become the basis on which service in the U.S. Senate is predicated.

The first of these principles is simply that public office should not be used for private gain.

Full public financial disclosure is a necessary precondition to implementing that principle. Public financial disclosure provides our constituents with the basis on which to make a reasoned judgment of our integrity, and our use of our public responsibilities.

In an earlier day financial disclosure might have been enough. I recognize that many distinguished Members of this body argue that such disclosure is adequate. I do not agree.

I think the events of the past several years demand that we go beyond mere disclosure—we must strictly monitor that disclosure, and provide an adequate enforcement mechanism. I will be joining with the distinguished Senator from Delaware, Mr. ROTH, in an effort to strengthen the enforcement mechanism contained in the bill.

A second principle that ought to guide our behavior is that being a Member of Congress is a full-time job.

To give anything less than our full talents and energies to this job is simply to shortchange the public. It should go without saying that a Member of Congress should not spend a significant amount of time tending to private investments or interests.

We have a job. We ought to do it, and be paid adequately for it. We ought not to be able to supplement our income beyond the 15-percent limitation imposed on outside earned income with activities which actually engage our services. We have to face facts that fees and honoraria for practicing law or giving speeches are directly related to our positions of influence within the Government.

The prevailing practice of earning large sums of money in these ways simply serves to further the notion that we our busily feathering our own nest while on the public payroll.

The committee's 15-percent limitation on outside earned income is a reasonable one, and must not be weakened.

On this point, I received a letter yesterday from the president of Common Cause, David Cohen, and I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HASKELL. Mr. President, Senate Resolution 110, by abolishing the so-called "unofficial office accounts," and by speaking to "lame duck" foreign travel, and the notorious practice of "double-dipping," as well as other less publicized, but vitally important aspects of Senate practice, goes a very long way toward remedying the abuses and potential for abuse which have so weakened public confidence in the Congress of the United States.

I again commend Senator NELSON and Senator THURMOND and the other committee members for their work, and I urge that the Senate adopt this code of ethics without weakening it in any way. This is a serious test of our commitment to high standards of public responsibility. We dare not fail.

EXHIBIT 1

COMMON CAUSE,
Washington, D.C., March 16, 1977.

DEAR SENATOR: On Thursday, March 17, the Senate will consider S. Res. 110, the proposed Code of Conduct, drafted by the Special Committee on Official Conduct, chaired by Sen. Gaylord Nelson.

The bi-partisan Nelson Committee has done an outstanding job in reporting a comprehensive, meaningful package that contains the essential elements of an effective Code, including a 15% limit on earned outside income, a new enforcement procedure, public financial disclosure with auditing of reports, limitations on gifts from lobbyists to an aggregate of $100 per year, abolition of unofficial office accounts, and reform of Congressional foreign travel and in the use of the franking privilege. Common Cause strongly supports the Nelson Committee recommendations.

Public financial disclosure is an absolute necessity if the Senate is going to begin to deal with the problems of conflict of interest. Disclosure, however, is not enough. The key to the Code of Conduct is the stringent limitation on earned outside income (including honoraria) proposed by the Nelson Committee and recently adopted by the House of Representatives. With the pay raise now in effect, there can be no justification for Senators engaging in extensive personal services for compensation. Being in the Senate is a full time job and Senators should not be using their positions to earn outside fees and honoraria which can and do cause real and apparent conflicts of interest.

We strongly oppose the Muskie amendments to the limit on earned outside income. These two amendments—one which would apply the 15 percent limit to unearned income and one which would then totally abolish any income limitation—are both clearly designed to destroy the crucial 15 percent limit on earned outside income. We urge you to vote against the Muskie amendments and to retain the 15 percent limit on earned outside income recommended by the Nelson Committee and adopted in the House of Representatives by the overwhelming vote of 344-79.

A strong enforcement mechanism is absolutely essential if the new Code of Conduct is to work effectively. The enforcement procedure contained in the Nelson Committee package is balanced and workable and establishes a much needed process for investigating significant allegations of wrongdoing. If this enforcement mechanism is not adopted, the rest of the Code of Conduct will be seriously undermined.

The vote on a new Code of Conduct is a crucial ethics test for the Senate. The Nelson Committee recommendations should not be weakened in any way during floor consideration. The decisions made on the floor will give the American people the opportunity to

see if the Senate is serious about writing a meaningful Code of Conduct. Senate adoption of a strong Code, including a 15 percent limit on earned outside income, would send a loud and clear message to the American people that the Senate is serious about restoring trust and confidence in our political institutions.

Sincerely,

DAVID COHEN,
President.

ORDER FOR RECESS UNTIL 1:30 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 1:30 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS AND RESUMPTION OF CONSIDERATION OF SENATE RESOLUTION 110 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, after the two leaders or their designees are recognized under the standing order tomorrow, there be a period for the transaction of routine morning business, not to extend beyond the hour of 2 p.m., with statements limited therein to 10 minutes each with no resolutions coming over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, that would mean then that at 2 p.m. tomorrow the Senate would resume its consideration of the resolution concerning the code of ethics, would it not?

The PRESIDING OFFICER. The Senator is correct.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I wonder if the distinguished minority leader can tell me whether or not Mr. HAYAKAWA intends to speak on the pending matter.

Mr. BAKER. Mr. President, it is my understanding that he does not.

Mr. ROBERT C. BYRD. Very well. Then, Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business so that no further time be charged to either side on the pending measure.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes. Shall I withhold this request?

Mr. ALLEN. Yes.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

Mr. ALLEN. While we still have the Stevenson amendment pending, I would like to call for a division of the question in the Stevenson amendment. There are four parts, and I call for a division.

Mr. ROBERT C. BYRD. Mr. President, will the Chair respond?

The PRESIDING OFFICER. The Chair is having the matter studied, to see whether a division is proper, and the Parliamentarian will report forthwith.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. ALLEN. Mr. President, I call the Chair's attention to the fact that there are four separate and distinct amendments in the amendment.

The PRESIDING OFFICER. It is not divisible under rule XVIII, because it is an amendment to strike and insert, and that is specifically not divisible under the rule.

Mr. ALLEN. Very well. I believe that will probably defeat the whole amendment. I would like to ask unanimous consent—Senator STEVENSON is not here; I will withdraw that.

The PRESIDING OFFICER. The Senator may move to strike part of the amendment.

Mr. ALLEN. Very well; we will proceed in that fashion, then.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOHN F. KENNEDY CENTER

Mr. ROBERT C. BYRD. Mr. President, I understand this has been cleared with the minority. I ask the Chair to lay before the Senate a message from the House of Representatives on S. 521.

The PRESIDING OFFICER (Mr. DURKIN) laid before the Senate the amendment of the House of Representatives to the bill (S. 521) to amend the John F. Kennedy Center Act to authorize funds for the repair of leaks.

(The amendment of the House is printed in the RECORD of March 4, 1977, beginning at page 6299.)

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate disagree to the amendments of the House of Representatives on S. 521, and agree to the request of the House of Representatives for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. BURDICK, Mr. BENTSEN, Mr. ANDERSON, Mr. MCCLURE, and Mr. DOMENICI conferees on the part of the Senate.

S. 1034—POSTPONEMENT OF BAN ON SACCHARIN

Mr. HAYAKAWA. Mr. President, I have been receiving an avalanche of mail on the subject of banning saccharin. Therefore, I would like to speak on this subject.

Mr. President, I would like to take a few minutes to call attention to some aspects of the ban on saccharin which are not widely understood. In order to explain what I am saying, let me start with a story that may seem on first glance to have little to do with the subject.

At the University of Chicago there is a famous student of child psychology and psychiatry, Dr. Bruno Bettelheim, who is famous especially for his Orthogenetic School, for the treatment of extremely disturbed children.

When these emotionally disturbed children are admitted for residence at this school, the first thing they find is that there are chocolate bars and dishes of candy on the tables in every room, accessible to any who might want them. The reaction of these unhappy children to this freely available candy is both an index of the degree of their emotional disturbance and of the importance of sweets in people's lives. Let me explain what happens.

Some children are so excited by the sight of these sweets that they grab all they can, stuff their pockets with them, take them to bed with them that night and, of course, some make themselves quite ill eating too much candy. Other children are simply frightened. They stare and stare at the candy, but are afraid of touching it, apparently for fear of punishment.

Normal children can eat candy when they want it and leave it alone the rest of the time. It is not a problem to them. But it is a problem for emotionally disturbed children—and the reason is that sweets, in our culture, are laden with emotional significance far beyond their nutritional significance.

We reward our children for good behavior with sweets. We punish them by denying them sweets.

We say to them, "Finish your mashed rutabagas and then you can have your dessert."

Therefore, for almost all of us the taste of sweets is associated with approval—it means that somebody loves you or approves of you. And the denial of sweets means that you are not loved. And this is why unhappy people are often obese. This is why many women, after a shattered romance, console themselves by eating too much candy. We all need the taste of sweetness to assure us that we are approved, that we are loved.

For some, however—those who suffer from overweight, high blood pressure, blood sugar, diabetes—the consumption of sweets is unhealthy. It aggravates their disorder. In extreme cases, the continued eating of sweets can lead to death.

This is why this ban on saccharin has created, it seems to me, such a tremendous reaction.

Let me quote a letter from one of my constituents in San Diego:

With the help of many products containing saccharin I have lost 64 pounds. I am still to lose 100 pounds or I will surely die. I am 34 years old and I am doing everything in my power to avoid early death. One thing I have done is to quit smoking. Smoking can cause cancer. . . . There is no evidence that saccharin has ever caused a single case of cancer in a human being. Please help me by changing the law which forced the FDA to ban saccharin.

The woman obviously needs to avoid sugar if she is to live. What is important to point out is that in her case, as in the case of millions of others, psychologically she needs the taste of sweetness, even if nutritionally sugar can destroy her. Is it necessary to add that a person who is ill needs the taste of sweetness—the assurance that he or she is approved and loved—even more than the person who is well?

Another constituent writes:

I have a disease which requires a very strict diet and sugar is totally banned, because my doctor says that use of sugar would cause an early death.

Saccharin in one of the things that helps to make my sparse diet tolerable. I know sugar will kill me. Saccharin is a medical necessity for me.

A constituent from Berkeley says:

My wife has hypoglycemia, a blood sugar disorder. Artificial sweeteners are necessary for her to control her weight due to this imbalance.

Another letter, from a Mr. Gosnell of North Long Beach, is rather lengthy, but I wish you to hear a portion of it:

I am of a family that traces diabetic origins maternally to the 19th century. I am age 46 and have myself been diabetic over 25 years. As a child I was partially raised by a diabetic uncle and I feel well qualified to express the concern from the diabetic's point of view.

My wife is a naturalized American from Korea and I have assumed responsibility for support of her family and their candidacy for American citizenship, including mother, brother, sister and their families, and we have a son half-Aryan, half-Korean.

So I must earn a living and assume a reasonably normal productive lifestyle to do this.

Although it may seem a small matter, I depend on artificial sweetness to bridge the gap between living as a diabetic and living a normal lifestyle with diabetic adjustments.

Stories we hear on this subject are often very touching.

The psychological problems I am talking about apply with special force to diabetic children. Children need love. They wither without it. And the taste of sweet things is an assurance of love that a child needs.

A Mrs. Carter of Eureka, Calif., writes:

I would like to strongly protest the ban of saccharin. My seven-year-old boy is a diabetic and is highly dependent upon the use of saccharin-sweetened foods because of his intolerance to sugar.

A 12-year-old boy by the name of Kenny in Marysville, Calif., writes:

My best friend's little sister has diabetes and if a law is passed to get rid of saccharin she will have no diet drinks for her or anybody else.

Mrs. Dorothy Clarke of Santa Cruz writes:

As the wife, daughter, and daughter-in-law of diabetics, I am very aware of how difficult it is to cope without the use of sugar. Without saccharin, it will be nearly impossible.

It would indeed be impossible because cyclamates, too, have been banned. It seems to me that the reason there was not more of an outcry against the banning of cyclamates is that there was saccharin to fall back on. But if cyclamates and saccharin are both banned, I am told that it will take years to test adequately and to bring to market another artificial sweetener.

Mr. John Suing of Weed, Calif., tells a particularly touching story. He writes:

We have two diabetic boys and they have few luxuries with regard to the food they can eat. . . . Meals are the high point in a diabetic's day, and we try to make it as pleasant and enjoyable as we can for our boys. When we top a meal off with a sugar-free drink as a real treat to them, they feel just like those of us who are not diabetic and they forget for a few minutes that they have a disease for which there is no cure.

Mr. President, these are only a few of the hundreds of pleas for help I have received since FDA announced its decision late last week to ban saccharin.

Letters, telegrams, and phone calls are coming into my office—and I am sure into the offices of my colleagues as well—at an astounding rate.

Millions of Americans are frankly scared for their health. Most pitiably, many are scared for the lives of their children, and their own lives. We cannot in conscience ignore them.

For this reason, I introduce today emergency legislation to postpone the proposed ban of saccharin for 3 years.

I realize that this postponement cannot fully resolve the possibility that saccharin may be banned. But, I stress that this is an emergency situation, and an emergency bill is called for.

I am also preparing legislation to modify the Delaney clause of the Food, Drug, and Cosmetic Act, which prohibits the use in food of any ingredient shown to cause cancer in animals or man. This clause was the reason that FDA was obliged to announce its ban of saccharin. However, this legislation involves much complex research, and I will introduce it as soon as possible.

My bill today addresses the immediate problem of the ban on saccharin.

I ask my colleagues on both sides of the aisle to study my proposal. I ask their support for what I feel is a humane act, in the true sense of that word.

I ask unanimous consent that the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1034

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there are authorized to be appropriated $250,000 for the purpose of conducting a study of the potential cancer-producing effects of saccharin on human users. Such study shall be conducted (or contracted for) by the Secretary of Health, Education, and Welfare and shall be completed not later than two years after the date of enactment of this Act. The Secretary shall submit a report on such study to the President and the Congress not later than 60 days after the completion of the study.

(b) Notwithstanding any other provision of law, neither the Secretary of Health, Education, and Welfare nor any other officer in the executive branch of the Federal Government shall cause the ban or any other restriction on saccharin in interstate commerce for a period of 3 years after the date of enactment of this Act.

Mr. MATSUNAGA. Will the Senator from California yield?

Mr. HAYAKAWA. I yield.

Mr. MATSUNAGA. Mr. President, I associate myself with the statement made by the Senator from California and, if the Senator will permit, I should be more than happy to cosponsor the measure with him.

Mr. HAYAKAWA. I am most grateful to the Senator from Hawaii (Mr. MATSUNAGA).

Mr. MATSUNAGA. I ask that my name be included among the cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I commend the distinguished junior Senator from California for his action in a matter of extraordinary interest to the people of this country at the moment. Saccharin may seem like a small thing to some, but it is a great thing to many. In many ways, the proposed ban on saccharin represents a further intrusion into the daily lives of people by Government. It is important, and it will be increasingly important, as the principles involved here might even extend into other things—other food additives, coloring and the like. I think the country is not in the mood for this proposed ban unless it is shown that it is absolutely essential.

Mr. President, if the Senator from California is agreeable, I ask unanimous consent that I may be added as a cosponsor to this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. The Senate will convene tomorrow at 1:30 p.m. After the two leaders or their designees have been recognized under the standing order, there will be a period for the transaction of routine morning business with statements limited therein to 10 minutes each. At 2 p.m. the Senate will resume consideration of this matter, the code of ethics for the Senate.

I suspect that there may be rollcall votes tomorrow afternoon on amendments or motions in relation to this measure.

COMMITTEE MEETINGS

All committees would be permitted to meet until 2 o'clock tomorrow afternoon. I am sure that is one thing the Senator from Mississippi has in mind.

Mr. STENNIS. Yes. I thank the Senator; that helps. That is enough.

Mr. ROBERT C. BYRD. Yes; of course, the Appropriations Committee and the Budget Committee have standing authority to meet without the consent of the Senate.

Mr. BAKER. Mr. President, a parliamentary inquiry, if the Senator will yield to me.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I came in after the distinguished majority leader had begun his description of the legislative calendar for tomorrow.

In keeping with our earlier colloquy, I hope our colleagues understand that tomorrow I will object to any committee meetings beyond those permitted under Senate Resolution 4 or the Standing

Rules of the Senate. In recapitulation of that statement, it is my understanding that committees can meet tomorrow until 2 o'clock.

Mr. ROBERT C. BYRD. That is correct.

Mr. BAKER. And that no committee, then, under the objection I now am making to committee meetings, can meet after 2 o'clock tomorrow.

Mr. ROBERT C. BYRD. I do not think the Senator needs to make his objection now, because no unanimous consent has been asked, but the Senator has stated the situation correctly.

Mr. BAKER. I am not making any objection now, if there is no request, obviously; but I want to put my colleagues on notice that objection will be made to any such request.

Mr. ROBERT C. BYRD. The Senator's colleagues are on notice.

There is one subcommittee for which authority was granted the day before yesterday, however. The Science, Technology, and Space Subcommittee received unanimous consent the day before yesterday to meet at 2 p.m. tomorrow. That order is not vitiated, and that subcommittee will be permitted to meet. Other than that, the Budget Committee and the Appropriations Committee are the only committees that have standing authority to meet.

So committees may meet as early as they wish tomorrow, 7:30 or 8 if they wish, and meet until 2 p.m.; and, of course, when the Senate recesses tomorrow evening, they can meet; they can meet on Saturday, and I would urge that committees do the best they can under the extenuating circumstances at this time, which to some extent do place a stricture on their meeting. I hope they will do whatever they can to meet when they can, so as to be able to report legislation to the floor as early as possible, and thus enable the Senate to act on measures sooner than would otherwise, perhaps, be the case.

Mr. President, let me amend my statement in this respect: The Foreign Relations Committee received authority 2 days ago to meet at 2:30 p.m. on Monday. So that committee will be permitted to meet at 2:30 on Monday.

Mr. BAKER. Mr. President, I certainly do not make any question of the authority of the Foreign Relations Committee to meet, or any other committee to meet, pursuant to previously entered unanimous-consent agreements; but I would just say briefly that I think the matter before the Senate is of such unique sensitivity and special importance to the Senate that I would very much hope that those committees might consider the possibility of rescheduling those hearings, so we could have a maximum attendance on the floor during the entire debate on this measure.

I have no authority, of course, to insist upon it; but I would respectfully request that any committees that have authority to meet during the pendency of the ethics measure before the Senate would reconsider that schedule, and accommodate the responsibility of Senators to pay maximum attention to this issue.

I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, I would hesitate to suggest that committees change their scheduled meetings, especially in view of the fact that consent has already been given for them to meet at such and such a time, in one instance on tomorrow and in another instance on Monday. But I thought it would be appropriate to state for the RECORD and bring to the attention of the distinguished minority leader the fact that the Foreign Relations Committee had already been given consent to meet at 2:30 p.m. on Monday.

I understand and certainly sympathize with the Senator's viewpoint that as much attendance as can possibly be had on the floor during the consideration of the pending matter would be desirable. But I felt that unless we clarified in the RECORD the fact that that consent order for the Foreign Relations Committee has already been entered, the committee might indeed feel that at some point and in some way the previous order had been vitiated. That was my reason for my statement.

Mr. BAKER. I thank the majority leader for making that clarification. I would ask, if the majority leader would yield, if he knows of any other committees that have similar orders.

Mr. ROBERT C. BYRD. As a matter of fact, I do not. I did not recall that until it was called to my attention.

May I ask the Chair, can it be ascertained whether or not any other orders have been entered heretofore for consent for committees or subcommittees to meet tomorrow, Monday, or during any other day next week?

The PRESIDING OFFICER. The Chair is informed that no committee, other than the one just indicated, has been granted the privilege of meeting.

Mr. ROBERT C. BYRD. I thank the Chair.

RECESS UNTIL 1:30 P.M. TOMORROW

Mr. MATSUNAGA. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 1:30 p.m. tomorrow.

The motion was agreed to and, at 6:34 p.m., the Senate recessed until Friday, March 18, 1977, at 1:30 p.m.

CONFIRMATION

Executive nomination confirmed by the Senate, March 17, 1977:

U.S. REPRESENTATIVE TO THE ORGANIZATION OF AMERICAN STATES

Gale W. McGee, of Wyoming, to be the permanent representative of the United States of America to the Organization of American States, with the rank of Ambassador.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

HEALTH CARE BUDGET

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 16, 1977

Mr. FISHER. Mr. Speaker, for some months I have been concerned about the rising cost of health care. On March 15, I discussed this issue in an address before the Arlington County Medical Association. The text of my remarks follows:

THE BATTLE OF THE HEALTH CARE BUDGET

Our ears are still ringing with campaign rhetoric, we are now being dragged by the pundits and prognosticators into the great American game of guessing how and when various campaign promises will be translated into programs, budget proposals, statutes, appropriations, and—inevitably—tax dollars. In the health care corner of this big game, the speculation focuses primarily on "the national health insurance question": Is President Carter really going to come up with a firm proposal, or was that just campaign talk? If he is, when will it come, how sweeping will it be, what will it cost, and will the Congress go along with the President? A secondary but related area of speculation centers around the question of slowing down the escalation of health care costs—whether measured in terms of total health expenditures, health insurance premiums or per diem rates for hospital care.

I'm not going to play this questioning game with you tonight. I have no secret knowledge of what the President will propose—or when; about as far as I'm willing to go at this time is to speculate that no major new health program legislation is likely to be enacted by the Congress this year. That may or may not hold true for 1978 as well, but one year at a time is all I'm willing to guess about. This forecast, let me repeat, relates to new program authority only. There may be, indeed probably will be, some significant changes made in existing Medicare and Medicaid legislation this Congress—possibly even this year.

Cost considerations underlie these predictions—both as to new program authorities and as to amendments to current program authorities. Major new program starts will require major additional revenues, but the outlook for raising large new revenues at this stage of our economic recovery is uncertain and will have to await the outcome of the economic stimulation program about to be enacted. Furthermore, the experience with Medicare and Medicaid to date has made the Congress chary about undertaking additional health care obligations until someone can derive new and better ways to keep program expenditures from climbing out of sight. At the same time, however, the Congress is getting increased pressure from back home to "do something" about the rising costs of Medicaid and hospital care. What you can expect in this present Congress, therefore, is a hard new look at our present program commitments, with particular emphasis on (1) measures to provide better protection against fraud and abuse, particularly in the Medicaid program, and (2) new approaches to the containment of cost increases, with particular emphasis on hospital costs.

While the immediate focus of these cost

containment efforts may be centered on somewhat arbitrary "rate regulation" proposals, a somewhat broader inquiry into cost considerations seems likely in the near future. Indeed, it seems to me and to many of my Congressional colleagues that there is a need to back off a bit from our past approaches to cost containment and to reexamine some of our assumptions and concepts with respect to health care economics.

For example, we may need to rethink what should be included in our definition of health and medical care. With a steady rise in the number and proportion of older people in our population, and with institutional health care costs rising even more rapidly, we should look anew at what kinds of facilities are really needed for the care of the elderly. While some progress has been made along this line, there are still many persons in mental institutions whose real problem is senility rather than mental illness. Similarly, a significant portion of the projected need for nursing home beds could probably better be classified as a need for domiciliary facilities—or even day-care facilities—for the elderly. To reclassify or redefine these needs does not mean there are no additional needs, but it may greatly affect the kinds of facilities we build, the composition of their staffs, and the availability of health insurance funds—public or private—to cover institutional operating costs. Redefinition along lines indicated here could result in better utilization of facilities and some cost reduction over all.

Similarly, we need to continue to press, wherever possible to find alternatives for inpatient hospital care—the most expensive and most rapidly rising component of health care costs. A great deal of innovation and progress has already taken place with respect to the kinds of medical procedures that can be provided effectively on an outpatient basis, and the effectiveness and economy of home care services has also been amply demonstrated. Much remains to be done, however, to develop the institutional framework for these cost-saving alternatives to inpatient care, and to assure that economies are not achieved simply by sacrificing quality. This applies particularly to home care services, where professional oversight may be more difficult to apply.

The problem of rapidly escalating medical costs led to renewed interest in cost containment. Cost containment is very difficult, having in mind the expectation that many have for the most advanced kinds of medical treatment involving very expensive medical technology. The high premiums for malpractice insurance almost force physicians to order expensive and protracted forms of diagnosis and treatment. The more medical costs are covered by insurance, the greater the expectation of policy holders is that whatever is wrong with them will be taken care of. This is a most delicate subject but cannot be avoided. Doctors inevitably are caught in the pull and haul of wanting to treat all patients according to the very best medical practice and technology on the one hand, and the knowledge that this course will run medical costs up even more. The widespread adoption of third-party insurance, such as Blue Cross-Blue Shield and the various pre-paid health maintenance programs, means that neither the provider nor the recipient of insured care has strong motivations to contain costs. We probably need to back away from this problem and consider a broad range of approaches to what appears to be the most intractible of all medical problems of our times.

Finally, we must broaden our attack on cost escalation by focusing more attention on the role and responsibilities of consumers of health care services. This is probably the toughest assignment of all. What it means, to put it bluntly, is that we must do a better job of making the American public—your patients and my constituents—understand certain truths that they would prefer to ignore:

(1) That the way they live and behave—their eating, drinking, smoking, exercise and work habits—are probably the most potent determinants of their adult health status;

(2) That the best way to make real reductions in total medical care costs is not to whittle away at the rates for providing curative services, but rather to reduce the need for medical interventions—partly through preventive medicine practices but primarily through individual health maintenance habits;

(3) That our national over-reliance on curative medicine is not only a threat to our individual health status; it is also a major villain in the drama of escalating health care costs. In the battle of the health care budget we must face the reality described in Pogo's classic line: "We have met the enemy, and he is us."

I don't need to tell you practicing physicians how hard it is to persuade people to do what they ought to do for their own good, but we have got to keep hammering away on this basic theme, and by "we" I don't mean just our doctors and nurses, but the educational system, the press and the broadcast media, and others who have skills and opportunities relating to health education. Federal, state, and local government may have important roles to play in preventive care by such means as aid to clinics that emphasize this aspect, assistance to schools with improved preventive care efforts, introduction of preventive care at the very earliest ages in child care centers and kindergartens, life-long programs of preventive care, and emphasis on this welfare programs of all kinds. Last year, Congress enacted legislative authority for new experiments and undertakings in health education. No easy answers can be expected, but our efforts must be increased until some headway is made.

One of the avenues particularly in need of exploration is how to make people generally appreciate the connection between health maintenance and health care costs. I wish, for example, that we could find a health insurance parallel for the "safe driver" premium reductions that are prevalent in the auto insurance field. I'm not sure whether any such provision would be feasible, but I think we should at least search for an equivalent. I realize that the deductible and coinsurance features of some health insurance policies provide some restraints on consumer utilization. The trouble is that they apply the brakes a little too late—after the patient needs medical or hospital care. What would be better would be some financial inducement for the insured person to reduce everybody's costs by preserving his own good health.

Many people in the country now look for immediate extension of health insurance to cover in a comprehensive way all people, not only the elderly or the low-income. This expectation is intensified as a result of a recent election in which comprehensive health insurance has been laid down in the Democratic party platform and less clearly in President's Carter's campaign utterances. A realistic approach might be to reform and improve the medicaid program and less urgently the medicare program, and then move to some kind of catastrophic health insurance coverage. In any case, greatest care must be taken in moving toward comprehensive coverage not to overtax the American people with costs higher than they are willing to bear whether through employment taxes or general taxes. Care must further be taken that the administrative capacities of the various medical systems in the country not be overstrained. And finally care must be taken that too rapid an extension of health insurance doesn't simply run up the cost of providing medical services in an inflationary way.

On this cautionary, but yet hopeful, note, I'll conclude these explanatory thoughts on rethinking some of our health economics concepts. I know I haven't found all the answers yet, but I'm earnestly searching for better ideas. If you people—leaders of the medical profession—will continue your search as well, the problems involved won't seem quite so difficult a few years from now as they do in March of 1977.

TERMINATION OF AID TO COUNTRIES ENGAGED IN ILLEGAL NARCOTICS TRAFFIC

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 16, 1977

Mr. GILMAN. Mr. Speaker, today I am introducing legislation terminating all U.S. assistance to any nation which fails to take adequate steps to control illegal trade in narcotics.

In recent years, the devastating impact of drug abuse in the United States, particularly that of heroin, has led to U.S. efforts to obtain the cooperation of other countries in suppressing illegal traffic in narcotics substances, with a priority given to illicit opium—as distinguished from export opium produced in accordance with international agreements to meet the world's legitimate requirements for opium-based drugs. Such increased U.S. efforts to secure multilateral cooperation stem from the fact, as illuminated in a report of the international narcotics control program, that—

The Key drugs of abuse originate abroad and our domestic efforts result in seizures of only 10–15% of that entering the U.S.

This same report emphasized what has been by now universally recognized:

The illicit movement of drugs respects no boundaries. What appeared to be largely an American problem several years ago has now substantially affected foreign populations. The abuse of heroin and other drugs has markedly risen in Southeast Asia, in Europe, and other areas. The international characteristics of the trade have become evident to all, to the point that government leaders in many countries have recognized the virtue of a multilateral attack on the problem.

The United States must continue to support and initiate international cooperative efforts designed to quash the continually proliferating network of illegal narcotics traffic. During the last 15 years, more than 500,000 Americans have succumbed to heroin addiction. The concomitant devastation—in terms of related crimes, and rehabilitation and law enforcement costs—visited upon Ameri-

can society by this inflow of harmful substances from abroad has been estimated at an annual social cost of $17 billion. The United States, while committed to international solutions to the drug problem, cannot fail to act unilaterally if, indeed, that route presents potentially productive alternatives. In the absence of stronger political commitments by foreign governmental leaders to narcotics control, our international programs cannot be fully effective. The legislation I am introducing today is born of recognition of that fact.

Congress must take resoundingly affirmative action as a clear signal to those countries unwilling or unmoved to shoulder their share of the responsibility for this debilitating intrusion of narcotic substances into our Nation.

To those who would contend that this measure would interfere in the internal policies of another nation, I would remind them that we are living in an interdependent world and must encourage each nation, while safeguarding its own interests, to act responsibly as it considers domestic policies which affect other nations.

Accordingly Mr. Speaker, I offer the following bill, which I request be reprinted in full at this point in the RECORD:

H.R. 5135

A bill to provide for the termination of all American assistance to any country which fails to take adequate steps to control illegal trade in narcotics

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 620 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(y) No military, economic, or other assistance may be furnished under this or any other Act and no sales of defense articles and services (whether for cash or by credit, guaranty, or by any other means) may be made under the Foreign Military Sales Act to any country in any fiscal year—

"(1) unless—

"(A) the President determines, and so certifies in writing to the Congress, that such country has taken adequate steps to prevent narcotic drugs and controlled substances (as defined in paragraphs (16) and (6) of section 102 of the Controlled Substances Act), which are produced or processed, in whole or in part, in such country or which are transported through such country, from being—

"(i) illegally transported, directly or indirectly, to the United States, or

"(ii) illegally sold within the jurisdiction of such country, and in particular, from being illegally sold to United States Government personnel or their dependents in such country; and

"(B) neither House of the Congress, by resolution adopted within sixty calendar days after such certification, disapproves such determination; or

"(2) unless the President determines, and so certifies to the Congress, that—

"(A) an emergency exists which requires such assistance or sales in the national security interests of the United States, or

"(B) with respect to humanitarian assistance only, assistance is required immediately for urgent humanitarian purposes.

If either House of Congress disapproves a determination made by the President under paragraph (1)(A) with respect to a country, such country shall remain ineligible for assistance and for sales of defense articles and services until the Congress, by concurrent resolution, declares such country eligible. Any determination by the President under this subsection shall be effective only for the fiscal year for which it is made. The President may, at any time, suspend assistance and sales of defense articles and services to any country which he determines has failed to restrict adequately illegal production of or trafficking in narcotic drugs or controlled substances.".

TRIBUTE TO DR. HAYDEN

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. AMBRO. Mr. Speaker, today it is my pleasure to pay public tribute to Dr. Charles W. Hayden, a respected community leader in my North Shore Long Island District and a surgeon whose excellent capabilities are widely recognized by his professional peers.

On March 24 Dr. Hayden will be the guest of honor at a testimonial dinner given by a voluntary group of Glen Cove citizens. Such festive occasions are usually reserved for the conclusion of a successful career. Dr. Hayden, however, is an active and vigorous gentleman of 64 who, I am happy to note, has no intention of retiring from the practice of the good works which have earned him the affection and respect of his neighbors and associates.

Since he came to Glen Cove in 1946 Dr. Hayden, a graduate of Washington University and Harvard Medical School, has dedicated his professional skills to assure that the young and needy receive the same high quality of medical care available to the more fortunate. Beyond his medical services Dr. Hayden has given his valuable time freely to a host of community projects. Just to mention a few of his affiliations indicates the wide scope of his concerns. He is president of the Glen Cove Neighborhood Association and a member of the board of managers of the Glen Cove YMCA, which, I might add, elected him man of the year in 1966. A former member of the Glen Cove Planning Board, Dr. Hayden also serves on the executive committee of the Nassau County Council of Boy Scouts and on the advisory board of governors of Adelphi University.

Recognizing that a vital community depends upon the strength of the individual family, Dr. Hayden has shared his deep love of learning, enthusiasm for life and social commitment with his wife Joan and their three children, Eric, Brian and Carol.

The honor to be given Dr. Hayden on March 24 is, as one of his neighbors said, long overdue. For all who know Dr. Hayden it is a way of saying thank you for being in our midst. The life of our community has been and will continue to be enriched by the character and philanthropy of such generous citizens as Dr. Charles W. Hayden.

FDA'S SACCHARIN BAN SERVES INTEREST OF PUBLIC HEALTH

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 16, 1977

Mr. VENTO. Mr. Speaker, the recent FDA ban on saccharin has made headlines throughout the country and has generated a not surprising negative reaction from many segments of our society. Although people who must diet, because of obesity problems and those afflicted with diabetes and related diseases are leading the attack, many other people are raising the logical question, "What will be next?"

That is a fair question. It is time for Congress to take a good hard look at the Delaney clause of the food additive amendments passed by Congress in 1958. Although well intended, the Delaney clause makes absolutely no allowance for dose rates in any cancer-causing substance consumed by people except for tobacco. I question the logic of this clause and believe there exists a case for modifying it now before other additives are swept off the market because, in abnormally large quantities, they may be cancer-causing agents.

Mr. Speaker, I concur with my colleague from North Carolina, the Honorable JAMES MARTIN, an organic chemist himself, who states:

If it is clear that normal use is safe, as it is with saccharin, then people ought to be able to use it.

It would seem to me, in the case of saccharin, that those who depend on it as a sugar substitute are in far less danger than health complications that might result if saccharin is taken off the market. In this regard, I can hardly imagine anyone consuming 800 bottles of diet pop in 1 day, the quantity of saccharin estimated to trigger possible bladder cancer.

Mr. Speaker, I would encourage the FDA to impose a mandatory labeling of all food products which contain saccharin. The American people should be made aware of any possible hazard to their health if consumption of this product is abused.

Furthermore, Congress should encourage both private industry and Government laboratories to develop a sugar substitute that will not jeopardize the health of our society. Hopefully, working together, a safe substitute may be on the market in a relatively short time.

Mr. Speaker, I include the St. Paul Dispatch editorial in the RECORD:

NOT SO SWEET AN ORDER

Working at the Food and Drug Administration must be something akin to front-line soldiering at times. You toss out an order and then duck, for the shrapnel is bound to be thick. Thus with the most recent grenade, a ban against the casual use of saccharin as a substitute for sugar.

The loudest cries of anguish come, of course, from those who make money off sac-

charin: manufacturers of the chemical; those in the soft drink business. It's not a small matter, for Americans use 5 million pounds of the stuff a year, three-fourths of it in soft drinks.

Dieters (and there actually are many who think drinking diet pop will make them thin) resort mostly to ridicule. A person would have to consume 800 bottles of pop a day in order to duplicate the cancer-causing effect detected in rats. This over the period of a lifetime. Not even the most addicted are likely to hit that level.

And then there are those individuals who, for medical reasons cannot tolerate sugar and formed the original market for artificial sweeteners. Their reaction is likely to be, "What next?"

The FDA, of course, will be the object of all the outrage, humor and (pardon) bitterness. This is not justified.

Americans live in fear of cancer and in fear of doing anything meaningful to reduce the incidence of cancer. They hope for a miracle drug or surgical procedure to make the curse go away. It won't. Maybe we need a national cancer policy as well as a national energy policy, for the problems are of the same sort. Good sense dictates certain courses of action; those same courses of action are socially and economically expensive. So we choose not to act, not even to quit smoking but to continue to subsidize the tobacco industry.

Congress reflected America's fear of cancer when it directed the FDA to ban food additives that are shown to cause cancer in humans or in animals. The FDA has little choice in the matter, if it is to be honest with its mission. In this case, if we read the reports rightly, the animal tests weren't even done in this country but in Canada. Maybe we should be wondering why the work was done in Canada instead of here.

At any rate, it is clear that modern America, like other industrialized and wealthy nations, is peppered with cancer-causing agents. They're in our food, our water, the air, the houses in which we live, the cars we drive. The "cure" for many, if not most cancers probably has been found already: eliminate 90 per cent of the products we've come to depend on to provide "the good life."

Well, we won't pay the price, no diet pop and cigarettes, to say nothing of automobiles and heavy industry. So it seems here that the basic questions are these: how safe do we want to be? and who is to do the protecting?

Congress gave the FDA an order that we suspect would ban everything in food, including the food, if the tests were pushed hard enough. Certainly any additive, including salt and pepper, must be lethal if taken in sufficient quantity. Does this mean we should ignore the results of animal studies and wait until some autopsy uncovers a grain of, say, saccharine surrounded by a 10-pound tumor?

Hardly. But Congress handed the FDA a pretty wild weapon and should call it back for a second look. If "cancer policy" is to be near-total protection, as the FDA order indicates, then it is ludicrous to look at one food additive at a time while actively encouraging the production of other suspect-to-probable causes of cancer. If it is to be demonstrable human danger, the people up at Reserve Mining will be happy.

Somewhere in between there has to be reasonable ground. It should not be determined by producers (does America really need 5 million pounds of saccharin a year?) and it should not be some sanitation law that makes the whole program look slightly ridiculous when it is occasionally enforced.

TECHNICAL AMENDMENTS TO TAX REFORM ACT OF 1976

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. CONABLE. Mr. Speaker, today I have introduced some technical amendments to the historic structure provisions of the Tax Reform Act of 1976. My bill would delay the termination date of the provision of the Tax Reform Act of 1976 which allows a deduction for charitable contributions of conservation easements of no less than 30 years' duration and would limit the recapture of amortization of certified rehabilitation expenditures on the disposition of certified historic structures to the excess of the amortization deductions claimed over the otherwise allowable straight line depreciation.

These provisions which this bill amends were added to the Tax Reform Act of 1976 by a Senate floor amendment introduced by Senator Beall. The amendment contained four provisions dealing with the taxation of historic structures, each of which had a 5-year termination date, and the one provision which allowed deductions for charitable contributions of conservation easements of no less than 30 years' duration which had a 1-year termination date.

In his floor statement accompanying the amendment, Senator Beall stated that the termination deadline for the five provisions were included so that the tax expenditures resulting from the provisions would not continue indefinitely without a review by Congress of their effectiveness. I understand that Senator Beall had intended the provision dealing with conservation easements to have a 5-year termination date, but that his amendment inadvertently provided a termination date for this provision of June 14, 1977, instead of the intended termination date of June 14, 1981. Section 1 of the enclosed bill would change the termination date of the provision dealing with conservation easements to the intended termination date of June 14, 1981, and should permit a more reasonable period of time for Congress and the Treasury to evaluate the effectiveness of the provision.

Section 2 of the bill generally limits the recapture of deductions for rapid amortization of certified rehabilitation expenses on the disposition of a certified historic structure to the excess of the amortization deductions claimed over the otherwise allowable straight line depreciation. A technical error was made in the drafting of the Tax Reform Act which provided that the rapid amortization deductions would be recaptured under section 1245 of the code with the result that the gain on the disposition of a historic structure would be recaptured—that is, treated as ordinary income rather than capital gain—to the extent of the full amount of any rapid amortization deductions claimed with respect to property. This is the rule that generally applies with respect to recapture of depreciation or amortization deductions on the disposition of personal property. However, in the case of dispositions of real property, recapture is ordinarily accomplished through section 1250 of the code under which a gain on the disposition of the structure is ordinarily recaptured only to the extent that the depreciation or amortization deductions claimed exceed otherwise allowable straight line depreciation.

Although section 2 of the bill would correct the technical error made in the Tax Reform Act by generally limiting recapture upon the sale of a certified historic structure to the excess of the amortization deductions claimed over otherwise allowable straight line depreciation, recapture of the full amount of the amortization would still be provided to the limited extent that the gain on the disposition of a certified historic structure is attributable to the disposition of an elevator or an escalator. This is the same rule that applies with respect to the recapture of depreciation or amortization deductions on disposition of other types of real property.

AID FOR INNOCENT VICTIMS OF CRIME

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 16, 1977

Mr. MAZZOLI. Mr. Speaker, I would like to share with my colleagues the following editorial which appeared in the Record, the Louisville Archdiocesan newspaper.

This editorial, in citing a worthy program established by the last session of the Kentucky General Assembly, underscores the necessity of speedy action on Federal legislation to assist States in aiding the innocent victims of crime.

As a cosponsor of H.R. 3686, the Victims of Crime Act of 1977, I urge expeditious action by the 95th Congress to usher this important legislation into the statute books:

OUR SOCIETY HAS OVERLOOKED CRIME VICTIMS FOR TOO LONG

Forgiving sinners is a worthy goal for each of us, but we suggest that remembering the sinners' victims is equally important.

That is why we were gratified to see a brief item in the secular press recently. The item noted that payments are being made to victims of serious crime for medical expenses and lost earnings. These payments come through a State agency set up and funded by the last session of the Kentucky General Assembly.

Our gratification comes because of the realities of the contemporary world, in which charity has, perhaps of necessity, been institutionalized. While still arguing that the best charity is the kindness and compassion of one human being for another, we admit that certain need must be served by formal agencies. This is true even within some charitable and social arms of the Church.

This sense of organization has long since spread to the offenders. Convicted criminals

are kept by penal organizations. Persons who are guilty of less serious crimes against society or their fellow humans are counseled by still other formal units.

Watching over all these organizations are various arms of the media who assign reporters to keep an eye on the performance of these different agencies.

Perhaps that is why it may seem to some of us that the rights of criminals are quite widely publicized. It is probably not so much any so-called bleeding heart reaction to the plight of criminals as it is the formal assignment of media representatives to watch and report regularly on the performance of agencies dealing with criminals.

Victims have no such representation or watchdogs of their rights. Victims are one-day wonders in the fast-moving media world. Without discounting the compassionate and effective work of everyone from police officers to medical personnel, few agencies look after a victim beyond the initial post-assault period.

Facing these organizational realities, we are glad to see still another agency alive and functioning. If the Crime Victims Compensation Board continues to function properly, victims will receive at least some of the benefits that come to others in our over-organized society.

JOB CREATION PROPOSAL

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. BAUCUS. Mr. Speaker, I am pleased to take this opportunity to express my wholehearted support of the Congressional Rural Caucus' anti-inflation job creation proposal.

We need to recognize the unique character of many rural problems, and give them the type of special consideration that our urban problems received in the 1960's and early 1970's. Thus, I am encouraged by the attention that the Congressional Rural Caucus proposal has received, and the cooperative effort that it represents.

In contrast to the President's revised budget, the budget proposals drafted by the Congressional Rural Caucus, if enacted, would provide more than $16 billion in stimulas that would be directed toward rural areas. More important, it has been shown that these funds could produce 2 to 3 million private sector jobs.

The most striking feature of the CRC budget proposal is that it provides most of these funds from the private sector, through increased loan guarantees from the Farmers Home Administration and the Small Business Administration. I am not always a supporter of providing Government guarantees for private loans. However, I have found that when the Government guarantees loans to citizens in rural areas, the prospects for default are relatively lower in rural areas than other areas. The chance that the Government will be forced to spend funds on defaulted loans is reduced in rural areas.

Many rural areas are unable to compete on equal footing with urban areas for various forms of Federal assistance. The CRC proposal would be a step in the right direction, by acknowledging the different approaches which must be taken in dealing with either urban or rural economic problems. All we are really calling upon Congress to do is to provide rural residents with their fair share of economic opportunities and public services.

May I join with my colleagues in the Congressional Rural Caucus in expressing hope that we in Congress will move swiftly to approve this much needed piece of legislation, aimed at remedying the economic problems faced by our rural citizens.

WILSON ADDRESSES ISSUE OF POSSIBLE REDUCTIONS IN POSTAL HOME DELIVERY

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, the U.S. Postal Service will, as we all know, face continued financial difficulties in the years to come. From some quarters the recommendation has been made that money could be saved by reducing home delivery from 6 to 5 days per week.

No firm decision has been made by postal management to move in that direction at this time, but I have recently begun receiving reports from postal employees in the field that mail is allegedly being held back and manipulated in an attempt by management to show that 5-day delivery is sufficient. While I am receiving reports regarding delayed mail from a number of cities in the country, most of the reports are coming from the Postal Service's western region.

At this time I cannot confirm these alleged delays, but I am in the process of investigating the matter.

No change to 5-day delivery is imminent. According to postal management:

A reduction in the number of delivery days would be a change in the nature of postal services on a nationwide or substantially nationwide basis within the meaning of section 3661 and would require a request by the Postal Service to the Postal Rate Commission for an advisory opinion.

Also, postal management recognizes that:

Any changes in wages, hours and other terms and conditions of employment that derive from such a change as a conversion to a 5-day delivery schedule would, of course, require Postal Service compliance with applicable statutory requirements in the labor relations area and the provisions of extant collective bargaining agreements.

Mr. Speaker, at the heart of this matter is the fact that cutting back to 5-day delivery is really an issue of public policy and should be decided by the Congress.

The Postal Service maintains that savings could be $300 to $400 million annually if such a change took place, although the USPS admits that "potential cost savings are not precise because the savings could vary."

Under legislation which I have sponsored, H.R. 19, a procedure would be established which would prohibit service cuts, such as dropping to 5-day delivery, or rate increases, until Congress was provided a certain amount of time to consider a subsidy in its place.

The impact of 5-day delivery could be significant to many Americans. It is a decision which Congress could consider and decide, if my legislation is approved.

As chairman of the Postal Personnel and Modernization Subcommittee of the House Post Office and Civil Service Committee, I have yet to see any evidence which would persuade me that the reduction of some delivery of mail from 6 to 5 days would be of such a financial benefit to the Postal Service as to offset the reductions in service to the public and the potential loss of jobs to postal employees. At a time when the new administration and Congress is working toward full employment, any action which would eliminate jobs has to be thoroughly researched and completely justified.

Therefore, Mr. Speaker, I plan to oppose any attempt to reduce mail delivery from 6 to 5 days unless it is clearly demonstrated to me that it is to the best interest of all involved—the public, the postal employee and postal management.

THE RULE OF REASON

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. PICKLE. Mr. Speaker, I am today introducing a bill which brings more commonsense to the Truth in Lending Act (15 U.S.C. 1640).

My bill is not designed to harm this law, nor will it do so in my opinion. It will make truth in lending more realistic. The bill is simple, and its full text reads:

A creditor may not be held liable in any action brought under this section for a violation of this title if the creditor is in substantial compliance with the provisions of this title and regulations promulgated hereunder respecting the alleged violation.

This language does one thing to the law—it applies the legal maxim de minimis non curat lex to the Truth in Lending Act. In layman's terms this means that minor, technical, and unintended acts by the creditor are not subject to fine.

My bill grows out of expert counsel of an Austin, Tex., attorney, Mr. Donald Goldston. He is an attorney whose practice includes extensive consumer practice. His everyday experience, plus study of the case St. Germain against Bank of Hawaii, 413 F. Supp. 587 (Ha. 1976), has led him to recommend the language I introduce today.

In the materials I have received from Mr. Goldston, two paragraphs in particular stand out in my mind. I would like to put this in the RECORD.

As I am sure you know, I do not disfavor the basic concepts underlying most consumer

protection laws; I have long advocated that some were needed. But I am appalled at the unrealistic structuring of most such, at the complexities of all such, and at the bureaucratic implementation of all such. Most of the existing consumer protection laws and the implementing regulations thereof are so complex that neither lawyers nor judges can agree upon the proper meaning of such. I did not mention this above; but the law books are filled with one judicial opinion after another which conflict with other judicial opinions about how to comply with the Truth-in-Lending Act.

When there is no general agreement about the law among lawyers and judges, you can just imagine how baffled the layman is. *And those disclosure forms are filled out by laymen, not lawyers.* The consumer protection laws must be readily understood by the moms and pops operating a small retail store, or such laws will continue to be, as they have been for years: (1) more honored in the breach than in the obeyance thereof; (2) legalized means of blackmailing businessmen into coughing up hundreds of thousands of dollars in settling claims based upon such evils as using the wrong sized type in a printed form; (3) meaningless, in terms of disclosing information, to the average person; and (4) inflationary in their impact on our economy.

In short, I would hope that the Congress would pass my bill, and that the Truth in Lending Act be enforced against the real violators, and not the technical, nonsubstantive violators.

GAS PRODUCTION COSTS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. COLLINS of Texas. Mr. Speaker, is the price of gas going to stay high? The answer is "yes," because gas is short and new reserves are expensive to develop.

We have 10 years of gas reserves. The most accessible gas production has been found and produced costs for exploration and development have increased.

Gas is still cheap at $1.95 MCF because compared by Btu energy content to other types of energy gas has similar Btu value at $1.95. The old prices will not come back and here is an example of why that is true.

I received a report from the Total Exploration Co. of Corpus Christi, Tex. To get the full facts, I talked with their president, H. C. Cooke. I reviewed their entire experience on No. 2 Vincent gas well in Refugio County.

At this time, Total Exploration Co. is applying to the Federal Power Commission to increase the price to $1.60. But this would just barely break even. At the old price, he will have to discontinue the well. Read their report as it lists the cost data for one gas production situation. Here is Cooke's statement from Total Exploration Co.:

Enclosed herewith are statements of income and expenses on the Total Exploration Company No. 2 Vincent gas well, Refugio County, Texas. The income covers a period of sixteen months, July 1975 thru November 1976.

Income to the working interest from gas at 76.65 cents per MCF was $27,583.99, total costs were $56,966.33, for a loss of $29,382.34.

Based upon the average home use of 5.3 MCF per month, this gas well will furnish gas for 540 homes. It is quite obvious that Total can no longer produce this well for this price gas, and somewhere down the line 540 homes or their equivalent will be without gas.

If the FPC will increase the price of this gas to $1.60, we will continue producing this well, even though at this figure our total production over the sixteen months of 45,826 MCF would show a loss of $245.57.

In addition to the above costs, this year Total Exploration Company drilled and abandoned two wells on this tract at a cost of $118,000.00, as evidenced by the enclosed contract.

ST. PATRICK'S DAY

HON. PETER W. RODINO, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. RODINO. Mr. Speaker, today, we honor the memory and spirit of the beloved patron saint of Ireland, St. Patrick. Truly there can be no better occasion on which to also pay tribute to the numerous contributions of Irish men and women and their descendents in the building of our great Nation.

Most Americans are well acquainted with the history and legends surrounding the life of St. Patrick. Born a citizen of Rome, while still a youth he was kidnaped by fierce drug marauders. Enslaved for several years in what is now County Antrim, legend records that the assistance of the Almighty enabled Patrick to escape and make his way home. Upon his return he studied for the priesthood, and after his appointment as a bishop, St. Patrick was sent to Ireland to convert to Christianity the Druids he had once served.

Arriving in 431 A.D., he quickly encountered strong resistance to this new faith he preached. His early days in Ireland were perilous, and more than once the saint's life was threatened. Undaunted, Patrick persevered in his missionary labors and, according to legend, first used the shamrock to illustrate the mystery of the Trinity to his skeptical listeners.

Numerous miracles have been attributed to Ireland's patron, perhaps most prevalent being the colorful legend that St. Patrick rid the island of all its serpents.

Without a doubt the saint's zealous efforts eventually proved extremely successful and countless numbers were converted to Christianity. In addition, St. Patrick is known to have established schools, churches, and at least one college. Ceaseless dedication to his flocks earned St. Patrick an eternal place in the hearts of Irishmen. At his death on March 17, 493, thousands of grieving mourners traveled great distances to pay final tribute to the figure who had transformed groups of warlike tribes into a peaceful and civilized community.

Mr. Speaker, as Americans we too acknowledge a debt to St. Patrick through the many and varied contributions of the Irish people to the growth and development of our Nation.

Along with other immigrants the Irish played a key role in constructing the railroads which first linked the coasts of our growing land. The talents of Irishmen and their descendents are represented in diverse fields, ranging from athletics, the arts, to religion where thousands of Irishmen have held important church positions.

And on this day it would be impossible not to recall perhaps the one man who personified Irish success in the United States, our late President, John F. Kennedy.

Mr. Speaker, each year the Newark St. Patrick's Day parade is a long-awaited and major event in my district. Most unfortunately, the parade this year which was scheduled for Sunday, March 13, was canceled due to inclement weather. Perhaps this is an indication of our close ties with Ireland, as I understand rain also interrupted the Dublin parade this morning. However, I wish to highly commend Mr. Tom Conroy, the grand marshal for Sunday's parade, on his superb and diligent efforts in organizing this year's celebration.

Mr. Speaker, an old proverb proclaims that "Everyone is Irish on St. Patrick's Day." I am especially proud to be an "honorary" Irishman and to salute the proud heritage of the magnificent Emerald Isle. Regrettably, today, areas of St. Patrick's beloved Ireland are suffering from a tragic, bitter conflict. Certainly we can imagine no more fitting tribute to the memory of this most inspiring Irish figure than the restoration of peace and tranquillity to beautiful Ireland.

FREE VLADIMIR PRESTIN

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. LEHMAN. Mr. Speaker, I would like to bring to the attention of the House today the story of a Soviet dissident, Vladimir Prestin, who for 7 years has been denied an exit visa for Israel.

Vladimir Prestin is an engineer who has written several articles and has three patents. Since 1969, he has not worked on any projects that could be considered secret, yet is still refused permission to emigrate.

Vladimir is currently employed doing menial work in a factory. He spends his spare time teaching Hebrew, taking part in scientific seminars and other educational and cultural programs for fellow Jews.

Vladimir has a wife, Elena, and a son Misha, who will soon be celebrating his 13th birthday, the age of Bar Mitzvah. In a gesture of solidarity, synagogues throughout the world are having Bar Mitzvahs for Misha on Saturday, March 19.

In honor of the courageous Prestin family, I would like to share this poem written by a member of the South Florida Conference on Soviet Jewry:

IF WE FORGET THEE VLADIMIR PRESTIN

(By Morton E. Freiman)

If we forget thee Vladimir Prestin . . .
The birch trees will wither and die
But the dream of your ancient homeland
Will remain like a prisoner's cry

Imprisoned, deprived and denied
That homeland, so far yet so near
Still the vision of freedom within you
Must grow brighter with each passing year

Abraham, Isaac and Jacob
Are with you whenever you pray
For on their internal passports, too
Was written the word Yevre!

We have not forgotten thee Volodya
The birth trees are thriving and strong
Soon, redeemed, in Yerushalayim
We shall offer in praise a new song

RELEASE OF DR. MIKHAIL SHTERN FROM SOVIET PRISON

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. AMBRO. Mr. Speaker, yesterday, I was pleased to learn that the Soviet Union's News Agency Tass has reported the release of Dr. Mikhail Shtern, an eminent Soviet endocrinologist sentenced in 1974 to 8 years at hard labor on trumped-up charges following the application of his youngest son to emigrate to Israel. Dr. Shtern, the senior consultant in the Polyclinic of Vinnitsas—Ukraine—Endocrinological Health Center, was singularly responsible for the elimination of the thyroid diseases endemic to the western Ukraine. Nonetheless, his entire professional career has been dogged by the manifestation of successive waves of Soviet anti-Semitism, including Stalin's infamous "Doctor's plot."

His recent troubles began in September 1973, when his family received an invitation from Mrs. Shtern's sister to join her in Israel. Following his refusal to forbid his sons to emigrate, Dr. Shtern was arrested and placed incommunicado in a basement prison cell for many months. His family did not even know where he was. During this period, anti-Semitic mobs stoned the Shtern home, broke the windows and caused Mrs. Shtern to fear for her life. The Soviet authorities continued to harass the Shterns by confiscating their property and leaving them penniless. Both sons—one a physicist and one a psychologist—were fired from their jobs and threatened with arrest on the charges of "parasitism." After a rump trial—during which attempts were made to prevent his wife and sons from attending—Dr. Shtern was pronounced "guilty" of bribery for "accepting two chickens, one goose, some vegetables, 70 eggs, and 770 rubles" from various patients over a 20-year period. His sentence was 8 years in a Soviet labor camp. He has spent the past 2 years in a labor camp in Kharkov where he has been denied the right to practice as camp doctor and has been forced to work in the camp machine shop with a wrench, despite his ill health and age. His wife has only been allowed to visit him once a year, and every two nights he is moved from barracks to barracks, from sleeping area to sleeping area, so as to disorient him and attempt to create a breakdown.

Since becoming a Member of the Congress in January 1975, I have written to Secretary Brezhnev and to Ambassador Dobrynin several times on Dr. Shtern's behalf. Several months ago, I had the honor of meeting with Dr. Shtern's son, Viktor, after which I drafted another appeal to the Soviet officials. I know that the series of letters sent directly to Dr. Shtern by my colleague, Congressman DOWNEY, must have been a great source of strength and hope for him, and I commend him for it. While I cannot take any of the credit for the release of Mikhail Shtern, I can and do derive pleasure out of this decision by the Soviet leadership, whatever their reasons might be. Now, it is my hope and prayer, Mr. Speaker, that this same leadership will complete their gesture of good will and compassion by granting Dr. Shtern an exit visa so that he may join his sons in Israel. To do anything less would only constitute a cruel hoax on this brilliant physician whose only crime is that he is a Jew.

THE SOVIETS DISCOVER DISTRUST

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. DERWINSKI. Mr. Speaker, a major cause of disturbance in foreign affairs is the complete distrust that the Soviets find themselves in, as a result of their failure to live up to the Helsinki accords. This question of foreign policy is addressed in an editorial, appearing in the Chicago Tribune of March 16. I insert this editorial for the Members' attention:

THE SOVIETS DISCOVER DISTRUST

Pravda has set up a frightful hullabaloo over the support President Carter has given to dissidents in the Soviet Union. It can doom detente, Pravda says. It can dim any hope of a new strategic arms limitation agreement. The Communist Party newspaper goes on to say that "attempts to bring pressure on us . . . are bringing about an atmosphere of distrust."

There is distrust. That's for sure. We know from long experience. The Soviet Union has been sowing distrust in American breasts for years. It has violated agreements with us regularly. The Helsinki agreement of 1975 is no exception. It has been clear almost since the day of the signing that the Kremlin had no slightest intention of honoring this pledge in the agreement: "The participating states will respect human rights and fundamental freedoms, including the freedom of thought, conscience, religion, or belief . . ."

It was Moscow's callous, daily violation of this clause that prompted Mr. Carter's criticism. How is it possible to say he has caused "distrust" by pointing to the Kremlin's own breaches of the agreement? Pravda has directed its warning to the wrong party; it should have gone to the Kremlin.

As a matter of fact, for the construction of a good arms agreement it doesn't matter whether Pravda trusts us or not. As a matter of fact, we would be foolish indeed to enter into any agreement based on something as ephemeral as faith in the Soviet Union. Any pact should depend on tangible, reliable things like verification of compliance through mutual inspection of weapons and sites and through other hard-noscd means.

If the Soviets really want a workable arms agreement, one that may help save the world from destruction, they will not be too deeply concerned about the negotiating atmosphere.

Meanwhile, the Kremlin may as well stop telling us to be quiet about human rights violations. If the Kremlin can, as Leonid Brezhnev said, pursue detente on the one hand and at the same time support the creation of Marxist despotisms in any country it chooses, then we have every right to embrace the nobler ideal of pursuing detente while seeking to inspire a movement for individual freedom wherever we choose. Ours is the true effort to support national liberation; to the Soviets, liberation and democracy are merely words to conceal an effort to spread despotism.

If saying this causes the Kremlin to talk of distrust, it is because an evil system can survive only by spreading distrust of a good one.

DISPLACED HOMEMAKERS ACT

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. MOAKLEY. Mr. Speaker, I rise to urge most strongly the swift passage of Congresswoman BURKE's bill, the "Displaced Homemakers Act," H.R. 28. This act deals with women who have been psychologically and economically sheltered from the business world, only to face financial disaster because of possible divorce or widowhood. These women possess few marketable skills and little experience, yet suddenly they must support both themselves and their dependents. The prospects of their financial survival are frighteningly dark.

The extent of this problem is hidden from us by the lack of appropriate statistics. After much research, the Alliance for Displaced Homemakers could only conservatively estimate that in March of 1973, 2.2 million homemakers between the ages of 34 and 64 definitely qualified as "displaced" and in need, another 7.5 million women with children over 18 appeared to be potential candidates, and 15 million more women, presently receiving child care benefits for their children under 18, threatened to join the corps of unskilled mothers seeking financial subsistence, once their children attained maturity. Hundreds of other displaced homemakers, undetected by these figures, may also be enduring the nightmare of sudden economic distress, without hope of governmental assistance.

Since 1973, the divorce rate has been steadily rising, implying ever greater numbers of displaced homemakers. Yet, simultaneously, the rate of alimony awards has been declining, indicating that ever fewer mothers are receiving monetary aid for their dependents. The available figures indicate that only 47 percent of divorced mothers were awarded any child support at all, and of this amount, only 21 percent actually continued to receive regular payments. Even in the marriages that remain stable, women are outliving their spouses to a

significant degree. These women, like their divorced counterparts, are then forced at a late age to face economic demands for which they are unprepared. They need our assistance.

Congresswoman BURKE has responded to the many constituent calls for help in this area, and drafted a bill geared toward easing the displaced homemakers' transition into the working world. Complementing both psychological and practical requirements, the bill creates multipurpose centers which provide both health, education and home management programs and job counseling, training and placement services, besides offering a coordinated referral service to other appropriate programs. Despite long isolation and a tough market, these women can become productive, self-sufficient members of our economic community, given the flexible, comprehensive adjustment aids this thoughtful act provides.

I am sure that a little careful investigation will prove to each Member of Congress that this bill offers services both desirable and relevant to the needs of the homemakers in their districts. Many women already enduring the trauma of loss and displacement, are also poised on the brink of financial disaster. I ask my fellow Members to help me to provide the necessary bridge to financial survival. I urge affirmative action on the "Displaced Homemakers Act," H.R. 28.

SETTING THE RECORD STRAIGHT

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. WAMPLER. Mr. Speaker, the Washington Post today, March 17, 1977, carried a major headline article, "Nitrogen Fertilizers Seen as Threat to Earth's Ozone Shield," on page A3. The scare impact of this article must be immediately clarified before the public obtains the false impression that official scientific facts have just been announced that the farmers are causing cancer by fertilizing their crops.

Because of the emotional impact this story could generate, especially since the article gives the impression of being an official Government announcement, I contacted the National Science Foundation this morning to find the truth about the Post's article.

A National Science Foundation spokesman stated as follows:

The National Center for Atmospheric Research is a private organization under contract by NSF to perform studies; Dr. John Gille, quoted by the author of the Post article, is not a Federal employee; that the employees of the National Center for Atmospheric Research had been cautioned in the past not to cast statements they made as official Government announcements; that the quotas attributed to Dr. Gille by the Post are "scientific speculation" at this time; that the article is "low in scientific content"; that the "nitrogen cycle" pertaining to fertilizers is not a major concern at the present time, but that fluorocarbons from spray can propellants still are a matter of concern by NSF; and that the National Science Foundation "does not condone this type of article before we know what the facts really are."

This article hit me between the eyes, Mr. Speaker, because only yesterday I was studying the impact of this winter's bad weather on the availability of fertilizers for our farmers this spring to grow crops to feed our people. I found out, incidentally, from the Department of Agriculture that while supplies of fertilizers are improving and probably will be adequate, USDA is still sticking by its earlier estimate that we will have a 750,000 ton loss of fertilizers this year. While this is not a serious shortage, it could—if it materializes—have an impact on the cost of farm products to consumers.

I trust, Mr. Speaker, my statement puts today's Post article into proper perspective.

LIFE FROM THE LAB: WHO WILL CONTROL THE NEW TECHNOLOGY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. OTTINGER. Mr. Speaker, I would like to call the attention of my colleagues to a most important debate that has been raging in the academic and scientific community and has now reached the Halls of Congress. It concerns the highly controversial subject of genetic research—specifically in recombinant DNA—and the ultimate goals we seek to achieve. Put simply, the new science of recombinant NA is the transplating of genetic material from one living organism to another completely unrelated species with the possible result that new life forms are created.

Hearings have been held in the Subcommittee on Health and the Environment of the Interstate and Foreign Commerce Committee on which I serve. Bills have been introduced by Subcommittee Chairman PAUL ROGERS, Congressman SOLARZ, and myself to regulate and supervise this research. Much has been written recently in the press on this subject. One of the most thoughtful and comprehensive pieces was written by Judith Randal and appears in this month's Progressive magazine. I would like to enter it in the RECORD for the benefit of all of us who will soon be asked to make an informed judgment on this most important subject:

LIFE FROM THE LABS: WHO WILL CONTROL THE NEW TECHNOLOGY

(By Judith Randal)

As recently as five years ago, almost anyone who suggested that the species barrier could be broken much more easily and at far less cost than it took to split the atom would probably have been regarded as a science fiction buff at best, and more probably as a nut.

Today this is no longer fantasy. At the very time, ironically, when thousands of species are threatened by man or already extinct, the tools that will cause entirely unrelated species to exchange hereditary material have become a reality. What now confronts us is the problem of weighing the potential benefits of this new technology against the potential risks—without sacrificing the freedom of scientific inquiry or endangering the world on a previously unimagined scale.

Interspecies hybrids are nothing new, but the issue of such unions—the mule is an example—have always been distinguished by an inability to reproduce. Moreover, those forms of life—bacteria and blue-green algae—which do not have distinct cell nuclei and those which do, have always been autonomous biological kingdoms whose boundaries could not be crossed. With the discovery of enzymes that will fit ordinary bacteria with the genes of any plant, animal, insect, or virus a scientist may choose, and with the evidence that generation after generation of germs will then continue to express the characteristics conveyed by the transplants, such distinctions are fading fast.

As they fade, we suddenly face the prospect that man will be moving genes back and forth across boundaries that many millions of years of evolution have set in place. That prospect now engages the scientific community in a furious debate—one of which most Americans are still unaware, while the rest wonder which biologists to believe.

The dilemma of balancing scientific risks and benefits is, of course, a familiar one. In the case of nuclear energy, both the risks and the benefits are at least familiar and more or less quantifiable. And when physicists have created new elements, they have done so with the knowledge that their behavior will be highly predictable. By contrast, even the experts can only guess what will happen when germs are provided with exotic genetic material and what trade-off this new technology will require. And whereas radiation generally decays, novel microbes might multiply indefinitely in a hospitable environment.

Last June, the National Institutes of Health (NIH) published voluntary guidelines which, in effect, sort proposed genetic experiments according to their estimated risk and then define those which can be safely performed under specified conditions and those which are potentially so hazardous that they should be deferred pending further developments, or completely avoided.

Some biologists, including Nobel laureates David Baltimore and James Dewey Watson of the Massachusetts Institute of Technology and the Cold Spring Harbor Laboratory on Long Island, respectively, are satisfied that the NIH guidelines provide adequate safeguards against the escape into our midst of bacteria that might prove to be drug-resistant. There are others, within and without the Nobel ranks, who think such an "Andromeda Strain" scenario is overblown, and who protest that the NIH has imposed needless limitations on scientific inquiry.

But there are still others—and they, too, include a Nobelist, Professor George Wald of Harvard—who are not at all convinced. They point out that accidents have happened under the best-regulated scientific circumstances, and they would, therefore, have the work go forward only in highly secure facilities and sparsley populated places—if at all.

The bacteria that receive gene transplants are called DNA recombinants. DNA, or deoxyribonucleic acid, is the molecule of heredity (except for some viruses). In the course of the experiments, segments of the DNA of two or more species are annealed. The novel micro-organisms created in this process offer insights into biological mechanisms that are not otherwise easily obtained, thus arousing the scientific curiosity of those who long to unravel the mysteries of cancer and other forms of serious disease. If, indeed, these organisms could be counted on to remain laboratory curiosities—and if reputations and money were not riding on them—there would be little reason to give gene-juggled microbes a second thought.

But this is not the case. In at least one university biology department, opposition to the experiments is already construed as an attempt to block scientific progress. Graduate students who balk at using the technique may find it hard to earn a degree or to find a post at the laboratory of their

choice. At the same time, both academia and industry have correctly perceived that programming bacteria to turn out quantities of valuable chemicals and drugs is the stuff of which fortunes may soon be made. Today's fairly modest research project could be the basis of tomorrow's big business deal. (See "One Small Step beyond Mankind," Page 21.)

Last October, for example, Dr. Herbert Boyer of the University of California, San Francisco, was a leader of two research groups that reported they had successfully used recombinant technology to induce the production of beta galactosidase, a milk-digesting protein, in *Escherichia coli*, a species of bacteria whose usual habitat is the human or animal intestine. In this case, the protein was one that *E. coli* are capable of producing anyway. But Boyer was quick to point out that "we've gone out of the area of basic science into the area of practical application" and to predict that bacteria could be induced to become factories for the manufacture of insulin and other medications and chemicals.

What is important here is that the University of California and the California Institute of Technology, which was also represented on the Boyer team, lost no time in applying for patents on the technique. This means that, while the work was done with NIH funding and therefore adhered to the NIH guidelines, the income generated by it in the future could free both institutions—or for that matter any institution in a like position—from such constraint.

Universities, it is true, might be reluctant to incur the displeasure of the NIH. And an NIH regulation (which has never been used) would permit the agency to withhold funding from other projects should a grantee or contractor defy the recombinant guidelines. Nonetheless, the NIH might well be reluctant to discipline the research community. And as universities become more pressed for funds they are being driven to engage in projects that may become ethically dubious, though financially rewarding.

To be fair, there probably would have been no safety guidelines had it not been for the scientists themselves. In mid-1974, eleven prominent molecular biologists—Baltimore and Watson among them—called for and obtained a two-year moratorium on what seemed to be the riskiest gene grafts. It would seem, then, that since scientists initiated and designed the guidelines, they would also have a strong stake in complying with them.

But moral considerations do not necessarily prevail—especially when a recent Federation of American Scientists survey disclosed that 10 per cent of those responding thought the guidelines needlessly strict, and when compliance is entirely voluntary.

Under the NIH guidelines, laboratories engaged in the least potentially dangerous studies are designated P–1 (P standing for precautionary). Those somewhat up the line of potential risk are called P–2, and so on. P–4 laboratories have the most elaborate precautions to prevent the contamination of personnel or the escape of bacteria into the environment, and are the only facilities where the potentially most hazardous experiments are sanctioned.

Laboratories at Fort Detrick, Maryland, built for the Pentagon's now-abandoned germ warfare program and now used by the National Cancer Institute, house a P–4 facility. And the multi-million dollar lunar-receiving laboratory at the Johnson Space Center in Houston, designed for the isolation and containment of those "moon germs" that never materialized, would also qualify as P–4. So does the laboratory on Plum Island, off the eastern tip of Long Island, which the Department of Agriculture maintains for the study of hoof-and-mouth disease.

E. coli bacteria are the focus of most of the experiments conducted to date because this species of germ is the most thoroughly studied, and therefore the best understood. Many scientists would feel more comfortable working with a species that does not infect man, though considerable steps have been taken to disarm *E. coli*.

A special strain, K–12, is used; as far as is known, K–12 will not take up residence in people. And enfeebled substrains of K–12 have been developed that are dependent on any array of special requirements—the presence of certain nutrients, ultraviolet light, and extreme temperatures, for instance—in order to survive or reproduce. The theory is that the needs of such enfeebled strains can be supplied only in the laboratory. One scientist has aptly described the weaknesses that have been bred into the K–12 substrains as "messiah genes."

All this sounds reassuring—more than the facts may warrant. The behavior of bacteria is unpredictable, and the estimates of risk are necessarily crude. And the enzymes that permit scientists to transplant genes from one species to another do not act directly on the bacterial recipients, but on go-betweens. This multiplies the possibilities that something may go wrong.

These go-betweens are viruses known as phages, which naturally infect germs, or tiny, free-floating circlets of hereditary material called plasmids, which do the same. Some scientists worry about what might happen if gene-shuffled phages or plasmids came into contact with bacteria that—unlike the enfeebled K–12 substrains—had not been designed to commit suicide in the event of their escape to the outside world.

Exchanges of plasmids, in particular, are known to occur in nature between strains and even between species of bacteria. Proponents of genetic research generally argue that if it happens in nature, there is probably nothing to fear. Critics are not so sure; their concern is that if sufficiently large numbers of these deviants were rapidly introduced, the situation could get out of hand.

Dr. Stanley Falkow, a microbiologist at the University of Washington in Seattle and an expert on *E. coli*, has questioned the wisdom of introducing certain plasmids even into enfeebled strains of K–12. On the basis of studies he has conducted on calves, he advised the NIH Recombinant DNA Advisory Committee that "it may not be too farfetched to suggest that some DNA recombinant molecules could profoundly affect the ability of this *E. coli* strain to survive and multiply in the gastrointestinal tract." Another of Falkow's worries is that a recombinant might somehow acquire the ability to reproduce in water, and so pose a massive environmental threat. Whatever the present hazards of *E. coli*—and it already causes most urinary tract infections and is dangerous to many who are chronically ill—it cannot ordinarily multiply in the presence of oxygen.

These concerns aside, the chemicals that form the basis of the new technology are, in principle, precision instruments that cut specific segments of DNA from one type of cell to be transplanted into others. When they are prepared by sophisticated scientists experienced in recombinant experimentation, restriction enzymes are exactly that. However, some researchers rely instead on commercial suppliers whose enzymes may or may not behave predictably. Such variability contributes to the inherent risk.

At present, anyone can buy restriction enzymes off the shelf or by mail from such supplies as Miles Laboratories, and there is nothing to prevent the amateur from dabbling in the technology, nor is there any point in licensing the production of restriction enzymes, since anyone who knows anything about biochemistry can concoct his own from readily available ingredients.

A few years ago, a Massachusetts Institute of Technology undergraduate, having read published reports, demonstrated on paper that he knew how to build an atom bomb. Since DNA recombinant work requires only a meager investment in equipment and can be carried out in limited space, a similarly resourceful high school student could conceivably collect the necessary materials and then simply turn the experimental brew loose on the general environment.

DNA recombinants, like radiation, would not make their presence quickly known to the senses should they escape. They might well prove impossible to trace. Geiger counters will detect radiation; an equivalent device for detecting bacteria has not been invented yet.

Other possible hazards in the process are even more troubling. A Government interagency committee formed by White House directive "to review Federal policy on the conduct of research involving new forms of life" reports that the National Science Foundation, the Energy Research and Development Administration, and the Department of Defense have agreed to observe the NIH guidelines and that the Agriculture Department has indicated its probable willingness to go along. But neither the Occupational Health and Safety Administration, the Center for Disease Control, nor the Environmental Protection Agency—all of which might logically be involved—has assumed any oversight responsibilities for recipients of research grants or contracts, and the NIH, too, has demurred. Such loopholes raise the possibility of reckless mischief.

Furthermore, no one knows how much research is in progress. There is reason to wonder whether the Central Intelligence Agency or its equivalents abroad might not secretly carry out experiments their governments officially decried. And there is, as in nuclear science, the possibility of exploitation by lunatics or terrorists.

There is also the inevitability of exploitation by U.S. private industry. The Pharmaceutical Manufacturers Association, the trade group to which the largest drug firms belong, for example, has told the Senate health subcommittee that it generally agrees with the NIH guidelines, but that its members will want to make larger quantities of DNA recombinants than is permitted under the rules that apply to academic researchers.

Meanwhile, seven of these firms—Miles Laboratories, Eli Lilly, Hoffman-LaRoche, Merck Sharpe and Dohme, Abbott Laboratories, Upjohn, and Pfizer—are already at work with recombinants or are gearing up. There are other such firms that do not belong to the PMA; because they are generally smaller and less visible, they are perhaps even more likely to cut corners in striking out on their own.

The drug industry is only one of many that has sniffed potential profits in this new technology. While the public interest may dictate full disclosure about recombinant research, private enterprise operates on the principle that if the costs of bringing experimental findings to commercial realization are to justify the investment, trade secrets must be kept.

Thus, at a Commerce Department meeting last November at which several large firms were represented, the consensus was that the private sector should publicly register its projects, but let it go at that. While nuclear reactors must be licensed before they are built, any corporation wishing to build a containment facility for microbes can simply go ahead with no questions asked. In fact, should it decide to perform recombinant experiments at even the P–3 or P–4 level without proper safeguards, it could do that, too.

Dr. Ronald Cape, who heads a biologically oriented California firm called Cetus and who attended the Commerce Department meeting, said later that there was agreement that "the registry would discourage underground or fly-by-night operations because anybody who decided to go into this field would have to stand up and be identified." But Cape obviously had some misgivings, since he also wondered aloud whether this type of enterprise should be in the profit-making sector at all.

Cetus is now doing nothing wth recom-

binants and, according to Cape, is not in a rush to enter the field: "If we go into the business at all, we'll start off with the safe biological containment kinds of things." But the company numbers among its senior consultants molecular biologist Joshua Lederberg, a Stanford University Nobel Prize winner, who is on record as believing the NIH guidelines are too strict.

Lederberg is not the only academic to find himself in a somewhat ambiguous position. One of the most eloquent critics of the entire recombinant movement is Professor Robert Sinsheimer, chairman of the biology division at the California Institute of Technology, who regards the NIH guidelines as "sorely inadequate." Yet people at Cal Tech are engaged in this work, and the institution, which already has a P-2 laboratory, is building a P-3 facility. Sinsheimer says he would not want to be associated with an institution where a department chairman had veto power over his subordinates. And he doubts the public would benefit if the experiments were halted at Cal Tech while they proliferated elsewhere. As he sees it, this would be as meaningless as having a nation unilaterally disarm.

Even if we were to ignore or resolve the danger of catastrophic accident, the emerging genetic technology would raise formidable and frightening problems—many of them similar to, but much more acute than, those already posed by other scientific developments. The production and promotion of antibiotics, and their consequent overuse, has already led to the existence of drug-resistant germs. Now it is being suggested that bacteria can be programmed to manufacture antimicrobials more cheaply. It is not difficult to envision a new surge of highly promoted drugs—and a new health hazard.

General Electric has applied for patents on a technique which will use plasmids to confer on one strain of pseudomonas bacteria some genes endowing it with the capacity to digest most, if not all, of the various hydrocarbons that constitute crude oil. The new species could obviously prove a godsend for cleaning up oil spills. But what would happen if it found its way into petroleum storage tanks, pipelines, or the wing tanks of a commercial jet aircraft in flight? And what will be the impact on the ocean environment itself? No one knows.

After our experience with antibiotics, pesticides, and many other scientific and technological "advances," we have surely learned that the remedies we devise often create new and acute ailments. An urgent question must, therefore, be asked: Can't at least some of what seems attainable through DNA recombinants be achieved by other, safer means? Perhaps the short-run cost of such alternatives might be higher, but the long-run savings might be immense.

Few people, unfortunately, are even aware that such questions must be raised. But some rearguard actions are being fought. Harvard University, for example, is eager to remodel a floor of its forty-year-old biology building into a P-3 (moderate risk) recombinant research facility, and it has received the approval of the NIH and the promise of some $285,000 of the agency's money. Work has already begun. But some members of Harvard's biology department—notably George Wald and Ruth Hubbard—are convinced that the insect-ridden structure, which by the University's own admission is also subject to floods, is no place for such an endeavor.

When their objections caught the ear of Cambridge's mayor, Albert E. Velluci, and the Cambridge City Council, a classic town-and-gown dispute ensued. Hearings were held, and last July a three-month "good faith" moratorium (which has since been extended) was imposed on P-3 and P-4 experiments at both Harvard and the Massachusetts Institute of Technology.

A citizens' review board appointed at the time has been looking into the situation. Chaired by a former mayor who owns a heating oil firm, the four men and four women—whose occupations range from nurse, social worker, physician, and structural engineer to professor of urban policy and community activists—recommended in January that the experimentation be permitted to resume. But in the belief that "a predominantly lay citizen group can face a technical scientific matter of general and deep public concern, educate itself appropriately to the task, and reach a fair decision," the panel also agreed that the NIH guidelines do not go far enough, and made further safety recommendations of its own. Among these is a proposed city ordinance that would automatically declare any research not in strict conformity to safety requirements to be a public health hazard.

The Cambridge review board obviously arrived at a political compromise. But its report made an essential point: "Knowledge, whether for its own sake or for its potential benefits to humankind, cannot serve as a justification for introducing risks to the public unless an informed citizenry is willing to accept those risks."

But not every town can be expected to react like Cambridge, and there are limitations to the local-option approach. Scientists, like industries, can readily move on if they don't like what they find in one place. Having already complied with a self-imposed moratorium, recombinant proponents are not likely to stand still indefinitely for what they regard as undue interference. They are, in general, an impatient lot, further pressed by what they feel is a need to make up for lost time in the face of competition from abroad.

Scientists of many nations are eager to participate in recombinant research, and some are already doing so with far less disclosure than there has been here. Britain's Official Secrets Act means, for example, that we may know less about what has been going on in British labs than we do about what has been happening in ours. Further, if U.S. firms cannot experiment at home, nothing can stop them from going abroad.

The new genetic technology is seductive—not only because it is cheap, fast, easy, and potentially lucrative, but also because it is intellectually appealing and holds out the promise of impressive benefits in spite of the admitted risks. The opportunity has probably passed, if it ever existed, to impose a total ban on the work—and any such ban would be breached. If there is one nightmare that biologists on all sides of the issue share, it is that Federal legislation might be drawn so inflexibly that it would impede both the progress and the safety of the research.

How, then, will the inevitable compromises be drawn? By making the research unpatentable? By insisting that all experiments be conducted in regional Federal facilities which industry would have to support in order to qualify for profits from the discoveries? By establishing an intricate system of licensure and environmental monitoring?

It is difficult to make even an educated guess. But it is clear that whatever is to be done must have the careful and immediate attention of scientists, and of the rest of us. A population explosion among microbes can occur in a matter of days, or even hours.

FARM CONVENTION

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. BEDELL. Mr. Speaker, I would like to bring to the attention of this body the farm convention which has been held in Washington, D.C., these last few days. Some 270 farmers and farm wives from southwestern Minnesota, and western Iowa have traveled to this city at their own expense to meet with Members of the Congress and other governmental officials in order to learn more about Government programs and policies, and in order to advise people in Government concerning problems experienced in the farm area.

One of the sessions in this program found the group breaking up into groups of 8 or 10, and meeting with individual Members in their offices to talk on an informal basis about farm problems and polices.

It has always been my belief that a democratic form of government can only operate effectively with the involvement of the people. This farm convention has demonstrated to the people of our country the willingness of our rural people to give of their time and money in order to participate in our governmental process.

I believe it serves as a great example of how our governmental system should work, and I believe our Nation owes a vote of thanks to these farm people for the fine example they have set for the rest of our people through their participation in this farm convention sponsored by myself and Congressmen NOLAN and HARKIN.

A TRIBUTE TO THE IRISH-AMERICANS ON THIS ST. PATRICK'S DAY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Ms. MIKULSKI. Mr. Speaker, it is eminently appropriate on this St. Patrick's Day that we recall the debts of this country to the isle of saints and scholars. The contributions of the Irish people to our history and culture have truly been remarkable. It is a source of immense pride to note that so many Irish men and women have helped to build and develop the United States.

I am proud of the nine men of Irish descent who signed the Declaration of Independence and of the thousands who fought in our Revolutionary Army. We are proud of the anonymous millions who found refuge on our shores during some of the darkest days of Irish history. It is they who courageously and relentlessly provided the labor and the intellectual and spiritual needs to a growing nation.

The first Irish upon our shores concentrated in industries such as railroading and mining. The children of these immigrants in turn gave to this Nation their finest talent. Names such as Meany, Kennedy, Cooke and Yeats, enrich our national heritage. Their generosity, warmth and kindness have made them a welcome addition to our American mosaic.

On this day however a sober note must be interjected into the festivities. I pray that the violence which has torn apart Ireland will soon come to an end. It is

my sincerest desire for a peaceful Ireland. A country joined not through violence but through a common effort by both the north and the Republic, by Catholics and Protestants to establish a system of government in which both communities will live in economic, political, and social harmony. The most hopeful sign in this bloody conflict has been the growth of the women's peace movement. Nonviolent, Protestant and Catholic they are surely the hope of the future.

I am confident that the Irish people will work out their differences. No matter how diverse their political or religious interests or backgrounds, the one thing all Irish men and women share is a love of their fine country. It is upon this love that the foundations of a peaceful Ireland will be formed.

POLITICAL DISSENT AND INSANITY IN THE SOVIET UNION

HON. WILLIAM R. COTTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. COTTER. Mr. Speaker, in the Soviet Union, political dissent is not always a crime. It is sometimes classified as "mental illness." You have to be insane to defy the power of the Soviet Government.

Soviet psychiatric hospitals are full of prisoners of conscience, their health often endangered by "treatments" which really are a kind of medical torture.

We in Congress recently heard the moving testimony of Vladimir Bukovsky, whose release from a psychiatric prison was forced by international opinion. He was one of the lucky ones. Meanwhile, the imprisonment continues, and we must continue to speak out until all Soviet political prisoners are given their freedom.

Efforts such as those of the Connecticut State Medical Society, which are described at the conclusion of this statement, can only be helpful.

With your permission, Mr. Speaker, I would like to bring the society's actions on behalf of the Soviet Union's psychiatric prisoners to the attention of my colleagues:

THE CONNECTICUT STATE
MEDICAL SOCIETY,
New Haven, Conn., March 8, 1977.

Hon. JAMES E. CARTER,
President of the United States,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The Connecticut State Medical Society is a voluntary professional organization having as members more than 4,000 doctors of medicine licensed to practice in the State of Connecticut.

At a meeting of the Society's Council, held on February 16, 1977, the Council members were informed that there is no considerable reliable evidence that the psychiatric profession and its institutions in the Soviet Union have been used as instruments to suppress dissent; that dissenters have been incarcerated in mental institutions who show no evidence of mental illness; and that many such dissenting individuals have been subjected to insulin coma, sulfur injections and other discredited forms of "treatment". To validate this information, the Council members received (among others) the following supporting statement: "On the basis of the available documentary evidence, Amnesty International accepts as a fact the general allegation that numerous Soviet citizens have been confined to psychiatric hospitals as a direct result of their political or religious beliefs and with no medical justification."

(Prisoners of Conscience in the USSR, 1975, p. 104)

Reflecting its deep concern about these allegations, the Council voted to adopt a resolution as follows:

"Be it Resolved: That the Council of the Connecticut State Medical Society call for the immediate end to the abuse of psychiatry for political purposes in the USSR, and instruct its officers and representatives to transmit this resolution to the President of the United States, the Secretary of State, Connecticut's U.S. Representatives and Senators and to the Secretary-General and Premier of the USSR as well as to the Soviet Ambassador to the United States."

Knowing of your publicly-stated dedication to working to guarantee full civil rights to all peoples of the world, the Council has directed that its action be brought to your attention and to that of the United States and Soviet Union officials stipulated in the resolution.

With every good wish.

FOR THE COUNCIL,
Respectfully,
WILLIAM R. RICHARDS, M.D.,
Executive Director.

ST. PATRICK CHURCH, POTTSVILLE, PA., CELEBRATES 150TH ANNIVERSARY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. YATRON. Mr. Speaker, St. Patrick's Day is a very special occasion for many Americans. However, this most festive day is of particular significance this year to the Church of St. Patrick of Pottsville, Pa. For March 17, 1977, serves not only as the church's patronal feast day, but as the highlight of St. Patrick's parish's 150th anniversary.

The Church of St. Patrick of Pottsville is the oldest in Schuylkill County and served as a Jesuit mission during the first years of our Nation's history. The parish was named in honor of the patron saint of Ireland, the homeland of the earliest Catholic immigrants in Pennsylvania's anthracite region.

His Excellency Gearoid O'Clerigh, the Irish Consul General in New York, will be the guest of honor and speaker for the occasion.

The church of St. Patrick, throughout its long and glorious history, has played an irreplaceable role in the community of Pottsville and the anthracite region of Pennsylvania as a whole. After 150 years, the structure itself still stands, a monument to the courage and spirit of its first parishoners and to the freedom and opportunity which drew them to America's shores. The memories of those early Irish immigrants and the lives of the members of the present-day congregation, serve as sterling testimony to the Church of St. Patrick's invaluable contributions to the quality of life in Schuylkill County.

Today, I join the parishoners of St. Patrick's in saluting their church for 150 years of community service, leadership, and spiritual guidance.

THE DROUGHT'S IMPACT ON SOUTH DAKOTA

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. PRESSLER. Mr. Speaker, I have frequently brought to your attention the terrible impact of the drought on South Dakotans. The following testimony dramatizes the severe impact of the drought on a dairyman from my home town of Humboldt, S. Dak., and his desperate need for Federal assistance:

STATEMENT BY DON LIAS

Mr. Chairman, members of the House Committee on Agriculture, it is a pleasure for me to be here today and I want to thank you for the opportunity to appear before this committee.

My name is Don Lias. I am a dairy farmer and my farm is located approximately one mile east of Humboldt, South Dakota. My farm consists of 700 acres which I operate jointly with my brother. Together we milk 175 cows, and our income is almost entirely dependent upon our dairy production.

Under normal conditions you would not find someone such as myself before your committee, as all my life I have grown used to living with the ups and downs of dairy prices and the risks of farming. Generally, I believe most farmers are willing to take great economic risks without a word of complaint, but today we who live in the drought areas of the country are faced not only with the ongoing low prices for our products, but also with the fact that the very soil of our farms, upon which we depend to raise the feed for our cows, is so dry that it can no longer sustain our operation. It is for this reason, low milk prices and the impact of the drought that I decided to come before you today.

In short, while we in agriculture have traditionally learned to live with low and unstable prices, we simply cannot continue to live with poor prices and a drought which has severely limited our ability to produce.

Gentlemen, I am sure that in your tenure in Congress you have heard the calls of many dairy farmers for higher prices. Perhaps, because you have heard our pleas so often you have become hardened in your reaction to our stories. However, I am here today to tell you that this time our pleas cannot fall on deaf ears, because for many of us this is our last chance.

My family has farmed in Humboldt, South Dakota since 1929; we have experienced numerous crises. We survived the depression, the dust bowl days, the Benson era, and more recently we have had to contend with the drastically rising costs of steel, rubber, plastics and other products which the dairy farmer must always rely upon. Now, in the last three years, a drought has hit us hard. We are paying three times as much for feed now than we were paying just a year ago and this is happening at a time when dairy prices have taken a drop! In short, gentlemen, we have lost our shirts and are about to lose our pants, too!

As I see the situation, dairy farmers at this time need to have milk prices raised to a level of at least 90 percent of parity, with

quarterly adjustments to meet the frequent market changes. For example, the dairy legislation proposed by both Senators Humphrey and Nelson would be a great step forward for our industry.

Good, strong, steady milk prices are one of the quickest ways to revitalize our drought-stricken industry. Fair prices, gentlemen, will make it much easier for us to remain on our feet until the drought cycle has ended.

While this may not be the appropriate time, I wish to touch upon another topic related to the plight of the farmer during this drought era. As Secretary Bergland has noted, "the drought disaster programs are in themselves a disaster." Gentlemen, I know your schedule is a heavy one, but I must ask you to move as rapidly as possible in revamping all agriculture disaster legislation, as by late spring it may be too late for many of us. Simply put, by then thousands of farmers will have lived off their assets as long as possible and will have to sell their farms when faced with another cropless year.

In summary, we American farmers ask very little of society—like other businessmen we ask for help only in times of dire need, but unlike other businesses we are not protected from unfair foreign competition. We are a proud and productive group of Americans who believe strongly in the American work ethic. Yet, at this time of drought, unfair foreign competition and other negative factors, the American farmer is one of the lowest paid groups of American workers.

What we ask for today is your help in the face of disaster. Help to see us through this difficult time for agriculture, and we in return will continue to pay our taxes, produce food for home and abroad, and above all, through farmer consumption of products produced by almost twenty-one million other Americans, continue to have a positive and growing impact on the overall American economy.

Thank you.

ELDERLY SERVICES PERSONNEL TRAINING

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. MOAKLEY. Mr. Speaker, one of my major legislative priorities, and hopefully one of the 95th Congress', is proper protection and care for our older Americans. Congresswoman COLLINS shares this concern, and she has reintroduced a bill specifically geared toward developing qualified personnel to deal with our elderly.

H.R. 15796 approaches this goal in two ways. First, it provides grants through the Higher Education Act of 1965 to institutions developing specific programs to teach skills, attitudes, and services necessitated in dealing with the aged. Second, the bill amends the Older Americans Act of 1965 to require that area agencies offer direct social services to the elderly. In this way, H.R. 15796 gets knowledgeable assistance directly to our deserving senior citizens.

Mr. Speaker, when I say "our" senior citizens, I mean just that. We have the duty to care for aging Americans who have helped to make America the great country that it is. Providing training and jobs for people skilled in serving our elderly seems to me a minimal step toward easing the growing burdens of our senior Americans. They deserve proper attention from our social service agencies. I, therefore, urge swift passage of Congresswoman COLLINS' thoughtful legislation, H.R. 15796.

SAVING HARLEM'S HERITAGE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. RANGEL. Mr. Speaker, Harlem, N.Y., in the 1920's, was the center of America's black art, literature, and drama. The Harlem clubs and theaters, along with the creative atmosphere, inspired many of the entertainers and writers of that period. Now, the streets of Harlem are filled with the unemployed and the addicted, and the great clubs and theaters stand vacant because the small theaters cannot compete with the new, larger theaters that seat more people and yield more money for the performers.

It is shameful to see these great monuments of an American era closed and abandoned because they can no longer support themselves. I believe, with some subsidy funding from the Government, we could return these now vacant buildings to their former vibrance, which would aid in upgrading the Harlem community by implanting some feeling of pride in the inhabitants of the area. The following column by Pete Hamill underscores the need for some form of assistance. I commend my colleagues attention to the article by Mr. Hamill which appeared in the New York Daily News on March 4:

A DIRGE FOR THE LOST SOUL OF HARLEM

(By Pete Hamill)

Outside in the Harlem sunshine, a man with a shine box waited under the marquee of the Apollo Theater for the morning's first customers. Working people hurried along, in a river of dark faces, to the subways or the State Office Building. The neon burned on the Blumstein's sign, and the shopkeepers were rolling up their corrugated iron shades as 125th St. came awake.

But inside the Apollo Theater you could almost hear the ghosts. The ghosts of the dead: of Charlie Parker and Little Willie John of Nat King Cole and Dinah Washington, of Bojangles Robinson and Bessie Smith and Lady Day. And the ghosts of the people who used to come here every year, and don't come around any more: Redd Foxx and Pigmeat Markham, Lou Rawls and Ray Charles, Gladys Knight and the Pips and James Brown and Al Green, and hundreds of others who were here when they were young and poor and the Apollo was one of the greatest theaters in American musical history.

"I get a chill when I come in here now," said Robert Schiffman, who now owns the shuttered theater. His late father, Frank Schiffman, had run the Apollo since 1934; it was a measure of the way Harlem felt about the Apollo and its white management that in the riots of 1935, 1943 and 1966 not a windowpane was broken. "So much fun," Schiffman said. "So much laughter, so much music."

Schiffman was standing on the stage, and he looked over the empty orchestra, and up to the two balconies of the 1,600-seat theater. The theater is small, almost intimate, not like the giant cold barns of Vegas or the mammoth amphitheaters of the road, where black performers now entertain an entire nation.

"YOU HAD CONTACT HERE"

"You had contact here," he said. "The performers and the people were practically on top of each other. They used to say there were two shows at the Apollo, the one on the stage and the one in the audience, Goddammit."

The Apollo has been closed since January 1976, and for allowing that to happen this city should be ashamed of itself. The Apollo was an institution, a monument, a glory of this city that was, in its way, as symbolically important as the Statue of Liberty. London would not allow the Palladium to vanish, nor Paris permit the folding of the Olympia. But the Apollo is closed, an event that has devastated 125th St. between Seventh and Eighth Aves., grievously harmed Harlem and diminished New York City itself.

At bottom, the Apollo was about the refusal to be defeated. And that is why the entertainers kept coming for a long time after the Apollo could no longer compete with Vegas and television. The Apollo was a tough audience; they would run you off the stage if you Uncle Tomed it; they would stiff you with silence if you came on too slick.

But if you were down home and funky, if you let the bloods in the balcony know that the big dollars hadn't changed your heart, then the Apollo would love you back. Any sucker could make it in Hollywood; making it in the Apollo was another matter.

WHAT CAN BE DONE

And now it is closed. And Schiffman works downtown at an agency, and comes uptown once in a while, as he did yesterday, to talk about what can be done to bring it back.

"A combination of things did us in," he said, sitting on a couch below a wall full of awards that he and his father had gathered over the years from black organizations. "First, a 1,600-seat theater, by today's standards, is just too small. The audiences here demanded the best performers, and rightly so. But it became impossible to compete. We could only charge $6 top; the result was that someone like Gladys Knight and the Pips would have to play two shows a night and three on weekends, just for us to break even.

"A lot of them could make in one night, somewhere else, what they could make in the Apollo in a week. A lot of them had loyalties to the Apollo, and continued to come. Redd Foxx, Pearl Bailey, Marvin Gaye, Al Green, James Brown, people like that, and others, would come back. But largely it was a begging job."

Schiffman looked out the window, where the midmorning traffic was beginning to build on 125th St. He lit a cigaret and went on, explaining that some of the big problems happened in the 1960s.

THE FOCAL POINT

"If there were demonstrations in this community, the Apollo was often the focal point," he said, "mainly because they knew you could attract TV cameras at the Apollo when you couldn't get them elsewhere in Harlem. The Apollo was the focal point for a lot of the economic life of this community. It was the catalyst that drew people here. When we flourished, everybody around us flourished.

"And I mean everybody, from the street hustlers, all the way up to the retailers. The store merchants were overwhelmingly concerned about what the hell the Apollo was doing; they knew that if I had Al Green in the theater, there was going to be a tremendous flow of people to the street, and they

would beef up for it, they would change their hours because they knew there would be a lot of people in the street at night. It was Christmastime for them."

But the theater was more than a simple creator of commercial traffic. Schiffman said. "The Apollo was a source of pride. It said to the people of this community that black superstars still wanted to come here, to share in this community's pleasures and pain, when they didn't really have to."

There were other factors. Street merchants, selling their wares on the sidewalks, altered the character of 125th St. Whites who had always made up a small portion of the Apollo audience vanished completely during this period of black nationalistic hostility in the late 1960s.

"Uptown was plagued by the same type of thing that every other part of the city is plagued by," Schiffman said. "And that is crime. Pocketbook snatching, automobile ripoffs. Street crime made it uncomfortable for people to come here. I mean black people."

In addition, the theater had no handy parking facilities. Schiffman and others had pleaded with Kinney, Myers and the other major owners of commercial parking lots to open a lot in Harlem; the Apollo even offered to provide additional security if a lot were built on fallow land on 124th St. The commercial parking people refused; and the city would not build a municipal lot. By the early '70s, it was easier for a black couple to drive to Times Square, park, see a movie and have a good meal than it was to do the same on 125th St.

Schiffman showed me plans for a new Apollo, a complex on 125th St. that would include a new Apollo Theater with 3,000 seats, a 400-room hotel, a ballroom to be called the Savoy, and a rooftop club-restaurant, to be called the Cotton Club and theatrical and dance workshops. He is in the process of raising $200,000 seed money for the venture from 10 black entertainers; and the whole complex would cost $30 million.

"Maybe it's a pipe dream," he said. Maybe in the interim we could get some foundation money, some kind of subsidy to get open again. But for now, we're just waiting for the future to happen."

NATIONAL COACHES DAY

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. PICKLE. Mr. Speaker, today I am introducing a resolution to designate October 7 as "National Coaches Day."

In communities across this Nation, coaches of athletic teams have a significant impact on this country's youth. And this influence has been overwhelmingly positive. Quite often a good coach can have more influence for good over a student than the parents do.

Although many coaches in professional sports earn sizable salaries, the average wage earned by coaches in secondary schools is not lucrative. But despite this, coaches put in many overtime hours because of their dedication to the students they work with and a devotion to sports.

It is my feeling that those of us who have had sons and daughters participate in athletic programs in their school are aware of the contribution of coaches and feel that a day in their honor is appropriate.

THE AMERICAN AGENDA FOR WORLD DEVELOPMENT, 1977

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. HARRINGTON. Mr. Speaker, the Overseas Development Council will release tomorrow its fifth annual survey of the issues facing the United States in dealing with the developing world. Entitled "The United States and World Development: Agenda 1977," this year's edition places particular emphasis on the continuing negotiations between rich and poor countries that has been called the North-South dialog. The authors of "Agenda 1977" quite aptly point to the need, at this moment of national and international transition, for a comprehensive approach to the developing world's call for a new international economic order.

I commend this publication to my colleagues, both for the completeness of its documentation and the clarity of its analysis. In particular, I find the ODC's use of new measure for "quality of life," one that states the full range of living conditions in a country much more accurately than such standard measures as gross national product, an especially useful contribution.

I ask that excerpts of ODC's summary of the book be inserted in the RECORD for the information of those concerned with the important international development issues discussed in this new publication.

The excerpts follow:

THE UNITED STATES AND WORLD DEVELOPMENT AGENDA 1977

This summary is a condensation of the Overseas Development Council's fifth annual assessment of U.S. relations with the developing world. The full text of *Agenda 1977*, published by Praeger Publishers, includes:

An introduction by Theodore M. Hesburgh, Chairman of the Board of Directors of ODC, and James P. Grant, President of the Council.

"The United States and World Development, 1977," by ODC Vice President John W. Sewell, director of this year's *Agenda* project, providing the context and the background for the major policy questions facing the new Administration.

"Major U.S. Options on North-South Relations: A Letter to President Carter," by Roger D. Hansen, ODC Senior Fellow, outlining and analyzing three policy options for the Carter Administration: present policies with marginal changes, accelerated international reform, and support of a basic needs approach to development.

"Recommendations for U.S. Policy: Agenda 1977," by the ODC staff, suggesting specific U.S. policies on more than a dozen issues ranging from food security and human rights to arms transfers and the debt of the developing countries.

Five clusters of Statistical Annexes by Florizelle B. Liser: the global poverty-affluence spectrum; food, energy, and raw materials; world trade; world military expenditures; and resource flows.

Copies of The United States and World Development: Agenda 1977 are available at $4.95 each from the Overseas Development Council, 1717 Massachusetts Avenue, N.W., Washington, D.C. 20036. A hardback edition is available from Praeger Publishers, Inc., New York.

"The industrial democracies should resist the temptation to see the current North-South dialogue as a situation in which losses are inevitable and negotiations are primarily designed to gain time or preserve the status quo. Rather, they should treat it as an extraneous opportunity for initiating, in the words of President Carter, "a common effort"—which, by the end of this century, could create a world that not only better serves the already advantaged, but also is free of the worst aspects of absolute poverty and repression."—Theodore M. Hesburgh and James P. Grant; Introduction, Agenda 1977.

AN OPEN MOMENT IN HISTORY

The leadership of the United States passes to President Carter at one of those moments in history when circumstances combine to make change possible on a scale that was previously unthinkable. Developed and developing countries alike are recognizing the need for fresh approaches to solve the global problems that face them all—from food scarcity and energy shortages to nuclear proliferation and the plight of the nearly one billion people in the world living in abject poverty. The United States, under a President who bears no burden of prior identification with past disputes, has a unique opportunity to stimulate cooperation on global problems that one nation can resolve alone. The question is, will the opportunity be seized.

In an unprecedented Inauguration Day statement to the "citizens of the world," President Carter pledged his Administration to "be more responsive to human aspirations" and to take the lead in the effort to guarantee freedom not only from political repression but from poverty and hunger as the U.S. in "a common effort" to pursue these goals. What can the U.S. do now to signal its willingness to respond constructively to global problems? What shape might this "common effort" take? Agenda 1977 analyzes and discusses these questions.

A RAPIDLY CHANGING WORLD SETTING

The international order created after the Second World War has shown itself to be inadequate to changing patterns of economic growth and the increasing interdependence of nations. Both the developed countries of the North and the developing countries of the South agree on the need for a major overhaul of existing economic and political systems. This process of renegotiating the world order is already under way in a variety of forums, where a changing political climate is evidenced by the demands of the developing nations for a greater role in global decision-making. The U.S. has recognized that no one nation dominates the international scene and that it needs to treat its relations with the developing countries as a mainstream element of its foreign policy. It is also clear that the importance of U.S. economic relations with the developing countries continues to grow. The U.S. sells more of its goods to the developing countries than to the European Communities, Eastern Europe, and the Soviet Union combined (see "U.S. Trading Partners" chart, page 3), while developing countries provide it with both critical raw materials and lowcost consumer goods.

A NEW FOCUS ON BASIC NEEDS

The developing countries as a group were well on their way to exceeding the 6 per cent annual growth target set for the 1970s when they were hit in 1974 with sudden and massive increases in the cost of essential imports such as oil, fertilizer, and food, and subsequently by a global economic slump. The stronger of these countries pulled through at the cost of reduced imports, diminished foreign exchange reserves, and a soaring national debt. The weaker required

infusions of emergency aid and lost their chances for any significant development progress for the rest of the decade.

This dramatic change in development prospects hastened a rethinking of development strategies that was already under way. In the previous two decades, the developing countries experienced steady growth, some at rates unparalleled even in Western economic history. Despite this past record, the gap between rich and poor continues to widen today, both between countries and within them. If the per capita income of the world's forty poorest countries (population 1.2 billion people) were to grow at the rate of 3 per cent annually from now until the end of the century—which is highly optimistic—it would only then begin to approximate that of Britain and the U.S. in 1776. The old development strategies raised the gross national product of these countries, yet left almost a billion people living in chronic poverty.

A growing number of experts are coming to the conclusion that only major policy changes can bring about a change in the fortunes of the poorest fourth of humanity. The new strategies being proposed emphasize equity and the need to meet the basic human needs of the poor. Unlike the strategies of the previous twenty-five years, they assume that economic growth and greater equity in the distribution of its benefits are complementary, not contradictory. It is now thought that the right combination of domestic policies and reforms of international economic systems could overcome the worst aspects of chronic poverty by the end of this century.

OPTIONS FOR PRESIDENT CARTER

It is essential that an overall policy for dealing with the developing world be established by the new Administration from the start. Already scheduled North-South negotiations must be prepared for almost immediately. In the first half of 1977, President Carter will make decisions on commodity agreements, trade negotiations, debt management, and arms sales to developing countries; he will have to coordinate strategy with the major Western trade partners of the U.S. in the OECD for important talks at the Paris-based Conference on International Economic Cooperation (CIEC) as well as at the U.N. If these problems are dealt with on an issue by issue basis, what seem like logical policy decisions now may prove in the long run to be mutually inconsistent and in some cases detrimental to U.S. relations with the developing world.

Several differing perspectives and options on North-South relations are examined in detail in *Agenda 1977*, illuminating the complexity of the development policy choices before the Carter Administration. In brief, the United States can attempt to defuse confrontations with the Third World by making only the minimum changes necessary—step by step. Or it can actively explore and adopt new policies to speed change in directions beneficial to developed as well as developing countries. Or, in varying combinations with the first two options, it can support a basic human needs strategy aimed at eliminating the worst aspects of absolute poverty worldwide by the year 2000.

If the Carter Administration selected the first option, it might adjust present policies slightly, implementing them more effectively than the U.S. has in the past. It could, for example, make available some increased support in areas such as development assistance and trade preferences or act on recently proposed measures such as the "development security facility" to stabilize expert earnings put forward by former Secretary Kissinger in 1975. The prime objective of this approach would be to reduce the potential for confrontation between North and South, although the U.S. would presumably continue to emphasize bilateral relations with some of the stronger developing nations, such as Brazil, Saudi Arabia, and Iran.

The second option would take President Carter beyond the marginal change of the first and into a commitment to a broader and more significant range of reforms. The proposals that make up the "New International Economic Order" called for by developing countries at the 1974 and 1975 special sessions of the U.N. General Assembly would be carefully examined, and those judged beneficial to the international economy as a whole would form the nucleus of the U.S. negotiating position. But the U.S. would go beyond these, in some cases supporting proposals which would spur development in the South at some cost to the North—a cost which would be justified on grounds of prudent statesmanship or moral responsibility.

Option three would aim more directly at meeting the basic human needs of the world's poorest billion people. U.S. policy here would be to try to overcome the worst aspects of this poverty and to attain specified minimum standards of nutrition, health services, and basic education by the end of the century.

The three "options" clearly are not watertight alternatives; elements of the basic needs approach presented as option three could be incorporated into either of the first two options.

RECOMMENDATIONS FOR U.S. POLICY

Agenda 1977 suggests an approach that would lay the basis for action on options two and three—the accelerated reform and basic needs strategies—but would start with the swift implementation of option one "marginal" changes that are not inconsistent with the two more ambitious options. This alternative would call for early and simultaneous action to (1) begin some far-ranging reforms of existing international economic institutions and practices, and (2) substantially increase support for programs to provide adequate food, nutrition, health care, and education for the world's poorest people.

Food insecurity

Better weather substantially improved the 1976–77 crop outlook over the previous year, but medium- and long-term world food security is in fact as precarious as ever. The need for food has consistently outstripped food production during the 1970s. Given the rate of growth of the cereals deficit in the developing countries, bad weather in any major producing area could mean an even worse famine than the one experienced in 1972–73.

The World Food Conference of 1974 set three objectives for improving world food security: to establish a minimum level of food aid for the short term, to set up a grain reserve system for the medium term and, as the only long-term solution, to increase food production in the developing countries.

In 1977, Congress is due to reexamine most major U.S. food and agriculture legislation, from Food for Peace to food stamps. It is essential that a unified policy approach be taken to both the international and domestic aspects of the issue.

The U.S. should: (1) encourage increased food production and improved distribution in developing countries through an increased commitment to bilateral and multilateral development assistance programs; (2) resume negotiations aimed at establishing a world food reserve; (3) commit itself to guaranteeing an annual minimum of food aid on the basis of three-year advance commitments. In both food sales and grants, priority should be assigned to countries experiencing the greatest need.

Basic human needs

Of the nearly one billion people living in absolute poverty in the world, 750 million (nearly two thirds) are in the low-income countries, 170 million in middle-income countries, and 20 million in the richer countries. Per capita income in the poorest countries averaged $150 in 1973. These countries are pervasively poor in a way that was not true of today's rich countries in the early stages of their own development.

There is a growing consensus among specialists that economic growth and a more equitable distribution of its benefits are compatible goals—that with political will and an emphasis on programs aimed directly at the poor, the minimum basic needs of the poorest billion could be met over the next twenty-five years. In its recent report to the Club of Rome, the "Tinbergen Group" called for the following global basic needs goals for the year 2000: life expectancy, 65 years or more (compared to the low-income countries' present average of 48); literacy rate, at least 75 per cent (compared to 33); and infant mortality, 50 or less per 1,000 babies (compared to 125).

The goal of meeting the basic needs of this segment of the world's population could be met at an estimated cost of $10–15 billion a year *over present aid levels*. The $10 billion figure would be feasible a) if developed countries would reach or exceed an aid level of one half of 1 per cent of their gross national product; b) if some portion of aid now going to middle-income countries were redirected to low-income countries; and c) if the increases were earmarked for basic needs uses such as jobs, health, and nutrition.

The U.S. should: 1) significantly increase its financial support to basic needs programs in low-income countries; and 2) explore the extent and forms of cooperation among the industrial democracies and developing countries to attain basic needs goals in all developing countries over the next generation.

Population

The world's population has grown rapidly in the past twenty-five years, mainly in the developing countries, because death rates have until recently declined faster than birth rates. Currently, overall population growth rates have begun to decline due to increases in economic and social well-being and greater availability of family planning services. To lower the birth rate as rapidly as possible toward a stable level, much more focus is needed on alleviating negative factors that motivate large family size—on improving health care, nutrition, employment, education, and the status of women.

The U.S. should: (1) assess the impact of basic needs programs on decisions concerning family size; (2) greatly increase research efforts to develop more effective and acceptable methods of fertility control; (3) significantly increase support for expanding acceptable family planning programs in the developing countries.

Human rights

The human rights issue is becoming highly sensitive as developed and developing countries continue to disagree vigorously on defining that term. The industrialized world stresses the political and civil liberties in the first half of the U.N. Universal Declaration of Human Rights, but the developing countries point to the wide-ranging economic and social rights in the Declaration's second half. The situation is complicated by the fact that many Third World governments are, in varying degrees, authoritarian.

Human rights recently has become a subject of contention in the U.S. between the Executive and Legislative branches of government, as the Congress has tied human political rights strings to foreign military and economic assistance legislation. But the legislators have also addressed themselves to economic and social rights, as when both houses passed "Right to Food" resolutions.

Cutting foreign aid to punish human political rights violators is a popular idea, but cutting development assistance in particu-

lar is usually a weak lever on repressive regimes. A more comprehensive and effective approach is needed. Moreover, U.S. aid efforts in recent years have concentrated on reaching the poorest people in recipient countries. Aid cuts are likely to punish them, not their rulers.

The U.S. should: 1) ensure that its development assistance funds go to projects which directly benefit the poor majority in Third World countries; 2) actively seek to establish international criteria for identifying "gross violations" of political human rights—preferably in cooperation with international organizations; 3) consider what range of policies will effectively promote both economic and political human rights.

Development assistance

Most of the *poorest* countries will need aid in one form or another for at least the balance of this century. The U.S. currently contributes less than 0.3 per cent of its gross national product to programs of "official development assistance"—bilateral grants and loans or contributions to multilateral institutions such as the World Bank or the U.N. Development Programme. Adjusted for inflation, the total amount of U.S. development assistance has declined by nearly 50 per cent since 1963. If this country is to support efforts to alleviate the worst effects of absolute poverty, these programs require special attention in 1977. The bilateral legislation that was rewritten in 1973 to direct aid to the poorest people within the poorest countries requires reauthorization, and the U.S. is in arrears in its contributions to the World Bank's International Development Association (IDA), the regional development banks, and some U.N. agencies. The next replenishment of IDA also must be authorized in 1977.

The U.S. should: (1) commit itself to increasing levels of official development assistance to a level of 0.5 per cent of GNP by fiscal year 1981, with at least 75 per cent of these funds going to countries with per capita incomes of under $300; (2) urge an early decision on the fifth replenishment of IDA at a level of $8.1 billion for the OECD countries; (3) support prompt Congressional action to increase the capital of the World Bank; (4) explore with both developed and developing countries ways to provide automatic sources of assistance for low-income countries; (5) complete a comprehensive review of U.S. development assistance by 1978.

Organizing for interdependence

The resumption of North-South negotiations in the immediate future will be complicated by the lack of effective institutions that encompass the broad range of discussions now going on between developed and developing countries.

Existing international structures are accused by some of being too unwieldy (the U.N. General Assembly) or too exclusive (the International Monetary Fund). Perhaps the best indication of the need for mechanisms more acceptable to all sides was the creation of the 27-nation CIEC in Paris, made up of a carefully balanced group of OECD, OPEC, and other developing countries; yet CIEC had only a one year life span and will not be renewed unless all participants want to see it continued. In deciding on new and reformed institutions, it will be important to ensure that the interests of all major groups of nations are represented.

To deal effectively with the global issues outlined in *Agenda 1977*, including the new approaches needed to development cooperation, the Carter Administration also should reorganize and improve coordination among various branches of the U.S. government.

A QUALITY OF LIFE INDEX: THE PQLI

The need for a quality of life index as a supplement to GNP figures has been recognized for some time—notably by the U.N. Secretary-General and by the recent "Tinbergen Group" report to the Club of Rome. The Overseas Development Council has introduced a Physical Quality of Life Index (PQLI) that can be used in conjunction with the per capita GNP indicator to assess each country's progress in terms of human well-being. The PQLI index—which is a rough but useful composite measure of life expectancy, infant mortality, and literacy—is described and shown for all countries in the Statistical Annexes of *Agenda 1977*.

Development performance by two standards—Country groups and sample countries

	Per capita GNP [1]	PQLI index [2]
Lower-Income Countries (average)	152	39
India	140	41
Kerala, India	110	69
Sri Lanka	130	83
Lower Middle-Income Countries (average)	338	59
Malaysia	680	59

THE 1977 WASHINGTON FARM CONVENTION

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. HARKIN. Mr. Speaker, this week, I have been privileged to join with Congressman BERKLEY BEDELL from Iowa and Congressman RICHARD NOLAN from Minnesota in sponsoring the 1977 Washington Farm Convention for farmers here in Washington, D.C. Over 300 farmers and their spouses attended the convention this week. Over 140 farmers came from the Fifth Congressional District of Iowa which I am proud to represent.

Mr. Speaker, these farmers spent their own money to come here to Washington to attend this convention for 3 days. They have had panel discussions covering nearly every aspect of legislation and administrative decisions that affect agriculture. We have discussed climate and weather forecasting, grain reserves, the disaster program, the Environmental Protection Agency, the new farm bill, and many other topics.

Congressman BEDELL first stated this convention idea 2 years ago, and this is the first year that I have joined with him in sponsoring in and having farmers in from Iowa's Fifth District. It has been a tremendous success, and Mr. BEDELL should be commended for taking the leadership in beginning this program.

Another important item on the agenda was for small groups of farmers to meet personally with individual Members of Congress in their offices to discuss what they would like to see in new farm legislation. This gave the farmers a chance to talk directly with other Members of Congress who represent various areas and regions of the United States. I want to take this time to thank all of those Members who gave so graciously of their time to meet with these farmers in their offices and to discuss the problems of agriculture with them. The meetings were beneficial to both the Members and to the farmers who were able to learn of many problems that are faced by Members of Congress who do not represent rural and agricultural areas.

As I said, the convention has been a tremendous success. As I see it, there were really two goals which we wanted to accomplish: First, to send back with the farmers a lot of information that will be helpful to them and which they in turn can pass on to their neighbors and fellow farmers; second, we wanted to impart directly to Members of Congress and to administration officials in the Department of Agriculture and elsewhere the feelings and opinions of the farmers. I feel that both of these goals have been accomplished and have made this convention a great success.

I want to close by thanking all of those farmers from the Fifth Congressional District of Iowa who took their time and their own money to come here to Washington to help me do a better job in representing them and their interests. They have just contributed greatly to our democratic process in the United States.

A WELCOME TO FARM CONVENTION 1977

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. NOLAN. Mr. Speaker, over 300 family farmers from Minnesota and Iowa have come to Washington this week to meet with Members of Congress and the

administration to explain the need for solid, workable farm legislation.

I want to take this opportunity to thank the 60 Members of the House of Representatives for taking the time to meet with these people yesterday. Our visitors were anxious for the opportunity not only to impress upon urban Representatives the importance of a good new farm bill, but also to learn about the special problems involved in representing nonfarmers who buy the food farmers produce.

Yesterday's sessions were yet another step in the continuing effort of rural and urban people to understand one another, and to work together to assure a fair price for the farmer and a stable supply of reasonably priced food for the consumer in the supermarket.

Those of you who were able to join us during Farm Convention 1977 had the privilege of meeting with some of America's most efficient producers. They have learned how to lobby and they will be back. I know this Congress will join me in welcoming them.

NATIONAL EMPLOY THE OLDER WORKER WEEK

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. RICHMOND. Mr. Speaker, the second week in March was designated as "National Employ the Older Worker Week" in order to direct our attention to the serious problems facing the middle-aged and older worker. It is a means of focusing our attention on the grave consequences resulting from the increasing loss of one of this country's most important resources—productive people.

Because of our failure to recognize the great contribution that the person over 40 still has to make to our society, advancing age has become a serious employment barrier. It is estimated that at least 1.5 million over the age of 40 are unemployed. This is approximately 26.7 percent of all unemployed Americans, and represents a drastic increase over the 596,000 unemployed Americans over the age of 40 in 1969.

If this situation continues, individuals reaching their 40's or 50's will have only several despairing conditions to look forward to—rising joblessness, sharply increased duration of unemployment, seriously limited occupational mobility, and greater chance of poverty.

The saddest figure from among those which have come to our attention regarding the older person is his increasing level of poverty. According to recent figures released by the Bureau of Census, there are more than 25 million people now living in poverty; 5,450,000 of that figure represent heads of households. Of these 5 million, well over 1 million are between the age of 45 and 64, and 728,000 are over the age of 65.

Figures of black unemployment among workers over 40 are even more grim; their rates of unemployment and discouragement are generally twice those of white workers.

These conditions translate into maximum payments for unemployment compensation benefits, increased welfare payments, reduced social security benefits for these individuals when they retire, greater dependence on such programs as the supplemental security income program, unmet mortgage payments, and an increased number of families with no means of support.

What we are faced with, therefore, is a problem of middle-aged and older worker unemployment. This situation has heretofore received very little attention.

However, several Members of Congress have turned their attention to developing solutions to ease this unemployment crisis, by producing greater job opportunities and special services for the worker over the age of 40.

Today, Congressman HENRY WAXMAN, Congressman JAMES SCHEUER, and I are reintroducing two bills with over 40 cosponsors, which seek to alleviate this grim situation. Even though our bills have differences, we believe their goals are the same; the issue they address is so important that we are working together to insure its consideration by the Congress.

The Middle-Aged and Older Worker Employment Act of 1977 and the Equal Opportunities for Second Careers Act of 1977 are two measures which can be used as vehicles for developing specific employment services for the person over the age of 40. These services can include job development and job inventories to catalog available and suitable jobs for this age group. These bills also provide the means for stimulating activity to upgrade the skills and capabilities of older workers, and will enable us to investigate the advantages of such concepts as flextime—allowing an individual to schedule his required work hours around his personal needs—and lifelong education.

I believe the support that these bills have already received is an indication of the desire of the Congress to find the appropriate answers to this problem. As sponsors of two pieces of legislation, Congressmen SCHEUER, WAXMAN, and I believe the situation of the older worker merits close attention, and we commend these measures to our colleagues.

SOYBEAN DAY

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. NOLAN. Mr. Speaker, today is "Soybean Day" in western Minnesota. In order to acquaint my colleagues with the importance of this observance, I would like to pass along these remarks by Mr. Harold Larson, Soybean Day's vice chairman:

SOYBEAN DAY

Soybean Day originated in 1961 and was organized for the purpose of educating the soybean farmers in improved soybean farming practices in western Minnesota.

The appreciation day is sponsored jointly by the Dawson Chamber of Commerce and Dawson Mills. (Dawson Mills is a processor of soybeans.) The event begins with a noon meal consisting of foods prepared with soybean products, such as pancakes, ham loaf and cookies.

Everyone is welcome to attend this festivity. Attendance has been in excess of twenty-five hundred people. The informative program begins after noon lunch with entertainment, informative speakers and introduction of dignitaries. Persons in responsible positions such as Secretary of Labor—James Hodgson, national president of the American Soybean Association—Gerald Michaleson, National Soybean Crop Improvement president—Bob Judd and many other familiar people have participated.

The merging of the Boyd School with Dawson Public School has incorporated some businessmen from the Boyd community. Ron Stone, president of the State Bank of Boyd suggested the committee list Soybean Day in the Library of Congress for posterity and we thank him for this suggestion.

AL SHANKER OF THE AMERICAN FEDERATION OF TEACHERS DISCUSSES PROPOSED CUTS IN IMPACT AID

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. KILDEE. Mr. Speaker, I should like to bring to the attention of my colleagues a column written by Albert Shanker, president of the American Federation of Teachers, which appeared in the New York Times of March 13, 1977. In his article, Mr. Shanker outlines the disastrous effect the proposed cut in Federal impact aid funds would have on school districts across the Nation.

I know that many of my colleagues share my concern about the financial problems facing school districts, and I believe they will find Mr. Shanker's column of great interest:

DISAPPOINTING START ON FUNDS FOR SCHOOLS

(By Albert Shanker)

Since school districts all across the country are facing financial problems, they all waited hopefully for the first budget proposal by President Carter. That proposal has now been made, and it is disappointing.

The headlines which appeared throughout the country correctly reported that Carter had increased the federal money for schools over what President Ford had proposed. That is true. But when we compare the Carter proposal not with the Ford budget but with what the federal government actually spent on schools last year, we get a different picture.

President Carter is proposing a very slight increase in federal aid to education, but an increase so small that it will not even begin to cover the inflationary costs of this year. In real dollars, schools will be getting less money under the Carter budget than they are getting now under a budget which the Congress compelled President Ford to accept.

One of the most unfortunate aspects of the Administration's proposal is that it drastically reduces "impact aid" by $300 million. This cut, if approved by Congress, is not justified and would be disastrous.

Impact aid, which was first enacted in 1950, is an important school aid program which is not generally understood. Under

the program, the federal government provides financial assistance to local school districts in order to compensate for the special burdens they confront because the federal government owns property within the school districts, and they must educate the children of those who live or work on such property. The idea behind impact aid is simple. School districts get most of their funds from taxes imposed on both residential and commercial property. In the most common situation, schools receive support through taxes which parents pay on their residence and taxes paid by the businesses for which the parents work. But since school districts cannot impose real estate taxes on federal installations, such districts are hard-hit when they must educate children who live with their families on federal property and/or whose parents work on a federally-owned site.

Just imagine the problems faced by a school district in which a large number of the residents live on a local military base or in public low-income housing and where many of the residents work in federal buildings! The taxpayers in the district who live and work on privately-owned property would have to agree to a very high tax rate to cover the education of all the children.

The impact aid formula defines two categories of federally connected children. Category A are those who live on federal property and reside with parents who work on federal property. The federal government now pays roughly 90% of the cost of their education. Category B children are those who either live on federal property or in low-income housing, or reside with parents who work on federal property—so that only one tax source, rather than the usual two, supports their education. Currently the federal government provides about 45% of the cost of educating Category B children.

The Carter Administration proposes to eliminate payment for Category B children. Major cities—which were to be targeted for special help by this Administration—will lose a staggering amount of money for education. The Council of Great City Schools has given the following estimate of the dollar loss for 27 such school systems:

School system and impact aid dollar loss.
Atlanta, $1,208,601.
Baltimore, $771,881.
Boston, $466,405.
Buffalo, $306,824.
Chicago, $5,906,459.
Cleveland, $870,815.
Dade County, $909,936.
Dallas, $766,384.
Denver, $1,176,242.
Detroit, $787,974.
Long Beach, $620,824.
Los Angeles, $2,510,488.
Memphis, $829,944.
Milwaukee, $389,626.
Minneapolis, $357,571.
Nashville, $246,790.
New Orleans, $858,994.
New York City, $19,819,814.
Oakland, $963,836.
Philadelphia, $4,064,721.
Pittsburgh, $778,898.
Portland, $236,866.
St. Louis, $435,874.
San Diego, $3,625,120.
San Francisco, $407,939.
Toledo, $266,608.
Washington, $3,727,528.

Though popular with Congress (impact aid is said to benefit anywhere from 375 to more than 400 congressional districts), impact aid was often opposed by the Executive Branch on the ground, largely, that because some federally-connected children lived in certain wealthy school districts surrounding the capital, where their parents worked, the aid went to districts which did not need it. But in a reform amendment in 1974, such children were gradually phased out and, in their place, children from low-rent public housing were substituted, thus providing assurance that the funds would go to districts with the greatest need. By proposing now to eliminate payments for such Category B children, the Carter Administration is not only undoing the reform but throwing out the baby with the bath water.

It cannot be that the President does not mean to keep his oft-stated commitment to a larger federal support level for education. It must be that the same Nixon-Ford bureaucrats who have opposed impact aid in the past are still around making their irresponsible suggestions. Or perhaps the Carter Administration is not aware of the reforms instituted in 1974 to meet the arguments of the impact aid critics. In either event, the Administration's proposal is unsound and should be re-thought.

THE CAMP SAFETY INCENTIVE ACT

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. ANDERSON of Illinois. Mr. Speaker, today I am introducing the Camp Safety Incentive Act as an alternative to the various pending youth camp safety bills which provide for Federal inspections and enforcement in those States which do not have federally approved youth camp safety programs. By contrast, my bill would simply provide a 3-year Federal grant program to encourage and assist States in developing and operating their own youth camp safety programs. This is nearly identical to the substitute to the youth camp safety bill I offered on April 17, 1975, which was narrowly defeated, 188 to 194.

Mr. Speaker, I have offered this alternative bill because I frankly do not think the camp safety problem warrants the type of massive Federal intervention into this area which the other bills would authorize. About 25 youngsters lose their lives every year in camps—and certainly each death is a tragedy—and the injury rate in camps is about 31 per thousand campers per year—which includes minor injuries. But the injury rate in our Nation's schools is five times greater—150 per thousand per year, despite the fact that schools have a 6-hour day and most camps run on a round-the-clock basis. If one puts these on an equal time basis, it could be concluded that camps are 20 times safer than schools are.

And yet, we are told that the imposition of Federal regulations, inspectors and enforcement are necessary because only 12 States, according to Consumers Union, have meaningful health and safety regulations, including, incidentally, my own State of Illinois. It is also claimed that Federal intervention is necessary because we really do not know how bad the problem really is—we do not have adequate statistics and the HEW report on camp accidents issued in 1971 was faulty and incomplete. In other words, we should legislate blindly, without the full facts, because the problem might be much greater than we think it is.

Mr. Speaker, my bill adopts a more limited, yet I think realistic and reasonable approach, by providing a 3-year Federal grant assistance program for those States which wish to develop and implement their own youth camp safety programs. It provides an incentive, in the form of $22.5 million in grants over that 3-year period, for those States which do not now have adequate camp safety programs, to get such programs off the ground if there is a perceived need for such a program.

This is not an open-ended grant program and would self-destruct after the 3-year period, thus forcing States to make a decision from the outset. My bill also authorizes a new survey of camp deaths, injuries, and illnesses nationwide upon which the Congress could make an informed judgment after 3 years as to whether any further legislation might be necessary. This prospect in turn should provide an additional incentive for States to act now or face possible Federal intervention at a future date.

Under the terms of my bill, the Secretary of HEW would promulgate model youth camp safety standards within 6 months after enactment. States could apply for $1 million in grant assistance during fiscal 1978 to develop State camp safety plans which conform to these model standards. Plan initiation and training grants would be made available to States having approved plans in the amount of $4 million in fiscal 1978, and $5 million in fiscal 1979. And early operation and improvement grants would be made available in amounts of $2.5 million in fiscal 1978, and $5 million in each of the 2 succeeding fiscal years.

Mr. Speaker, I have no doubt that if camp safety is perceived by the people of any State as a significant problem, they will bring pressure to bear on their State governments to take advantage of this limited Federal startup assistance offer for developing their own State camp safety program. In the meantime, the Secretary will be conducting a survey of the camp safety problem over this 3-year period and the Congress will then be in a position to intelligently decide whether anything more in the way of Federal legislation is needed.

I would hope we would see the wisdom in taking this incentive approach to dealing with the problem instead of charging blindly into creating a new junior OSHA.

At this point in the RECORD I include the complete text of my Camp Safety Incentive Act.

H.R. —

A bill to provide Federal financial and technical assistance to the States to encourage the development and implementation of youth camp safety plans and programs

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Camp Safety Incentive Act."

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to protect and safeguard the health and well-being of young persons in day camps and resident camps by providing for the development of standards for the safe operation of such camps, and to provide Federal financial and technical assistance to the States in

order to encourage them to develop and implement youth camp safety plans and programs, thereby providing assurance to parents and interested citizens that youth camps meet minimum safety standards.

PROMULGATION OF MODEL YOUTH CAMP SAFETY STANDARDS

SEC. 3. (a) The Secretary of Health, Education and Welfare (hereinafter referred to as "the Secretary") shall develop model youth camp safety standards. In developing such standards, the Secretary shall consult with State officials, and with representatives of appropriate public and private organizations, and shall consider existing State regulations and standards developed by private organizations which are applicable to youth camp safety, and shall make such suitable distinctions in such standards as are necessary and appropriate in order to recognize the differences in conditions and operations among different types of youth camps. The Secretary shall promulgate the standards required by this section within six months after the effective date of this Act.

(b) The standards developed by the Secretary shall be directed toward the safe operation of youth camps and related to such matters as—but not limited to—personnel safety qualifications and instruction; ratio of staff to campers; sanitation and public health; first aid and medical services; food handling; mass feeding and cleanliness; water supply and waste disposal; water safety, including use of lakes and rivers, swimming and boating equipment and practices; vehicle condition and operation; building and site design; equipment; and condition and density of use.

FEDERAL GRANT ASSISTANCE TO STATES

SEC. 4. (a) PLAN DEVELOPMENT ASSISTANCE GRANTS.—The Secretary may make grants to States for the development of State Youth Camp Safety Plans in accordance with section 5 of this Act. The amount of any grant under this subsection shall not exceed the amount determined by the Secretary to be the reasonable and necessary cost of carrying out such plan development activities. For the purpose of making payments pursuant to grants under this subsection, there are authorized to be appropriated $1,000,000 for the fiscal year ending September 30, 1978.

(b) PLAN INITIATED AND TRAINING GRANTS.—The Secretary shall make grants to States which have in effect plans approved under section 5 to assist such States with plan initiation and training costs. The amount of any grant under this subsection shall not exceed 50 per centum of the costs (as determined by the Secretary) for establishing and operating a youth camp safety program for the year for which the grant is made. No State shall be eligible to receive a grant under this subsection in more than two fiscal years. For the purpose of making payments pursuant to grants under this subsection, there are authorized to be appropriated for the fiscal year ending September 30, 1978, $4,000,000; and for the succeeding fiscal year, $5,000,000.

(c) EARLY OPERATION AND IMPROVEMENT GRANTS.—The Secretary shall make grants to States for the early operation and improvement of youth camp safety programs, provided he makes a determination on the basis of a review of each approved plan, that it is being administered in compliance with its provisions. The amount of any grant under this subsection shall not exceed 50 per centum of the costs related to the early operation and improvement (as determined by the Secretary) of the youth camp safety program for the year for which the grant is made. For the purposes of making payments pursuant to grants under this subsection, there are authorized to be appropriated $2,500,000 for the fiscal year ending September 30, 1978, and $5,000,000 for each of the two succeeding years.

STATE YOUTH CAMP SAFETY PLANS

SEC. 5. (a) Any State which desires to implement a State Youth Camp Safety Program and to qualify for Federal grant assistance as provided by section 4 (b) and (c) of this Act, shall submit to the Secretary a State plan for the operation of such program.

(b) The Secretary shall approve a plan submitted by a State under subsection (a), or any modification thereof, if such plan in his judgment—

(1) designates a State agency as the agency responsible for administering the plan throughout the State,

(2) provides for the development and enforcement of comprehensive youth camp safety standards, which standards (and the enforcement of such standards) are or will be at least as effective in providing the safe operation of youth camps in the State as the Federal standards promulgated under section 3, and provides that where penalties are not employed as a method of enforcement of such standards, a system of certification is in effect which is at least as effective as penalties,

(3) provides for consultative services to youth camps in the State with respect to comprehensive youth camp safety standards under such State plan,

(4) provides for an inspection of each such youth camp at least once a year during a period the camp is in operation,

(5) provides for a right of entry and inspection of all such youth camps,

(6) contains satisfactory assurances that such State agency has or will have the legal authority and qualified personnel necessary for the enforcement of such standards,

(7) gives satisfactory assurances that such State will devote adequate funds to the administration and enforcement of such standards,

(8) provides that such State shall coordinate the inspection efforts of such State agency so that undue burdens are not placed on camp operators with multiple inspections,

(9) provides that such State agency will make such reports in such form and containing such information as the Secretary may reasonably require,

(10) provides assurances that State funds will be available to meet the portion of the cost of carrying out the plan which are not met by Federal funds, and

(11) provides such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting of funds received under this Act.

(c) The Secretary shall approve any State plan which meets the requirements of this section, but shall not finally disapprove any such plan, or any modification thereof, without affording the State agency reasonable notice and opportunity for a hearing.

(d) In order to determine whether to make available additional grant assistance as provided by section 4(c), the Secretary shall review each plan, and the enforcement thereof, and make a finding as to whether each plan is administered so as to comply with the provisions of such plan and any assurances contained therein. Whenever the Secretary finds, after affording due notice and opportunity for a hearing, that in the administration of a State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), he shall notify the State agency of his withdrawal of approval of such plan and inform such State agency that no future payments will be made to the State under this Act.

REPORTS AND STUDIES

SEC. 6. (a) Any State which has in effect a State plan approved under section 5 shall file an annual report with the Secretary detailing all accidents resulting in death, injury and serious illness, other than minor injuries which require only first aid treatment, occurring in youth camps under the jurisdiction of the State plan. The Secretary shall compile these statistics and include summaries thereof in his annual report required under subsection (c) of this section.

(b) The Secretary shall undertake a survey and study of deaths and serious accidents and illnesses occurring in youth camps in the United States during the three-year period covered by this Act and shall include the results and findings of such survey and study in the final report required under subsection (c) of this section.

(c) The Secretary shall report to the President and to the Congress on or before January 1 of each year, beginning with January 1, 1979, and ending with January 1, 1981, on the activities carried out under this Act during each of the preceding fiscal years.

MISCELLANEOUS

SEC. 7. (a) Nothing in this Act or any standards or regulations issued hereunder shall authorize the Secretary, a State agency, or any official acting under this Act, to restrict, determine, or influence the curriculum, program, or ministry of any youth camp.

(b) Nothing in this Act shall be deemed to authorize or require medical treatment for those who object thereto on religious grounds, nor shall examination or immunization of such persons be authorized or required of such persons during an epidemic or threat of an epidemic of a contagious disease.

(c) Nothing in this Act shall be construed to supersede or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of youth camp operators and campers under any law with respect to injuries, diseases, or death of campers arising out of, or in the course of, participation in youth camp activities covered by this Act.

(d) The Secretary is authorized to request directly from any department or agency of the Federal Government, information, suggestions, estimates and statistics needed to carry out his functions under this Act; and such department or agency is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary.

DEFINITIONS

SEC. 8. For the purpose of this Act—

(1) The term "youth camp" means any camp which is advertised or promoted as a youth camp; operates on a permanent campsite as the term is generally understood; operates under the auspices of a profit or nonprofit entity; is conducted for ten or more children under the age of eighteen at any one time; and operates for a period of, or portions of, five consecutive days or more during one or more seasons of the year.

(2) The term "State" includes each of the several States and the District of Columbia, Puerto Rico and the Virgin Islands.

EFFECTIVE DATE

SEC. 9. This Act shall take effect on the date of enactment.

TERMINATION DATE

SEC. 10. (a) The grant assistance program established by this Act shall terminate on September 30, 1980. It is the intent of the Congress that such program shall not be renewed and that States desiring to develop and implement youth camp safety programs eligible for such assistance shall take appropriate action within the three-year period set forth in this Act.

(b) The Secretary shall include in his annual report of January 1, 1981, required by section 6(c), a separate section containing a summary of the three-year operation of the Federal program. Such summary shall include—but shall not be limited to—a listing of those States operating youth camp safety programs under approved State plans,

statistics collected on the incidence of serious injuries, illnesses and deaths as required by section 6(a), and any conclusions and recommendations which he may deem appropriate based on his summary and findings and the national study and survey required by section 6(b).

(c) The termination date in subsection (a) notwithstanding, the Secretary shall continue to provide States with such technical assistance as they may request and as may be within the capability of the Department to provide.

THE LAWNDALE POETS

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, the poet Allen Tate sought an answer, 20 years ago, to the question, "What should a man of letters be in our time?" He found an essential truth, but one couched in foreboding. While it was clear that the writer must recreate for his age, in Tate's words, "the image of man, and must propagate standards by which other men may test that image, and distinguish the false from the true," it was by no means obvious that the process was abetted by the advent of the mass-culture control of high-technology communications. Indeed, Tate insisted that the writer must discriminate and defend the difference between mass communication, for the control of men, and the knowledge of man which literature offers us for human participation.

There are writers in this country who have accepted the challenge posed by Tate, and I am proud to represent in Congress seven who live in Lawndale, Calif.

Carol Crumb, Judy Gahan, Jeff Miller, Linda Petrilla, Eddie Saiz, Kim Ulanday, and Kristie Willis have all been selected for national publication in the book, "Young America Sings." This publication is a compendium of the finest poems which America's high schools have to offer. I am extremely proud that Lawndale High School has placed seven students in its selective contents—proof that although southern California is the mass-communications capital of the world, sensitive and distinguished writing still flourishes in the Tate tradition.

My purpose in bringing these talented individuals to the attention of Congress is two-fold. I wish to afford the nation an acquaintance with some first-class California literature; and second, to examine the conditions under which it was produced. I believe there are lessons here which may be usefully replicated elsewhere.

In looking into this phenomenon, I had my district staff conduct interviews with all participants. Certain characteristics of both home life and individual drive seemed consistent throughout. Most importantly, books were always a part of the students' home lives. Noted Carol Crumb's mother:

The whole family lives on books.

Many families had complete sets of encyclopedias. All encouraged their sons or daughters as they wrote.

I was astonished to learn that many of the students lived 13-hour days, taking classes in the morning and working at second careers in the late afternoons. Kristie Willis serves as a technician in a health care facility; Linda Petrilla attends the Regional Occupational Center in Torrance, concentrating in data processing; Eddie Saiz engraves jewelry in a trophy shop. It seems that, as literature often must for those who read it, literature has provided these students with an escape from their heavy schedules into what Judy Cahan called "the Dream-me."

Carol Crumb and Linda Petrilla emphasized the strength of their imagination in their writing. Vivid imagery, often conjuring animals, appears in much of their work. Eddie Saiz found his subjects in the eternal themes of age, the Devil, and God, while Kim Ulanday concentrated on America's commonplace—her dog, her mother, and football.

Yet for all the variety of their imaginations, the students were in accord on one subject, the importance of their teacher. Indeed, many only began to write under her influence.

Mrs. Kathleen R. Perry, teaching for 6 years after raising a family, found that the greatest single obstacle to achievement among her students was their lack of self-confidence. She said:

They want to do their best but the strongest feelings in their lives are that they are not measuring up to expectation.

Mrs. Perry found many writers who were at a loss with what they read, either because they had no feeling for the writing process itself, or because they were intimidated by the very presence of words on a page. Under such circumstances, literature was too remote to be made an integral part of her students' lives.

Noted Mrs. Perry:

Reading a beautiful sonnet throws them into a shell. Their immediate attitude as writers is "I really can't do it."

Consequently, the conventional method of teaching writing through collateral reading was dismissed from the Perry program. The success of her method is attested to by Kristie Willis. Mrs. Perry proved to her that, in Kristie's words:

You don't have to be somebody special to write.

After reading the students' poems, I am convinced that Congress will disagree with Kristie. Those individuals are indeed very special. Their work stands as testimony to their creativity and dedication, and I am privileged to share it with my colleagues.

Carol Crumb, known as "Cookie," began to write as a child and comes from a creative family that has encouraged her interest in writing, interior decorating, and ceramics. It was Mrs. Perry who recognized her talent and encouraged it from outside the normal English curriculum. Carol's published poem was one she wrote on assignment from Mrs. Perry, and is intended for Friendship Cards:

We can write our names in the sand
Follow a blue bird
And try to catch a rainbow
But nothing would make me happier
Than just being by your side.

Judy Gahan, an actress intrigued by arcane words, builds her poems on those words. She firmly believes that an individual's response to literature is determined by whether literature has been made entertainment or chore. A 16-year-old junior, Judy writes from the basics of the craft. Simplicity is her key. She declares:

Describe the flower pot, the room and the person looking on.

And she writes:

PEACE

Wisp of a cloud
Lying motionless
Against the blue
Of a perfect pink morning
Seems to glide
So gently
From day to day
Upon a journey
Of feeling
Everlasting
Peace

Eddie Saiz has a pitching arm you would not believe. And when it comes to poetry, all he needs is that first line, that single intimate thought, and the poem becomes the lyric he hopes one day to set to music. A full-blooded Native Indian, Eddie hopes to go into engineering. His poem, "Psyche," was chosen.

Overtired—just got fired—
Looking for a job today.
Sick in bed, oh my head
Doesn't look like this is my day
I know I've got to straighten out.

Love my life—my kids and wife
No one's gonna take them away
I've got to run—has Satan won?
I think I'm really going insane.
I will pay until I die.

I'm going insane.
And everyone knows that it's true
For some odd reason
I think that my death's day is due.

Kim Ulanday, 17, always had her father reading to her, always asked questions, and read the dictionary right through. She observed:

So many people don't pay attention.

Her poem pays attention:

Beyond the dank and gloomy places
Tucked in a folded dark corner
Above the heart
And behind the brain
Is an oddly warpt and bent space.

It seems somewhat dusty and scarred from use
But when called up it stretches
To impulses far, and wide
Flowing forward never back
Fulfilling whimsicals, it races loose.

Somehow it's not needed more
It contracts back, small and obscure
We become pre-occupied without ourselves
With Time money, we lose touch
Forgetting that Fantasy is the human core.

Mocking the television era, Linda Petrilla's home is full of books. One of four daughters, Linda is a 17-year-old senior who draws her inspiration from greeting cards. She writes:

WONDERING

I lay awake at night wondering where you are
In my eyes I can see you, but when I reach out to touch you, you're not there
I think of only you. I wonder if you will ever come back to me.

Jeff Miller's poems were praised by each of his classmates. A midsemester graduate of Lawndale High, Jeff is attending El Camino College. His writing remains in flux, and he notes a winter-summer contrast in his style. In summer, his writing becomes "lighter," addressing more personal and nature-related themes; in winter, the subjects are more hard, penetrating. "Backroads of My Mind" was selected for publication:

Out of control, and close to the edge,
dangling by the smallest of threads.
Reaching to see the other side,
glimpsing at where inner worlds lie.

What will I see there, who might I find?
And when I get there, will it be mine?

Answers to questions in silver and gold
Each step of the way the story unfolds.
Free for the moment in space and in time.
Walking the backroads in search of what's mine.

Kristie Willis thought she never wrote well enough to be published. Her work has proved her wrong. In fact, like many of her classmates, she has been writing from an early age. While she writes mostly love poems, "party" is too much a part of her personality for the contemplative style associated with that genre. Like Kim Ulanday, she wants to study business; like Linda Petrilla and Judy Gahan, she is an admirer of Edgar Allen Poe. Her poems, however, contain little that is sinister, and owe their force more to Poe's imaginative example than to his subject matter.

I commend the poets to you. I commend their advocate and mentor, Mrs. Kathleen Perry, in whose classroom, in Kim Ulanday's words:

You learn to act as an adult because you learn to control your time.

I commend the principal of Lawndale High School, Mr. Duff Means, for his support and encouragement of an innovative program within the natural financial constraints facing every school. Lastly, I commend the poets' publisher, Mr. Robert Hartman, who is carrying on the work of his father. The senior Hartman, inventor of the self-soaping mustache brush, founded the National Poetry Press in 1937. He was one of those wild talents that seem to thrive only in California.

These poets have obviously been offered valuable support and encouragement from a variety of sources. They have returned the investment tenfold in these magnificent poems.

The tradition of Allen Tate is in good hands.

LET US EMPLOY OUR HANDICAPPED

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. MOAKLEY. Mr. Speaker, President Carter has named the resolution of our unemployment problems a top priority in this administration. Through reduction of unemployment, President Carter seeks not only to diminish unemployment and welfare rolls, but also to restore millions of Americans the dignity and independence which productive work affords. By initiating incentives for greater employment then, this administration provides the individual with the means to self-sufficiency, and the American economy with the promise of greater productivity and subsequent product-demand. Clearly, reduced unemployment can only benefit our country, and it therefore becomes a goal we should strenuously pursue.

One way in which this goal of full employment can be partially achieved is through swift congressional action on behalf of a much-forgotten constituency, our unemployed handicapped. Over 11 million handicapped Americans across our Nation are enduring an unemployment rate of roughly double the national average, yet few efforts are targeted toward aiding this group. Moreover, even those handicapped workers who have managed to find themselves permanent jobs are suffering a pay gap of approximately 22 percent below the national average for working Americans—$131 per week as opposed to $167 per week in 1972. Yet again, little is being done to guarantee these workers their chance for self-sufficiency. This situation is doubly lamentable, not only because of the undemocratic discrimination of an already disadvantaged group, but also because of the vital source of energy and competence our markets are missing due to the reluctance of employers to hire the handicapped.

H.R. 905, developed and introduced by the Honorable HAROLD FORD of Tennessee, effectively attacks this employment prejudice in two ways. By amending the Internal Revenue Code of 1954, allowing tax credits for a certain portion of the wages paid to handicapped workers, this bill encourages employers both to hire handicapped employees and to pay them a living wage. A time limit of 1 year, coupled with a credit limitation of the first $50,000 of tax plus one-half of the tax liability in excess of $50,000, carefully modulates the cost of this program. Its effectiveness, on the other hand, promises to be both widespread and long-lasting, as testified by the results of similar measures used in the successful WIN welfare tax credit program. So far, over 300,000 workers and 91,000 employers have participated in WIN, designed to reduce welfare roles and increase employment rates. Comparable results may be in store for a national handicapped tax credit program.

Both tax reform and creative new methods to decrease our unemployment rate are key issues in today's Government. Both are needed to help our handicapped surmount employer discrimination and gain the jobs they need and deserve. H.R. 905, modeled on the WIN Tax credit formula, promises significant results for this presently disadvantaged group. I urge its swift passage.

EMERGENCY NATURAL GAS ACT

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. ASHLEY. Mr. Speaker, I am today introducing legislation to amend the Emergency Natural Gas Act of 1977 (Public Law 95–2) by extending the period for exercise of Presidential authority in each instance for a period of 3 years, and by including large commercial and industrial usage as a high priority classification of usage, so long as various cautionary conditions have been satisfied.

This much-needed legislation was hurried into law because of the exigent circumstances gripping our Nation. I supported the prior legislation. Due reflection, however, has convinced me that the bill, if extended and expanded, can have a beneficial impact for a period well beyond this winter.

Certainly the Emergency Natural Gas Act of 1977 was viewed by its supporters as only a stop-gap bill, enacted in anticipation of a thorough review and the forging of a realistic and comprehensive national energy policy. In many respects Public Law 95–2 is still so qualified. And there can be no doubt that the adoption of a national energy policy remains as a top priority, and perhaps the top priority, of this Congress.

Nonetheless, it is necessary to consider what is meant by the word "emergency." It has been reliably projected that the cruel, uncompromising winter of 1976 is but a portent of things to come in the next several years. It can only follow in the light of these most disheartening predictions, that natural gas shortages and crisis conditions may become the order of the day in the foreseeable future. Even the passage of a comprehensive, meaningful national energy policy might not forestall the crisis impact for several years. We must have legislation that recognizes that the "emergency" conditions of 1976 and early 1977 will maintain for several years in all likelihood. Should it become apparent that the recent "crisis" was, in fact, a product of contrivance and manipulation, it would be a simple enough process to simply repeal the Emergency Act as extended by this bill, or not invoke its provisions. I am deeply concerned, however, that by not extending the emergency provisions of this bill to cover the period of anticipated crisis, we will find ourselves next year, or in 1980, attempting to deal with a situation that is out of control. It is for this reason that I have offered the 3-year extension of the time provisions of Public Law 95–2.

I have also included large commercial and industrial usages within the definition of "high priority" usage contemplated by the Emergency Natural Gas Act of 1977. For the purposes of this act, I have adopted the classifications set forth in clauses (ii) and (iii) of section 2.78 of title 18 of the Code of Federal Regulations as follows:

(ii) Large commercial requirements (50Mcf or more on a peak day), firm industrial requirements for plant protection, feedstock and process needs, and pipeline customer storage injection requirements.

(iii) All industrial requirements not specified in paragraph (a)(1)(ii), (v), (v), (vi), (vii), (viii), or (ix) of this section.

If the emergency deliveries, transportation and purchases contemplated by Public Law 95–2 are to have an across-the-board palliative effect on current and future energy crisis conditions, then some rational inclusion of large commercial and industrial usage must be recognized as a "high priority." I emphasize that this amendment, while including these additional usages, maintains the thrust of the original legislation to insure the furnishing of natural gas to residential consumers as the first order of business. It is provided in this amendment that the three priority usages of natural gas set forth in Public Law 95–2: Residential, small business, and any other usage which the President determines would endanger life, health, or maintenance of physical property, if terminated, must be satisfied before fulfilling the needs of large commercial or industrial consumers. The amendment further qualifies that there must be a finding that termination of such large commercial or industrial use would result in "* * * significant economic dislocations," and that such usage would be satisfied from supplies coming from lesser priorities of industrial usage. By expanding the "high priority" category in this reasoned and qualified manner, we give the President the power he needs in a crisis situation to make meaningful allocations of natural gas that respect the needs and interests of all Americans.

I urge support of this amendment to extend and expand the Emergency Natural Gas Act of 1977.

THE REAL FARMER IN CARTER'S CABINET

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. JONES of Tennessee. Mr. Speaker, many of us knew our former colleague, Bob Bergland, was a man of the soil. His roots are secure in the soil along Minnesota's Roseau River. For this and other reasons, Bob will be the most successful and effective Secretary of Agriculture we have had in many years.

The April issue of Horticulture magazine has an article written by Hugh Sidey which tells us why Bob Bergland became the man he is. I think it is a fitting tribute to a man we all like and respect and I hope you enjoy it as much as I did.

The article follows:

THE REAL FARMER IN CARTER'S CABINET

(By Hugh Sidey)

The earth was all about him. His adventure. His family's livelihood. His home. His very reason for being. Bob Bergland, the new Secretary of Agriculture in Jimmy Carter's Administration, came out of his land as much as anyone can. He lived the seasons and breathed the violent changes of weather. He was fused with that vast expanse of table top that hugs the Manitoba border and lies a short distance west of Lake of the Woods. He still is. The umbilical from his 600 Minnesota acres along the Roseau River may even be stronger than in his early days when he played on the land and worked it and did not think of being any place else. But as a Congressman from Minnesota's Seventh district before he made his way to the dim warrens of the Department of Agriculture, he found he had to go back for sustenance. Just go back and be on his land and see it and smell it and work in it and then he would know who he was and where he came from and be ready for a few more weeks in Washington.

Bob Selmer Bergland is of pure Norwegian extraction but now he is American. The parents of his mother and father came from Norway when the Scandinavians flowed across the North Atlantic and hurried to find their fortunes in the rich middle distances of Iowa, Minnesota and South Dakota. They were undaunted by the harsh sweep of the winter snows and short growing seasons. They were farmers who understood the rewards of owning land and they went where it was cheap. They had no money. Bob Bergland was born July 22, 1928, in Roseau where his family had an apartment above the Ford garage. His father worked as a mechanic, gathering his meager resources so that he could move to the farm beside the river. In 1933 the time had come and the family began life on 200 acres that still are part of the Bergland holdings. It was the land of prairie grass. There were none of the native trees on Bergland's stretch. The names of the towns nearby spoke of long winters. There was Caribou, Badger and Fox, all places hard by the 50th parallel.

It was not the place for livestock. The weather was too harsh. The need for tight barns increased the cost. Land and growing days were not abundant enough to furnish all the hay and grain needed. The farmers near Roseau grew wheat to sell.

It was hard but not a primitive existence. Machinery was devouring the endless miles and the Norwegians were natural tinkerers. Model T's, the green John Deere tractors and the great new harvesting machines were making themselves felt and they were as welcome as the spring rains. Good men and women, good land, good machines. In those innocent days this was a combination sent by God. In harmony they could produce miracles. The failure of one brought misery. It was the forge of strong people.

Bob Bergland's early memories are a mixture of these elements. His parents attentive and loving, hard working and hard worrying, but then joyous and thankful. His land long, low and flat with the Roseau River a few hundred feet from his house; the stream, only 200 feet wide at the high and dried up where the drought years came. His machines—that first John Deere D, a gleaming tractor which was the pride of the family and whose reassuring chug meant the land would be tilled on time, the grain planted and harvested.

The rhythm of Bergland's childhood was set by the weather. The cloud patterns were read from dawn to dusk. The weather could comfort and soothe and then in a few hours it could devastate. He lived his parents' heartbreak. He was nine the year his father despaired of ever getting his grain harvested as the rains beat day after day on the fields, making them impassable to the machines. "I remember how bad I felt," he recalls. "I was very young and it was very wet. My family had an awful time." He knew how the summer sun could peel a field hand's nose in its brief but blistering assault. And then there were blizzards. Raging slashes of arctic air that drove the snow parallel with the ground. "I rather enjoyed a blizzard," says Bergland, with the farmer's wisdom of what one does when caught in such wintry abuse. "You accommodate the inevitable. You go home and ride it out. Sometimes we were snowed in for days."

That is the kernel of conservatism that is in every farmer whether he calls himself a Liberal or a Farmer-Labor Party member (as Bergland does) or whatever. It is the understanding of natural forces, the joy of standing by oneself before the capricious weather mistress and outwitting her, yielding here, hunkering down there, then using her after she has thrown her fits and wants to be friends again. The challenges of Wall Street or the Detroit production line may be as complex but hardly more thrilling or rewarding.

Bob Bergland walked his land first. As a child he played beside the river, followed the tracks of rabbits in the snow and pulled his first fish from the clear water. "We never had money, he muses. Everything the family did had to be devised by themselves. He explored the fields and examined the machines. One harsh winter when the snow piled up his father put skis on the front wheels of the Model T. What a delightful contraption it proved to be for both man and boy. Inside their modest farm house the family had each other and little else but that, too was enough. The old structure was dry and warm and when the summer's bounty was served up piping hot and fragrant it was enough joy for a whole day. Bergland walked the river to school and he never remembers going off on those frigid mornings without a hot breakfast of pancakes or oatmeal. When his mother baked her dark bread he could hardly wait to get home for thick slices piled with homemade strawberry or raspberry jam.

Bergland's mind was in four parts—summer, fall, winter, spring. He waited and watched for the changes which brought the alterations in the farm metabolism. His favorite time was when the snow would melt and the ice on the river would break. That was the signal—at last release from the cold. It came about April 10 every year. Even as a toddler he got those earthly vibrations. One could see and hear winter leaving the land. The eager daffodils jumped from the earth with the snow nearby. The ice chunks would heave and collapse in the dead of night, sending groans through the dark. For Bergland it meant that things would soon grow.

In those first years, he would be in the family garden with his mother. She would open up the rows of the fresh earth. He would come along and help drop in the seeds—peas, beans, carrots. The smell of the earth enveloped him. He knew it would soon be warm all around him and that the signs of vitality would multiply. The daylight hours would grow. He would find early on that the best time of these fruitful days was at first light. He felt good. So did the earth.

As he grew older Bergland began to hunt the rabbits and pull more pickerel from the river. He built himself a boat with $2 of material he scraped together and sometimes he would drift downstream in it to school before and after the ice came. By the time he was 10 he could drive the tractor and he was trusted to pull the combine. For many, such endless hours under the sun riding back

and forth over the fields was a dreary business. Not Bergland. There was some resonance between himself and his machines and the job he was doing that gave him fulfillment even at that age. In the sixth grade his teacher asked all the kids to stand up and tell the rest of the class what they wanted to do when they grew up. Bergland said he wanted to be a farmer. The other kids laughed at him. In the middle of the 1930s with drought and depression heavy in the Midwest most people talked of leaving. But that never occurred to the young man who lived along the Roseau River.

He was hooked on growing things. The miracle of renewal carried him back to the fields whether it was barley, oats, flax, alfalfa or wheat. By that time he was a member of 4–H and he was competitive. He launched his own gardening projects. Because the natural growing season was so short, he could not under normal procedures get the vegetables he wanted into county fair competition at the end of July. That meant that Bergland had to devise some hot boxes in which to nurture the young plants during the last weeks of winter. He did that and installed them in the window of his upstairs bedroom. He would tend the tiny shoots while he gazed out at the river, waiting for the ice to go. When the signal came he had a healthy stand of carrots, potatoes, peas and tomatoes. He would then transfer them to the family garden plot and in the spare minutes between tractor rides he would tend his special crops. By fair time he usually had a few passable entries. Now and then he would come home with a blue ribbon and the 30 cents prize money.

His world began to widen in high school. He learned about biology and chemistry in books and the school labs. He carried that knowledge with him back to his farm chores. He listened to his father, a man not highly educated but open-minded and curious, a farmer who was among the first to use machines and fertilizer on his land. As long as the summer light would last, Bergland and his brother and father worked their 200 acres. Bergland would ponder the need to leave fields fallow, to plant alfalfa to restore nitrogen. The family bought evergreen seedlings to plant to break the wind and to add beauty to the land. When suddenly his high school days were ending, Bergland had no doubts about the next step. He would go on to the two-year School of Agriculture at the University of Minnesota in St. Paul. World War II was over when he entered in the fall of 1946. The campus was swarming with discharged GIs. It was a serious time. Bergland was a serious young man and he had two good years of learning. He thought he would transfer to a four-year course. But he ran out of money. He went back to farm in partnership with his father. It was not a melancholy move. He loved the life and he had some new ideas to try.

Farm prices were up. So were opportunities. The Bergland holdings began to grow as the family added acres and machinery. Up to that time most farmers in the area had considered chemical fertilizers an expensive luxury. But one summer between his years at the University, Bergland had set out experimental plots. The contrast between the fertilized plots and unfertilized crops could be seen from a distance. Bergland still remembers the expression on his father's face when he viewed the difference. The father and son knew they had to have fertilizers. Their production zoomed. Bergland was ready with another idea. A professor at the University had suggested the potential of raising bluegrass seed. The market for such seed was growing rapidly. The Minnesota conditions for growing it were good. In 1958 Bergland and some neighbors began to develop a seed business. Over the next years it became their main crop.

For a dozen years Bob Bergland's life was totally absorbed in his farming, wife and his family of six children, his small Lutheran church, the community with Sons of Norway, Lions, Eagles and Masons. But his mind reached beyond those limited borders. He wondered about the world as he watched—and felt—waves of the food crisis wash over his Midwest. He began to get interested in politics and in 1970 he ran successfully for Congress. He and his wife Helen loaded their things into the farm truck and drove to Washington.

As a Congressman Bergland saw even better what he calls "the awesome importance" of a proper agriculture policy. He watched from the inside as the Rube Goldberg supply and pricing structure faltered time and time again and the government delivery system of aid for disadvantaged sectors of agriculture failed to provide help. Bergland traveled beyond U.S. shores and viewed first hand the wretched millions in the poor countries, confined to despair because of the limitations of food. He sensed long before it became a fact of diplomatic language that food would become an enormous part of international strategy as the statesmen sparred for power and their shares of the world's goods. As a member of the House Committees on Small Business and Agriculture Bergland deepened his understanding of the economics involved in growing and supplying the nation and other parts of the world with food. From all of this and long before Jimmy Carter came upon the national political scene, Bergland decided that what the country needed and did not have was a "Food Policy." The idea of a farm policy was too limited. The constituency of food was immense and millions of people were vitally involved in producing, processing and transporting food. How closely their actions affected each other was just being understood.

The problems ahead for Bergland and for this nation's agriculture are enormous and he knows it. In his lifetime crop yields in this nation have doubled and tripled. But he knows there is a limit to what can finally be grown on U.S. soil. Yet, there seems to be no limit to population growth. Some 210,000 people are added to the world each day. Inexorably the people are overtaking the globe's ability to produce, even under ideal conditions. A million acres of U.S. land are still being paved over every year. "We cannot do that forever," insists Bergland. "There must be more land-use planning." An immense amount of our urban crisis has come from the earlier rural crisis. It was quiet and remote and not many people paid attention. But this nation has gone through "100 years of benign neglect" of its rural areas, says Bergland. Millions left the farms, drifted to the cities and the problems began. He wants to turn more attention to rural families and communities, to hold those people on the land who are there now and perhaps even lure a few back who have left and would return if there were enough economic opportunity. Bergland also wants his department to get further into studying the weather, to try to figure out the patterns that are changing and what that means. Weather is the big production variable. It can wreck whole economies, strain whole societies.

The slender man who moves quickly through the huge offices of the Department of Agriculture is bursting with more ideas—about food stamps, about helping people, about bolstering American strength in the world with grain production, about stabilizing markets and about creating food reserves to guard against catastrophe.

Perhaps part of Bergland's energy and good cheer comes from his luck. The job of Secretary of Agriculture has until recent years been a position of thanklessness. Agriculture was such a diverse and unorganized mass that pleasing one group inevitably meant alienating others. City interests looked with increasing suspicion and hostility on rural requests. Only when shortages developed and prices generally went high and the importance of food in the world order was recognized, did the Secretary's job smooth out. It is a relatively tranquil scene now in the Department of Agriculture. But more and bigger uncertainties lie just down the road. Water is short already in western growing areas. The winter damage in the Midwest is immense. Demands for different kinds of meat and fiber are increasing. The cries for help from the cities are stronger than ever. But Bob Bergland believes he is ready and that he can do some good.

Along the way he will have to take a few days now and then to go back to Roseau to see his land which will be tended by a step-son. He will walk in the fields and feel the spongy earth beneath his feet and ride his tractor and look at the far horizon and marvel again at nature's profound force.

MINIBUSINESSES

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. FORD of Tennessee. Mr. Speaker, today I rise to introduce the Mini-Business Opportunity Act of 1977, a measure that will greatly aid the economic stability of more than 9.1 million small businesses in our Nation.

The measure states that the Small Business Administration—SBA—will give special preferences to small business concerns with 100 or fewer employees—"minibusinesses"—in the sale of materials and services to the Federal Government. This simple declaration of preference can be utilized to protect the economic interests and well-being of millions of the true small businesses in America, those with 100 or fewer employees.

Mr. Speaker, this act is designed to supplement the protection afforded all small businesses under existing SBA programs, which give them preference in many cases over large businesses when selling to the Federal Government. As you know, small businesses are determined according to several standards, most often by number of employees and yearly revenue.

However, many times these standards are quite unfair to the minibusinesses. For instance, the economic advantages to a firm employing 450 people over a firm employing 15 people is easily seen. Yet, both firms would be classified as "small businesses" during bidding to sell to the Government.

This measure will benefit millions of American workers in minibusinesses. Of the 9.7 million nonagricultural businesses in our Nation, 9.4 million or 97 percent qualify as small businesses under SBA standards. Most important, of these 9.4 million small businesses, 9.1 million or 97 percent have 100 or fewer employees, qualifying as minibusinesses. Despite those large numbers, though, the minibusinesses must continually compete with larger firms for crucial Government contracts and services.

There are other methods for measuring the pressing need for the Mini-Business Opportunity Act of 1977. Dur-

ing these past few years, no section of the American economy has suffered more than the small business industry, most particularly, the minibusinesses. These "smallest of the small" have had to suffer bankruptcies and forced closings in a much higher number than the larger, pseudo-small businesses which have more than 100 employees. These minibusinesses also are the first to feel the effects of higher operating costs, newly imposed Government regulations, and the slowdowns in manufacturing and construction contracts and subcontracts caused by inflation.

The Mini-Business Opportunity Act of 1977 would greatly benefit these minibusinesses by giving them preference to bid competitively through Government procurement operations against the pseudo-small businesses. There is little economic fairness in making firms of 40 employees constantly bid against firms with 10 times that many employees under the existing SBA rules. Thus, the Federal Government would be helping to strengthen an integral part of the American business community.

Mr. Speaker, we in Congress have a great responsibility to render assistance to the 9.1 million minibusinesses in our Nation. By supporting the Mini-Business Opportunty Act of 1977, we will also be helping the millions of employees who work for these companies. I sincerely hope the act receives the closest attention and fullest support of my colleagues, as we attempt to improve the Federal Government procurement procedures administered by the Small Business Administration.

SOLARZ INTRODUCES LEGISLATION TO DEAL WITH ARMS TRANSFERS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. SOLARZ. Mr. Speaker, I have today reintroduced with a total of 40 cosponsors a bill first submitted on January 6 which is designed to provide Congress with the authority to disapprove most major transfers of American weapons from one country to another.

As a consequence of the vast increase in the overseas shipments of American conventional arms, there has been a geometric increase in the potential for the transfer of these weapons from the recipient countries to third countries to which the United States may or may not want to ship arms.

While Congress now has the authority to disapprove most major arms sales abroad in the legislation authored by Senator GAYLORD NELSON and Representative JACK BINGHAM, we do not have similar authority to stop arms transfers. H.R. 1534, reintroduced today, is designed to close this loophole by providing Congress with the power to veto arms transfers of U.S. weapons from one country to another.

Congress adopted a similar provision in last year's first consideration of the security assistance bill, only to have it dropped when the bill came up the second time in an effort to avoid a veto by President Ford.

Under existing law, if the United States has given or sold weapons under the foreign military sales program to another country, that country can in turn transfer those weapons to a third country only with the approval of the President. The President in turn is required only to provide Congress with a written certification and explanation of the transfer 30 days before giving his consent to the transfer. During the course of 1975, there were a total of 18 such arms transfers from nations to which we had previously given arms to other countries around the world.

My feeling is if Congress has the right to disapprove a sale in the first place, it should likewise have the right to disapprove the transfer of those weapons to other countries. I am particularly concerned that as the volume of actual deliveries of arms that we have contracted to sell over the past few years increases—and the United States has agreed to sell about $29.4 billion in foreign military sales over the past 3 years—the potential for those weapons to get passed to other countries is vastly expanded.

The bill that I am proposing will not stop transfers where a recipient country agrees to give the weapons to a third country without seeking prior American approval. But the United States then has the option of stopping further sales of weapons or the delivery of supplies and spare parts to such a violator nation. My bill would enable Congress to consider potentially controversial transfers where the President has given his permission, such as the transfer of a number of F–5 aircraft from Iran to Jordan.

I might add that the bill includes language which would give the President the right to exercise an emergency waiver permitting a third country transfer, even in the absence of congressional approval, similar to that provided to the President under the terms of the Nelson-Bingham amendment.

Joining me as cosponsors of this legislation are the following Members:

Representatives BADILLO, BEDELL, BLANCHARD, CARNEY, CHISHOLM, COHEN, COLLINS, CONTE, DOWNEY, DRINAN, EDGAR, EDWARDS of California, GIBBONS, HARRINGTON, HAWKINS, HOLTZMAN, JENRETTE, KOSTMAYER, KREBS, LEACH, LONG of Maryland, MEYNER, MIKVA, MINETA, MITCHELL of Maryland, NOLAN, PATTERSON of California, PEASE, RANGEL, ROE, ROSENTHAL, SCHEUER, SIMON, STUDDS, WAXMAN, WEAVER, FITHIAN, MAZZOLI, and STEERS.

NEWSLETTER

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. WOLFF. Mr. Speaker, one of the duties of a Member of Congress is to communicate directly with his or her constituency so as to keep informed as to their views and their needs.

Periodically, I send a newsletter to my constituents reporting on the activities of the Congress and soliciting their views on the issues of the day.

I am today, for the record, asking that a copy of my latest newsletter be printed in the CONGRESSIONAL RECORD. The text is as follows:

NEW CONGRESS FACES VARIED PROBLEMS AS SESSION CONVENES

Dear Friend and Constituent:

The 95th Congress convened with a renewed sense of confidence and spirit that it will respond fully to our nation's troubles and enact meaningful legislation to achieve essential change.

As your Representative, I believe this to be an appropriate time for me to highlight some of my responsibilities in the House. I am looking forward to the months ahead as truly an effective and productive time.

My colleagues and I on the Select Committee on Narcotics Abuse and Control are determined to develop a working blueprint for a national drug policy that will coordinate and unify the various jurisdictions now involved with the overall drug problem. As Chairman, I will report to Congress on new concerted efforts to stop high level narcotics trafficking that transports the deadly menace to our shores and more effective methods for prevention and treatment.

Drug abuse has not waned. New sources have opened up again and a ready market is available. It is estimated that, today, drug abuse in this country costs more than $27 billion a year. Nearly 40 percent of this cost is the direct result of crimes committed by addicts who must cheat and steal to maintain their expensive habits. Serious crime continues to rise for nowhere in the world is drug abuse more acute than in the United States—our country where no hard drugs are grown, but are all smuggled in from abroad.

Why is America's youth into the drug scene?

We intend to find the answers and do something about finding solutions. We will scrupulously investigate the reasons responsible for the widespread increase in narcotics use—international trafficking, organized crime, interdiction methods and law enforcement, existing prevention and rehabilitation programs, and the criminal justice system that deals with narcotics laws and drug related crimes. Our society and future generations cannot be further corroded by this lethal drug culture.

As a ranking member of the House International Relations Committee, I have been selected by my colleagues to be the Chairman of the Subcommittee on Asian and Pacific Affairs, the panel empowered to probe the problems of those areas abroad and to assess their impact and effect upon domestic conditions for the purpose of recommending Congressional action and legislation.

The committee is charged with the responsibility of our overall China policy; the question of whether or not we should resume relations with Vietnam and resolution of the MIA situation with Hanoi; our base agreements with the Philippines; overall U.S. strategy in the Pacific; troop removals from Korea; and our sensitive relationship with Japan.

Included in the committee's mandate are the problems of one-half of the world's population, including that of India, Pakistan, Australia and New Zealand—remote from our shores, but so important to the quest for world peace and the effect upon our everyday life. This committee will help to shape the destiny of the world for years to come.

I also continue to be the New York member of the House Committee on Veterans' Affairs and am the ranking member of the Subcommittee on Veterans' Education and Training, a position that enables me to fo-

cus attention on the critical needs of our nation's veterans and their families.

This session, I introduced the Comprehensive Veterans Readjustment Act of 1977, H.R. 2231, an all-inclusive measure to again update and increase educational and training opportunities for Vietnam veterans. It is the intent of this Act to reform the GI Bill to hopefully reverse the intolerably high unemployment rate (currently more than 550,000) for veterans of this war era. Basic provisions will not increase the total amount of educational benefit payments, but will permit an accelerated use of the allocated funds to provide realistic tuition and living allowances while the veteran is enrolled in a school or college.

We must honor our obligation and afford the Vietnam veteran the chance to attain an enriching and productive life. This goal must be a national commitment to provide opportunities on par with those we offered veterans of previous wars. We owe all our veterans a chance at tomorrow.

Sincerely,

LESTER WOLFF.

PROMPT ACTION ON ENERGY POLICY IS VITAL TO AMERICA'S FUTURE

This past winter's natural gas crisis, that virtually shut down entire cities and forced untold thousands to be out of work, subsided as the weather warmed, but the fundamental problem of providing for America's energy needs remains critical.

I voted for the President's Emergency Energy Bill to ease the immediate crisis just as I have supported past measures to mandate fuel allocations in an effort to assure that no sector of our nation is short-changed. Adequate energy supplies, be they oil or natural gas, are a national problem, not a regional privilege.

However, no amount of stop-gap measures will solve the long range problem of declining energy supplies and rising demand. Priority must be given to enactment of a comprehensive program to meet all of America's requirements if we are to regain our financial stability and economic viability in the foreseeable future.

Our nation's recovery is hampered by questionable shortages and increasingly high prices for essential energy supplies. This condition will continue to accelerate until we implement a National Energy Policy—action I have long advocated—to contain the corporate excesses of domestic suppliers, decrease our reliance on foreign producers, invoke voluntary conservation and realize a meaningful program of extensive research and development into alternate energy sources. We must increase domestic energy production and insure energy reserves. We must encourage conservation while establishing price standards that will not gouge the consumer.

Legislation does not happen in one day or even one year for there are many steps to be taken before a policy becomes law. We have shilly-shallied too long and America is suffering the consequence.

As just one instance, for the past four years I have attempted to secure the cooperation of government, and utility companies in shutting off pilot lights on gas cooking appliances that waste between 30 and 50 percent of all gas consumed by these stoves annually. In New York State alone, pilot lights on appliances burn an incredible 44 billion cubic feet of natural gas every year, enough to service the needs of 220,000 homes. Great Britain, among other European nations, safely eliminated pilot lights on their cooking elements to conserve energy—why can't we?

Accordingly, I have reintroduced my legislation, H.R. 2888, to provide an income tax credit to cover the cost of engaging professional help to safely convert automatic pilot lights to manual ignition.

Further, I am co-sponsoring legislation to give greater impetus to the development of alternate sources of energy and measures to establish a Solar Energy Loan Administration to provide homeowners, builders, and small businesses with low interest loans to expedite the purchase and installation of solar heating and cooling systems. I believe these measures to be essential fuel conservation steps, for this nation's dependence on fossil fuels must end.

I have long warned against the United States being subjected to oil blackmail. The continuous buildup of petrodollars by the oil producing nations (more than $3 trillion by 1980) threatens the future capability and productivity of our country and its citizens. While our need for oil is critical, the third world states are using these petrodollars to gain a stranglehold on our assets and interests by investing heavily in U.S. industry, financial institutions, defense productions, real estate, natural resources and businesses.

I am opposed to indiscriminate offshore oil drilling for we must insure that satisfactory environmental protection safeguards will be in force. We cannot afford the risk of more oil spills that devastate our coastal waters and poison our fishing beds.

Even more intimidating, I believe, is the threat of an Arab takeover of our offshore lands through extensive investments in American firms—an intrusion that can only result in those nations gaining substantial control of U.S. domestic supply lines.

Under our present Outer Continental Shelf statutes, a loophole permits foreign investors to back U.S. front men in bids for offshore drilling leases even though U.S. law forbids foreign nations and corporations from bidding directly on oil and gas leases.

My legislation, HR1367, is intended to thwart such intolerable intrusion by the foreign oil producing nations of OPEC—the very same nations that spawned the energy crisis in the first place and now seek to reap even greater profits at the expense of the American consumer. My bill would close the loopholes in the present OCS statutes and insure that offshore oil and natural gas drilling leases are granted only to U.S. citizens, and American corporations and associations that limit foreign investment and financial interest to 5 percent. We cannot afford to permit the oil barons of the world to own our natural resources—America's life line.

I am hopeful that President Carter's appointment of Dr. Schlesinger as White House energy administrator will bring us closer to the Comprehensive Energy Policy so desperately needed by America.

WOLFF CALLS FOR EPA STUDY OF NORTH HILLS DEVELOPMENT PLANS

The preservation of our cities and communities from the threat of environmental damage is a matter of utmost importance to me, for any careless disregard of potential hazards today, will only jeopardize the future well-being of our families and the lives of our children.

While I do not believe the federal government should impose itself on local zoning and planning matters, I am deeply concerned with the impact an enormous population increase in one community, in this instance the Village of North Hills situated near the Nassau-Queens line, will have on the 6th Congressional District.

Whether our vital natural resources—fresh water and clean air—will remain in sufficient supply to meet new demands, and whether the area's municipal services—waste disposal, police and fire protection, highways and school systems—can withstand further influx without costly tax restructuring, are the questions that must be answered with complete candor.

I have requested the U.S. Environmental Protection Agency to begin an in-depth study of the conditions relevant to the anticipated population change and to issue an environmental impact statement that will guide both the village and the surrounding communities in their efforts to mutually resolve this serious problem.

MORTGAGE BREAK FOR UNEMPLOYED

This nation's high unemployment rate continues to place an intolerable strain on the American family and is a major cause of breaks in the structure upon which our society is based.

Today, many of those unable to find a job are threatened with the loss of their homes because they cannot pay their monthly mortgage commitments.

I have introduced legislation, HR 3389, to offset this painful reality of unemployment. My Bill would establish a Federal Housing Bank to purchase mortgages from the Federal National Mortgage Association and the Federal Home Loan System and refinance these mortgages for families stricken with unemployment.

In brief, this legislation would provide emergency mortgage relief and less expensive mortgage money to financially strapped families and individuals unable to hold onto their homes due to circumstances of unemployment.

FUSION ENERGY EXPERTS LAMENT BUDGET SLASHES

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. BURGENER. Mr. Speaker, in the firm belief that our Nation's energy situation is on the threshold of becoming a major economic, social, and political crisis, I feel obliged to share with my colleagues and the readers of the CONGRESSIONAL RECORD the following thought-provoking article by Mr. Bob Corbett, science writer for the San Diego Evening Tribune.

[From the San Diego Evening Tribune, Feb. 25, 1977]

FUSION ENERGY EXPERTS LAMENT BUDGET SLASHES

(By Bob Corbett)

DENVER.—President Carter's just-announced budget cutbacks could have a "major impact" on the nation's quest for fusion energy, perhaps delaying its realization into the next century, it was asserted here yesterday.

This somewhat dismayed reaction to the proposed $80-million slash in fusion research funds was expressed by several experts in the field.

The cuts would delay several experiments needed for the quick development of fusion, which many scientists view as the ultimate answer to the nation's and indeed the world's, energy problems.

Fusion research represents the scientific effort to tap the power of the hydrogen bomb for peaceful purposes. This power stems from the release of energy that comes by forcing atoms together, or fusing them. It is a much more powerful process than that used by current atomic plants that gain their power by splitting the atom.

The cutbacks, however, apparently will not affect the Doublet III program, a fusion project now being constructed by the General Atomic Co. in San Diego's Sorrento Valley.

Stephan Dean, a leading scientist for magnetic fusion programs with the U.S. Energy

Research and Development Administration in Washington, D.C., indicated that the Doublet project is too important to be pared.

It is one of the two most important fusion experimental programs in the country, Dean said in an interview at the 143rd annual meeting of the American Assn. for the Advancement of Science.

However, Dean said, the fund cutbacks would cause significant delays in other important magnetic fusion projects, some of which are already under construction. They could cause the layoffs of hundreds of scientists and engineers, he said.

The projects are located at top research centers, including Princeton University, the Los Alamos Scientic Laboratories and the Sandia Laboratories in Albuquerque, he said.

Dr. Richard L. Schriever, another ERDA scientist, who deals with laser fusion, echoed some of Dean's dismay.

Important programs investigating how laser beams can be used to touch of the fusion process will be delayed at the Lawrence Livermore Laboratories near Berkeley as well as at Los Alamos and Sandia, he said.

Ironically, the Carter cutbacks have come just at a time when fusing scientists believe they are on the brink of taking fusion power out of the laboratories and into the realm of practical reality.

Dr. Peter L. Auer of Cornell University told an AAAS audience that recent advances indicate a practical demonstration of fusion power could come within about five years. Dr. Edward A. Frieman, associate director of Princeton University's Plasma Physics Laboratory, agreed.

The problem of fusion physics is almost over, the scientists said, and the time has come to begin thinking about the technological developments needed to turn fusion power into a safe, sure and economical source of energy.

It has been pointed out many times that there is enough hydrogen in the sea to fuel fusion plants for millions of years.

These developments were welcomed by Clinton P. Ashworth, a top engineer for the Pacific Gas and Electric Co. Industry has been eager for such words, he said, because it needs to start planning now on just how to build fusion reactors, where to place them and how to work them into an energy delivery system.

The development of fusion energy, the scientists explained, depends on containing the nuclear fuel at high enough temperatures (100 million degrees), at extreme densities for long-enough periods of time for the fusion reaction to take place.

The scientists indicated that the worst of these problems now seem on the verge of solution either by using strong magnetic fields to confine the reaction or through the use of laser beams to implode small pellets of nuclear fuel.

That's why the Doublet III program is so important, Dean said. Construction scheduled for completion in about a year, he said, with testing to start later.

The project, he said, will represent the first attempt to bring these fusion factors of time, density and temperature together in a prototype-like machine.

The hope, scientists indicated, is that some sort of pilot fusion plant could be in operation by the mid- or late 1980s.

The Carter cutbacks, Dean said, are apparently the results of a decision to opt for short-range energy programs such as conservation and coal and to string out long-range solutions like fusion.

If such reductions represent a continuing trend, he said, the fusion program could be delayed for many years, even to a point where it would no longer have a realistic goal.

Fusion scientists, Dean said, have had no opportunity to discuss the problem with Carter administration people.

TO END MANDATORY RETIREMENT

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. FINDLEY. Mr. Speaker, passage by Congress of legislation to outlaw mandatory retirement may prove to be the most important contribution to human rights of any action the 95th Congress can take. Mandatory retirement is the last remaining legal form of discrimination in our society. It permits the Federal Government and private employers to force people to retire simply because they reach an arbitrary age, usually 65.

During my testimony this morning before the House Select Committee on Aging, it became apparent to me that now is the time to close the so-called bona fide loopholes in the 1967 Age Discrimination in Employment Act. Even though the act is designed to protect those between the ages of 40 to 64 from discrimination in employment because of age, section 101, 4(f), (1) and (2) have seriously hindered the successful application of the law. These clauses allow employers to make age a condition of employment and exempt certain pension and retirement plans from the full force of the law.

On the first day of the 95th Congress I introduced H.R. 65, a bill to extend the Age Discrimination in Employment Act to those age 65 and older. That extension will be less than complete if the bona fide loopholes are not closed.

To that end I am introducing today a bill that will close those loopholes and make all necessary statutory changes to assure that an extension of the Age Discrimination in Employment Act will have the desired effect of ending every legal sanction to the cruel practice of mandatory retirement.

The public clearly wants to do so. A recent Harris poll shows that 86 percent of those surveyed oppose policies which require retirement at a set age.

For many retirees lost income is a critical problem. Despite efforts to strengthen pension funds, many retirees live on less than half their working income and watch their standard of living erode with each year of inflation.

Beyond financial hardship, mandatory retirement blocks the fulfillment of a basic need—the self-esteem gained from useful employment. The case files of physicians and psychiatrists bulge with tragedy: the records of patients whose health deteriorates rapidly once they retire. Lacking the challenge that will get them up and going each morning, they literally fall apart and find an early grave. The day of retirement is often as great a shock as the death of one's spouse.

Happily, not all people are forced to retire. Many continue working at advanced ages. They help themselves financially and psychologically. At the same time they enrich economy, helping to create jobs for others.

Many of the names are well known: Eugene Ormandy, 77; Col. Harland Sanders, 87; S. I. HAYAKAWA, 71; George Burns, 81; Ted Geisel, better known as Dr. Seuss, 73; George Meany, 83; Katherine Hepburn, 68.

Benjamin Franklin helped write the U.S. Constitution at 81. Grandma Moses was still painting at 100. Winston Churchill was British Prime Minister at 77. Oliver Wendell Holmes was still a powerful influence in jurisprudence at 90.

Of course, most workers want to retire when they reach age 65. Their right to do so must be protected. But many today are forced to retire even though they correctly sense that they are more effective at work than ever. It is easy to understand why they lose their faith in the American commitment to equal justice for all. It is high time Congress ended this last remaining legal sanction to widespread discrimination.

ORGANIZING FOR DISORDER

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mrs. HOLT. Mr. Speaker, there are those of us who feel the unionization of the military, a goal being pushed by the American Federation of Government Employees to swell its treasury, would have a disastrous impact on the ability of our Armed Forces to defend our country. It would be utterly destructive of the discipline and good order necessary for efficient, combat-ready military forces.

The Baltimore News-American on March 15 ran an editorial on this subject that is worth the attention of every Member of this House. I submit it for the RECORD.

ORGANIZING FOR DISORDER

If you are a member of the armed forces in some western European nations you can grow a beard like Solomon's, shave your head like Telly Savalas, or let it sprout into the most defiant hirsute halo imaginable. You won't even have to salute a superior officer unless you happen to feel like it.

The reason why you could get away with such independence in allied countries like The Netherlands is because you belong to a union, the purpose of which—naturally—is to promote the maximum self-interest of its members.

In Holland, as a result, only the windmills can be depended on, a dismal fact which the present commander of NATO forces would quickly affirm in private. He might also have strong private opinions on the general reliance of this nation's present all-volunteer army.

Nothing is ever so bad that it can't be made worse. And that is precisely what our largest union of federal employes has in mind. Unless a pending referendum of present members nixes the idea, the union this fall will attempt to sign up our 3.2 million uniformed military personnel.

Kenneth Blaylock, president of the American Federation of Government Employes, attempts to take the built-in curse off his ambition by declaring his proposed union never would consider going on strike. Its sole purpose, he claims, would be to organize grievances and better the working conditions of G.I. Joe.

Well, just think that over. If you are a healthy young man or woman unable to find

work elsewhere, you can enlist in our armed forces tomorrow and everything will be provided—the best food, clothing and social insurance available to military personnel anywhere in the world.

In exchange, from any reasonable viewpoint, you are supposed to realize that you are part of a machine whose function depends on coordinated, unquestioned teamwork. You are expected to take orders.

Congress, to its credit, has produced numerous pending bills to block the proposal for a unionized military personnel. President Carter and Labor Secretary Ray Marshall are vehemently opposed. So are we, and so—we are convinced—should be the American people in general.

Collecting dues from a potential 3.2 million persons is a mighty attractive idea to a union leader. What is really due—and far more important to the United States of America—is an organized, committed and reliable force whose sole allegiance is to serve the common cause.

The very idea of unionizing our armed forces is nutty, extremely poisonous, and an invitation to open challenge by those whose fundamental conviction is that might makes right.

It should be shot down, right now, and we urge President Carter to take the initiative with an unqualified statement of renunciation.

COPING WITH THE BUREAUCRACY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. DERWINSKI. Mr. Speaker, an article by Richard E. Friedman, appearing in the January-February edition of the Chicago Bar Record, has just been brought to my attention.

Mr. Friedman is a distinguished public servant who has served as a Regional Director of the Department of Health, Education, and Welfare for region 5, for the past 5 years. Previously, he served as first assistant attorney general of Illinois.

Therefore, his article, "Coping with the Bureaucracy," is based on firsthand knowledge and experience. I especially commend this article to the members of the Carter administration who have expressed interest in restructuring the Federal bureaucratic monster:

COPING WITH THE BUREAUCRACY

(By Richard E. Friedman)

In a recent article published in the Chicago Bar Record,[1] Federal District Judge Frank J. McGarr enunciated McGarr's First Law: "Whatever Government Does, It Does More or Less Badly." The objective of government, according to Judge McGarr, is to act with ". . . clarity of purpose, brisk efficiency, dedicated personnel and a notable record of achievement and success."[2] I sense that much of Judge McGarr's frustration stems from litigation he has heard involving the government. As a well-known party defendant (in my representative capacity, of course), the best defense I can muster is a plea of nolo contendere.

This article analyzes the reasons for the problem, and suggests methods for dealing with it. My observations are based on some 20 years of experience in state and local government and as a professional outside critic of the operation of government. The modest purpose of this article is to move forward the cause of effective government operation. I have provided a specific enumeration of basic problems such as size, volume, complexity, regulatory and organizational problems. Changing this array of problems will require a massive effort, and beneficial changes will not occur immediately.

The first consideration in dealing with the problem Judge McGarr has stated is the size and responsibilities of the various federal agencies. For example, the Chicago Regional Office of the United States Department of Health, Education, and Welfare covers the states of Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin, and serves 45 million people (about 22 percent of the country's population). The office administers some 325 governmental programs and disburses some $21 billion annually (about $2.5 billion in Cook County alone). About 14,000 employees working in 275 branch offices which report to seven major administrative divisions attend to this considerable volume of work.

As part of the 1976 federal budget presentation, we prepared a so-called "mess chart" depicting the various agencies which are required to act as checkpoints for the processing of one funding application on a relatively simple program. Thirty-two separate agency checkpoints were shown, amid a hopeless tangle of lines connecting the various agencies. In looking at this chart, one wonders not about the issue of efficiency, but how anything is ever accomplished.

Plans are being made by the new administration to reorganize government. This concept can be achieved and can result in improved governmental efficiency. However, I offer a note of caution.

Several years ago I served on a task force examining a possible reorganization of one facet of HEW which relates to health care. I had recently purchased a portable television set, and on a trip to Washington I found the schematic electrical wiring diagram for the set in my briefcase. I had a slide made of that diagram and used it (upside down, as I recall) as a reorganization plan in part of my lecture to the task force. The plan was well received, but fortunately only one-third of the participants at the meeting regarded the diagram as feasible for purposes of governmental reorganization.

Another problem relates to the regulations attached to the 325 programs which HEW administers. Each program is congressionally mandated, and a substantial body of rules, regulations and guidelines are associated with the enabling legislation. Regrettably, many of these regulations are needlessly prolix and unclear. This creates problems of interpretation for both the bureaucrat who is responsible for enforcement of the regulation, and for the person or entity being regulated. Moreover, the indexing of regulations is often outdated or nonexistent. A substantial part of the decision-making process becomes dependent upon bureaucratic institutional memory. Thus, a researcher is hampered by an inability to find a nicely indexed body of regulations describing precedents or containing helpful annotations. It should be noted that I am not describing practice before administrative tribunals involving the Immigration and Naturalization Service, the Internal Revenue Service and the Social Security Administration where there is, at least, an indexing system that would permit objective preparation of a matter.

An applicant or grantee usually requires guidance in deciding which program meets its needs. One of the responsibilities of federal bureaucrats is to provide technical assistance to bewildered applicants. Efforts in this area are good, but the applicant is frequently unable to organize the elements of his problem, and to make a clear presentation. The net result is that an applicant does not always receive the benefits of technical assistance.

I have used the term "bureaucrat" in a nonpejorative sense. In my experience as a bureaucrat I have found that my associates are competent people who try very hard to serve their clients—the public at large. Many practitioners have probably never seen a real, live bureaucrat close up, although bureaucrats can be readily identified by a harried look. The reason for this condition is that they must work full time with the complexities and frustrations of government that I have described, whereas an applicant's frustration with government is only intermittent.

Then, too, decisions made by bureaucrats are predominantly ones that make others unhappy. For example, we usually have many applicants for limited funding, and the proportion of disappointed applicants to successful ones is very high. Also, a program manager may be accountable for the expenditure of many millions of taxpayers' dollars. The reward for taking chances is minimal, and the exposure for a wrong decision is very great. Thus, the natural inclination of a bureaucrat is to be cautious.

Moreover, bureaucrats have the unenviable task of dealing with a wide array of social problems—such as student desegregation, busing and health care delivery—which society has not satisfactorily resolved. Another factor that frustrates bureaucrats is that, for the most part, the people with whom they deal have only a minimal understanding of the processes of governmental decision making, and consequently there are often unbridged communication gaps.

Much of the activity involving federal programs occurs at the regional level. Policy is usually made in Washington, while the implementation of policy involving allocation of funds and enforcement of regulations is made in the regions. The advocacy role I have described does not constitute lobbying for new governmental policy, which is a different kind of specialty. Rather, the role of the lawyer is to try to apply policy to a usually confusing factual situation.

I suggest there is an advocacy role that a lawyer can serve on behalf of a client who either is applying for a federal grant or is already participating in a federal program. Such an assignment must be handled knowledgeably and sensitively. On occasion I have seen lawyers create problems with the bureaucracy for their clients by their lack of understanding of the process of government, or by their efforts to formalize what is essentially an informal forum. Snatching defeat out of the jaws of victory is a real peril in this setting.

The lawyer's requisites for this specialty would include a knowledge of the processes of government. While expertise in specific program areas is helpful, it is not an imperative—for two reasons: first, there are approximately one thousand federal human service programs, and it is unlikely that anyone can acquire expertise in more than a few programs; second, the real barrier is usually the identification of one or two key issues—and sufficient knowledge about these kinds of issues can be readily acquired. Problem analysis, a skill of lawyers, could be utilized to cut away extraneous issues so as to reveal issues that are oftentimes rather simple and resolvable.

Many decisions, of necessity, come down to a determination of the shading of gray areas. A practitioner who can array the facts of the matter and make a brief and logical presentation is well received by the bureaucracy—but this happens only infrequently. Often a client may reach an impasse with a government regulator. Hard lines are taken on both sides, scar tissue forms, and a deadlock occurs which must then be resolved by litigation. A skillful lawyer can rescue a

[1] 58 CHI. BAR REC. 22 (1976).

[2] Id. at 22.

client by recognizing the multi-facets of an issue and advising him accordingly.

Perhaps this approach will result in McGarr's Second Law, loosely stated: "Government Does Better Than It Used To." Many costly and time-consuming lawsuits can be avoided by the timely intervention of lawyers, and a lawyer acting in this area performs a service to his client and the government. I sense that Judge McGarr and other federal judges would prefer to hear far fewer cases involving the government, which would relieve judges of the unwanted role of extra-legal bureaucrats.

WATER-THIRSTY CALIFORNIA

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. ROUSSELOT. Mr. Speaker, President Carter's February 21 message to the Congress recommending deletion of funds in the administration's fiscal year 1978 budget for 19 water resources development projects shook water-thirsty California like an earthquake registering 7.4 on the Richter scale. In a totally nonpartisan manner, the 43 members of the California congressional delegation have banded together to encourage an immediate reconsideration of this February 21 recommendation by President Carter. Most Californians are aware that the Auburn-Folsom South, Central Valley project in northern California was directly affected by this Carter decision. This project is an important element in California's total water system. How irresponsible can bureaucrats be—with 71 percent of the foundation treatment construction completed as of the end of January 1977, this project represents an investment of more than $50 million of taxpayers' money. Obviously, Californians cannot afford to wait for mandatory rationing of water before they appeal directly to the President and urge him to rescind this misguided recommendation. Because water projects require careful, long-range planning, we cannot allow certain "environmental extremists" to so conveniently and quickly provide the President with a "hit list" of projects which, by their judgment, should be removed from ongoing construction. We need to raise our voices now in opposition to such one-sided decisions and deletions by fiat.

In February, immediately following the President's announcement that he had instructed the Secretary of the Interior and the Secretary of the Army, working with the Council on Environmental Quality and the Office of Management and Budget, to undertake an evaluation of the 19 water resources projects for which he was not requesting funding for fiscal year 1978, the House Committees on Public Works and Interior and Insular Affairs held hearings to receive testimony on water resource and reclamation projects. The members of the California congressional delegation, together with Senators CRANSTON and HAYAKAWA, have immediately gone to work to make sure that the point of view of the majority of California is heard above the criticism of those in the environmental movement who would hope to return California to the Stone Age.

The chairman of the Public Works Committee, fellow Californian HAROLD T. (BIZZ) JOHNSON, has sent letters to President Carter making the following point: Section 80 of the Water Resources Development Act of 1974—Public Law 93-261—directs the President to study and report to Congress on the principles and standards to be used in the formulation and evaluation of water resources projects and appropriate Federal and non-Federal cost sharing for such projects and project policies should be done in the context of section 80 rather than unilaterally as it is now being done. Chairman JOHNSON has also recommended that observers from the appropriate congressional committees be present during the project evaluation process, that criteria and data collected by the agencies be public information, and that, in the last review, projects which are in difficulty should be subject to public hearings.

In support of the effort to utilize every available resource which will provide water supplies for domestic uses, irrigation and energy development I plan to join with Senator PETE DOMENICI of New Mexico in finding ways to reinstitute the now expired Saline Water Conversion Act of 1971. In view of the serious drought conditions in California, and the entire West, it is essential that we develop water supplies for the future—supplies which are contained in saline river waters, coastal brackish water, and vast brackish or saline aquifers that are known to exist beneath every Western State.

It is appropriate that plans be in effect for long range water delivery systems. Both Senator DOMENICI and I hold the strong conviction that the Federal Government should have a definitive program for water resources research and development. Californians know that the saline waters of the Pacific Ocean provide a potential resource for water conversion. Research will produce the necessary technology to show the most feasible and economic method for development of the water supplies so necessary for human sustenance and survival. The recent shortages of snowfall and rain make it obvious that we cannot fall behind in our responsibility to the people of California. The Congress must move swiftly and forcibly to find both short term and long term solutions to meet our future water needs. Many of us have pledged to work aggressively for legislation which will encourage development of an important natural resource—water.

THOUGHTS ON REHABILITATING DRAFT DODGERS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

[From the Navy Times, Feb. 28, 1977]

THOUGHTS ON REHABILITATING DRAFT DODGERS

(By J. D. Hittle, Brig. Gen., USMC (Ret.))

There isn't much purpose in arguing that the draft dodgers shouldn't be given a pardon. The issue for all practical purposes is closed.

When the President made his decision, that, for now, ended the argument.

But while the argument of whether there should be a pardon is meaningless, there is real meaning in taking a look at what the pardon means.

And that's a big order. This pardon goes so widely and deeply to fundamentals of military service and the obligations of citizenship that this column doesn't have the space even to briefly tick off all the pertinent issues involved.

There are a few things that are already sharply clear. In the first place, the pardon of draft dodgers might be interpreted as giving the citizen the right to decide, in the future, whether or not he believes that the war he is called to serve in is a "just" war. If he doesn't think so, then what can he do? In the light of the pardon, he can well conclude that he can run for Canada, or any other country that will tolerate him. There, in safety from shot and shell, he can wait out the war.

When it is over, there will always be self-appointed moralists who will acclaim border-jumpers as being braver than those who, whether they liked it or not, answered their country's call to arms. And those who ran away will have reason to believe that they will be pardoned and welcomed home.

If that should happen, they would, of course, also be able to come home intact. That's a lot more than can be said for the good citizen who did his duty and was crippled or killed in answering his country's call to arms.

The most disheartening aspect of the entire pardon issue—and this, in fairness, was not an element of the pardon action itself—is the gushing tribute to the "conscience and courage" of the draft dodgers in being spiritually strong enough to refuse to get shot at!

This, obviously to any serviceman, is plain hogwash. It was a lot safer taking a bus to work in Toronto or Vancouver than pushing to the top of a Red-held hill in Vietnam.

Somewhere in all of the talk about justice to the poor draft dodgers something has been widely missed by a lot of people. That something is the matter of justice to the person who didn't cut-and-run, the person who accepted his obligation of citizenship and answered his country's call. The man who runs away from military service, at least from the moral standpoint, commits pretty serious crimes.

The first, and probably the most obvious one, is that he evades the draft. That's bad enough. But there is more to his list of wrongdoings. When he refuses to do his duty, it means that someone else has to take his place. Someone who obeys the law has to take the draft dodger's place in the long line, moving, in a sense, toward the "firing line."

There is no way of ever totaling up the tremendous number of good servicemen who were wounded, maimed or killed by the simple process of moving up ahead of their normal turn because of those who ran away from the draft and military service.

What this, in turn, means is that by not doing their duty, by running away, the draft dodger was in a real way responsible for the wounding or death of the one who was in combat where the evader should have been.

So when we hear all this mush about the conscience of the draft dodger, let's hope that he has enough conscience to realize and remember that another American—a better one than he—may well have suffered, even

died because of his refusal to do his duty as a citizen. The pardon may clear a lot of his legal problems, but if there is a bit of moral fiber in his body, the pardon should never clear his conscience.

Of course, as the years wear on, the draft dodgers will become more mature simply by the process of aging. We can hope that with his maturity will come, at least for some, a realization of the enormity of their crime against their country and against their fellow Americans.

As a means of perhaps hastening that realization—at least in the minds of a few of the border-jumpers—there is something that might be done.

I propose that each draft dodger who benefits from the pardon should receive, from the government on which he turned his back, a reprint of the once-famous story of Philip Nolan.

Philip Nolan was "The Man Without a Country."

As the story relates, Nolan was stationed at a fort on the western frontier following the Revolutionory War. He was an admirer of Aaron Burr, and was eventually accused of being involved in Burr's alleged conspiracy. Nolan was tried by a general court.

In a flash of resentment and anger he told the court, "Damn the United States. I wish I may never hear of the United States again." Well, the court sentenced him to have his wish. Moved from one Navy ship to another, he never again saw U.S. soil, No one was allowed to mention the United States in his presence.

What makes Nolan's tragic story so pertinent is that the draft dodgers, in a real sense, turned their backs, like Nolan, on their country. In skipping across the border to evade service, they, too, in a sense, renounced their country. They were luckier than Lt. Philip Nolan. They were pardoned.

But if they were each sent a reprint of "The Man Without a Country," some few just might read it. They would, then, perhaps better understand the crime they committed, and the fate of self-ostracism from which they were spared by the pardon.

The letter to each one pardoned should ask that he at least take time to read one paragraph of the story. It has the sad advice of Philip Nolan as he neared his death at sea. These were his words, born of the torment of a man who turned his back on his country, and lost her.

"And for your country, boy, and for that flag, never dream a dream but of serving her as she bids you, though the service carry you through a thousand hells. No matter what happens to you, no matter who flatters you or abuses you, never look at another flag, never let a night pass but you pray to God to bless that flag."

Such reading would be pretty strong medicine for draft dodgers. But, for a few, it might keep them from telling their sons to do as their daddies did when it is their turn to answer their country's call.

They would be doing their sons a favor. It's possible, of course, that the next time the border jumpers won't be pardoned. Then they like the tragic Philip Nolan could live out their lives as latter-day men without a country.

It would serve them right.

NORTHERN IRELAND

HON. BRUCE F. CAPUTO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. CAPUTO. Mr. Speaker, we are all painfully aware of the troubles currently besetting Ireland. The conflict in those six of divided Ulster's nine counties known as Northern Ireland is now in its seventh year. All of the solutions that have been tried up to this point have not borne fruit, yet the problem will not go away. It remains not only as a tragedy for modern Ireland, but it prevents the reconciliation of the Irish and British peoples and constitutes a threat to the peace and stability of the North Atlantic community and, therefore, to the security of these United States.

But I do not bring before this House a problem without also bringing a possible solution. The solution which I propose for consideration is one for which precedent exists not only in Irish history, but in the history of the United States. A possible means of insuring local autonomy and the protection of minority rights, while at the same time eliminating the instability inherent in unsatisfied irredentism, might be a Federal solution. That is to say we might consider allowing the people of Ireland the same opportunity which we enjoyed in Philadelphia in 1787, to sit down in convention together, all parties, free of foreign hindrance, and write a new Constitution for a new Ireland which will be as congenial to the needs and traditions of all the people of Ireland as the Constitutions of the Swiss Confederation and of the United States are for their own peoples.

This is not an idea which is historically foreign to the Irish genius. It is an Irish solution found in the decentralized democratic federalism of Ireland's own past in accordance with the principle of subsidiarity.

Over half a century ago, Winston Churchill prophesied the tragedy of keeping Ireland divided:

> It would be a disaster to Ireland, if the Protestant population in the North stood aloof from a national parliament. . . . Whatever Ulster's right may be, she cannot stand in the way of the whole rest of Ireland. Half a province cannot impose a permanent veto on the nation. Half a province cannot obstruct forever the reconciliation between the British and the Irish democracies. . . . I say really what the Southern Irish most desire and what Irishmen all over the world most desire is not hostility against this country but the unity of their own.

In order that the United States might be able to play a constructive role, however passive, in the restoration of peace, justice, and respect for human rights in all Ireland, I urge that congressional hearings be held on the Irish question so that we may have all the facts.

To this end I commend to this House an article by James Kevin Fitzpatrick of Westchester County, N.Y., from National Review magazine of August 30, 1974, entitled "A Way Out of Ireland's Dilemma?" It explores a possible federal solution proposed by a former member of the British Parliament, Hon. Frank McManus.

PUBLIC OFFICE IS A PUBLIC TRUST

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. JOHN T. MYERS. Mr. Speaker, as a member of the House Committee on Appropriations, I share with other Members of the House a continuing concern with seeing that public funds are used in good faith for the purposes for which they are appropriated. In this connection, I am increasingly bothered by what seems to be a violation of the basic principle that a public office is a public trust, and public funds should not be misused for purposes of political advantage.

I refer to current efforts of people in the Department of Agriculture and in the White House to replace Federal employees holding the positions of State director of the Farmers Home Administration and State executive directors of the Agriculture Stabilization and Conservation Service with political supporters of the Carter administration. The Farmers Home Administration is an agency within the Department of Agriculture which provides credit for those in rural America who are unable to get credit from other sources at reasonable rates and terms. The agency operates principally under the Consolidated Farm and Rural Development Act (7 U.S. Code 1921) and title V of the Housing Act of 1949 (42 U.S. Code 1471). Applications for loans are made at over 1,750 local county offices, generally located in county seat towns throughout the United States. I cannot overemphasize the importance of the Farmers Home Administration.

The Agricultural Stabilization and Conservation Service was established by the Secretary of Agriculture in 1961 under authority of an act of Congress (5 U.S. Code 301), and the Reorganization Plan 2 of 1953.

Just as the Farmers Home Administration is managed by a director in each State, so the Agricultural Stabilization and Conservation Service is managed by a State executive director. The ASCS is an agency of the Department of Agriculture that administers specified commodities and related land-use programs designed for voluntary production adjustment, resource protection, and price, market, and farm income stabilization. It is critical to the public interest that the operations of these two agencies be carried forward on a nonpartisan, nonpolitical basis by experienced and professional State directors. Apart from that, any effort by the Department of Agriculture or the White House to replace the present State directors for political reasons would be a violation of the rules of the U.S. Civil Service Commission, certain Federal criminal statutes, and the first amendment of the U.S. Constitution.

These State director positions are listed in schedule A of the Civil Service Commission rules. They are defined as "positions other than those of a confidential or policy-determining character for which it is not practical to examine" (5 CFR 6.2). As pointed out by the House Committee on Post Office and Civil Service in its publication "Policy and Supporting Positions" there is a list of "political jobs" which are listed in schedule C of the Civil Service Commission rules and are defined as "positions of a confidential or policy-determining character". Incumbents of "noncareer executive assignments" and schedule C positions "serve at the pleasure of the agency head because the positions' excepted status reflects such considerations as advocacy of

administration programs or policy-determining responsibilities." However, positions in schedule A are excepted from the competitive civil service solely because it is impractical to hold competitive examinations for the jobs.

Apart from violation of U.S. Civil Service Commission rules, replacement of persons holding these schedule A positions in the Farmers Home Administration and the ASCS by the Carter administration for political reasons would violate the spirit and probably the letter of laws enacted by Congress which makes it a crime for any person directly or indirectly to promise, appoint, or deny employment in a Federal job in consideration for political support. The Supreme Court of the United States has recently in *Elrod* v. *Burns*, 96 S. Ct. 2673, reaffirmed the principle that Federal employees have a first amendment right not to be denied Government employment on the basis of their political views and forbids the imposition of political allegiance as a condition of Federal employment.

My greatest concern at the moment arises from the fact that the Department of Agriculture, recognizing the illegality of replacing State directors of the Farmers Home Administration and executive directors of the Agricultural Stabilization and Conservation Service for political reasons, is now taking the position that these positions are wrongly classified in schedule A and should be reclassified by the Civil Service Commission in schedule C. A United Press International wire story appearing in the Nation's newspapers on March 5, 1977, quoted Secretary of Agriculture Bergland as follows:

> Bergland said in an interview he is asking the Civil Service Commission to reclassify the State ASCS executive directorships from "schedule A" to "schedule C". The "C" category is used for policymaking and confidential assistant posts, and people in such jobs can be replaced at any time with no civil service protection. . . . Another agriculture official said he assumed if the state directorships were reclassified, many of the current occupants would be replaced.

There is being organized a Committee for the Protection of First Amendment Rights of Department of Agriculture Employees under the chairmanship of Carl L. Shipley, a distinguished Washington lawyer who served for many years as a member of the Republican National Committee. I think it would be a tragedy for the Carter administration to try to return us to the discredited "spoils" systems of political patronage, where the winner takes all and fires loyal public servants in order to replace them with his political supporters. Congress established the U.S. Civil Service Commission in 1883 in order to promote a system of Federal employment based on merit instead of political patronage. The rules of the Commission provide generously for Presidential appointees in "political jobs" which involve confidential work or policy-determining activities. And I agree that the President should have the power to appoint his own policymaking colleagues to help him carry out his programs. This is a principal purpose of free elections. But no President can be permitted to subvert the rules of the Civil Service Commission, or evade the law by asking the Civil Service Commission to reclassify schedule A positions as schedule C positions in order to increase the number of "political plums" he can hand out to his supporters. All of us in Congress share a common responsibility to maintain our present system of Federal employment based on merit and competence instead of "political spoils."

BUKOVSKY TELLS AFL–CIO LEADERS ABOUT DENIALS OF RIGHTS IN SOVIET UNION

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. EILBERG. Mr. Speaker, in the wake of the detainment of Anatoly Scharansky by the Soviet security police for questioning and on this, the day that the Helsinki Commission is meeting to hear testimony about the Soviet noncompliance with the right of emigration with respect to Soviet Jewry in accordance with the Helsinki declaration, I would like to enter into the RECORD a transcript of an address given by Vladimir Bukovsky before the AFL–CIO Executive Council at its recent meeting in Bal Harbour, Fla.

Mr. Bukovsky, who recently testified at hearings conducted by the Commission on Security and Cooperation in Europe, spent 12 of his 34 years in Soviet prisons. He has been in the forefront protesting the lack of civil liberties in the Soviet Union and the misuse of psychiatry. He was released last year in exchange for the leader of the Communist Party of Chile.

At this time, I submit for the RECORD a transcript of Vladimir Bukovsky's address:

ADDRESS OF VLADIMIR BUKOVSKY

We, in the Soviet Union, well know that the AFL–CIO is our permanent and dependable friend—a friend whose concept of freedom is not affected by international boundaries.

I would personally like to thank the American workers who took part in the campaign to protect me which ended in my being liberated. American labor unions have proven many times over that for them the word solidarity is not a mere slogan—not mere rhetoric, but day-to-day practice.

We remember that in 1947, when nobody in the West wanted to hear anything about mass terror in the land of the recent ally, it was the American labor unions who collected the testimonies of a great many former Soviet political prisoners and published the first map of the Gulag Archipelago.

When the American government was in one of its periodical states of readiness to save the collapsing Soviet economy and thus strengthen the totalitarian system, the position of the American labor unions turned out to be decisive and the Soviet Union did not receive most-favored nation treatment.

It was only recently that I had the opportunity to read Mr. Meany's address to the Senate Foreign Relations Committee on 1 October 1974 and I can testify that all of my fellow prison inmates would have put their signatures under that speech.

I have come to you as a representative of Soviet political prisoners to discuss with you the best ways of helping those who are persecuted, exploited and deprived of freedom. When I am asked here how many political prisoners there are in the Soviet Union—I answer "250 million". And, this is no joke because we live in a country which is surrounded by barbed wire, in which slave labor exists, in which there is no freedom of movement, where the defense of one's rights is considered to be an offense against the criminal law code.

When the workers in the USSR read in Soviet newspapers numerous, detailed dispatches about all the strikes in the West, many of them seriously believe that you must be dying of hunger: in the Soviet Union only a person directly threatened by starvation would decide on such an extreme act as a strike. The rare, desperate strikes in the Soviet Union do not occur in the demand of better working conditions or a raise in pay—but only when the workers and their families literally have nothing to eat.

The weavers in Ivanovo struck in 1970 when food ceased to be supplied to the city. As the USSR Helsinki Accords Monitoring Group informs us, four port workers in Riga were arrested in May, 1976 and in August sentenced to one and a half to three years deprivation of freedom after a strike which took place because of the absence of meat in the food stores.

The Soviet Union has signed various international conventions recognizing the right of workers to strike. But it has not bothered to formulate this right in its own legislation. Moreover, strikes are regarded as a "rude, group violation of social order," for which one can be deprived of freedom for up to three years. This is for a completely peaceful strike—merely a refusal to work. When it comes to other forms of struggle—such as sit-down or picketing—these are punishable under the article entitled "mass disorders," by deprivation of freedom up to fifteen years or by the death penalty.

In the West, the decision to strike is usually taken by the labor union. In the Soviet Union, this is beyond imagination. Soviet trade unions do not protect the workers against hunger, persecution or exploitation. Labor unions in the USSR are part of the party-government machine, which addresses itself not to the defense of the interests of working people, but only to the implementation of party-government projects. Even the Soviet Supreme Court, having looked into the practice of court cases involving illegal firings, was forced to point out that the labor union organizations are not observing labor legislation and do not defend the workers actively enough. Workers' complaints to labor union organizations are handed over by them to the KGB. In the verdict of the court in the political case of the truckdriver, Vladimir Pavlov (Maikop-town, 1971) his complaint to the district council of labor unions was taken to be material proof of his guilt. So, there is nothing surprising in the fact that for a ten-year period, the chairman of the Soviet labor unions was the former chairman of the KGB.

These fictitious Soviet labor unions exist to prevent a worker's movement from arising. The first article of the Soviet Constitution states: "The Union of Soviet Socialist Republics is a workers' and peasants' state". And every complaint from workers is regarded as an attack on the interests of the working masses.

The Odessa worker, Leonid Seryy, in a letter addressed to western heads of state and to the U.N. Human Rights Committee, writes as follows: "People who defend the right of the workers to strike and make various other protests are put into psychiatric hospitals. People who support the statements of Solzhenitsyn and Sakharov are picked up on the streets and tried on a charge of hooliganism. I, myself, have been a witness to such outrages. Having seen all this and felt it on ourselves, we have become convinced that in our country a working man has no right to protest, our labor unions also have no rights and do not attempt to acquire them."

This letter, which was sent out to the West as an attachment to one of the Soviet Helsinki Group's documents, contains a very concrete picture of the material deprivations and persecutions which are the fate of workers and their families. The highly qualified lathe operator Leonid Seryy is deprived of the opportunity to increase his earnings. In attempting to stick to pay limits imposed from above, the administration falsifies his working time and his production. His family—(a wife and six children) live in semi-starvation.

The workers of Riga struck because of the absence of meat, but Seryy writes: "Very seldom is there meat in the stores, but anyway, we have bought it four or five times in our whole lives, not more. So it doesn't bother us whether it is in the stores or not."

With an officially defined minimum living wage of 70 rubles per month per person. Seryy's family receives—included all bonuses for children—about 230 rubles per month. "We buy two pounds of butter per month . . . Almost all our clothes are hand-me-downs from other people. . . The kids go to school and I go to work without breakfast. . . . We have neither furniture nor a refrigerator. There are not enough blankets." Having received nothing but threats and humiliations—in answer to his complaints and protests, Leonid Seryy is now undertaking unsuccessful measures to emigrate to the U.S. or Canada with his family.

The worker electrician, Valentin Ivanov, of the village of Yermolino in Kaluga District, wrote to you, Mr. Meany, in November 1976 also asking for help in leaving the Soviet Union. In his announcement to the Presidium of the Supreme Soviet explaining his reasons for emigration, Valentin Ivanov writes, in particular: "The low level of pay. I can say with full responsibility that I have spent the best years of my life working for a piece of bread. The worker is completely defenseless against arbitrary action by management because of the absence of free labor unions. For instance in September 1974, I was forced to work for twenty hours on Saturday and Sunday without any pay. The labor union to which I complained took the side of management. I could give you dozens of examples such as this one."

The Ukrainian worker Ivan Sivak writes as follows: "I have been living for thirty years already in the Soviet Union, not living but existing. During these thirty years little has changed in the life of a worker. I live in poverty and need. My pay is barely enough to cover food. In addition, in the Soviet Union there is no justice, no freedom. There are limitations in all spheres of life. Everywhere a man feels himself a slave."

That is the way millions of Soviet workers think and feel, deprived of the right to vote, terrorized by the punitive organs. But the process of spiritual liberation is taking hold of more and more new layers of people, and already far more than one academician or writer is becoming the public voice expressing the needs of society.

We are present at the beginning of the process which will bring us to freedom. The process of realization on the part of the workers that they have rights and human dignity. The fate of our peoples, and not only in the Soviet Union but in Eastern Europe as well, will now depend on your position, on your solidarity and support. From whom can Soviet working people hope for support if not from their brothers in the West?

For decades, we have looked with hope at the West, expecting help from the free nations true to their democratic principles. What have we seen? You know better than I that the greatest building projects of the Stalin's five year plans, using in full force the labor of prisoners, were created through the use of western, above all American techniques and technology. Every time that the hopelessly inefficient Soviet economy is in need of resupply and support, western countries readily come to its support. They come to help—not the people—but the totalitarian regime.

In March 1970, Academician Sakharov and other participants of the civil rights movement in the USSR made a statement to the Soviet Government, pointing out that Soviet backwardness in the field of automation, and computerization of industry can only be overcome in an atmosphere of freedom, with free creative experimentation and scientific research. The western business world answered this warning by increasing deliveries of computers to the Soviet Union.

For me, the fact is symbolic that I was brought out of the Soviet Union in handcuffs of American manufacture, inscribed with the words "Made in USA." Such handcuffs are broadly used in the prisons and camps of the USSR.

KGB agents install audio-surveillance devices of western manufacture in the apartments of Soviet defenders of human rights. In Moscow, exhibitions of western police technology are organized.

These are only examples, not more than symbols: In the last analysis any economic aid to the Soviet Union and Eastern European countries, which is not conditioned on definite and strictly fulfilled demands, serves only to strengthen that prison of people which goes by the eloquent label of "the Socialist camp."

An integral part of the Soviet economy is the unpaid forced slave labor of three million prisoners. These prisoners are used in the most varied enterprises, the products of their labor are often included in the general flow of Soviet exports. The Baikal-Amur line, a railroad of strategic importance, is being built on Japanese money and on the slave labor of prisoners. In our concentration camp in the Urals, in the factory to which we were driven to work, there was an old "Cincinnati" milling machine. At this ancient machine tool, patched up with plaster, with broken handles, whole generations of prisoners had worked since the 1930's. This is a symbol of the "convergence" of American technology and Soviet slavery.

It would seem that we are a long way from the days of slave-holding societies, but even international conventions directed against slave labor accept the possibility of its employment with reservations. It is up to nobody else but workers and free organizations of workers to achieve a review of these conventions.

The question here is not just one of solidarity, but of mutual interests. Thus, western capital investments in the USSR, calculated on the exploitation of cheap labor, do direct damage to the interests of the workers in the West. I am certain that American labor unions—at the very least—have the right to examine all cases of investment of American capital in the USSR, the working conditions and pay in places where American capital is applied, to prevent money being made on the lack of rights of Soviet workers.

The specifics of socialist countries are such that the problem of labor cannot be solved apart from the problem of civil rights. The recent events in Poland have shown this most vividly. There, the workers' movement is much stronger and more mature than in the Soviet Union. But, in our country too the initial growth of this movement is connected with the general struggle for human rights. Hence, it is impossible to defend the interests of Soviet workers without defending the Soviet movement for civil rights and its participants.

The arrests of the participants of the Moscow and Ukrainian Helsinki groups, Yuriy Orlov, Alexander Ginsburg, Mikbla Rudenko and Oles Tikhiy are a blow to the incipient workers' movement.

I see that at present not only western society but also government officials, above all President Carter and his administration, are beginning to take up a firm moral position in regard to violations of human rights in the Soviet Union. I can only welcome this. But I know that voices are already sounding against this position; fears are already being expressed that the Soviet leadership will react and is reacting to this firmness with cruelty and repression and that maybe it is better not to anger the Soviet Union, but to return to the practice of concession and back-stage discussion.

And it is true that the Soviet Union is at present doing everything it can to prove that it scorns all western protests and will not weaken repressions. At this moment, the most important thing is to acquire patience, not lower your guard, not to expect speedy and immediate results. This is exactly my opinion of President Carter's position and I hope that American labor unions, which have great experience in the defense of human rights in the USSR, will support the President in his moral political actions.

I would also like American labor unions to continue to stress the civil rights problem in socialist countries in their contacts with the other labor unions of the free world. The international workers' movement could give very substantive aid to the Soviet workers and defenders of human rights—both through direct support and solidarity and through influence on politicians and statesmen.

CIVIL ENERGY FROM LASER FUSION—A GROWING REALITY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. PURSELL. Mr. Speaker, with this extension of remarks, I begin a series of installments regarding laser fusion and its applicability and probably of meeting our Nation's growing energy shortage. Recently, at Los Alamos, N. Mex., in the scientific laboratory, scientists produced the world's first thermonuclear fusion reaction generated by a carbon dioxide—gas—laser. This same reactor was obtained by KMS fusion in May of 1974 using a neodyniun glass laser which at the time could be equated to the first controlled fission atomic energy reaction under the stands at Stagg Field. The significance of the Los Alamos accomplishment is that it used a gas laser which is believed to be more adaptable to producing civil energy. The articles follow:

[From the Washington Star, Mar. 4, 1977]

LASER, A-FUSION BREAKTHROUGH CLAIMED

LOS ALAMOS, N. MEX.—Los Alamos Scientific Laboratory yesterday reported its scientists have produced the world's first thermonuclear fusion reaction generated by a carbon dioxide laser.

A spokesman called the achievement a major breakthrough in fusion research that could cut 10 to 20 years off time needed to develop a fusion reactor.

A laser is a device that uses the natural oscillations of atoms for generating light pulses, which then can be beamed at atomic particles. Fusion is the creation of enormous quantities of energy by the uniting of atomic nuclei.

[From the Washington Post, Mar. 4, 1977]

BREAKTHROUGH CLAIMED IN FUSION BY LASER BEAMS

LOS ALAMOS, N. MEX., March 3.—Los Alamos Scientific Laboratory claims its scientists have produced the world's first thermonuclear

fusion reaction generated by a carbon dioxide laser.

A laboratory spokesman called the achievement a breakthrough in fusion research that could cut 10 to 20 years from time needed to develop a fusion reactor.

A laser is a device that uses the natural oscillations of atoms for generating light pulses, which then can be beamed at atomic particles. Fusion is the creation of enormous quantities of energy by the uniting of atomic nuclei.

Dr. Sidney Singer, chief of the lab's carbon dioxide laser systems development of carbon dioxide lasers for fusion energy production.

The carbon dioxide laser has been called unsuitable for fusion projects involving targets of the hydrogen isotopes deuterium and tritium because it generates light with longer wave lengths than other lasers. But carbon dioxide lasers are thought to be more efficient and cheaper than glass lasers of comparable power.

The thermonuclear reaction was achieved with the laboratory's two-beam carbon dioxide laser—the largest and most powerful of its kind in the world.

A carbon dioxide laser facility scheduled for completion in 1981 is designed to achieve the breakeven point—where the amount of energy produced by fusion equals the amount used to trigger the process.

President Carter has proposed an elimination of fusion project construction funds from next year's budget.

The statement issued today by the Los Alamos laboratory did not mention that proposed cutoff.

Experimental laser fusion power generators are not expected to be operating before the 1980s. They would have an advantage over current nuclear power plants because there is no radioactive waste, and heavy hydrogen fuel is available in large quantities from sea water.

CONGRATULATIONS TO JIM DELANEY

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. OBERSTAR. Mr. Speaker, Saturday, March 19, is the 76th birthday of one of the most distinguished Members of the House of Representatives, Congressman JAMES DELANEY, of New York, chairman of the Rules Committee. On that day, as on all the days of his long career in Government, he will be a living exemplar of the true meaning of the Spirit of '76.

It is, of course, customary on certain occasions for Members of the House to offer laudatory remarks about an outstanding colleague. We often do so when they retire, move on to another post in Government, or pass away. But that is not the situation in this case, for I know that Congressman DELANEY is not about to leave this House of the people, where he has served for three decades, under any circumstances.

When JAMES DELANEY first came to Congress, in January 1945, the United States was reaching the end of a long and terrible ordeal, but her sacrifice in World War II had guaranteed that freedom would survive over much of the world. Now, 32 years later, much has changed in international affairs. But JAMES DELANEY's concern for human rights, both here at home and overseas, has not changed.

When he came to Washington, this country was about to lose a leader who had been an inspiration and a hope to millions of the needy and the neglected. I am sure that, had he lived to the present, Franklin Roosevelt would have been satisfied with the way the freshman Congressman from New York carried on his traditions and advanced his ideals. If it is not presumptuous for us to speak today in the stead of a former Chief Executive, perhaps we can say to our colleague what the man from Hyde Park would say to him: "Well done."

As an example of his dedication to the rights of all and his concern for the average American, he has for years been in the forefront of efforts to secure a tax break for the millions of youngsters and parents who support nonpublic and independent schools. This year, he has reintroduced what is known to parents and educators across the country as the Delaney bill (H.R. 3403), which I am pleased to cosponsor. It would provide tax deductions or credits to preserve the diversity of American education and to assist families, especially low-income families, to make their own decisions about their children's schooling. That sensible, equitable proposal is typical of Congressman DELANEY's initiatives over the years. It brings together in a common cause many Members of this Chamber who do not ordinarily see eye to eye. That, too, has been part of the Delaney record: reconciling his colleagues by keeping before us the public interest rather than personal goals.

His constituents, the people of Queens in New York City, know a good public servant when they find one. That is why they have kept him here so long and why they are apt to insist he stay after many of us are gone.

I know that every Member of the House will join me today in offering our congratulations to JAMES DELANEY upon his 76th birthday and in expressing to him our common request: that he share with us his secret of eternal youth.

MILITARY PERSONNEL CRISIS STILL GROWING

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 17, 1977

Mr. BOB WILSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

MORE THAN JUST DOOMSDAY RHETORIC—MILITARY PERSONNEL CRISIS STILL GROWING

(By J. D. Hittle, Brig. Gen., USMC (Ret.))

As President-elect Jimmy Carter prepares to take office, one of the most useful briefing papers he could have would be on the military personnel crisis.

This may well come as a surprise to the new Commander in Chief. After all, the serviceman—as far as the campaign was concerned—was the forgotten man.

If there is any such document in the Carter briefing file, it is fervently hoped that it has been written by someone who knows what he is talking about. That means someone who knows what the serviceman is talking about. Such a simple qualification eliminates the computer worshipers whose false economic proposals have generated so many of the military personnel problems the President-elect is going to find on his White House doorstep when he returns from taking his oath of office.

For too long, too many who should know better have been acting as if a personnel crisis doesn't exist because they say it doesn't. This hasn't helped President Ford in his difficult time in office. And such wishful thinking will be a disservice to the new President. He's the one who is going to have to come to grips with the growing crisis in military personnel matters.

There isn't any more space, even under the Pentagon's vast expanse of rugs, to sweep personnel problems.

For anyone who thinks that the talk about a military personnel crisis is doomsday rhetoric, here are a few symptoms to mull over:

Dissatisfaction: This covers a multitude of complaints, such as the unrelenting campaign to undermine and destroy the commissaries. Anyone who can claim that this issue hasn't upset service life hasn't talked with irate wives.

It takes bureaucratic determination and bumbling to get patient, normally shockproof service wives so mad they organize and write letters to their senators and congressmen. But this is just what happened when the budgeteers decided that it would save money to start junking the military commissary system. Of course, the computers that totaled up the theoretical savings didn't show the dollar loss resulting from good people leaving the service because of what they believe is a breach of faith.

Then, there is medical care for dependents. The bureaucratic mishandling of the ill-conceived "40-mile rule" as well as the cutback in Champus, imposed needless confusion and anxiety on service families. The stories of frustrations and difficulties faced by service wives while their husbands were away are not the stuff of which high morale is made.

Unions: Another basic symptom of the personnel crisis is the threat of a military union. This could be one of the most difficult problems facing the new President. A military union would pose huge problems and dangers to military discipline, effectiveness and to national security. But, as things are now going, a union is getting closer.

The threat is serious because the idea of a military union is the result of accumulating dissatisfaction. It is the result of the service person feeling abandoned by the civilian leadership that should be looking out for the military.

All the optimistic claims by officials that the serviceman doesn't need a union, and all of the threats of prohibiting a union by law, won't stop one from happening.

The reason: A military union is the result of such massive and fundamental causes it can't be stopped by saying that there shouldn't or won't be a union.

I haven't forgotten the incident, which I reported in a previous article, when I asked 14 Navy first class petty officers if they thought there would be a military union in the next five years or sooner. They unhesitatingly said yes by a 13–1 margin.

The only way a military union is going to be stopped is to remove the causes. The first thing to do is to restore and follow the principles of leadership. The most important single thing the new President could do, as commander-in-chief, is restore top-level civilian personnel leadership in all its meanings.

First, it would mean real attention to servicemen and their families. It would mean

considering them as people, not as numbers in a computer.

It would mean a return to the sanctity of an agreement. No longer could the destruction of the commissaries, cuts in medical care for dependents, and all the well-earned entitlements of military service be reduced or taken away on the basis of the flimsy legalistic explanation that there never really was a written contract with the serviceman that he would have these things as part of the package of military life.

He knows what he was given to expect when he took his oath and pledged his life in defense of his country. Good civilian leadership at the top should stop insulting his intelligence by telling him that he didn't exactly understand what he was told when he joined up.

Leadership is just what the serviceman is not getting from what has become almost a cult of "personnel management." This has been a root cause of the proposals that have afflicted the serviceman and his family. Ask any fighting man, "Do you want to be led, or do you want to be managed?"

You don't need three guesses to answer that one!

Personnel managers would have had a tough time of it taking the Anzio beachhead, holding the Nazi thrust at the Battle of the Bulge, and getting "Old Glory" planted atop Mt. Suribachi on Iwo Jima.

The military service is *people*. Leadership and people go together. Put it another way: management of military personnel depersonalizes. Leadership emphasizes the person.

To many in the military, the term "personnel management" means somebody they don't know, and never will know, sitting at a desk in a corner of a faraway room deciding how he will manage the lives of military people, he in turn, will never know.

Leadership has been defined as "the sum of those qualities of intellect, human understanding and moral character that enables a person to inspire, motivate and direct people successfully."

Leadership is knowing what makes the fighting man tick. Management is knowing what makes a computer tick.

If there is a real restoration of leadership at the top civilian levels there will be more emphasis on human factors and less on management computers. The trouble with computers, which are inseparable from management—and useful when properly used—is that there isn't a computer that has a key that can be punched for the value of morale, devotion, patriotism, fairness, bravery and good faith.

But this encroachment of the personnel management cult into the military has had some other profound, but not always obvious, effects.

In civilian life, for instance, personnel management thinks in terms of *jobs*. But, when the job concept is carried into the military through the operation of personnel management, it runs contrary to the most basic military attitudes. A person in the military performs a service to our country. He doesn't just do a job.

And the more that the job concept carries over into the military, the more the things civilians connect with jobs comes along into military thinking. What goes with a job? Regular hours, a salary, overtime pay, working conditions, and that leads to you-know-what—a union. All this, in turn, results in a civilianizing of the military.

In conclusion, there is a broad military personnel crisis. It's not getting better. There must be a real return to top-level civilian leadership. Military "personnel management" and all the civilianization that goes with it should be given the old heave-ho.

Let's hope that never again will we hear of a military course in "Squad Management," or of noncommissioned officers and petty officers referred to as "part of management."

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Friday, March 18, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

MARCH 21

9:00 a.m.

Agriculture, Nutrition, and Forestry
To consider the nomination of Carol Tucker Foreman, of the District of Columbia, to be an Assistant Secretary of Agriculture, and a Member of the Board of Directors of the Commodity Credit Corporation.
322 Russell Building

9:30 a.m.

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings to inquire into domestic communications common carrier policies (i.e., telephones, computers, etc.).
1202 Dirksen Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills, proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Handicapped Subcommittee
To hold oversight hearings on developmental disabilities.
Until 1 p.m. 4232 Dirksen Building

10:00 a.m.

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the National Aeronautics and Space Administration.
1318 Dirksen Building

Appropriations
Defense and Military Construction Subcommittees
To hold joint hearings on the administration's proposal to close the Uniformed Services University of the Health Sciences.
1223 Dirksen Building

Banking, Housing, and Urban Affairs
Subcommittee on Financial Institutions
To hold oversight hearings on activities of the Electronic Fund Transfers Commission.
5302 Dirksen Building

Energy and Natural Resources
To hold hearings on S. 977, the proposed Coal Utilization Act.
3110 Dirksen Building

Finance
To continue consideration of H.R. 3477, to provide for a refund of 1976 individual income taxes, to reduce individual and business income taxes, and simplify and reform certain other tax provisions.
2221 Dirksen Building

Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings to release a "Supplemental Staff Study of Severance Pay-Life Insurance Plans Adopted by Union Locals."
3302 Dirksen Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
6226 Dirksen Building

2:00 p.m.

Appropriations
Public Works Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for public works programs, to hear representatives of Envirnomental Research and Development Administration.
Room to be announced

MARCH 22

9:30 a.m.

Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the office of the Secretary; the Office of the Solicitor; and the Navajo-Hopi Relocation Commission.
1114 Dirksen Building

Armed Services
General Procurement Subcommittee
To resume hearings on proposed military procurement authorizations for fiscal year 1978.
212 Russell Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings to inquire into domestic communications common carrier policies (i.e., telephones, computers, etc.).
235 Russell Building

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Handicapped Subcommittee
To receive testimony on the administration's legislative proposals for programs for the handicapped.
Until 1 p.m. 4232 Dirksen Building

10:00 a.m.

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the defense establishment to hear officials of the Defense Communications Agency, and Supply Agency.
1223 Dirksen Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of AID.
S-126, Capitol

Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the National Aeronautics and Space Administration.
1318 Dirksen Building

Appropriations
*Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Office of the Assistant Secretary of HEW for Education and the National Institute of Education.
S-128, Capitol

Appropriations
Treasury, Postal Service, and General Government Subcommittee
To continue hearing on proposed budget estimate for fiscal year 1978 for the Department of the Treasury, the Postal Service, and General Government.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
Subcommittee on Financial Institutions
To hold oversight hearings on activities of the Electronic Fund Transfers Commission.
5302 Dirksen Building

Budget
To hold hearings in preparation for reporting the first concurrent resolution on the fiscal year 1978 budget, to receive testimony on U.S. Monetary policy.
357 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
3110 Dirksen Building

Finance
To hold hearings on legislation to extend the Emergency Unemployment Compensation Act (H.R. 4800).
2221 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2, to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
6226 Dirksen Building

Judiciary
To hold hearings on the nomination of Peter F. Flaherty, of Pennsylvania, to be Deputy Attorney General.
2228 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

2:00 p.m.
Appropriations
Treasury, Postal Service, and General Government Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Treasury, the Postal Service, and General Government, to hear public witnesses.
1224 Dirksen Building

MARCH 23

9:00 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on proposed legislation, to amend and extend the Agriculture and Consumer Protection Act, to hear Secretary of Agriculture Bergland.
Until: noon 322 Russell Building

Finance
To hold hearings on pending Departments of the Treasury and HEW nominations.
2221 Dirksen Building

Human Resources
Labor Subcommittee
To consider S. 924, to provide for equal treatment of craft and industrial workers, and to establish a national framework for collective bargaining in the construction industry.
Until 2 p.m. 4232 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Land Management.
1114 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings to inquire into domestic communication common carrier policies (i.e., telephone, computer, etc.).

Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on certain proposed reprograming of funds for fiscal year 1977.
1223 Dirksen Building

Appropriations
Labor-HEW Subcommittee
To continue hearings on proposal budget estimates for fiscal year 1978 for elementary and secondary education programs.
S-128, Capitol

Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5902 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
3110 Dirksen Building

Government Affairs
Subcommittee on Intergovernmental Relations.
To hold hearings on S. 2, to require reauthorization of Government programs at least every five years (proposed Sunset Act).
3302 Dirksen Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation and to reorganize certain nuclear export functions.
6226 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To resume closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

Select Small Business
To hold hearings on S. 972, authorizing the Small Business Administration to make grants to support the development and operation of small business development centers.
Until: 1 p.m. 424 Russell Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for school assistance in Federally affected areas and for emergency school aid.
S-128, Capitol

MARCH 24

9:00 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
To resume oversight hearings on the major international economic issues facing the United States.
4221 Dirksen Building

9:30 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Smithsonian Institution.
1114 Dirksen Building

Commerce, Science and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292, and S. 689.

*Select Nutrition and Human Needs
To resume hearings to examine the relationship between diet and health, to receive testimony on beef consumption.
457 Russell Building

10:00 a.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for programs for education of the handicapped, and for occupational, vocational, and adult education programs.
S-128, Capitol

Appropriations
Foreign Operations Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of AID.
1318 Dirksen Building

Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5302 Dirksen Building

Commerce, Science and Transportation
Surface Transportation Subcommittee
To hold hearings on S. 922 authorizing funds for fiscal year 1978 for the U.S. Railway Association, and on funds for the Office of Rail Public Counsel within the Interstate Commerce Commission.
235 Russell Building

Energy and Natural Resources
To hold oversight hearings on proposal for an international petroleum transshipment port and storage center to be located on the Palau District, Western Caroline Islands, Trust Territory of the Pacific Islands.
3110 Dirksen Building

Energy and Natural Resources
Subcommittees on Energy Research and Water Resources
To hold hearings on proposed authorization for fiscal year 1978 for Energy Research and Development Administration.
Room to be announced

10:00 a.m.
Governmental Affairs
To continue hearings on S. 591 and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Governmental Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2, to require reauthorization of Government programs at least every five years (proposed Sunset Act).
6226 Dirksen Building

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear officials of AID.
1318 Dirksen Building
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for higher education, welfare programs, and for library resources.
S-128, Capitol

MARCH 25

9:00 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Nutrition
To hold oversight hearings on the food stamp program.
322 Russell Building
9:30 a.m.
Commerce Science and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building
10:00 a.m.
Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment, to hear congressional witnesses.
1223 Dirksen Building
Banking, Housing, and Urban Affairs
To hold hearings on S. 406, the proposed Community Reinvestment Act.
5302 Dirksen Building
Commerce, Science and Transportation
Merchant Marine and Tourism Subcommittees
To hold oversight hearings on ocean shipping practices.
235 Russell Building
Energy and Natural Resources
Subcommittee on Energy Research and Water Resources
To hold hearings on proposed authorizations for fiscal year 1978 for Energy Research and Development Administration.
3110 Dirksen Building
10.00 a.m.
Governmental Affairs
To continue hearings on S. 591 and 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building
11:00 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for 1977 from officials of Amvets.
Until Noon. 1202 Dirksen Building

MARCH 28

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building
10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced
Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building
Commerce, Science, and Transportation
Communications Subcommittee
To resume hearings to inquire into domestic communications common carrier policies (i.e., telephones, computer, etc.).
1202 Dirksen Building
Energy and Natural Resources
To hold hearings on proposed legislation dealing with utilization of coal resources.
3110 Dirksen Building
Government Affairs
Subcommittee on Intergovernmental Relations
To hold hearings on S. 2 to require reauthorization of Government programs at least every 5 years (proposed Sunset Act).
3302 Dirksen Building
Governmental Affairs
*Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
6202 Dirksen Building
2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced

MARCH 29

9:30 a.m.
Agriculture, Nutrition, and Forestry
Subcommittee on Rural Development
To hold hearings on medicare reimbursements for rural-health care clinics.
322 Russell Building
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Fish and Wildlife Service.
1114 Dirksen Building
Commerce, Science, and Transportation
Subcommittee on Aviation
To hold hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building
10:00 a.m.
Appropriations
Defense Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Defense Establishment to hear congressional witnesses.
1223 Dirksen Building
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development.
1318 Dirksen Building
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Office of Human Development.
S-128, Capitol
Appropriations
Transportation Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Federal Railroad Administration (Northeast Corridor).
1224 Dirksen Building
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
Room to be announced
Commerce, Science, and Transportation

SENATE—*Friday, March 18, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 1:30 p.m., on the expiration of the recess, and was called to order by Hon. THOMAS J. MCINTYRE, a Senator from the State of New Hampshire.

Mr. McINTYRE. Our convening prayer today will be offered by the Reverend Abe G. Watson, minister of the Universalist Church of Brewton, Ala., and father of our page, David Watson.

PRAYER

The Reverend Abe G. Watson, minister of the Universalist Church, Brewton, Ala., offered the following prayer:

Eternal Spirit, as we begin this session of the Senate, help us to begin by offering thanks to you for the many blessings that have come to us as a nation. We thank you for this day and the new opportunities that it will bring—opportunities to work for a just society and for peace for all men—opportunities to be men and women of courage, of integrity and to bear one another's burdens.

We give thanks for our Nation, for our President, and for the Members of Congress. Grant to each of them wisdom and strength to lead this Nation to peace and justice for all.

Creator of all men, teach us how to live these days. We have been guilty of living in the past and worrying about tomorrow rather than living in the "now." The "now" is what we have; therefore, help us to be good stewards of today.

In the "now" abides faith, hope, and love. The greatest of these is love. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 18, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. THOMAS J. MCINTYRE, a Senator from the State of New Hampshire, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. McINTYRE thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Thursday, March 17, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are various nominations on the Executive Calendar that have been cleared for action beginning with the Department of Labor. I ask unanimous consent that the Senate go into executive session to consider the nominations on the calendar beginning with the Department of Labor.

Mr. BAKER. Mr. President, I advise the majority leader that our Executive Calendar is cleared through four nominations for the Department of Labor and two for the Council of Economic Advisers and there is no objection on our part to the confirmation of those nominations.

Mr. ROBERT C. BYRD. I thank the Senator.

There being no objection, the Senate proceeded to the consideration of executive business.

DEPARTMENT OF LABOR

The second assistant legislative clerk proceeded to read sundry nominations in the Department of Labor.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

COUNCIL OF ECONOMIC ADVISERS

The second assistant legislative clerk read the nominations of Lyle E. Gramley, of Maryland, to be a member of the Council of Economic Advisers, and William D. Nordhaus, of Connecticut, to be a member of the Council of Economic Advisers.

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs considered these two nominations, Lyle E. Gramley and William D. Nordhaus.

We considered the nominations, as a matter of fact, way back in January. It was not until just 2 days ago we finally got the clearance on the nominations.

These are two extremely important nominations because the Council of Economic Advisers is the principal economic group that advises the President of the United States, that works on the economic group annual economic report, has immense influence in determining the kind of economic policies we follow, tax policies, spending policies, monetary policies, and so forth.

Mr. President, Mr. Nordhaus impressed on us the breadth of his background and the excellence of his record and training. Mr. Gramley also has an interesting and useful background.

I was sufficiently moved by the Gramley nomination, by its implications, to feel that I should make a statement to the Senate when that nomination came before this body.

I have done this in the form of a little rhyme:

LYLE E. GRAMLEY NOMINATION, OR IS THE CEA GOING TO THE DOGGEREL?

Let me state flatly: there's little that's comic
'bout Carter's new counsel on things economic.
Why? 'cause the appointment of Lyle E. Gramley
Comes straight from the bosom of Arthur Burns' family.
Will this make the Council King Arthur's meat?
(For many a year Gramley sat at Burns' feet.)
And when he's through with the Council, where will he go?
Back to the Fed, where the word is: go slow.
That means higher interest, fewer jobs, less housing.
The economy will slumber when it needs arousing.

Now, I like Gramley. He has experience and professional capacity,
But we need an economist who will act with audacity,
Imagination, daring, vigor and verve
To put production back on an upward curve.
The Carter plan calls for full-steam-ahead
While Burns would go slow, take it easy, play dead.
Gramley is *Burns'* man; he comes from the Fed.

One thing the Gramley appointment makes sure
The policies of King Arthur Burns will endure
Tho' he and the Knights of the Fed Round Table
Care too little for jobs—but prices gotta be stable!

Thus does King Arthur expand his domain
With the White House Council but a link in the chain
In the Chairman's quest for the Holy Grail
In the land where tight money and unemployment prevail

On this nomination, then, how do I vote?
Despite my misgivings, Gramley's an economist of note.
Selected by Schultze, by Carter supported.
He has pledged the recovery shall not be aborted.
So with some reluctance here's a hesitant aye,
But on the Council the Senate must keep a skeptical eye.

Mr. President, I am willing to have the Gramley nomination go ahead, but I think we should be aware of Mr. Gramley's record, his attitude, the fact he is very skeptical, for example, about the stimulative housing program, and be conscious of this when the recommendations come before this body.

Mr. President, I yield back my time.

The ACTING PRESIDENT pro tempore. Who yields time?

Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield back my time under the standing order.

Mr. BAKER addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

FRANCE ASSUMING LEADERSHIP IN NUCLEAR TECHNOLOGY

Mr. BAKER. Mr. President, an article in the March issue of Physics Today entitled "France Gains on U.S. in Nuclear-Power Generation and Trade" provides an up-to-date assessment of the French nuclear power industry. Many feel that the U.S. leadership in this field is unchallenged.

The Physics Today article provides a comparison between the nuclear industry in France and the United States. While the U.S. nuclear policy is momentarily adrift, France is moving ahead to build a nuclear power capability that will provide two-thirds of France's electricity needs by 1985. Nuclear plants in the United States will be hard pressed to supply 22 percent of our Nation's electricity by the same date.

Second, France is well ahead of the United States in the development of the fast breeder reactor. A demonstration liquid metal fast breeder reactor named the Phenix began operating at 250 megawatts of electric power in 1974. Since then it has produced 3 million kilowatt-hours of energy at a 69 percent load factor. The equivalent step in the U.S. nuclear program would be the 380-megawatt electric power Clinch River breeder reactor. While this project is now scheduled to become operational in 1983, this time schedule will be delayed if the administration's proposed cuts in the breeder reactor program materialize.

France does not show signs of joining the United States in a self-imposed moratorium on domestic reprocessing and recycling of plutonium. The problem of disposal of radioactive wastes is being solved by the French. A pilot radioactive waste solidification plant at Marcoule, France, has been operating since 1969. A full-scale solidification plant will go into operation at Marcoule this year.

Mr. President, I seriously question how the United States is going to continue to assert its influence on the important issues of nuclear proliferation and safeguards of nuclear materials if we lose our position of leadership in nuclear technology. I feel that the professional journal Physics Today has done us a service by providing us with an up-to-date assessment of France's nuclear industry. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Physics Today, March 1977]

FRANCE GAINS ON UNITED STATES IN NUCLEAR-POWER GENERATION AND TRADE

The aftermath of the presidential election finds the U.S. energy program floundering in direction and scope. In sharp contrast France is moving ahead to build a nuclear-power capability that will not only provide a nuclear grid satisfying two-thirds of France's electricity needs by the middle of

the next decade but could well enable her to replace the U.S. as leading supplier of nuclear power-plant hardware and services for the rest of the world. At the start of this year U.S. utilities had sixty-odd reactors in operation, representing a total of 47,000 MWe, while the French government utility Electricité de France (EDF) had seven full-scale plants on the line producing less than 3,000 MWe. By 1985 U.S. utilities will be hard pressed to add another 100 nuclear plants to give a combined capacity of 168,000 MWe that would supply 22% of the nation's electricity needs; EDF, on the other hand, is quite confident it will have 40 new plants in operation by this date that will enable nuclear power to provide 60–75% of France's electricity.

Although the absolute number of French reactors will still be less than one-third those in the U.S., the new French reactors will all be of identical design and will employ identical fuel elements, safety features and so on. The U.S. reactors, on the other hand, will be of a variety of different types built by at least four different manufacturers and operated by at least as many utilities as there are states. Hence the French grid will have the largest number of reactors of a single type manufactured by one supplier (the French consortium Framatome) and operated by one utility (EDF). The French believe this intensive experience with a one-of-a-kind plant will give them the edge in being able to optimize performance for their own needs and demonstrate leadership in the world nuclear market.

The nuclear decision. The driving force behind France's ambitious nuclear-power program is the desperate financial plight imposed on the country with the tripling of fuel-oil prices in 1974. Unlike the U.S., France has no large supply of coal to which it may turn. At the current prices of imported oil, nuclear energy is half as expensive as any other form of energy available to the French.

The decision to go nuclear was made shortly after the oil crisis in 1974. In 1975 the French also settled on a reactor type for their 1980's expansion—the enriched-uranium, pressurized-water reactor (PWR) developed by Westinghouse. They had originally started out in the nuclear-power business in the 1950's with a gas-cooled graphite reactor of their own design fueled with natural uranium. Then in the late 1960's they built a prototype gas-cooled heavy-water reactor and, together with Belgium, built a PWR under license with Westinghouse. Also during this period the French built and learned to operate a gaseous diffusion plant to enrich their own uranium.

By 1969, France was convinced that it had an assured supply of enriched uranium and decided to abandon the gas-cooled designs in favor of enriched light-water reactors, which had been brought to a more advanced stage of development by American companies. It remained then to choose between the PWR and General Electric's Boiling Water Reactor (BWR). The French cost estimates indicated that power would be produced at the lowest price by the PWR and they decided to base their near-term nuclear expansion on this reactor design. In 1975 Framatome, the French private consortium that built the first PWR in France, was chosen as the sole supplier of the 40 new PWR's to be added to the EDF grid. At this time the Commissariat à l'Engerie Atomique (CEA) obtained a 30% holding of Framatome stock. Framatome officials boast that the company's new 25,000-m^2 factory at Chalon-sur-Soane is capable of turning out eight PWR plants per year that will not only take care of the EDF contracts but a sizable export market as well. Framatome is vigorously pursuing the foreign market and at this point has orders from Belgium, Iran and South Africa for two PWR's each.

Fast breeders. France's long-term position in the nuclear business looks even brighter than the short-term. The long-term future of nuclear energy, of course, revolves around the development of the fast-breeder reactor that can extend uranium as an energy source by a factor of 70 or so. Here France is already the indisputable front runner. The French experimental fast-breeder Rhapsodie, a 40-MW liquid-metal-cooled system, has been in operation for ten years with an availability of 90%. A demonstration LMFBR named Phenix began operating at 250 MWe in 1974 and since then has produced 3 million KWh at a 69% load factor. The equivalent step in the US fast-breeder program is the 380-MWe Clinch River Breeder Reactor, which had been scheduled to go critical in 1983; this date is now threatened by significant delay arising out of the new Administration's stated intention to back off on the pace of nuclear-energy development. The first commercial-sized breeder, the 1200 MWe Super-Phenix, is already under construction in France near Lyons and will start operating in 1981. This plant is being built in collaboration with Italy and West Germany. The equivalent US plant, the Prototype Large Breeder Reactor, is scheduled by ERDA to begin operating in 1988 but this date now also faces delay.

A major reason for the more bearish attitude in the US towards breeders is the concern, widely publicized during the recent election, about nuclear proliferation—plutonium used by breeders might be diverted to produce nuclear weapons. European nations, especially France and West Germany, disagree with the US on how to resolve the proliferation issue. Both countries have now agreed under pressure from the US to refrain from selling nuclear-fuel reprocessing facilities to other countries. But there is no indication that France and other countries in Europe plan to share the position taken last fall by President Ford that "the US should no longer regard reprocessing of used nuclear fuel to produce plutonium as a necessary and inevitable step in the nuclear fuel cycle." France would appear to have no intentions of joining the US in a self-imposed moratorium on domestic reprocessing and recycling of plutonium; moveover, a CEA spokesman told physics today that France, although it has agreed not to export reprocessing equipment, sees no reason why it should not export fabricated fuel containing plutonium to its nuclear customers as soon as it is commercially feasible.

Waste disposal. Another area of concern about nuclear energy in the US is the problem of long-term disposal for high-level radioactive wastes. Marcus Rowden, Chairman of the US Nuclear Regulatory Commission, observed at a recent conference that, although the US has the basic technology, we have yet to demonstrate a method of disposal that is technically sound and also socially acceptable. In a paper last July Robert Seamans Jr., as administrator of ERDA, pointed out that because commercial reprocessing of nuclear fuel has not been carried out in the US since 1972 no high-level wastes have been generated since that date. ERDA hopes to begin detailed design of a waste solidification plant in 1978 and have a geologic repository (probably a salt bed) in operation by 1985. In sharp contrast, the French have been operating a pilot industrial solidification plant at Marcoule since 1969 that has processed the high-level waste from 800 tons of irradiated fuels to date. A full-scale solidification plant will go into operation at Marcoule this year. The French strategy for ultimate disposal of wastes differs from the US in that the French plan routinely to let the solidified wastes cool down in intermediate storage in concrete wells for 40 years before ultimate storage in a suitable geological formation. This gives them 40 years, they note, to prepare acceptable sites.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. CURTIS. Mr. President, I will offer today an amendment to the ethics bill, and I invite the consideration of the Senate to that amendment.

I believe that the purpose of the ethics proposal is not only to raise the standard of ethics but also to raise the public confidence in the Senate. One of our problems here is that we are involved in such a proliferation of committee assignments and work that, too often, not many Senators are in the Chamber. We understand the reason for it, but still it is not a good procedure.

The amendment I shall offer will provide that in order to conduct any business, 25 Senators must be on the floor and that any time 25 Senators are not on the floor, the Presiding Officer will suspend all business. It is not impossible. It means that it will be the responsibility of the majority to see that 15 Senators are in the Chamber, and it will be the responsibility of the minority to see that 10 are here.

It would mean that we would have to schedule committee meetings so that there would be that minimum number here to transact business. It would also mean that if that many Senators are not here, the business is not very important.

I believe this would do more to improve the legislation enacted and would do more to raise the position of the Senate in the public mind than anything else.

I also call attention to the fact that we waste a great deal of time on quorum calls. Something important is about to come up, or someone who has spent a lot of time on a subject matter wishes to be heard, so they have a quorum call. Then they have a live quorum. What happens is that we are all recorded and then go back to the duties we were performing.

This is simple. I think the country could understand it. I hope Senators can, because they will all have a chance to vote on it.

Mr. President, a parlimentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. CURTIS. May I send the amendment to the desk at this time, or must I wait until the ethics bill is under consideration?

The ACTING PRESIDENT pro tempore. The Senator may send it to the desk.

Mr. CURTIS. Mr. President, I send the amendment to the desk, and I serve notice that there will be a rollcall vote.

Mr. BAKER. Mr. President, I commend the Senator from Nebraska for his initiative in this respect.

One of the great tragedies of present circumstances in Congress is that the quality of a debating quorum is often missing. I think there is too much talent in the Senate, too many people of ex-

perience, judgment and insight, to lose that great asset.

I hope that ways can be found to encourage the attendance of Senators regularly and continuously on this floor.

I said yesterday that it would be my intention to object, insofar as I could object, under the rules of the Senate, to the meeting of committees during the consideration of this measure—that is, the ethics bill. I think that more attention to floor duties and less attention to committee detail while the Senate is in session would move us much closer to the laudable objective expressed by the Senator from Nebraska.

Mr. President, I have no other requirement or requests for my time under the standing order, and I yield back the remainder of my time.

Mr. BENTSEN. Mr. President, I say to the distinguished Senator from Tennessee that I am delighted that we got through the reorganization of the Senate committees, because now we have two committee meetings at the same time instead of four. It is a great step forward.

[Laughter.]

Seriously, it has helped.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 2 p.m., with statements therein limited to 10 minutes each.

THE SACCHARIN BAN

Mr. BENTSEN. Mr. President, I should like to address myself to an immediate problem. I think that the announcement by the Food and Drug Administration of their intention to ban saccharin really insults our intelligence. The ban makes a mockery of the Food and Drug Administration's mandate to assure the safety of food and drugs available to the American public.

The fault is not, however, with the FDA. They are simply following a section of the Food, Drug and Cosmetic Act that was passed 19 years ago. The section says:

> No additive shall be deemed safe if it is found, after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animal.

That, by itself, sounds reasonable, until you carry it to the extreme.

That legislation may have been a rational approach to assuring the safety of foods and drugs in 1958. However, in the last 19 years, scientific investigation has advanced almost faster than our ability to analyze the information that results from the investigation. Even scientific researchers have pointed out that given the increasing sophistication of cancer research, "a blanket denial no longer makes sense."

Mr. President, I am not a scientist but my commonsense tells me that the level of saccharin fed to the rats in the Canadian tests—an amount equivalent to human consumption of 800 cans of diet soda a day—is not even remotely likely to be consumed by any human being.

In many cases the potential harm from banning saccharin far outweighs the hazard to health that saccharrin may cause. There are an estimated 10 million diabetics in this country for whom sugar is poison. One out of four Americans is overweight and suffers from a greatly increased risk of heart disease and arteriosclerosis. For these people artificial sweeteners like saccharin are essential.

Mr. President, we live in a society that offers cigarettes for sale although they are a known carcinogenic for both smokers and nonsmokers. I am not saying that carcinogenics should be available. I am saying that in cases where the risks are extremely remote and benefits are real and substantial, people are intelligent enough to make up their own minds.

The approach we have taken with cigarettes is to provide people with information on the risks in plain English and then allow them to make their own decisions.

This is the solution I would advocate for saccharin. It makes no sense to ban saccharin, when it is obvious that normal usage is safe. We are creating a greater health hazard than we are preventing.

I intend to introduce legislation to amend the Delaney clause of the Food, Drug, and Cosmetic Act to allow some discretion on the part of the FDA in the actions it can take as a result of its scientific investigations. I urge my colleagues to support me in this effort.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. BENTSEN. I am delighted to yield to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I associate myself with the remarks of the Senator from Texas.

Yesterday, I joined the junior Senator from California and the distinguished minority leader in introducing a bill which would suspend the ban on the use of saccharin for 3 years, during which time further study could be made.

I am happy to learn that the distinguished Senator from Texas also has prepared a bill, which is to be introduced. I believe that the support for his bill and the bill which I joined in introducing yesterday will provide more than the necessary majority in the Senate and in the House, and I think we can bring some sense to the FDA.

Mr. BENTSEN. I would be delighted to be a cosponsor of the Senator's bill.

Mr. MATSUNAGA. I thank the Senator.

PRICE SUPPORT FOR MILK

Mr. PROXMIRE. Mr. President, the Secretary of Agriculture is about to announce the support price for milk to take effect on April 1. For tens of thousands of dairy farmers that makes April 1 the most important day in their economic lives in the year.

Secretary Bergland's decision will determine the kind of year they will have.

There should be no doubt about the Secretary's decision. It should reflect the pledge President Carter made about a year ago in Wisconsin when he told our dairy farmers that he would sign a law mandating a minimum price support of 85 percent of parity.

Secretary Bergland's decision should reflect that the present 80 percent level of price supports does not begin to cover the cost of production for dairy farmers. Even 85 percent price supports would leave dairy farmers short of the $10.10 per hundredweight which University of Wisconsin studies establish as the cost of production without even including labor or management costs.

Dairy farmers in my State typically operate large units milking more than 50 cows, having a herd of more than 100, an investment in excess of $200,000 and working 70 or 80 hours a week, with the wife working an additional 50 hours and two children also pitching in on the average for 20 hours each, earn less than $8,000 a year.

Their earnings are less than two-thirds of the earnings of off-farm families. And yet these farm families are the most efficient producers in the world.

Mr. President, the No. 1 victim of economic injustice in this country today is the farmer and especially the dairy farmer. He does everything a person is supposed to do to justify a reasonable income in a free economic society: He takes a big risk, not only on prices but on weather; he makes a large investment of capital; he works tremendously long hours—those cows have to be milked every day, twice a day, 52 weeks of every year; and he is immensely productive. In fact, in the past few years he has doubled his productivity.

And his reward for all this is an income that is an insult.

Mr. President in setting the support level for the year beginning April 1, Secretary Bergland should recognize fundamental facts:

First, the President has told the dairy farmers of this country that he favored 85 percent of parity;

Secondy, to set the support level at 85 percent of parity will provide dairy farmers with a little better break, an opportunity not to earn the income that justice entitles them to earn, but to earn at least part of it.

I conclude, Mr. President, by pointing out that the great difference between this country's and the Soviet Union's economy is not in our factories and not in our commerce. It is in our farms. The fact is in this country only 4.5 percent of our people work on farms. Thirty-three percent of the people in the Soviet Union do. As we know, the Soviet Union has a bigger population, but we produce 20 percent more food.

The simple arithmetic is we are, therefore, 10 times more productive in farming than they are, yet the farmer has been the forgotten man of our economy.

Mr. President, I made a study a few years ago—I am not sure that it still applies—but in virtually every one of our 50 States the No. 1 cash crop is milk. I think if the Senators will check the cash crop in their own States they will find how important this decision by Secretary Bergland is going to be on April 1, and I do hope we get the word to Secretary Bergland that this decision should be on the side of providing economic justice.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. ABOUREZK). Is there further morning business?

BAIL REFORM ACT OF 1977

Mr. DOLE. Mr. President, the Bail Reform Act of 1966 was enacted to assure that no person, rich or poor, would be needlessly detained pending trial on an alleged criminal act. The act required release of accused persons in noncapital cases on their own recognizance or upon certain nonfinancial restrictions when release on personal recognizance was not sufficient to deter flight. Detention could only be ordered in capital cases where detention is the only way to assure public safety.

Unquestionably, prior to the 1966 act, too many defendants, unable to post bond, languished in jail until tried, regardless of the strength or the seriousness of the charges and regardless of the risk of flight. The 1966 act addressed a legitimate problem, but I feel now as I did then, that it went too far in responding to that problem. By considering only the reasonable assurances that a defendant would appear at trial in determining whether a pretrial release was justified, the act totally ignores an important factor—public safety.

A most recent example occurred in Washington, D.C., last week when a terrorist was released on personal recognizance before his hostages had regained their composure, and the issues that gave rise to the terrorist activity continued to fester. Although the pretrial release on personal recognizance was apparently an integral part of the negotiations that resulted in the release of the hostages, the fact that a terrorist can one minute be illegally endangering the lives of more than a hundred persons, and the next minute be back on the streets uninhibited, runs contrary to the American sense of justice. Public confidence is an important element in our criminal justice system. Appropriate public safety considerations are the key to retaining public confidence.

CONSIDER COMMUNITY SAFETY

Last week, the Judicial Conference of the United States issued a report endorsing changes in the Bail Reform Act of 1966 which would allow danger to the community to be considered in the evaluation of pretrial release.

An amendment to the Bail Reform Act to authorize a judicial officer to consider "safety to any other person or the community" along with existing considerations in setting conditions for the pretrial release of a defendant in a criminal case.

In accordance with that recommendation, I am today introducing legislation which I feel gives appropriate consideration in pretrial release situations to public safety while also assuring the procedural and due process rights of the defendant. The bill, the Bail Reform Act of 1977, would permit a Federal judge to set strict conditions on release or to detain a defendant in cases of murder in the first degree, forcible rape, armed kidnapping and armed robbery.

SPECIAL TREATMENT FOR HOSTAGE CASES

In addition, the bill would mandate some form of detention or other limitation in those cases where hostages were held by the defendant. If a person charged with any offense seized any hostage during the commission or attempted commission of or during the immediate flight from the commission or attempted commission of an offense and used the hostage for the purpose of negotiating his own release, the bill prohibits the release of that person except on an affirmative ruling of a judicial officer at a formal hearing with the decision being based on appropriate consideration of community safety.

REMOVES DISCRETION

The purpose of the hostage provision is to remove from the U.S. attorney and the judicial officer the unlimited discretion they have in determining pretrial release. When these officials possess total discretion and hostages are being held, the hands of public officials are tied. The judicial process itself is a hostage. It is forced to cave in to any and all demands of the terrorist to insure the safety of the hostages. No consideration of public safety or reasonable assurances of appearance at trial are possible within this situation. The judicial officer and the U.S. attorney are in an untenable situation.

This legislation removes the decision on the issue of pretrial detention from the list of items that can be negotiated when hostages are being held. The judicial officer would still be given substantial discretion in determining what pretrial restrictions are appropriate in each individual case, but this would be decided at a pretrial detention hearing and not in a negotiating environment with the lives of hundreds of hostages at stake. This procedure insures sufficient discretionary latitude to assure room for negotiations. The terrorist would not feel trapped. But he would have to submit to authorities until a pretrial bail hearing could be held. The judicial officer would at that time be forced to take into consideration the need for community safety and the appropriate restrictions needed to assure appearance at trial before granting any form of release.

PRETRIAL DETENTION POSSIBLE

Under provisions of the act, defendants charged with first degree murder, forcible rape, armed kidnapping, and armed robbery would be brought before a judicial officer for an initial hearing in the manner which is now customary. At that time, the U.S. attorney could file a motion for a detention hearing. The judicial officer must then examine the range of release conditions, short of detention, which might be appropriate. If he determines that none of the alternatives will assure community safety, he will grant the hearing.

The U.S. attorney must then show that there is substantial probability that the person actually committed the present offense. Substantial probability is a standard somewhat more stringent than probable cause but less rigid than guilt beyond a reasonable doubt standard necessary to convict. Once the process is complete, the judicial officer, based upon his findings, would be authorized to detain a defendant for up to 90 days prior to trial.

PROTECTS DEFENDANTS' RIGHTS

The procedural safeguards for the defendant are numerous. He has the right to be represented by counsel, to testify, and to present information and witnesses in his behalf. If he wishes to testify, his testimony is not admissible on the issue of guilt in any other proceeding. Detention is limited to a maximum of 90 days, detained pretrial defendants are to be confined separate from convicted defendants to the extent possible, and reasonable opportunities for preparation of a defense are to be granted including limited periods of release if required.

Mr. President, in summary, I point out that the changes would exempt first-degree murder, armed robbery, armed kidnaping, forcible rape from the conditions in the existing law that permits the judge to also consider public safety in consideration of pretrial release.

It seems strange to this Senator that someone who has held more than 100 persons as hostages would be back in his home before they themselves were released. I think, perhaps, it is time we take a hard look.

It provides that any defendant who holds hostages in the commission, attempted commission, or escape from a crime, must surrender to authorities and go before a judicial officer in a pretrial bail hearing before the terms of pretrial release can be considered. The judicial officer is required at the time of the pretrial hearing to appropriately weigh public safety considerations before determining what release conditions are appropriate.

Second, the bill permits public safety to be taken into consideration in determining the pretrial release conditions when the defendant is charged with the crimes of armed robbery, armed kidnaping, forcible rape, or first-degree murder. Previously, public safety was a consideration in pretrial release evaluation only when offenses punishable by death were charged.

Third, the bill authorizes detention prior to trial where noncapital offenses of murder, armed kidnaping, armed robbery, and forcible rape are charged. It also establishes a pretrial detention hearing procedure to protect the rights of the defendant.

Finally, the bill authorizes the imposition of additional penalties where crimes are committed by individuals who are already on bail, parole, or some form a conditional pretrial release.

STARTING POINT

The bill, as drafted, applies to the Federal Criminal Code, and with modifications could readily be incorporated into the criminal code of the District of Columbia Code.

I realize this is far from a cure-all for the problems which exist in this area. But public concern over the number of crimes committed by individuals released prior to trial is growing. Concerns are daily being expressed over public safety which is being threatened by the release on personal recognizance of individuals charged with violent crime. Public confidence in our criminal justice system requires that we address

these issues promptly. I trust this legislation can serve as a starting point.

Mr. President, I yield back the remainder of my time.

ORDER EXTENDING TIME FOR FILING ANNUAL REPORT OF THE SPECIAL COMMITTEE ON AGING

Mr. CHURCH. Mr. President, I ask unanimous consent that the Senate Special Committee on Aging be given until March 31 to file its annual report. This additional time is needed to index the annual report and to obtain Senate action on a resolution for additional copies of this publication.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 86-42, appoints the following Senators to the Canada-United States Interparliamentary Conference, to be held in Victoria, British Columbia, May 27-31, 1977: the Senator from Montana (Mr. METCALF), the Senator from Maine (Mr. HATHAWAY), the Senator from Vermont (Mr. LEAHY), the Senator from New Hampshire (Mr. DURKIN), the Senator from Nebraska (Mr. CURTIS), the Senator from Kansas (Mr. PEARSON), and the Senator from Alaska (Mr. STEVENS).

The Chair, on behalf of the Vice President, pursuant to Public Law 86-420, appoints the Senator from Texas (Mr. BENTSEN), chairman, and the Senator from North Carolina (Mr. MORGAN) to the Mexico-United States Interparliamentary Conference, to be held in Guaymas, Mexico, May 27-31, 1977.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON MOBILE HOME STANDARDS—MESSAGE FROM THE PRESIDENT—PM 53

The Presiding Officer laid before the Senate the following message from the President of the United States, which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

I herewith transmit the Second Annual Report on mobile home standards as required by Section 626 of the National Mobile Home Construction and Safety Standards Act of 1974.

JIMMY CARTER.

THE WHITE HOUSE, *March 18, 1977.*

MESSAGE FROM THE HOUSE

At 1:40 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the bill (H.R. 4088) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, in which it requests the concurrence of the Senate.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-928. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of a construction project that is being undertaken by the U.S. Army Reserve; to the Committee on Armed Services.

EC-929. A letter from the Secretary of Transportation transmitting, pursuant to law, the sixth Urban Mass Transportation Administration Annual Report of Capital Assistance, Technical Studies, and Relocation Grants for the period January 1, 1976, through December 31, 1976 (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC-930. A letter from the Chairman of the Federal Deposit Insurance Corporation transmitting, pursuant to law, the second annual report of the Federal Deposit Insurance Corporation's Office of Bank Customer Affairs for the year 1976 (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC-931. A letter from the Chairman of Transportation transmitting a draft of proposed legislation to provide a comprehensive system of liability and compensation for oil spill damage and removal costs, and for other purposes (with accompanying papers); to the Committee on Environment and Public Works.

EC-932. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 1-229, "An Act to reorganize the administration of the District of Columbia General Hospital, to establish a Commission to govern that hospital, and for other purposes" (with accompanying papers); to the Committee on Government Affairs.

EC-933. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, an amended report covering personal property donated to public health and educational institutions and civil defense organizations, and real property disposed of to public health and educational institutions during the transition quarter July 1, 1976 through September 30, 1976, which replaces the report transmitted on December 30, 1976 (with an accompanying report); to the Committee on Human Resources.

EC-934. A letter from the Executive Secretary to the Department of Health, Education, and Welfare transmitting, pursuant to law, a copy of a document that was sent to the Federal Register on the final regulations for treatment of payments under state equalization programs (with an accompanying report); to the Committee on Human Resources.

EC-935. A letter from the Chairman of the Federal Election Commission transmitting, pursuant to law, a copy of a report on the administration of the Freedom of Information Act for the calendar year 1976; to the Committee on the Judiciary.

EC-936. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, a copy of a report on the administration of the Freedom of Information Act for the calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC-937. A letter from the Chairman of the Federal Election Commission transmitting, pursuant to law, a copy of correspondence which the Commission has sent to the Office of Management and Budget (with accompanying papers); to the Committee on Rules and Administration.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HUDDLESTON, from the Committee on Agriculture, Nutrition, and Forestry:

With amendments:

S. 106. A bill to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes (Rept. No. 95-59).

HOUSE BILL REFERRED

The bill (H.R. 4088) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, was read twice by its title and referred to the Committee on Commerce, Science, and Transportation.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. DOLE:

S. 1035. A bill to amend the Bail Reform Act of 1966 to provide for pretrial detention of certain dangerous persons, and for other purposes; to the Committee on the Judiciary.

By Mr. BARTLETT:

S. 1036. A bill to amend the Water Resources Control Act of 1976 relating to Federal certification of local flood control projects; to the Committee on Environment and Public Works.

By Mr. HUMPHREY:

S. 1037. A bill to alleviate the financial crisis confronting the public schools of the Nation by providing increased financial resources for elementary and secondary education, and by promoting the equitable distribution of such resources within the States through the establishment of a National Education Trust Fund; to the Committee on Human Resources.

By Mr. CURTIS:

S. 1038. A bill to amend the Fair Labor Standards Act of 1938 with respect to an exemption for certain young employees who enter into an agreement with an employer to work for an agreed upon wage that is less than the minimum wage, and for other purposes; to the Committee on Human Resources.

By Mr. ABOUREZK:

S. 1039. A bill for the relief of Jack George Makari; to the Committee on the Judiciary.

By Mr. ROTH:

S. 1040. A bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation; to the Committee on Human Resources.

By Mr. SPARKMAN (for himself and Mr. ALLEN):

S. 1041. A bill to amend the black lung benefits provisions of the Federal Coal Mine Health and Safety Act of 1969 to extend those benefits to miners who incur silicosis in iron mines; to the Committee on Human Resources.

By Mr. SPARKMAN (by request):

S. 1042. A bill to amend the Arms Control and Disarmament Act, as amended, in order to extend the authorization for appropriations, and for other purposes; to the Committee on Foreign Relations.

By Mr. BENTSEN (for himself, Mr. CRANSTON, Mr. HATFIELD, Mr. LONG, Mr. JOHNSTON, Mr. GRAVEL, Mr. WEICKER, Mr. INOUYE, Mr. STONE, Mr. MATSUNAGA, and Mr. ALLEN):

S. 1043. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. STEVENSON:

S. 1044. A bill to permit the vessel *Manatra II* to be inspected, licensed, and operated as a passenger-carrying vessel, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. STEVENSON (for himself and Mr. PERCY):

S. 1045. A bill to change the name of the Indiana Dunes National Lakeshore to the Paul H. Douglas National Lakeshore; to the Committee on Energy and Natural Resources.

By Mr. SCHWEIKER (for himself, Mr. HELMS, Mr. HEINZ, Mr. DOLE, Mr. HATFIELD, and Mr. RANDOLPH):

S. 1046. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Human Resources.

By Mr. SCHMITT (for himself and Mr. DOMENICI):

S. 1047. A bill to amend the Urban Mass Transportation Act of 1964; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CHILES (for himself and Mr. STONE):

S. 1048. A bill to amend title XVIII of the Social Security Act so as to enable certain aliens to obtain coverage under the supplemental medical insurance program established by part B of such title; to the Committee on Finance.

By Mr. CHILES:

S. 1049. A bill for the relief of C. C. Cannon; to the Committee on the Judiciary.

By Mr. RANDOLPH:

S. 1050. A bill to amend title 39 of the United States Code to extend the period during which there is a moratorium on the increase of any rates, the reduction in levels and types of postal services, and the closing of certain post offices; to the Committee on Governmental Affairs.

By Mr. BIDEN (for himself, Mr. BAYH, and Mr. MCINTYRE):

S.J. Res. 39. A joint resolution to provide for a study of the effects of saccharin; to the Committee on Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BARTLETT:

S. 1036. A bill to amend the Water Resources Control Act of 1976 relating to Federal certification of local flood control projects; to the Committee on Environment and Public Works.

Mr. BARTLETT. Mr. President, included in the Water Resources Development Act of the 94th Congress was a provision authorizing construction of local, urban flood control projects in conjunction with ongoing Federal feasibility studies. The purpose of this provision was to assure local interests that they could initiate flood control improvements with the understanding that the cost of these improvements would be assumed by the Federal Government. The legislation that I am introducing strikes the termination date of December 31, 1977 from this law.

Without the coordination of effort between the Corps of Engineers and local units of government, the process of researching and building flood preventive structures is both costly and time-consuming.

As you know, Mr. President, without the cooperation which this provision affords, completion of flood control projects requires several years of feasibility studies and authorization efforts. After being alerted to a flood control problem, the Corps of Engineers does what is called a reconnaissance report. If this report indicates the need and potential viability of a Federal project, the corps then proceeds with an indepth survey report which takes 2 or 3 years. The survey report is then submitted to Congress, which then may take 2 or more years to study the project before proceeding with authorization.

Once Congress does authorize the proposal, the corps then goes into what they call phase one and phase two, which is planning and design of the project. This ordinarily takes as much as 3 or more years. Finally, after all of these lengthy steps, the construction begins. The indictment of the whole system is that the actual construction is the easiest step, often taking less than 2 years.

District engineers have lived with these procedures for many years and have suffered the abuses of many people, who for good reason, cannot understand why a flood control project requires 10 or 15 years for completion.

Mr. President, I congratulate Congress for approving a new certification procedure which essentially eliminates part of this dilemma. Section 134(a) of the Water Resources Development Act of 1976 enables the Federal Government to participate in a cooperative effort with local units of government on the projects that the local unit has planned and implemented.

The intention of this law is not to have the corps take over every local flood control project initiated by communities across the country, but to create a situation where efforts may be coordinated on certain specific projects which the district engineer has certified.

Unfortunately, the termination date written into the law prevents Congress from honestly evaluating the effectiveness of this cooperative agreement. I believe my colleagues will agree that 1 year does not allow us time to fully realize the potential that this program affords.

When more communities become aware of this program, they will be less reluctant to initiate the construction of badly needed flood control projects. The ability of local interest to raise funds—including issues of bonds—will be greatly enhanced, for people will know that a solution and actual project work are imminent rather than years in the future. Finally, costs will be more accurately fixed without regard to inflation and escalating values.

Mr. President, the benefits from this program may be substantial. In order to test the efficacy of section 134(a), I recommend that the termination date be removed. The continuation of this program may be helpful to many persons in urban areas who must go through the trauma and fear of actual floods, resulting damage, and death. I hope that my colleagues will consider the extreme necessity of this provision, and move expeditiously to enact this provision.

I have received a report from the National Flood Insurers Association which shows the expansion of the flood insurance program, and it also exhibits the continuing need to address urban flooding problems.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL FLOOD INSURERS ASSOCIATION,
Arlington, Va., March 15, 1977.

Hon. DEWEY BARTLETT,
Russell Senate Office Building,
Washington, D.C.

Attention: John Sublett

DEAR MR. SUBLETT: Pursuant to your request for information regarding flood damages sustained and paid under the National Flood Insurance Program, I provide you with the following information:

Fiscal year	No. paid claims	Amount paid
1970	40	$72,818
1971	197	178,500
1972	1,095	2,565,379
1973	7,067	15,040,243
1974	14,457	36,661,867
1975	10,927	26,313,746
1976	20,875	81,359,082
Total	55,468	162,191,635
1977 first six months	6,642	32,918,678

Three particular occurrences in the more recent history of the Program stand out as examples of substantial involvement of the Program in relation to overall flood damages, insured and uninsured:

The first is Hurricane "Eloise" occurring on September 13 through September 26, 1975 causing damages in fourteen states along the East coast from Florida to Massachusetts and Puerto Rico. Over 12,000 claims were reported and over $40 million paid. In Pennsylvania alone, the NFIA paid over $25 million on 8,000 claims. This compares to Hurricane "Agnes" in June, 1972 when we had only 600 policies, 147 losses and paid only $772 thousand in Pennsylvania. As you can see, in the short time span of three years we had increased the policy count from 600 to over 40,000 and increased payments by over 3,000%. The large majority of payments dur-

ing Hurricane "Eloise" were made in the urban areas of the country, like Panama City, Florida, Harrisburg and Wilkes Barre, Pennsylvania and Trenton, New Jersey. Residential, commercial and manufacturing structures and their contents were involved.

A second recent example occurred in your own state on Memorial Day, 1976 when torrential rains caused flash flooding in Tulsa, Oklahoma. The standing water depth relative to grade floor averaged between four and five feet and the average paid claim was the highest for any single occurrence in the Program's history. Over $12.2 million was paid on 1,080 claims. As you are probably well aware, Tulsa proper had experienced four previous floods within a five year span. This is an urban area built almost completely on a flood plain.

The third example is a similar occurrence to that of Tulsa, occurring in the city of Houston, Texas on June 14, 1976, in which 1090 claims were reported and over $8.5 million paid.

After you have had a chance to review the above information, you may have a request for more specific information. We will be happy to assist in any way we can.

Very truly yours,

W. L. KENNELL,
Claims Manager.

By Mr. HUMPHREY:

S. 1037. A bill to alleviate the financial crisis confronting the public schools of the Nation by providing increased financial resources for elementary and secondary education, and by promoting the equitable distribution of such resources within the States through the establishment of a National Education Trust Fund; to the Committee on Human Resources.

NATIONAL EDUCATION INVESTMENT ACT OF 1977

Mr. HUMPHREY. Mr. President, today I am introducing the National Education Investment Act of 1977. When I introduced similar legislation in the past, I stated that we needed to launch "decisive Federal action to address the critical problems confronting school districts across the Nation."

Today, the problems are even more critical, and decisive action is even more urgent. We need to establish a new education policy for America—a policy to guarantee that all children and youth, without regard to circumstances of residence, family income, or race will have a full and equal opportunity to obtain a quality education.

The National Education Investment Act provides for the establishment of a National Education Trust Fund in the Treasury, from which payments would be made to State and local jurisdiction applicants which agree to substantially reduce or eliminate the taxation of real property for the purpose of financing elementary and secondary education, under a program which would promote progressive tax reform in the State and the improvement and balancing of per pupil expenditures among all local school districts.

The title of my bill, the National Education Investment Act, indicates the fundamental commitment that must be made to increasing the Federal investment in education to one-third of all public resources.

One of the most pressing problems is the disparity of the resources available to students among the school districts within a State. In recent years the courts have increasingly noted that the level of educational services provided to a child is largely dependent on the wealth of the district in which he or she lives. Some States are under court order to alter the means by which public education is funded, and pressure for reform is increasing in other States.

Federal funding must make up a substantial share of the total funding of reform in educational financing in order to make a positive change in this area and to avoid raising false expectations. If there is no serious commitment to a substantial and continued amount of Federal funding, the potential improvement in educational financing will be negligible.

The National Education Investment Act proposes that a major advance be launched in Federal policies toward education. It is not the final answer—a number of other important legislative proposals have been made toward the achievement of this objective which is so vital to the future of our Nation.

This bill will not do away with other Federal programs that presently aid public elementary and secondary education. However, it should be anticipated that the enactment and implementation of this legislation would be effectively coordinated with legislative and administrative adjustments in existing Federal programs. This process properly should include the redesignation and technical revision of programs whose continuation is determined to be important in the comprehensive program of Federal assistance envisioned by the National Education Investment Act.

The legislation which I am introducing today has several characteristics which merit the most serious consideration by Congress.

This bill is comprehensive, addressed both to overcoming major fiscal resource disparities among school districts, which undermine equality of educational opportunity for all American children, and to pinpointing special education needs of children which for too long have received a totally inadequate response—including the needs of preschool children, of mentally or physically handicapped children, and of educationally deprived children in areas of poverty.

The National Education Investment Act presents clearly defined measures and a definite time schedule for addressing all these problems—not through just providing more Federal dollars, but through using Federal assistance as leverage to promote counterpart efforts by State and local governments. It calls for a total national effort on behalf of our children.

I urge Congress to take action on this priority national agenda for education without delay.

Mr. President, it is necessary that two subjects be addressed directly with respect to this legislation.

First, the issue of tax reform within the States, and the issue of finding adequate revenues to pay for our schools, must not be dealt with as separate matters, in any legislation before Congress. These issues must be seen as a single, major problem demanding a comprehensive solution. On the other hand, it must not be the function of the Federal Government to dictate the answers, but rather to provide a strong incentive for the States and local jurisdictions to find equitable and constructive solutions. I believe the National Education Investment Act provides an effective program to address tax reform and education financing issues simultaneously, and to encourage State and local governments to accept the primary responsibility for carrying out this task.

Second, the issue of maintaining local control of schools should be addressed fairly and honestly. Some may view this issue as a slogan without adequate philosophical substance or clear definition, or as being used to justify resistance to school desegregation, or as being divorced from reality where school districts are increasingly finding it almost impossible to fund rising school costs and must depend more and more on outside financial resources.

However, this issue also reflects a deep feeling, a strong belief, of our people in cities and towns across America about local responsibility for the education of children. My bill undertakes to respect this belief, subject to the assurance that an equal opportunity will be provided for all children to obtain an education of high quality.

The National Education Investment Act does call upon State and local educational agencies to specify school-age populations being served and to indicate the scope of educational services, in accounting for the use of Federal assistance. And it does place requirements upon such agencies to implement and carry out certain educational programs for groups of children who have been neglected or inadequately served.

But most importantly, this bill takes the basic view that States and localities should now be enabled, through the provision of adequate and dependable Federal assistance—as intended, for example, by the establishment of a National Education Trust Fund—to work out their own answers to the unique problems they confront in guaranteeing the right of every child to a quality education.

Moreover, an important aspect of this legislation is that it will mean more Federal dollars with less Federal involvement in the operations of local school districts, because it will require only certification of an acceptable State plan and do away with the burdensome paperwork and certification requirements under the present various and sundry Federal education program.

Mr. President, I ask unanimous consent that a summary of the National Education Investment Act of 1977, together with the text of the bill, be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 1037

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

That this Act may be cited as the "National Education Investment Act of 1977."

DEFINITIONS

SEC. 2. As used in this Act—

(1) The term "Secretary" means the Secretary of the Treasury.

(2) The term "applicant" means any State, political subdivision of a State, or other public agency or authority, which imposes a tax on real property for the purpose of financing elementary and secondary education.

(3) The term "fund" means the National Education Trust Fund established under section 3 of this Act.

(4) The term "State" includes the District of Columbia and the Commonwealth of Puerto Rico.

ESTABLISHMENT OF FUND

SEC. 3. There is established in the Treasury of the United States a trust fund to be known as the National Education Trust Fund (hereafter referred to as the "fund"). The fund shall consist of—

(1) amounts appropriated to it under the authority of section 4 of this Act.

(2) amounts transferred to it from programs authorized under any other provision of law; and

(3) interest and proceeds credited to it under section 5(c), and receipts from any other source.

APPROPRIATIONS TO THE FUND

SEC. 4. There are authorized to be appropriated to the fund such sums as may be necessary to carry out the purposes of this Act for the fiscal year ending September 30, 1978, and for the two succeeding fiscal years.

MANAGEMENT OF THE FUND

SEC. 5. (a) It shall be the duty of the Secretary to invest such portion of the fund as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose, such obligations may be acquired (1) on original issue at the issue price, or (2) by purchase of outstanding obligations at the market price. The purposes for which obligations of the United States may be issued under the Second Liberty Bond Act, as amended, are hereby extended to authorize the issuance at par of special obligations exclusively to the fund. Such special obligations shall bear interest at a rate equal to the average rate of interest, computed as to the end of the calendar month next preceding the date of such issue, borne by all marketable interest-bearing obligations of the United States then forming a part of the public debt; except that where such average rate is not a multiple of one-eighth of 1 percent, the rate of interest of such special obligations shall be the multiple of one-eighth of 1 percent next lower than such average rate. Such special obligations shall be issued only if the Secretary determines that the purchase of other interest-bearing obligations of the United States, or of obligations guaranteed as to both principal and interest by the United States on original issue or at the market price, is not in the public interest.

(b) Any obligation acquired by the fund (except special obligations issued exclusively to the fund) may be sold by the Secretary at the market price, and such special obligations may be redeemed at par plus accrued interest.

(c) The interest on, and proceeds from the sale or redemption of, any obligations held in the fund shall be credited to and form a part of the fund.

EXPENDITURES FROM THE FUND

SEC. 6. The Secretary is authorized to make and to contract to make payments from the fund to applicants in order to enable such applicants to substantially reduce or eliminate the taxation of real property for the purpose of financing elementary and secondary education, in accordance with further provisions under this act, during the period beginning October 1, 1977, and ending with the close of September 30, 1980.

ELIGIBILITY

SEC. 7. (a) An applicant is eligible to receive payments under this Act only if the Secretary determines, on the basis of an application in such form as the Secretary may prescribe and in accordance with further provisions under this Act, that the applicant has adopted or will adopt a program to substantially reduce or eliminate the taxation of real property for the purpose of financing elementary and secondary education.

(b) The Secretary shall not finally disapprove any application for funds under this Act without first affording the applicant reasonable notice and an opportunity for a hearing. The terms of an application approved under this Act shall be considered a contract, to which the United States shall be deemed a party-in-interest, and such contract shall be specifically enforceable in the appropriate Federal District Court by the Secretary.

LIMITATIONS OF CONDITIONS

SEC. 8. (a) Subject to further provisions under this Act, and except as provided under subsection (g) of this section, the amount of payment under this Act to any applicant, for the first fiscal year in which such application is made, and for the succeeding fiscal year, shall not exceed—

(1) the amount of funds which would otherwise have been received by the applicant from the taxation of real property for the purpose of financing elementary and secondary education during that fiscal year, to the extent that such taxation has been reduced, or

(2) the amount of funds for that year which an applicant in a State would require in order to expend for elementary and secondary education an amount per pupil which is equal to the applicable target per pupil expenditure for that applicant,

whichever is greater.

(b) As used in this section—

(1) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(2) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(3) The term "elementary school" means a day or residential school which provides elementary education, as determined under State law.

(4) The term "secondary school" means a day or residential school which provides elementary education, as determined under State law, except that it does not include any education provided beyond grade 12.

(5) The term "target per pupil expenditure" means the per "weighed pupil" expenditure for elementary and secondary school children, respectively, during the base period fiscal year determined by the Secretary for that State, of that local educational agency within such State with a per pupil expenditure for elementary and secondary school children, respectively, which is exceeded by not more than 10 per centum of the local educational agencies within such State.

(6) The term "weighted pupil" means a unit of pupil need used in determining allocations of funds to local educational agencies, which reflect cost differentials associated with pupils having special educational needs (such as handicapped children, economically disadvantaged children, those in need of bilingual education, and gifted and talented children) and cost differentials associated with sparsity or density of population, cost of living, or special socioeconomic characteristics.

(7) The term "homestead" means the dwelling, whether owned or rented, and so much of the land surrounding it, not exceeding one acre, as is reasonably necessary for the use of the dwelling or multipurpose building used as a home and a part of the land upon which it is built, and of a mobile home if used as a home. Such term does not include personal property such as furniture, furnishings, or appliances whether or not affixed to the realty.

(8) The term "rent constituting real property taxes" means an amount equal to 25 per centum of the gross rent actually paid in cash (or its equivalent) in any calendar year by an individual solely for the right of occupancy of his homestead in a calendar year.

(9) The term "gross rent" means a rental paid solely for the right of occupancy of a homestead, exclusive of charges for any utilities, services, furniture, furnishings or personal property or appliances furnished by the landlord as part of the rental agreement whether or not expressly set out in the rental agreement.

(c) To be eligible to receive payment under this Act for any fiscal year for which application is made, an applicant shall provide satisfactory assurances to the Secretary that where the taxation of real property is employed for the purpose of financing elementary and secondary education, that it will reduce real property taxes or rent constituting real property taxes upon an individual's homestead for the current taxable year.

(d) Prior to receiving payment under this Act in the second fiscal year for which application is made, each State of an applicant shall present data to the Secretary and to the Commissioner of Education demonstrating that, in the preceding fiscal year, all local educational agencies in the State had per pupil expenditures which met the required level for elementary and secondary school children, respectively, as set forth in this section.

(e) In the second fiscal year for which application is made and each year thereafter, the Secretary shall withhold not more than 20 per centum of the payment for which an applicant would otherwise be eligible, unless the Secretary has received proper notification from the Commissioner of Education, under such requirements as the Commissioner may by regulation prescribe, that such applicant has planned and will carry out programs to meet identified needs for early childhood development, vocational education, comprehensive educational programs designed to meet the special education needs of mentally or physically handicapped children and children with specific learning disabilities, and compensatory education for children who are educationally deprived.

(f) In the second fiscal year for which application is made and each year thereafter, the Secretary is authorized to increase the amount of payments to an applicant by not more than 10 per centum per year, upon receiving proper notification from the Commissioner of Education, under such requirements as the Commissioner may by regulation prescribe, that such applicant would require these additional funds in order to meet additional operating costs sustained by the applicant as a result of—

(1) the implementation of such educational programs as may be required under the provisions of this Act;

(2) the acquisition of new educational

equipment or the improvement of existing equipment by the applicant; and

(3) increased salaries for teachers paid out of funds made available by the applicant.

(g)(1) In the third fiscal year for which application is made and each year thereafter, or in any fiscal year for which an application is approved by the Secretary under the provisions of this subsection, the applicant shall be a State, and the amount of payment to such State shall be equal to 33⅓ per centum of the expenditures for elementary and secondary education, respectively, in such State in the fiscal year preceding the fiscal year for which application is made, upon the determination by the Secretary with the concurrence of the Commissioner of Education, subsequent to the presentation to the Secretary and the Commissioner of such information and data as the Secretary and the Commissioner shall jointly by regulation prescribe, including a State plan as further provided under this subsection, that such State has complied with the provisions of this Act with respect to—

(A) the substantial reduction or elimination of the taxation of real property for the purpose of financing elementary and secondary education, as set forth in section 6, section 7, and subsection (c) of this section;

(B) the achievement of the required level of per pupil expenditures by all local educational agencies in the State, as set forth in subsections (a)(2), (b)(5)–(6), and (d) of this section;

(C) the maintenance of combined fiscal effort by all local educational agencies and the State with respect to the provision of free public education by such agencies, and the establishment of a tax system within the State to maintain such combined fiscal effort and for other purposes, as further provided under this subsection;

(D) the planning and carrying out of educational programs, as further provided under this subsection; and

(E) general provisions as set forth in section 9.

(2) The State plan shall—

(A) stipulate measures and programs implemented to assure that the State is in compliance with the requirements of paragraph (1) of this subsection;

(B) provide that the State educational agency shall act as the sole agency for the administration of the State plan;

(C) set forth a program under which payments made to the State under this Act will be used solely by State and local educational agencies for elementary and secondary educational purposes;

(D) have been adopted only after affording local educational agencies in the State an opportunity to review and comment on its provisions;

(E) present data demonstrating that the combined fiscal effort of local educational agencies and the State with respect to the provision of free public education by such agencies for the preceding fiscal year (exclusive of payments received under this Act) was at least equal to such combined effort for the fiscal year preceding the fiscal year in which initial payments were received under this Act: *Provided, however,* That the resultant tax system within the State provides that—

(i) there shall be an equitable distribution within the State of the burden of financing public elementary and secondary education; and

(ii) such financing shall be a function of the total taxable wealth of the State, and is not limited to the taxable wealth of the individual local educational agencies within the State; and

(iii) such financing shall therefore be derived predominantly from State tax collections based upon the personal income of all persons resident in the State;

(F) provide for use by the State educational agency of payments made under this Act for the proper and efficient performance of its duties in implementing this Act, except that such agency may not, in any fiscal year, use for such purpose an amount greater than 1 per centum of the State's total entitlement for payments under this Act in such fiscal year, or $150,000, whichever is the greater;

(G) provide for objective measurements of the number of children in areas served by all respective local educational agencies in the State and for an assessment of their educational needs and achievements, as well as an accounting of educational services provided such children and the number of children served, and for the provision of annual reports to the Commission of Education providing such information and data as the Commissioner shall by regulation prescribe in carrying out the provisions of this subparagraph, where such information and data are provided according to the following categories:

(i) children of pre-school age;

(ii) children in the age group served by elementary and intermediate schools through grade nine;

(iii) children in the age group served by secondary schools in grades ten through twelve;

(iv) children who are mentally handicapped;

(v) children who are physically handicapped;

(vi) children who have specific learning disabilities;

(vii) children who are educationally deprived; and

(viii) children who can be assisted by vocational education.

(3) In the second fiscal year for which application is made by a State and each year thereafter, and upon receiving proper notification from the Commissioner of Education on the basis of information and data provided to the Commissioner by such State applicant in accordance with requirements under the State plan as set forth in subparagraph (G) of paragraph (2) of this subsection, the Secretary is authorized to withhold or increase payments to such State applicant as provided, respectively, under subsections (e) and (f) of this section. In any case in which the Commissioner has not determined that satisfactory data for the purpose of this subsection are available, the Commissioner is authorized to request the Secretary of Commerce to make a special estimate of the number of children specified under the respective categories of subparagraph (G) of paragraph (2) of this subsection, and the Commissioner is authorized to pay (either in advance or by way of reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information.

GENERAL PROVISIONS

SEC. 9. (a) The Secretary shall be the trustee of the funds, and shall report to the Congress not later than March 1 of each year on the status and operation of the fund during the preceding fiscal year.

(b) In order to qualify for any payment under this Act, an applicant must establish (in accordance with regulations established by the Secretary, after an opportunity for review and comment by the Governor of a State, with respect to a unit of local government located in such State) to the satisfaction of the Secretary that—

(1) it wil use fiscal, accounting, and audit pocedures which conform to guidelines established therefor by the Secretary (after consultation with the Comptroller General of the United States),

(2) it will provide to the Secretary (and to the Comptroller General of the United States), on reasonable notice, access to, and the right to examine, such books, documents, papers, or records as the Secretary may reasonably require for purposes of reviewing compliance with this Act,

(3) it will make such annual and interim reports to the Secretary as he may reasonably require,

(4) it will establish policies and procedures designed to assure that no more than 5 per centum of the Federal funds made available under this Act will be used for capital outlay and debt service, and

(5) the control of funds provided under this Act, and title to property derived therefrom, shall be in a public agency for the uses and purposes provided in this Act, and that a public agency will administer such funds and property.

(c) No person in the United States shall on the ground of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this Act.

JUDICIAL REVIEW

SEC. 10. (a) If any applicant is dissatisfied with the Secretary's final action with respect to the approval of its application under the provisions of this act, or with respect to the withholding of payments as provided under section 8(e), such applicant may, within thirty days after notice of such action, file with the United States court of appeals for the circuit in which the applicant is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(b) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

TRANSITIONAL PROVISIONS

SEC. 11. Notwithstanding the provisions of section 7, during the fiscal year ending September 30, 1977, the Secretary is authorized to furnish assistance and make payments to assist applicants in gradually reducing the amount of revenues received by such applicants by the taxation of real property for the purpose of financing elementary and secondary education.

SUMMARY: NATIONAL EDUCATION INVESTMENT ACT OF 1977

Establishes a National Education Trust Fund in the Treasury, from which the Secretary of the Treasury will make payments to State and local jurisdiction applicants, to enable such applicants to substantially reduce or eliminate the taxation of real property for the purpose of financing elementary and secondary education during an initial authorization period beginning October 1, 1977 and ending with the close of September 30, 1980.

Provides that during the first and second fiscal year for which application is made, Federal payments shall not exceed either (1) the amount of funds which otherwise would have been received by the applicant from the

taxation of real property for the purpose of financing elementary or secondary education during that fiscal year, to the extent that such taxation has been reduced, or (2) the amount of funds for that year which an applicant in a State would require in order to expend for elementary and secondary education an amount per pupil which is equal to the applicable target per pupil expenditure for that applicant, as further defined—whichever amount is greater. (Basically, the purpose of federal assistance would be to increase and balance per pupil expenditures among local school districts, without penalty to high-cost or high expenditure areas, and to target increased assistance on areas of educational deprivation).

Provides that to be eligible to receive payments under this Act in any fiscal year, an applicant must reduce real property taxes and rent constituting real property taxes upon an individual's homestead (where such taxes are used to finance elementary and secondary education) for the current taxable year.

Federal payments under this Act in the second fiscal year for which application is made, and thereafter, are made further contingent upon appropriate certification by the State of the applicant that in the preceding fiscal year, all local educational agencies in the State had per pupil expenditures which met the required level for elementary and secondary school children, as provided under this Act. Moreover, the applicant must have planned and will carry out programs to meet identified needs for early childhood development, vocational education, comprehensive educational programs designed to meet the special education needs of mentally or physically handicapped children and children with specific learning disabilities, and compensatory education for children who are educationally deprived. Provision is made for an incentive increase of 10 percent in payments to an applicant to meet such obligations, and for the withholding of 20 per cent of the payment for which the applicant would otherwise be eligible where such obligations have not been assumed.

Provides that in the third fiscal year for which application is made, or in any fiscal year for which application is made by a State which meets certain enumerated requirements, including the presentation of a State plan under which specific obligations are assumed, only the State will be eligible to apply for Federal payments from the trust fund. The amount of payment to such State shall be equal to 33⅓ per cent of the expenditures for elementary and secondary education in the State in the preceding fiscal year.

To be eligible for this assistance, the State must comply with the provisions of this Act with respect to the substantial reduction or elimination of the taxation of real property for the purpose of financing elementary and secondary education, the achievement of the required level of per pupil expenditures by all local educational agencies, the planning and carrying out of educational programs as stated above, and certain general provisions. In addition, the State must have adopted a State tax system under which combined State and local fiscal effort is maintained on behalf of elementary and secondary education, and that assures an equitable distribution within the State of the burden of financing elementary and secondary education, making such financing a function of the total taxable wealth of the State, achieved primarily by basing State taxes upon total personal income.

By Mr. SPARKMAN (by request):

S. 1042. A bill to amend the Arms Control and Disarmament Act, as amended, in order to extend the authorization for appropriations, and for other purposes; to the Committee on Foreign Relations.

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference a bill to amend the Arms Control and Disarmament Act, as amended, in order to extend the authorization for appropriations, and for other purposes.

The bill has been requested by the President of the United States and I am introducing it in order that there may be a specific bill to which members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD, together with the letter from the President to the President of the Senate dated March 10, 1977, and the letter from the Acting Director of the Arms Control and Disarmament Agency.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1042

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, The Arms Control and Disarmament Act, as amended, is further amended as follows:

(1) Section 31 (22 U.S.C. 2571) is amended by striking out "United States" in clause (2) of the second sentence.

(2) Section 49(a) (22 U.S.C. 2589(a)) is amended by inserting in the second sentence thereof immediately after "and other nondiscretionary costs," the following: "and for fiscal year 1978 the sum of $13,600,000 (and such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs), and for fiscal year 1979 such sums as may be necessary to carry out the purposes of this Act,".

THE WHITE HOUSE,
Washington, D.C., March 10, 1977.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I transmit herewith for consideration of the Congress proposed legislation to extend the appropriation authorization for the Arms Control and Disarmament Agency and for other purposes, together with a letter from the Acting Director of the Agency in support of this legislation.

The United States Government's interest in arms control agreements has gained widespread public and bipartisan political support. The ultimate goals of these agreements are to lessen the danger of war and to promote peaceful settlement of disputes. We are currently pursuing these goals in many forums, including negotiations bilaterally with the Soviet Union, and multilaterally with the Warsaw Pact countries, in the Geneva-based Conference of the Committee on Disarmament and in the United Nations.

In the troublesome area of nuclear proliferation, we are continuing to increase the effectiveness of the Treaty on the Non-Proliferation of Nuclear Weapons and the International Atomic Energy Agency. We are taking important initiatives to establish new cooperation with the other major nations supplying nuclear equipment and technology. And I have given my support to a comprehensive nuclear test ban.

In my Administration, the Arms Control and Disarmament Agency will have a very important role in all of these activities. By statute the Director of the Agency serves as the principal adviser to the Secretary of State, the National Security Council, and me on arms control and disarmament matters. In addition, the Director will serve as my chief negotiator at the Strategic Arms Limitations Talks and his Agency will continue to have the principal support responsibility for these negotiations and the negotiations relating to mutual and balanced force reductions in Europe. Its budget supports research in furtherance of these negotiations as well as nuclear non-proliferation, nuclear test limitations, and other important arms control activities.

Current authorization and appropriations for the Arms Control and Disarmament Agency expire September 30, 1977. I am transmitting the attached draft bill in order that the Congress may begin its consideration of future authorizing legislation for the Agency.

The draft bill would also amend the Arms Control and Disarmament Act to delete a requirement that all of the Agency's contracts and agreements for research be with United States institutions or persons. As explained in the letter from the Acting Director of the Agency, this amendment is needed for the Agency to fully carry out its statutory responsibilities.

I urge early enactment of this measure.

Sincerely,

JIMMY CARTER.

U.S. ARMS CONTROL AND
DISARMAMENT AGENCY,
Washington, D.C., February 18, 1977.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: Enclosed for your approval and transmittal to the Congress is a draft bill that would amend the Arms Control and Disarmament Act to extend the authorization for appropriations for the Agency and delete a restriction on the Agency's contracting authority.

The Agency's current authorization expires on September 30, 1977. The proposed legislation would authorize appropriations for the Agency for fiscal year 1978 of $13.6 million (plus such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law and other nondiscretionary costs). The funds authorized by this legislation will be devoted primarily to support of the anticipated third phase of the Strategic Arms Limitation Talks with the Soviet Union, the development of new concepts, techniques and agreements to prevent the further proliferation of nuclear weapons, efforts to improve and refine the verification of nuclear explosions, and exploration of new possibilities in the limitation of conventional weapons.

The draft bill also amends section 31 of the Arms Control and Disarmament Act to delete a requirement that all of the Agency's contracts and grants be with United States institutions and persons. The Agency is increasingly encountering instances where this restriction interferes with important national objectives. For example, because of concern about the possibility that plutonium might be diverted for nuclear weapons use as a result of reprocessing "spent" fuel from light water power reactors, the Agency recently had an urgent need for research on an alternative approach involving use of the spent fuel from U.S.-type light water reactors directly as fuel in Canadian-type heavy water reactors. Canadian private industry is the repository of much useful background information in this area, and the Agency would quite likely have made excellent use of contracts with Canadian organizations were it not for the restrictions in section 31.

Another example of where it is not practical to rely on domestic capability is in field testing innovative safeguards techniques and equipment developed by the Agency and its contractors. It is often necessary to do this developmental work at foreign sites to determine if the techniques and equipment are

effective when used at nuclear installations which differ from those found in the United States. The inability to enter into contracts with foreign organizations for some aspects of this work is a serious handicap to the Agency in developing internationally acceptable safeguards techniques and equipment.

This authorization request is supported by plans for what I believe will be a sound, effective, and well-conceived arms control and disarmament effort by the Agency. Its early enactment is essential to permit timely Congressional consideration of the Agency's 1978 budget.

Respectfully,

ROBERT M. BEHR,
Acting.

By Mr. BENTSEN (for himself, Mr. CRANSTON, Mr. HATFIELD, Mr. LONG, Mr. JOHNSTON, Mr. GRAVEL, Mr. WEICKER, Mr. INOUYE, Mr. STONE, Mr. MATSUNAGA, and Mr. ALLEN):

S. 1043. A bill to provide for the development of aquaculture in the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

NATIONAL AQUACULTURE ORGANIC ACT OF 1977

Mr. BENTSEN. Mr. President, today I am introducing a bill which, if enacted, will enable this country to open us a new major industry. More than that, this bill will enable us to increase our supplies of valuable foodstuffs and lower our dependence on other countries for commodities.

This bill is entitled "The National Aquaculture Organic Act of 1977". It states that it is America's policy that a strong aquaculture industry be established in this country. This national policy will be backed up with a strong commitment to cooperation and coordination among all levels of government and between the public and private sector. This national policy will act as a stimulus to an industry which is still in its infancy in America, but which has proven itself over and over again in other countries.

As my distinguished colleagues are well aware, aquaculture is the culture of fish, shellfish and seaweed. It is used to either add to natural supplies or to produce commercial products for sale to consumers. Currently, U.S. aquaculture is responsible for all trout produced in this country, for over half our catfish and crawfish, and for sizable portions of our oysters and salmon. In 1973 and 1974 aquaculture was a $191 million industry in the United States, accounting for about 3 percent of all fish and shellfish consumed domestically.

When these figures are compared to what has been accomplished in other countries and what could be accomplished in America, they indicate that we have not yet begun to exploit the full potential of this industry. Right now, in the free world, aquaculture accounts for fully 10 percent of all fish and shellfish consumed. In this country we produce only five or six species under conditions that approach commercial success, while in other countries dozens of species are now produced in controlled environments for supply to consumers.

The chief reasons for the success of other countries are three-fold:

First, capital is available and goes further in those countries than in the United States.

Second, consumption and price are higher.

Third, in those countries there is a national policy to promote aquaculture.

U.S. consumption of fish and shellfish is on the increase according to every study on the subject. Demand is growing. However, the technology for U.S. aquaculture has not yet been perfected, and there is still high risk in the industry. Consequently, venture capital, already scarce in these difficult economic times, is not available in sufficient quantity for further development of aquaculture. With more practical knowledge and with a few vivid demonstrations of success, of practicality and of commercial viability, private industry will increase its investment in the industry.

There are several good reasons for us to make aquaculture more attractive to the private sector right now, rather than in the distant future:

Normal international supplies of fish appear to be diminishing while demand is increasing. Too, due to the increase in fuel prices it has become more expensive to send fishing vessels thousands of miles to distant international waters. Greater production of fish and shellfish in inland, coastal, and near-coastal waters will both increase supply and cut down on energy costs.

Currently, the U.S. imports more than 50 percent of our fishery products; in 1974 this amounted to $1.5 billion. With an improved aquaculture industry, we could increase domestic production and alleviate our balance of payments problems. One estimation predicts an annual balance of payments savings of $580 million annually.

Aquaculture is an ideal industry for coastal wetlands, many of which are now being underutilized. In addition, it can make use of thermal effluents from powerplants, and bring value to a resource that is now regarded as a nuisance and largely wasted. Currently, powerplants in New York, Florida, Texas, and California are experimenting with this type of system.

Since it began ages ago, the open-seas and coastal-waters fishing industry has been plagued not only by shortages of fish, but also by fluctuations in the supply of fish available for catching. Introduction of juvenile species, known as ocean ranching, now makes it possible to stabilize and increase this supply to the benefit of the fishing industry.

In general, protein-rich foods are in short supply around the world. Increased yield in the fishing industry, brought about by acquaculture, can make significant contributions toward increasing these supplies of necessary protein-rich foods.

Aquaculture has benefited the large corporations, "Mom and Pop" operations, and small farmers. Facilities may range from multimillion dollar operations yielding thousands of tons per year to small tanks and ponds. For several species, current technology is sufficient to allow small operations; what is needed is the perfection of marketing systems designed to bring fish from small producers to consumers. One object of the National Aquaculture Act is to aid in the development of these marketing systems.

My interest in this industry was prompted by the many successful aquaculture projects carried out by and through the Cooperative State Research Service of the Department of Agriculture. Currently, CSRS sponsors 48 research projects at State agricultural research stations and at land grant colleges. These projects include studies on breeding and genetics, nutrition, disease, and parasite control, and quality control. The scientists involved in these projects take a shirt-sleeve, hard-working approach to their research, and they have done much to further the development of freshwater foodfish.

Mr. President, the major provisions of the National Aquaculture Organic Act are as follows:

The act would establish a National Aquaculture Development Plan under the Secretary of Commerce, who will consult with the Secretary of the Interior and the Secretary of Agriculture. The plan is to identify priority species to which efforts will be devoted.

The act calls for the Federal Government to provide information and technical assistance to persons and organizations interested in aquaculture. One method of accomplishing this will be to establish a public aquaculture information center.

The act will establish an Interagency Committee on Aquaculture, which will include representatives from Commerce, Interior, Agriculture, ERDA, EPA, and FDA.

The act provides for contracts and grants to colleges, universities, and other private industry entities to further develop aquaculture.

The act permits the Secretary of Commerce to guarantee commercial loans and obligations made to persons for the purpose of construction, reconstruction, or reconditioning of aquaculture facilities in the United States.

The National Aquaculture Organic Act of 1977 is of particular importance to those States which have made significant strides in the development of aquaculture industries. To be sure, these include all the coastal States, but they also include many of our inland States. In Texas, shrimp are now being raised successfully in Corpus Christi, utilizing the thermal effluent from a nearby powerplant. Yet we of Texas have found that shrimp need not be raised only on the coast. Hundreds of miles inland near Pecos we are, on an experimental basis, raising these same shrimp in ponds located in a semiarid region. These ponds are fed by the salt waters pumped from an ancient ocean which still exists deep underground.

Too, in the farmlands Texas catfish are raised in ponds and tanks. These fish are sold to local markets or are used to stock other ponds, rivers, and lakes.

Many of our Southern States are also engaged in the raising of several aquaculture species. In the Northeast, oysters and lobsters are now being raised like farm animals. In the Northwest, juvenile salmon are being released into native streams which carry them out to sea where they mature. In just a few years

these salmon return to those same streams to spawn, and there they are harvested by local citizens. On the western coastlands abalone are now being grown commercially.

These are just a few examples of what is happening now in the early stages of the industry. What can happen in the future is even more exciting: the production of fish from old offshore oil platforms; the release of shrimp into coastal waters where they will mature and be harvested by the shrimping industry; the breeding and development of superspecies, larger, better, and more nutritious than those that now exist.

As we farm the land, so can we farm the waters. The National Aquaculture Organic Act of 1977 is a major step in that direction. I hope that my colleagues will join me in support of an act which will bring more progress in an area on which we must place increasing reliance.

Mr. President, I ask unanimous consent that a summary of my proposed legislation be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE NATIONAL AQUACULTURE ORGANIC ACT OF 1976 SPONSORED BY SENATOR LLOYD BENTSEN

PURPOSE

To provide for the development of aquaculture in the United States through:

Basic and applied research.

Coordination of existing and future activities.

Sharing of information.

Guaranteeing loans for the development of commercial aquacultural facilities.

BACKGROUND

Aquaculture is the culture of fish, shellfish and seaweed. Acquaculture is used either to add to natural supplies (as in federal and state fish hatchery release programs) or to produce commercial products for sale to consumers.

The following are representative of species that are cultivated worldwide:

Shrimp, catfish, salmon, crawfish, oysters, seaweed, scallops, carp, sea bream, milkfish, eel, lobster, baitfish, trout, clams, freshwater prawns, yellowtail flounder, and amur.

Of these, the current U.S. industry consists of baitfish, trout, catfish, oysters, salmon and shrimp. Only the first five are produced in what may be termed commercially successful quantities.

Aquaculture was a $191,480,000 industry in the United States in 1973–1974. It accounts for about three percent of all U.S. consumption of fish and shellfish. However, in Japan and Czechoslovakia, aquaculture produces ten percent of their fish and shellfish. The chief reasons for this higher percentage are that in these countries (1) capital is available and goes further, (2) consumption and price is higher, and (3) there is a national policy to promote aquaculture.

U.S. consumption of fish and shellfish is on the increase, so that demand is expected to go up. However, the technology for U.S. acquaculture has not yet been perfected, and there is still fairly high risk in the industry. Consequently, venture capital, already scarce in these tough economic times, is not available in large quantities for further development of aquaculture.

The purpose of the National Aquaculture Act is to establish a national policy to promote acquaculture through further technological development and by making less risky private capital investment in the industry. With more practical knowledge and with examples of successful operations, private industry will increase its investment in the industry.

There are several very good reasons for the promotion of the aquaculture industry:

Normal international supplies of fish appear to be diminishing while demand is increasing. Too, due to increases in fuel prices, it has become more expensive to send fishing vessels to distant international waters. Production of fish and shellfish in inland, coastal and near-coastal waters will both increase supply and cut down on energy costs, resulting in lower consumer payments for these products.

Currently, the U.S. imports more than 50 percent of our fishery products; in 1974, this amounted to $1.5 billion. More domestic production, which would come with aquaculture, will help with our balance of payments problems. One estimation predicts an annual balance of payments savings of $580 million annually.

Aquaculture is an ideal industry for coastal wetlands, many of which are now being underutilized. Also, it can make use of thermal effluents from power plants, thus bringing value to a resource that is now largely wasted; currently power plants in New York, Florida, Texas and California are involved in this type of system.

Since it began ages ago, the open-seas and coastal fishing industry has been plagued by fluctuations in the supply of fish available for catching. Introduction of juvenile species, known as ocean ranching, now makes it possible to stabilize and increase this supply.

In general, protein-rich foods are in short supply. Increased yield in the fishing industry, brought about by aquaculture, can make significant contributions toward increasing the supplies of necessary protein-rich foods.

Aquaculture has benefited the large corporations, "Mom and Pop" operations, and small farmers. Facilities may range from multi-million dollar operations yielding thousands of tons per year to small tanks and ponds. For several species, current technology is sufficient to allow small operations; what is needed is the perfection of marketing systems designed to bring fish to small producers to consumers. One object of the National Aquaculture Act is to aid in the development of these systems.

MAJOR PROVISIONS OF THE NATIONAL AQUACULTURE ORGANIC ACT

(1) Establishes a National Aquaculture Development Plan under the Secretary of Commerce, who will consult with the Secretary of the Interior and the Secretary of Agriculture.

The plan is to establish "priority" species to which efforts will be devoted. Individual plans for the commercial production of each priority species will be developed.

(2) Calls for the Secretary of Commerce to provide information and technical assistance to persons and organizations interested in aquaculture.

Establishes a public aquaculture information center to function as a national clearinghouse for projects and technical data and analysis.

(3) Establishes the Interagency Committee on Aquaculture, which will include representatives from Commerce, Interior, Agriculture, EPA, ERDA, FDA and other Federal agencies which the Committee finds to have functions related to Aquaculture. The Committee will be responsible for coordination of Federal efforts.

(4) Provides for contracts and grants by Federal agencies in furtherance of this Act.

(5) Permits the Secretary of Commerce to guarantee commercial loans and obligations made to persons for the purpose of construction, reconstruction, or reconditioning of aquaculture facilities in the United States.

(6) Requires annual reporting on the implementation of this Act of Congress.

(7) Authorizations:

	1978	1979	1980
Commerce	$1,500,000	$12,500,000	$12,500,000
Interior	1,000,000	7,500,000	7,500,000
Agriculture	1,000,000	7,500,000	7,500,000
Total	3,500,000	27,500,000	27,500,000

Also, $100 million is authorized without fiscal year limitation to the Secretary of Commerce, to be held in trust for purposes of guaranteeing commercial loans and obligations outlined in (5).

By Mr. STEVENSON:

S. 1044. A bill to permit the vessel *Manatra II* to be inspected, licensed, and operated as a passenger-carrying vessel, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. STEVENSON. Mr. President, I introduce a bill to permit the vessel *Manatra II* to be inspected, licensed, and operated as a passenger-carrying vessel. *Manatra II*, owned by the Marine Navigation and Training Association, is operated on Lake Michigan to provide nautical training for groups such as Sea Scouts and Sea Cadets. The vessel does not meet the Coast Guard's safety standards for vessels of her size and tonnage. However, I understand that the association has undertaken substantial alterations and has consulted closely with the Coast Guard on steps required to insure the safe operation of the vessel.

I emphasize in introducing this bill that I am not suggesting that the Congress override the expert judgment of the Coast Guard on matters of safety. Instead, it is my purpose to facilitate an inquiry to determine whether a sound arrangement can be made to permit the vessel to be used for the association's training programs without compromising essential safety rules.

By Mr. STEVENSON:

S. 1045. A bill to change the name of the Indiana Dunes National Lakeshore to the Paul H. Douglas National Lakeshore; to the Committee on Energy and Natural Resources.

Mr. STEVENSON. Mr. President, today I am introducing a bill, along with my colleague, Mr. PERCY, to rename the Indiana Dunes National Lakeshore after the man most responsible for preserving the Nation's first urban national park—Senator Paul H. Douglas. The thousands of acres in this most valuable ecological, geological, and recreational resource exist today due to the perseverance of Senator Douglas.

I can think of no better way to pay tribute to the man who was concerned about the pressures and effects of life in the big city and the need to maintain easily accessible open space where city dwellers can rediscover themselves.

Many Indiana citizens wanted the dunes preserved, but had no one to help fight their cause. In 1957, members of the Save the Dunes Council approached Senator Douglas after their pleas for help to their own legislators proved fruitless.

His support of this cause came as a surprise to no one. He always extended his services to people in need—evidenced by his unrelenting efforts for civil rights,

education, medicare, urban renewal, and economic development.

Faced with the resistance of powerful business and development interests, Paul Douglas waged the battle for the lakeshore. It was Paul Douglas who aroused the conservation groups and public opinion. It was Paul Douglas who battled land speculators who sought vast profits. It was Paul Douglas who enlisted the support of Presidents Kennedy and Johnson.

After long and often discouraging conflict, Congress authorized the establishment of the Indiana Dunes National Lakeshore in November 1966. Without his persistence and determination this important part of our national heritage would not be preserved for future generations. All of it would have disappeared in the same manner much of it has already disappeared—lost to industrial growth by invading bulldozers and cement mixers.

Paul Douglas was a man of vision and courage who represented and fought for the millions of people who are the real, but often unrepresented, strength of this country.

At the beginning of his fight, Senator Douglas pleaded with a Senate that was not quite ready:

With all humility, I ask for your support of this bill to create the Indiana Dunes National Monument. I ask it in the name of the people of Indiana to whom it should belong forever; the people of Illinois who depend upon it; the people of the United States who are growing ever more alert to their disappearing natural resources; and the people, the millions upon millions of people who are yet to be born who cannot live and grow and be happy in a tight little world of factories, of smoke and noise and unrelieved pressures.

Mr. President, I believe it is proper that the "millions who are to be born" have a reminder of their debt to this great man—a man of honesty, compassionate understanding and loyalty. The lakeshore should be named the Paul H. Douglas National Lakeshore.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1045

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That an Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved on November 5, 1966 (80 Stat. 1309), is amended by striking out "Indiana Dunes National Lakeshore", wherever it appears, and inserting in lieu thereof "Paul H. Douglas National Lakeshore".

By Mr. SCHWEIKER (for himself, Mr. HELMS, Mr. HEINZ, Mr. DOLE, Mr. HATFIELD, and Mr. RANDOLPH):

S. 1046. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Human Resources.

Mr. SCHWEIKER. Mr. President, I send to the desk a bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made.

The Food and Drug Administration's recent announcement that it intends to prohibit the use of saccharin in foods and beverages has provoked a great public outcry, as I am sure all of my colleagues are aware. The FDA's decision was based on the results of a Canadian study which found that saccharin, when fed to rats in high doses, caused cancer of the bladder. Previous tests have not demonstrated with any degree of certainty that saccharin poses a risk of cancer, and saccharin has been used by the American people for about 80 years. Many people simply do not believe that sufficient evidence now exists to warrant a ban. But, the terms of the Delaney clause of the Food, Drug, and Cosmetic Act, FDA had no choice but to move against saccharin.

There are 10 million diabetics in this country who must forego normal sugar consumption. Many other Americans suffer from conditions, such as obesity, which make it necessary for them to restrict their intake of sugar. Countless people may run an increased risk of developing heart disease if they must give up artificial sweeteners.

Since cyclamates were banned in 1970, these people have relied exclusively on saccharin as an artificial sweetener. There is no other sugar substitute available to them. If the saccharin ban goes into effect, there will be no artificial sweeteners permitted to be sold in the United States.

We must be diligent in protecting the public health. We must not knowingly allow the American people to be exposed to substances which present a substantial cancer-causing risk. The purpose of the Delaney clause, which was enacted in 1958 when our ability to detect risks was much less advanced, is to insure that unsafe, cancer-causing substances do not enter into our food supply. In light of our increased scientific sophistication, and the fact that there may well be substantial health risks entailed if some additives—such as artificial sweeteners—are prohibited when there are no substitutes available, I think we should explore whether it is wise to give Federal officials some flexibility in administering the law. The bill I am introducing today would accomplish that.

My bill, similar to legislation already introduced on the House side by Representative JIM MARTIN of North Carolina, would not repeal the Delaney clause. Instead, the bill would permit Federal officials to use more discretion in making decisions to remove food additives from the marketplace, by allowing them to make an evaluation of the relative benefits and risks of such decisions.

Specifically, this legislation would allow the Secretary to make a finding that the benefits of permitting estimated use of a food additive outweigh the risks to human health posed by its continued use. The Secretary would have to consult with an advisory committee composed of trained scientists, consumer representatives, industry representatives, nutritionists, and other experts. We would have to provide a reasonable opportunity for comments from interested persons, and his finding could not take effect until 120 days after it was published in the Federal Register.

In making his evaluation of an additive, the Secretary would specifically be required to take into consideration such factors as the reliability of any tests performed with the additive, intake levels, ways to minimize human exposure to any risk posed by the additive, environmental effects, nutritional effects, and other considerations relating to the general public interest.

Lastly, the bill would allow for the continued availability of saccharin until there has been an opportunity for such an evaluation of the benefits and risks presented by its continued use.

I believe we owe it to the American people to be responsive to the deeply felt public concern which has arisen in connection with the decision to ban saccharin. I believe that the issues raised by the FDA decision merit serious consideration by the Congress, and the introduction of this legislation today is a step in that direction.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1046

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Food Additive Safety Amendments of 1977".

SEC. 2. Section 409(c)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348 (c)(3)) is amended—

(1) by inserting "(A)" after "(3)", by striking out "(i)" and "(ii)" in subparagraph (A), by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), by inserting "(I)" after "shall not apply with respect to", and by inserting after the semicolon the following: "(II) any food additive to be used as an ingredient of food for human consumption if, upon petition setting forth the grounds therefor, the Secretary has, in accordance with subparagraph (B), made and published in the Federal Register a finding that based on all the data presented the benefit to the general public from permitting the use of the additive outweighs any risk to human health that permitting such use may present"; and

(2) by adding at the end the following:

"(B)(i) A finding described in subparagraph (A)(i)(II) may be made only after the Secretary has received and considered the recommendations respecting such finding submitted by an advisory committee appointed by the Secretary from (I) individuals who are qualified by scientific training and experience to evaluate the carcinogenic effect of the food additive with respect to which such finding would be made and to evaluate the other effects of the use of such additive, (II) persons representative of the interests of consumers and the food additive industry affected, and (III) nutritionists, economists, scientists, and lawyers. The Secretary shall also provide reasonable opportunity for interested persons to comment on such a finding, and such a finding shall not take effect until the expiration of 120 days after it is published in the Federal Register.

"(ii) In making such a finding with respect to a food additive, the Secretary shall consider and in the finding—

"(I) evaluate the intake level at which the food additive causes cancer in animals in relation to the reasonably expected intake level of the additive by humans,

"(II) evaluate the quality of any test data and the validity of any tests which may have been performed on the food additive,

"(III) assess human epidemiological and exposure data respecting the food additive and statistical data on human consumption of it,

"(IV) evaluate any known biological mechanism of the carcinogenic effect of the food additive,

"(V) evaluate the means available to minimize human exposure to the risks presented by the food additive and the adequacy of the data available on such means, and

"(VI) evaluate the probable effects of prohibiting the use of the food additive and evaluate the probable effects of permitting its use, such evaluations to be made in accordance with the following priorities: first, health risks and benefits; second, nutritional needs and benefits and the effects on the nutritional value, cost, availability, and acceptability of food; third, environmental effects; and fourth, the interests of the general public.".

SEC. 3. The food additive regulation of the Food and Drug Administration applicable to saccharin on March 15, 1977 (Part 180, § 180.37; 52 Fed. Reg. 14638), shall, notwithstanding paragraph (c) of such regulation, remain in effect until such date as the Secretary of Health, Education, and Welfare determines he is unable to make the finding described in subsection (c)(3)(A)(i)(II) of section 409 of the Federal Food, Drug, and Cosmetic Act. Such a determination shall be published in the Federal Register.

By Mr. SCHMITT (for himself and Mr. DOMENICI):

S. 1047. A bill to amend the Urban Mass Transportation Act of 1964; to the Committee on Banking, Housing and Urban Affairs.

Mr. SCHMITT. Mr. President, I am introducing today an amendment to the Urban Mass Transportation Act of 1964, which provides for a clarification of the provisions under section 13(c). I am happy to have my colleague, Senator DOMENICI, as a cosponsor. This clarification of section 13(c) is needed in order to prevent the unnecessary delay of the approval by the Secretary of Labor of funding for mass transit programs in urban areas.

Section 13(c) of the Urban Mass Transportation Act of 1964 includes five provisions which are designed to protect the interests of workers affected by any changes made because of the funding by the Federal Government of local mass transit programs. Unfortunately, a perverse set of circumstances presently prevails to actually harm the interests of the workers which paragraph 13(c) was designed to protect.

It was the intent of Congress that the protective agreements between the city and the union representatives be negotiated at the local level. I quote the report of the House Committee on Banking and Currency:

The Committee wishes to point out that, subject to the basic standards set forth in the bill, specific conditions for worker protection will normally be the product of local bargaining and negotiations.

Presently in the city of Albuquerque, $1 million in urban mass transit funds are being denied to the city because of unnecessary bureaucratic delays here in Washington which is due in part to the unclear statement regarding the negotiation of protective agreement in section 13(c). My amendment would provide a clarification of the law with regard to the negotiation of protective agreements.

In Albuquerque, 15 employees of a local union are about to lose their jobs because of the entanglement of redtape in Washington. As pointed out recently in testimony before the Banking, Housing and Urban Affairs Committee, this problem has developed in other cities as well. I think it is necessary that the clarification provided in my amendment be adopted quickly.

The situation in my home State is well documented in several articles from the Albuquerque papers. I ask unanimous consent that they be printed in the RECORD following my remarks.

I have been in contact with the Secretary of Labor, the Honorable Ray Marshall, concerning this situation in Albuquerque, and he has agreed to look into the present situation. However, corrective legislation is obviously required.

I also ask unanimous consent that the text of my bill be printed in the RECORD.

Thre being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1047

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Section 13 (c) of the Urban Mass Transportation Act of 1964 is amended by adding at the end thereof the following: "Such arrangements shall not include a requirement for approval of any collective bargaining agreements other than by the appropriate local employee representatives."

[From the Albuquerque Journal, Mar. 1, 1977]

BUS RIDERS LOSE OUT

Albuquerque bus riders should ask Congress to change a law which threatens a part of this city's transit system service.

The U.S. Dept. of Labor (DOL) has refused to certify a $1 million grant in operating funds to the system because the international United Transportation Union (UTU) objected to a local labor protection agreement negotiated by the local union and the city. The Urban Mass Transportation Act (UMTA) requires that a labor protection agreement be negotiated between the transit operator and the union before the funds are released. The international union refused to accept the local union's agreement with the city so the DOL refused to certify the loan grant.

The DOL refusal will result in a cutback in city bus service beginning March 21 that will affect an estimated 2,500 rides riders a day and will result in the end of 10 to 15 jobs within the transit system.

The bus riders of Albuquerque should not have to suffer because of the actions of a labor union that has been given virtual veto power over issuance of federal grants to transit systems such as Albuquerque's.

The part of the act which grants such power is absurd and should be removed from the law. Not only does it delegate federal power to the union, it circumvents the intent of Congress which appropriated funds to help public transit systems better serve the public.

The irony is the union's refusal to approve the local labor protection agreement and will cost some transt workers their jobs and thousands of other persons their transportation.

[From the Albuquerque Tribune, Mar. 1, 1977]

DOESN'T MAKE SENSE

The city's dilemma in which it is forced to curtail or cut bus service reads like the cliche about winning the battle and losing the war.

The city will eliminate Sunday and night bus service, phase out two routes and cut back several other routes because Albuquerque did not receive a federal grant totalling more than $1 million.

The grant money has been refused because the United Transportation Union international would not approve a contract between its Local 1745 and the City of Albuquerque.

The grant under which the city sought to receive the federal grant requires that a labor protection agreement be negotiated between the city and the union before the federal funds are released.

The international union refused to ratify the agreement because the local pact does not provide such items as binding arbitration and the right to strike.

The city's chief administrative officer, Frank Kleinhenz, said those items could not be included in the contract because he believed the city would be in violation of state law.

The irony of the United Transportation Union's veto of the local agreement is that 10 to 15 of its members—city bus drivers—will lose their jobs because of the cutbacks in bus service.

In addition to the hardships faced by the drivers and their families, there also will be the loss of public transportation to people who depend on bus service to get them around the city.

The people of Albuquerque are the losers in the United Transportation Union's "victory" in blocking Albuquerque's federal grant

It doesn't make sense.

[From the Albuquerque News, Mar. 3, 1977]

UNION BLACKMAIL

Although abuses of union power seem disturbingly commonplace these days, few are as galling as that currently being perpetrated against the citizens—of Albuquerque by the United Transportation Union International.

Due to an inexplicable act of Congress, the UTU has been given, in effect, the power to determine whether or not Albuquerque receives federal funds for the operation of its bus system. This situation is not as strange as it may seem: special interest groups have often been able to attach "riders" onto worthwhile legislation which then becomes ineffective. But the fact is, the UTU International has deprived Albuquerqueans of adequate bus service.

Because the UTU International has refused to approve the contract its own Local 1745 made with the City, the U.S. Department of Labor will not release funds amounting to more than $1 million that would normally be granted to the City under provisions of the Urban Mass Transportation Act.

As a result, Albuquerqeans will not be able to ride the bus on Sundays or at night. And two bus routes will be eliminated, while the remaining services will be curtailed. Ten to 15 local UTU members will lose their jobs as a result of these cutbacks (adding to Albuquerque's already high unemployment rolls). Our elderly and lower-income families will find it even more difficult to survive economically.

This a clear-cut case of blackmail by the UTU International, which says, "If you don't play the game our way, we'll foreclose on your bus system." What makes the situation even more intolerable is that this blackmail is being financed with taxes paid by those very people who are being blackmailed,

and that the international union has overruled an agreement that was acceptable to most members of its own local union.

It is difficult to understand how the International's action could be in the best interest of its Albuquerque members.

Congress must put an end to this sort of blackmail. We urge you to write your legislators and ask what actions they have taken or will take to prevent such abuses where out-of-state union forces can cripple our transportation system.

By Mr. CHILES (for himself and Mr. STONE):

S. 1048. A bill to amend title XVIII of the Social Security Act so as to enable certain aliens to obtain coverage under the supplemental medical insurance program established by part B of such title; to the Committee on Finance.

Mr. CHILES. Mr. President, I am introducing on behalf of myself and Senator STONE, a bill to amend part B of the medicare program to provide for extended eligibility for participation in this program to elderly and disabled Cuban refugees and other persons in similar situations. This legislation is similar to amendments I offered during consideration of the Supplementary Security Income Act of 1972 that were enacted into law.

There reside today in Florida and throughout the United States a sizable number of Cuban refugees and other persons in a like situation who are not eligible to participate in the medicare part B program. Many of these hard working and productive persons are elderly, and many are disabled. The part B voluntary insurance program provides medical insurance benefits for aged and disabled individuals. Those who are eligible and decide to enroll may receive payments for home health care, diagnostic tests, and pathological and outpatient physical therapy services. This program is financed by payments from the enrollee along with contributions from Federal funds. Under the current law, eligibility is restricted to persons 65 years of age or older and who are either U.S. citizens or have been admitted as resident aliens living here for the last 5 years. The legislation I introduce today would provide for expanded eligibility for aliens who are residing in the United States under color of law, to include those present in this country as a result of the application of the provisions of section 203(a)(7) or section 212(d)(5) of the Immigration and Nationality Act.

Traditionally, we have extended to refugees equal treatment under the law and have accorded them eligibility to participate in various Federal programs. Based upon these past actions, we should not continue to deny their participation in this voluntary insurance program.

I think it is important and necessary that the Congress correct these past oversights and assure that these elderly and disabled members of our society will be able to have the benefits of medicare part B.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1836 (2) of the Social Security Act is amended to read as follows:

"(2) has attained age 65 and is a resident of the United States, and

"(A) is a citizen of the United States,

"(B) is an alien lawfully admitted for permanent residence in the United States, or

"(C) is an alien who is not lawfully admitted for permanent residence in the United States but who is (and on January 1, 1975, was) otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 203 (a) (7) or section 212 (d) (5) of the Immigration and Nationality Act),". (b) For purposes of section 1837 (d) of the Social Security Act, an individual, who does (but would not except for the amendments made by subsection (a)) first satisfy paragraph (2) of section 1836 of such Act on a date which is prior to the date of enactment of this Act, shall be deemed first to satisfy such paragraph (2) on the date of enactment of this Act.

Mr. STONE. Mr. President, through an unfortunate oversight, the opportunity was lost some years ago to amend the medicare part B voluntary insurance program of title XVIII of the Social Security Act. Such an amendment would have enabled many Cuban refugees living in our country and other persons of similar status to be eligible for the benefits offered by this program. It is very important, Mr. President, that these individuals be included in the voluntary insurance program. Many elderly persons are presently excluded despite the fact that they are hardworking and contributing members of our society.

For this reason, I want to cosponsor S. 1048, introduced by my distinguished senior colleague from Florida, Senator CHILES, amending part B of the medicare program—supplementary medical insurance benefits for aged and disabled—in order to include Cuban parolees and other persons of like status among the voluntary beneficiaries of welfare assistance to the blind, aged, or permanently disabled. This program offers benefit payments for home health services, diagnostic tests, and pathological and outpatient physical therapy services. Unlike other welfare programs, there is no requirement of impoverishment for participation in medicare part B.

Certainly, Mr. President, Congress should promptly look into this matter and enact legislation to extend the benefits of this program to all persons who are entitled to them.

By Mr. RANDOLPH:

S. 1050. A bill to amend title 39 of the United States Code to extend the period during which there is a moratorium on the increase of any rates, the reduction in levels and types of postal services, and the closing of certain post offices; to the Committee on Governmental Affairs.

LEGISLATION TO EXTEND MORATORIUM ON THE CLOSING AND CONSOLIDATION OF POST OFFICES, INCREASES IN POSTAL RATES, AND REDUCTIONS IN THE LEVELS OF SERVICE

Mr. RANDOLPH. Mr. President, on September 24 of last year H.R. 8603 became Public Law 94-421. This measure primarily concerns organizational and financial activities of the U.S. Postal Service and the Postal Rate Commission. It also contains a provision to prevent the indiscriminate closing of small post offices throughout America.

During the development of H.R. 8603, I consistently stressed the need to provide for the continuance of established postal services in rural areas and small towns of America. As a result, the bill contained language placing a moratorium on the closing and consolidation of post offices and prohibiting postal rate increases and reductions in levels of service until March 15, 1977. The date of March 15 was selected because on that date the Commission on Postal Service was required to report its findings to Congress and the President.

The Commission on Postal Service, established by Public Law 94-421, consists of seven members: three—including the chairman—appointed by the President, and two each appointed by the President pro tempore of the Senate and the Speaker of the House. The Postmaster General and the chairman of the Postal Rate Commission are ex-officio members without a vote. The general responsibility of the Commission is to conduct a comprehensive study of the Postal Service. However, the Commission is also required to review and issue recommendations on specific areas of interest, including public service aspects of the Postal Service.

The March 15 deadline, of course, has passed and the Commission's report is now due on April 18. I have reviewed the moratorium provisions of the bill and believe there is need for an extension. Congress must have time to review the recommendations of the Commission on Postal Services and to take the necessary steps to develop legislation in response to the recommendations.

The bill I introduce today extends from March 15 to October 31, 1977, the moratorium on rates, service reductions, post office closings and consolidations provided in Public Law 94-421. This extension will give sufficient time for the Congress to develop any legislative proposals on postal operations that should be undertaken as a result of the Commission's report.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1050

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (e) of section 2401 of title 39, United States Code, is amended by striking out "ending on the date on which the Commission on Postal Service is required to transmit the final report required under section 7(f)(1) of the Postal Reorganization Act Amendments of 1976 to the President and each House of Congress," and inserting in lieu thereof the following: "ending on October 31, 1977,".

By Mr. BIDEN (for himself, Mr. BAYH, and Mr. MCINTYRE):

Senate Joint Resolution 39. A joint resolution to provide for a study of the effects of saccharin; to the Committee on Human Resources.

Mr. BIDEN. Mr. President, there is no evidence that saccharin has caused—or will ever cause—cancer in humans. There is, according to the Food and Drug Administration, no immediate hazard to human beings. And, there have been no public hearings on the matter.

And yet, the FDA has ordered that products containing saccharin be removed from the market. This is just another example of the Federal Government going too far. It is also an example of going beyond commonsense.

I am today introducing a joint resolution that will prevent the FDA from carrying out this prohibition until it or the Office of Technology Assessment has conducted adequate research.

Saccharin is an artificial sweetener used in artificially flavored soft drinks, canned fruits, diet jams and jellies, sugarless chewing gum, toothpaste, mouthwash, cosmetics, over-the-counter drugs, and other products. Millions of Americans use it. They want to continue using it.

Some citizens need it—for instance, diabetics. Many of them would die from drinking one can of soft drink. They deserve an alternative.

Also, people with weight problems. There is scientific evidence that this condition can be hazardous to a person's health. Perhaps many more of us ought to use saccharin.

Saccharin is the only artificial sweetener that has been approved for use in food and beverages since the FDA banned cyclamates 7 years ago. And, by the way, some of the evidence that was used to justify that ban has subsequently been contradicted.

Taking products containing saccharin off the market would also be a severe blow to the companies that produce these products. In my view, it would be an unnecessary blow at this time.

Mr. President, I am not a scientist but I know that rats are different from people. I know that the relative quantity of an additive can make a crucial difference in an experiment.

In the Canadian experiment on which the FDA bases its ruling, the rats were fed the human equivalent of 800 cans of artificially flavored soft drinks a day. The Coulston experiments in the United States, which used a smaller amount, found that saccharin was no health hazard to human beings.

We ask only that the FDA or the OTA conduct, on human beings rather than rats, adequate studies that come to indisputable conclusions.

The FDA ban is well meaning, but it will hurt more than it will help. We must bring it to a halt.

ADDITIONAL COSPONSORS

S. 76

At the request of Mr. STONE, the Senator from Idaho (Mr. CHURCH), the Senator from South Carolina (Mr. THURMOND), the Senator from Rhode Island (Mr. PELL), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 76, a bill to amend title XVIII of the Social Security Act to authorize a payment under the medicare program for certain services performed by chiropractors.

S. 175

At the request of Mr. SCHWEIKER, the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 175, a bill to provide a special program of financial assistance to Opportunities Industrialization Centers and to other national community based organizations.

S. 196

At the request of Mr. BURDICK, the Senator from Idaho (Mr. CHURCH) was added as a cosponsor of S. 196, to amend the Internal Revenue Code.

S. 247

At the request of Mr. GOLDWATER, the Senator from New Mexico (Mr. SCHMITT), was added as a cosponsor of S. 247, a bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration.

S. 311

At the request of Mr. ROTH, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 311, a bill entitled the College Tuition Tax Relief Act of 1977.

S. 498

At the request of Mr. STEVENSON, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 498, a bill to amend the Federal Aviation Act of 1958 to provide improved notice to the public of changes in air carrier fares.

S. 506

At the request of Mr. HUMPHREY, the Senator from Washington (Mr. MAGNUSON) was added as cosponsor of S. 506, the Wage Supplements for Handicapped Individuals Act.

S. 514

At the request of Mr. RIBICOFF, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 514, to amend title XVIII of the Social Security Act.

S. 573

At the request of Mr. MATSUNAGA, the Senator from Wyoming (Mr. HANSEN) was added as a cosponsor of S. 573, to amend the Federal Aviation Act of 1958.

S. 689

At the request of Mr. KENNEDY, the Senator from Alabama (Mr. ALLEN) and the Senator from Idaho (Mr. CHURCH) were added as cosponsors of S. 689, a bill to amend the Federal Aviation Act of 1958 to encourage, develop and attain an air transportation system which relies on competitive market forces.

S. 694

At the request of Mr. KENNEDY, the Senator from South Dakota (Mr. McGOVERN), the Senator from Michigan (Mr. RIEGLE), the Senator from Utah (Mr. GARN), and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors to S. 694, a bill to adjust the status of Indochinese refugees to that of lawful permanent residents of the United States.

S. 772

At the request of Mr. BARTLETT, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 772, to amend section 1011(d) of the Tax Reform Act of 1976.

S. 779

At the request of Mr. BURDICK, the Senator from California (Mr. CRANSTON), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from North Dakota (Mr. YOUNG) were added as cosponsors of S. 779, to amend the Internal Revenue Code.

S. 939

At the request of Mr. BAYH, the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 939, the trade adjustment assistance program amendments.

S. 972

At the request of Mr. NELSON, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 972, a bill to authorize the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning and development, and domestic and international market development, and for other purposes.

S. 991

At the request of Mr. RIBICOFF, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 991, to establish a Department of Education.

S. 1015

At the request of Mr. NELSON, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 1015, to provide for the regulation of certain detergents in the Great Lakes region.

S. 1034

At the request of Mr. HAYAKAWA, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1034, relating to the use of saccharin.

SENATE RESOLUTION 105

At the request of Senator NELSON, the Senator from Colorado (Mr. HART) and the Senator from New York (Mr. JAVITS) were added as cosponsors of Senate Resolution 105, calling for a White House Conference on Small Business.

SENATE JOINT RESOLUTION 27

At the request of Mr. DECONCINI, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Joint Resolution 27, to limit Senators to two terms.

SENATE JOINT RESOLUTION 28

At the request of Mr. DANFORTH, the Senator from Utah (Mr. GARN) was added as a cosponsor of Senate Joint Resolution 28, to limit the terms of Members of Congress.

SENATE RESOLUTION 119—SUBMISSION OF A RESOLUTION AUTHORIZING ADDITIONAL PRINTING

(Referred to the Committee on Rules and Administration.)

Mr. CHURCH submitted the following resolution:

S. RES. 119

Resolved, That there be printed for the use of the Special Committee on Aging one thousand one hundred and sixty additional copies of its report to the Senate entitled "Development in Aging: 1976" (Pt. 1).

SENATE RESOLUTION 120—SUBMISSION OF A RESOLUTION RELATING TO THE BAN ON SACCHARIN

(Referred to the Committee on Human Resources.)

Mr. HUMPHREY submitted the following resolution:

S. RES. 120

Resolved, That it is the sense of the Senate that no ban or prohibition on the production, distribution, or sale of saccharin should take effect unless and until full and complete hearings have been conducted by the Food and Drug Administration to consider whether tests have been appropriate for the evaluation of the safety of this food additive, with respect to inducing cancer in man or animal; and, moreover, whether alternative public health protection measures should be taken in response to alleged carcinogenic effects of saccharin ingestion, where the danger to health of human consumption of normal quantities of saccharin has not been finally established; and, finally, whether an exemption from such ban or prohibition should be granted with respect to saccharin required for special dietary purposes.

FDA BAN OF SACCHARIN IS PREMATURE

Mr. HUMPHREY. Mr. President, the annals of American history are replete with heroic actions. We know that Nathan Hale regretted that he had but one life to give to his country. We remember that Barbara Fritchie never lowered her country's flag.

And now the Food and Drug Administration has stepped right between the calorie-conscious American and the only artificial sweetener on the market.

On March 9, FDA announced that it would ban the use of saccharin in foods after notice in the Federal Register and a period of public hearings.

It explained this action as a compulsory reaction to a Canadian study which alleged that high dosages of saccharin could cause malignant tumors in rats.

First, let me acknowledge that the FDA did not act without some precedent. Doubts about the safety of saccharin have persisted for many years, neither confirmed nor completely dispelled.

In 1972, the FDA imposed limits to discourage the general use of saccharin. A study requested of the National Academy of Sciences in 1974 concluded only that further study was needed. In January 1977, the FDA announced that it would act on the basis of the results of a Canadian study then underway.

The results are in. The FDA action responds to the language of the Delaney clause of the Food, Drug and Cosmetics Act, which flatly prohibits the use in food of any ingredient shown to cause cancer in animals or man.

As a consistent supporter of strict enforcement by the FDA of high safety standards, I am not convinced that this goal precludes any exercise of human or medical judgment.

There has been some tendency to dismiss the passionate public response to this ban as being only a case of protests from persons unwilling to forego self-indulgence in sweets. However, the impact of this ban would be far broader than persons with weight control problems. There are 10 million diabetics, of all ages, who require special sugar-free diets. There are millions of cardiovascular patients who must restrict their sugar intake. And there are millions of Americans who do not use saccharin but who consider the ban an arbitrary and simplistic action that offends commonsense. They believe that human judgment is an appropriate element of any governmental decision affecting the lives and habits of millions of Americans.

The issue is one of reasonableness. Science is not so advanced that it can always provide absolute answers. Rigid, automatic action that admits no weighing of benefit and risk is exaggerated in light of the history and experience with saccharin. I believe we can act rationally without abandoning the important principle of high standards of public safety. My proposal is that the forthcoming hearings should consider whether the evidence in support of the saccharin ban actually permits an evaluation of the safety of this food additive. I personally believe such a ban may be premature when based on a single study carried out elsewhere after at least 40 previous tests failed to develop conclusive evidence of harm. More important, I think the implications for human safety are not clearly established by test amounts equivalent to the human consumption of 800 12-ounce diet sodas daily over a lifetime.

I am happy to know that the House Commerce Subcommittee on Health and Environment has scheduled hearings to consider this action, and possible legislative clarification of the intent of current law.

To support this inquiry, I am today proposing a resolution to assure full hearings on both the necessity of this ban and the possible impact on persons whose special dietary requirements would be affected.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—SENATE RESOLUTION 110

AMENDMENTS NOS. 111 THROUGH 114

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted four amendments intended to be proposed by him to amendment No. 65 proposed to the resolution (S. Res. 110) to establish a Code of Official Conduct for Members, officers, and employees of the Senate; and for other purposes.

AMENDMENT NO. 116

(Ordered to be printed and to lie on the table.)

Mr. DURKIN (for himself and Mr. BIDEN) submitted an amendment intended to be proposed by them jointly to Amendment No. 65 proposed to Senate Resolution 11, supra.

AMENDMENT NO. 117

(Ordered to be printed and to lie on the table.)

Mr. DURKIN submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

AMENDMENT NO. 118

(Ordered to be printed and to lie on the table.)

Mr. BAKER submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

AMENDMENT NO. 119

(Ordered to be printed and to lie on the table.)

Mr. BARTLETT (for himself and Mr. NUNN) submitted an amendment intended to be proposed by them jointly to Senate Resolution 110, supra.

AMENDMENT NO. 120

(Ordered to be printed and to lie on the table.)

Mr. BELLMON submitted an amendment intended to be proposed by him to amendment No. 65 proposed to Senate Resolution 110, supra.

AMENDMENT NO. 121

(Ordered to be printed and to lie on the table.)

Mr. CURTIS submitted an amendment intended to be proposed by him to amendment No. 65 to Senate Resolution 110, supra.

ADDITIONAL DISTRICT COURT JUDGES—S. 11

AMENDMENT NO. 115

(Ordered to be printed and referred to the Committee on the Judiciary)

Mr. STONE (for himself and Mr. CHILES) submitted an amendment intended to be proposed by them jointly to the bill (S. 11) to provide for the appointment of additional district court judges, and for other purposes.

NOTICES OF HEARINGS

FOOD STAMP PROGRAM

Mr. McGOVERN. Mr. President, on behalf of the Subcommittee on Nutrition of the Committee on Agriculture Nutrition and Forestry, I wish to announce food stamp hearings on Friday, March 25 at 9 a.m.

Primarily, the purpose of these hearings is to handle the overflow of witnesses who could not be accommodated at the full committee farm bill hearings. However, a limited number of additional witnesses will be scheduled subject to time constraints.

Oral testimony will be limited to 10 minutes, but written statements may be of any length and will be inserted into the record in their entirety. Anyone wishing to testify should contact the hearing clerk of the committee at 224–2035.

WITNESS LIST

Mr. RIBICOFF. Mr. President, the Governmental Affairs Committee will continue its hearings on S. 826 and S. 591. The following additional dates have been scheduled:

Tuesday, March 29th, 1977:

Mr. Robert W. Fri, Acting Administrator, Energy Research and Development Administration.

Mrs. Patricia Roberts Harris, Secretary,

Department of Housing and Urban Development.

Mr. Brock Adams, Secretary, Department of Transportation.

Mr. Roderick M. Hills, Chairman, Securities and Exchange Commission.

Dr. David A. Hamil, Administrator, Rural Electric Administration.

Dr. John J. Bennett, Assistant Secretary for Naval Installations and Logistics, Department of the Navy.

Mr. George M. Stafford, Chairman, Interstate Commerce Commission.

Wednesday, March 30th, 1977:

Mr. Peter Stern, North East Utilities.

Mr. Arnold Saltzman, Commissioner, Federal Advisory Committee on National Growth Policy Processes

Mr. Edward F. Burke, Chairman, Rhode Island Public Utilities Commission.

Dr. Chauncy Starr, President, Electric Power Research Institute.

Mr. Irving S. Shapiro, Chairman, Board of Directors, E.I. Dupont De Nemours and Company.

OPERATION OF THE BLACK LUNG BENEFITS PROGRAM

Mr. RANDOLPH. Mr. President, I am authorized by the chairman of the Subcommittee on Labor (Mr. WILLIAMS) to announce that hearings will be held by the subcommittee, on the operation of the black lung benefits program and on the need for reform of that program, on Monday, April 4, 1977, and Tuesday, April 5, 1977. The hearings will commence at 10 a.m., and will be held in room 4232, Dirksen Office Building, on both days.

Persons wishing to submit statements or testify should contact Robert Humphreys on 224–7672.

SUBCOMMITTEE ON HEALTH AND SCIENTIFIC RESEARCH

Mr. KENNEDY. Mr. President, the Senate Subcommittee on Health and Scientific Research, chaired by Senator EDWARD M. KENNEDY, will hold a legislative hearing on genetic engineering/recombinant DNA research on Wednesday, April 6, 1977. The hearing will focus on pending legislative proposals for the regulation of recombinant DNA research and the administration's proposal currently in preparation.

Six months ago, in a joint letter with Senator JAVITS, I urged President Ford to extend guidelines written by the National Institutes of Health to assure the safety of the general public and laboratory workers involved in recombinant DNA research so that they would cover all such research in both the public and private sectors. Pursuant to our urgent request, the President created the Federal Interagency Committee on Recombinant DNA Research to study extension of the NIH guidelines to cover all recombinant DNA research. The Interagency Committee made its interim report on March 17, 1976. I have reviewed the report and feel that it represents a major step forward. I am pleased to find that the Secretary of Health, Education, and Welfare has the responsibility for formulating regulations for the use and production of recombinant DNA molecules. There are, however, problem areas.

First. We must assure sufficient and meaningful involvement of laymen and the general public in the formulation of regulations by the Secretary.

Second. We must carefully assess the wisdom of totally preempting State and local laws regulating the recombinant DNA research and applications given our concern to assure involvement of the general public in these issues.

Third. We must broaden the rationale for standards to include not only the safety of laboratory workers and employees, but also the safety of the public and other living things in the environment.

I am confident that these points can be resolved in our hearings.

Since the last hearings on recombinant DNA research before the Senate Health Subcommittee, there has been considerable public discussion and public controversy over this issue. I believe that the vigorous public debate over the potential benefits and uses of this research is extremely beneficial to the public policymaking process.

I believe that we may very well be at an historic point not only in the history of biological science, but also in the maturing of our society in its responsibility for the use of science. It is clear that we as a society must ultimately decide whether and how to proceed with recombinant DNA research and what use to make of this technology.

SUBCOMMITTEE ON CONSUMER AFFAIRS

Mr. RIEGLE. Mr. President, the Subcommittee on Consumer Affairs of the Committee on Banking, Housing and Urban Affairs will commence hearings on S. 656 and S. 918, bills to regulate debt collection practices, at 10 a.m. on April 25, 26, and 27, in room 5302 New Senate Office Building.

All persons wishing to testify should contact Mr. Lewis M. Taffer, room 5300, New Senate Office Building; telephone 224–0893.

ADDITIONAL STATEMENTS

AGREEMENT BETWEEN THE UNITED AUTO WORKERS AND MEMBERS OF CONGRESS ON AUTO EMISSIONS

Mr. RIEGLE. Mr. President, when the 1977 Clean Air Act Amendments are taken up by the full Senate soon, Senator GRIFFIN and I will offer the Riegle-Griffin amendment to that legislation. Our amendment contains an auto emissions schedule that reflects the recent agreement reached by the United Auto Workers—UAW—with Senator GRIFFIN and me, and Congressmen JOHN D. DINGELL and JAMES T. BROYHILL. We believe that this emissions schedule is technologically and economically feasible while being well balanced in terms of protecting jobs, protecting the public health and the environment, and conserving energy.

Today I am inserting in the RECORD several items which lend support to the Dingell-Broyhill/Riegle-Griffin/UAW auto emissions schedule. I think my colleagues will find these materials useful as they evaluate the 1977 mobile source provisions of the 1977 Clean Air Act Amendments.

The following items appear printed below:

The statements delivered by UAW President Leonard Woodcock, Congressman Dingell and me at our March 1st news conference announcing the auto emissions agreement.

A February 3rd letter from Mr. Woodcock to President Carter—accompanied by a memo detailing the results of an independent study conducted on the auto emissions question by David Ragone, Dean of the College of Engineering at the University of Michigan—urging adoption of the auto emission levels advocated by the UAW.

A February 12th Boston Globe editorial supporting the Dingell-Broyhill/Riegle-Griffin/UAW emissions schedule.

Mr. President, I ask unanimous consent that these items be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

STATEMENT OF LEONARD WOODCOCK, PRESIDENT, UAW

For some time the United Auto Workers has been concerned about the auto emission standards contained in the Clean Air Act and in the pending amendments to that Act. Our goal has always been to see the adoption, enforcement and monitoring of standards that are, first and foremost, consistent with protecting the public health. We have recognized that must utilize practical technology and be done in a manner that helps achieve the national goal of energy conservation through increased fuel efficiency in automobiles.

To this end, the UAW secured the services of a totally independent and highly regarded expert on this issue, David Rogone, Dean of the College of Engineering at the University of Michigan. We have endorsed Dean Ragone's recommendations, which reflect the most recent developments, regarding a timetable and goals for controlling the three principal pollutants in automobile exhausts: hydrocarbons (HO), carbon monoxide (CO), and oxides of nitrogen (NO_x).

Last month, in testimony to the Senate Committee on Environment and Public Works, I set forth the UAW position. That differed from both the Conference Committee action last year and the desires of the auto companies, but I said then that the UAW position "is not put forth as a bargaining position intended to achieve some other objectives." The urgency of the situation required that a focus be established for a realistic and responsible solution.

The key elements of the UAW proposed standards for auto emissions and the attainment schedule, based on Dean Ragone's recommendation, are as follows:

	HC	*CO*	*NO_x*
1978–79	1.50	15	2.0
1980–81	.41	9	2.0
1982 and later	.41	9	[1] 1.0

[1] EPA could increase up to 2.0 if air quality permits. Also EPA is to formulate program of waivers, up to 2.0, for innovative engines—such as diesels—that can produce fuel economy substantially higher than comparable vehicles.

I would be less than candid if I did not acknowledge that this position has been attacked, from different directions, as being either too lenient or too restrictive.

We are convinced, nevertheless, that it is the correct position.

Because of our conviction that the independently arrived at UAW position is correct, we are especially pleased to announce today that Representatives Dingell and Broyhill and Senators Riegle and Griffin have all agreed to adopt and to support the UAW position outlined above.

These able men have all previously intro-

duced legislation with different standards than those proposed by the UAW. The revised legislation that they have now agreed to introduce will include the UAW emission standards, as well as other mobile source provisions of the legislation they introduced earlier in the 95th Congress.

We have already begun discussion with other Senators and Congressmen, of both parties, and are confident that there will be a broad coalition, embracing diverse regional and ideological groups, supporting the Riegle-Griffin and Dingell-Broyhill legislation in their respective bodies of the Congress. What you see today is the emergence of what will be an effort of great breadth with a coalescing of support for the UAW position.

I might say, in anticipation of the inevitable question, that we are talking about a substitute for the proposed amendments to the Clean Air Act only for the portion of the Clean Air Act Amendments on mobile sources. Our proposal will not move to strike nor to amend in any way the stationary source provisions of the pending legislation.

Let me emphasize that adoption of revised automobile emission standards is an urgent requirement.

There is widespread agreement that the law presently in effect imposes requirements, for 1987 and subsequent model years, which are unnecessary and infeasible. The 94th Congress clearly agreed with that conclusion—alternative requirements were approved by the Senate, the House, and the Conference Committee—even though no proposed revision received final approval.

It is important to remember that the 94th Congress did enact mandatory fuel efficiency standards which first become applicable for 1978 model autos. The UAW supported that legislation, and pointed out that our concern about the emission standards was based primarily on the need for increased fuel efficiency. There is a trade-off between increases in fuel efficiency and decreases in emissions. That should not override the concern for public health, but any unnecessary margins of safety in the emission standards should be eliminated.

While each of the auto emission bills, approved last year by the Senate, the House, and the Conference Committee provided the same standards for 1978 models, there was lack of agreement with respect to subsequent requirements. Rapid action is needed to resolve the questions regarding future standards, or auto production will be severely disrupted with widespread economic impact. Production of 1978 models is expected to begin this summer; the industry's only realistic option has been to assume that the applicable standards will be those agreed upon last year. Engineering decisions, certification procedures, and other long lead time actions must be taken quite soon with respect to 1979 models. Equally important preliminary manufacturing decisions must be made soon with respect to 1980 and later models.

Finally, I want to make it clear that because of the emergence of broad-based support for the UAW proposal on emission standards, it is our intention to wage a vigorous fight in both the House and Senate for the proposal outlined above.

STATEMENT OF CONGRESSMAN JOHN D. DINGELL

I am very pleased to participate in this news conference today and in the agreement those of us at this table have reached on a schedule of automobile emission control standards for the model years 1978 and beyond.

We have constructed a schedule of standards that Congress should be able to move forward expeditiously. I am urging that it be adopted as promptly as possible.

By this agreement we have strengthened and balanced from an environmental and energy conservation standpoint, both schedules of standards we have been advocating to date.

In calling this news conference regarding this agreement today, we are also announcing that Congressman Broyhill and I in the House and Senators Riegle and Griffin in the Senate, will shortly introduce this new schedule of emission standards in legislation and will be launching an active campaign for enactment. This campaign will go forward with efforts in the House and the Senate and in conjunction with Mr. Woodcock and the UAW.

The new legislation will be an amendment to the 1970 Clean Air Act which both the House and Senate committees now have under consideration, including the need for revising auto emission regulations.

Both Congressman Broyhill and I and Senators Riegle and Griffin previously this year introduced a mobile source emission control bill, H.R. 2380 and S. 714. containing the Dingell-Broyhill standards that the House overwhelmingly adopted last fall, September 15th, 224 to 169. The Dingell-Broyhill standards, which had the support of the administrator of the environmental protection agency, Mr. Russell Train, were regrettably deleted in the ensuing House and Senate conference report last year, a conference report which later died October 1st, in a Senate filibuster against stationary source emission control provisions.

Mr. Woodstock, testifying before a Senate subcommittee in early February, announced auto emission standards the UAW planned to pursue. Those standards were most similar to the original Dingell-Broyhill/Riegle-Griffin schedule.

The bill we will introduce will contain the new emission schedule and the other provisions of the sections on mobile sources in the current H.R. 2380 (Dingell-Broyhill) and S. 714 (Riegle-Griffin).

This will be a complete package which adequately responds to needed changes in the Clean Air Act regarding mobile sources.

As you will recall those of you who followed the auto emission issue last Congress before it died, legislation Jim Broyhill and I pursued, provided for a gradual tightening of automobile emission standards. Today this agreement will continue the gradual tightening of standards, a schedule which continues to balance environmental objectives and energy conservation goals and savings for consumers while continuing the rate of clean air improvement.

Our new schedule of emission standards establishes portions of Mr. Woodcock's recommendations and includes provisions from the schedule the four of us in the Congress have been pursuing.

It is essential that the phased-in schedule of emission standards we are announcing today move forward to enactment. The production of automobiles for 1978 model year begins in a few months and it is agreed by all parties that the statutory standards in the law cannot be met in 1978. Those levels are unnecessary.

During congressional consideration of this issue last year, the House and Senate both passed bills extending the 1977 current standards through model year 1978. It is essential that those standards be maintained, if due only to the mere passage of time, for model year 1979.

This time table is essential for the purposes of providing certainty in the automotive industry and to continue to assure the workers in that industry their jobs.

This new bill will differ from the original Dingell-Broyhill/Riegle-Griffin proposal in three respects:

1. The hydrocarbon standard for the 1980–81 period is set at the original statutory level of .41 GPM instead of 9 GPM.

2. The final carbon monoxide standard which would have been in effect in model year 1982 is instead carried over indefinitely at the interim 1980–81 standard of 9 GPM.

3. A range of NO_x is given for the ultimate standard instead of leaving it entirely to EPA discretion.

Frankly, I am concerned about the potential fuel economy impact of going to .41 GPM hydrocarbon standards in 1980—two years sooner than my original schedule. We have, however accelerated the HC standards in response to concerns about hydrocarbon emissions generally—even though calculations using EPA methodology show that the two-year pull-ahead will change the health impacts by less than one percent.

This minimal change is because California cars, in the area where the photochemical oxidant problem is acknowledged to be most serious, are already meeting and will continue to meet the more stringent standard. So, most of the health benefits of going to more stringent hydrocarbon standards will have accrued regardless of when the 49-State standard is promulgated.

Present estimate for manufacturers indicate that the fuel economy penalty of a .41 HC standard in 1980 is between 2 percent and 10 percent. I continue to be concerned that this is a high price to pay for these slight gains in air quality. However, of the three pollutants, automotive HC emissions are strongly implicated in smog formations: and, if any clean-up should be accelerated, it is agreed that HC control is probably the priority.

The revision to the ultimate CO standard is based on recent data that indicates that the original 3.4 GPM standard is not needed for health reasons, and technical data which shows that three-way catalyst systems may have great difficulty attaining both low NO_x levels and the 3.4 GPM CO standard. On the health side, there is increasing evidence that a 9 GPM standard is more than adequate to protect public health.

Both the interagency task force report on motor vehicle goals beyond 1980 ("the 300 day study") and the air quality, noise and health panel report prepared by EPA in support of the task force indicate that if a 9 GPM CO standard is established:

The average carbon monoxide concentration in the year 2000 would be 20 percent of the average concentration experienced in 1971–73, yielding an 80 percent reduction even in the presence of growth in vehicle use and in stationary source CO production;

No air quality control region in the United States would violate the carbon monoxide air quality standard in the year 2000; and

There would be no cardiac health deaths attributable to carbon monoxide air quality in the year 2000.

In fact, the executive summary of the motor vehicle goals study (page 22) states: "Control of carbon monoxide (CO) at the present level of 15 gpm is sufficient to reduce projected excess cardiac deaths and persons days of discomfort to zero by 2,000 as emission-controlled cars replace older vehicles. Lower CO emission levels do not change these health indicators."

The State of California has recently decided that a carbon monoxide standard of 9 gpm is sufficient for its needs. At a meeting of the California Air Resources Board on November 23, 1976, long-term standards for all three pollutants (HC, CO, and NO_x) were recommended with the long-term standard for carbon monoxide remaining at today's California level of 9 gpm.

There is a strong case that more stringent CO standards than 9 gpm are not needed and there appear to be some strong technical arguments for holding at the 9 gpm level. Before completing my discussion on our new standards, I must comment on the serious concern that is held regarding the three-way catalytic converter. This device, that is not in mass production, shows some sign of being able to achieve somewhat lower emission levels than those currently in effect. The three-way converter, planned to be placed

on some new cars, is to be combined with an overall complex system of emission control devices which may not have durability even for the EPA 50,000 mile certification test.

There is no indication though that the motorist would have incentive to have the three-way catalyst repaired. Also, there is the question of the availability of repair services for the device that would be sufficient to maintain the Federal Fleet Emission Standards.

It is also known that the three-way converter will require excessive amounts of rhodium at this stage of its development. Rhodium is a rare and expensive metal, a by-product of platinum whose only known sources in any amounts today are South Africa and the U.S.S.R. These are questionable sources. This is a fact that could lead to short supplies of rhodium, especially in construction of mass produced vehicles, 10-million a year.

I question how much dependency can be placed on the three-way catalyst.

The final change made to the original Dingell-Broyhill/Riegle-Griffin emission schedule is on the ultimate oxides of nitrogen standard. Originally we would have authorized EPA to set the NO_x standard to be effective in model year 1982. This approach was recommended: (1) because there continues to be substantial debate over what level of control of oxides of nitrogen is needed for health reasons; and, (2) because of the concern that a final standard too stringent could preclude a number of technologies that show real promise of achieving both air quality and fuel economy improvement. In the revised bill EPA would have authority to set the NO_x standard in the range of 1 to 2 gpm. This appears to be the range that will ultimately represent a balance of fuel economy and air quality goals. Factors to be considered in determining the ultimate NO_x include technical availability and practicability, impact on fuel consumption, and cost of compliance. If these factors determine that the NO_x standard should be revised upward toward 2.0 gpm, the revision will occur if it will not endanger public health.

Also Administrator may grant a waiver up to 2.0 gpm NO_x for innovative technology that is shown to be extremely fuel efficient and if the waiver upwards to 2.0 would not endanger public health. I cite the diesel, the CVCC, stratified charge, and lean burn as some examples.

I think the facts can be said to argue for accelerated HC control although I continue to be concerned about fuel economy impact I also think there is now a strong case for a 9 gpm CO standard. In my opinion, the original Dingell/Broyhill bill offered a reasonable balance among the objectives of air quality and fuel economy improvement, minimized cost and stable auto employment. It appears that the new proposal sponsored by Dingell-Broyhill, Riegle-Griffin, Woodcock-UAW is technologically achievable.

I cosponsor this revised schedule because it is reasonable and balanced and it is critical that we unite and resolve our differences in order to avoid the catastrophic production disruption, product and consumer impacts that will result if we do not get on with the task before us.

STATEMENT OF SENATOR DONALD W. RIEGLE, JR.

I am very pleased to be part of this cooperative and successful effort to reach a joint agreement with the UAW on auto emissions levels. The schedule we are presenting here today has been arrived at after comprehensive and patient discussions between UAW President Leonard Woodcock, Congressmen John Dingell and James Broyhill, and Senator Griffin and myself. It is extremely gratifying to me, as I know it is to all of them, that we have been able to come together on an issue which touches the lives of so many Americans and which is so critical to our environment and to the nation's economy.

I especially want to welcome Leonard Woodcock's support of this measure. His assistance will be a crucial factor in seeing our proposal through Congress this session. I also want to express my thanks and appreciation to Congressmen Dingell and Broyhill for the vast amount of superb work they have put into this issue over the past year.

I sincerely believe that this emissions schedule represents the best balance that can be reached on the auto emissions question—best in terms of our national economy as well as in terms of the public health, air quality and unemployment problems which critically affect our country today. Improvement in each of these areas is a goal we are all trying to reach; the questions to be resolved—that I believe we have made a significant step toward resolving here today—are how, and by whose timetable, we can best achieve these improvements.

The figures we are advocating are significant because, if enacted by Congress, they will achieve two crucial goals. First, our set of numbers will enable production of both model year 1978 and 1979 cars to go ahead. 1979 cars are in an important planning stage, and we are rapidly approaching the July 1st deadline by which Congress must act if 1978 cars are to go into production.

Model year 1978 cars are currently being test run at 1977 emission levels that auto manufacturers have no assurance will be approved by Congress. If they are not approved and Congress adopts stricter standards for 1978—or, if Congress simply fails to act on Clean Air Act legislation before the July 1st deadline—Detroit will come to a virtual standstill in auto production. What that will mean in terms of lost jobs and decreased auto sales is ominous to predict. We are talking, however, about a projected loss of at least 230,000 jobs in auto-related industries and as many as 1 million car sales. And we are talking about these losses against a national unemployment figure of 7.9%, a Michigan figure of 9%, and a Detroit figure of fully 20%.

Second, these emissions figures will provide the most desirable air quality and health improvement standards when measured against statutory fuel economy requirements and costs to the consumer. Our proposal calls for 1980 statutory emissions levels of .41 grams per mile (gpm) of hydrocarbon (HC), 9 gpm of carbon monoxide (CO) and 2.0 gpm of nitrous oxides (NO_x). In 1982, the No_x level is to be reduced to 1 gpm with a waiver and suspension provision by which, under certain conditions, the NO_x level may be increased to 2.0 gpm.

Projections of the Federal Task Force predicts that the proposed .41 gpm figure for HC will reduce incidence of individual chest discomfort by some 5,000 cases in the year 2000; the proposed CO level of 9 gpm is more than sufficient to reduce projected excess cardiac deaths and days of discomfort to 0 in the year 2000, as emission controlled cars replace older vehicles; and the 2.9 gpm figure for NO_x emissions will significantly reduce attacks of lower respiratory disease in children in the years ahead.

Though a cost analysis of this particular schedule has not yet been completed, it is clear from past research on auto emissions levels that the figures we are proposing today will create substantial long-term benefits in energy savings, consumer costs and employment. In fact, major progress has already been made in improving the ambient air quality under current emissions requirements, and EPA maintains that improved air quality benefits of emissions schedules stricter than what we are jointly proposing will be marginal when compared to our figures.

Current emissions standards already represent an 83% reduction of HC and CO and a 38% reduction in nitrous oxides emissions relative to uncontrolled autos. Continued replacement of obsolete high pollution autos with low emission new cars will reduce mobile source related air pollution well into the 1980's even without the imposition of more stringent standards. And the added air quality benefits obtained from moving to tougher standards are not substantial compared to the fuel and dollar costs that will be required.

Moreover, according to EPA, ambient levels of HC and CO will, in 1990, be no lower under stricter auto emissions schedules than under our schedule. NO_x standards will be only somewhat improved by stricter standards; EPA, in fact, has acknowledged that stationary sources already create the majority of NO_x in many cities and that further reductions can be achieved at lower cost by controlling stationary sources. But *regardless* of which standards are adopted, exactly 31 air quality control regions are expected to exceed ambient air quality standards in 1990.

Finally, I should note that adoption of our auto emission schedule with the NO_x figure we recommend is the only way to assure that research can proceed on the development of different technologies for alternative, more fuel efficient, engines. Only catalytic technology appears to have the potential to meet a NO_x standard of less than 1 gpm, while other certainly viable engine alternatives—the diesel, lean burn and stratified charge—appear unable to do so at the present time. Thus, the adoption of tougher standards will prohibit development of these other innovative and fuel efficient engines while locking in the still unperfected catalytic technology. Under our proposed NO_x standards, crucial research and development programs can continue as auto companies work to meet the 1985 fuel economy goals established by the Energy Policy and Conservation Act of 1975.

For many reasons, then, I am firmly convinced that the auto emissions schedule that we have been able to work out with the leadership of Mr. Woodcock and the UAW is indeed a "bottom line" schedule. It has required give and take on the part of us all, but, to everyone's credit, we have been able to accommodate conflicting interests, and have established an emissions schedule that all of us who are vitally concerned with this issue can support and, more importantly, can work with. And I feel good about these emissions numbers because I sincerely believe that they are the most balanced in terms of continued clean air improvements, auto fuel efficiency, lower consumer costs, job production and protection, auto model availability, and future research and development potential.

The value of this agreement will, I think, be tested and proven in both the House and the Senate in the months ahead. Once again, I wish to welcome the support of UAW President Leonard Woodcock and to thank him for his invaluable assistance in resolving our differences. I look forward to working with him, Senator Griffin, and Congressmen Dingell and Broyhill to arrive at Clean Air legislation that really will be in the best interests of our nation. The energy probems that this country faces make it imperative that we move quickly toward achieving this legislative goal.

FEBRUARY 3, 1977.

THE PRESIDENT
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Adoption of revised automobile emission standards is an urgent requirement.

There is widespread agreement that the

law presently in effect imposes requirements, for 1978 and subsequent model years, which are unnecessary and infeasible. The 94th Congress clearly agreed with that conclusion—alternative requirements were approved by the Senate, the House, and the Conference Committee—even though no proposed revision received final approval.

It is important to remember that the 94th Congress did enact mandatory fuel efficiency standards which first become applicable for 1978 model autos. The UAW fully supported that legislation (although we expressed reservations about the 1985 target of 27.5 mpg), and pointed out that our concern about the emission standards was based primarily on the need for increased fuel efficiency. There is the trade-off between increases in fuel efficiency and decreases in emissions. That should not override the concern for public health, but any unnecessary margins of safety in the emission standards should be eliminated.

While each of the auto emission bills approved last year by the Senate, the House, and the Conference Committee provided the same standards for 1978 models, there was lack of agreement with respect to subsequent requirements. Rapid action is needed to resolve the questions regarding future standards, or auto production will be severely disrupted with widespread economic impact. Production of 1978 models is expected to begin this summer; the industry's only realistic option has been to assume that the applicable standards will be those agreed upon last year. Engineering decisions, certification procedures, and other long lead time actions must be taken quite soon with respect to 1979 models. Equally important, preliminary manufacturing decisions must be made soon with respect to 1980 and later models.

The issues involved are very complex, with many uncertainties as to what can and should be done. Even the experts often disagree as to the specific effects of auto emissions on air quality, and as to the effects of air quality upon health. There have been unexpected developments, both favorable and unfavorable. Nevertheless, decisions must be made based on informed judgment. The UAW has been guided by the advice of Dean David V. Ragone*, a nationally recognized authority on automotive power system and related matters. A paper by Dean Ragone is attached. In it he reviews developments that have occurred; in particular, he covers the three-way catalyst technology used by Volvo, new knowledge about the effect of carbon monoxide emissions, and emerging evidence regarding oxides of nitrogen. Therefore, Dean Ragone recommends the following schedule of standards to be enacted.

Model year	HC	CO	NO_x
1978–79	1.5	15	2.0
1980–81	0.41	9	2.0
1982 and later	0.41	9	1.0

EPA could increase up to 2.0 if air quality permits. Also EPA is to formulate program of waivers, up to 2.0, for innovative engines—such as diesels—that can produce fuel economy at least 25 percent higher than comparable vehicles; 0.4 NO_x would be a research objective.

While that proposed schedule differs from those considered by Congress last year, we believe it reflects the most recent information available and is a responsible basis to resolve the disputes about those schedules. It is not put forth as a bargaining position intended to achieve some other objective. Dean Ragone and I share the view that it is best to propose a schedule which will be consistent with health requirements, facilitate achievement of fuel efficiency goals, and impose demanding but attainable production innovations. We believe the schedule described will do that, and we recommend its rapid enactment.

It has been pointed out by others, but is worth repeating here, that the average level of emissions from all cars in use, not just those of new cars, is the significant factor. Since the standards proposed are considerably lower than those of cars already in use, there will continue to be a reduction in the average emission level as old cars are replaced with new ones. In fact, during the next several years, air quality (and fuel efficiency) will be affected more by getting new cars on the road in place of old ones, than by imposing overly restrictive new production standards.

Therefore I urge that prompt action be taken on the changes recommended, so that the auto industry will have a clear mandate regarding future production.

Sincerely,

LEONARD WOODCOCK,
President.

*Dean of the College of Engineering, The University of Michigan.

AUTO EMISSION STANDARDS 1978 AND BEYOND

In March of 1975 I sent you a note in which I discussed the relationship between auto emissions and fuel consumption and then went on to suggest some emission standards for the period 1977–81. Recent developments in commercially available technology and in the current status of automobile regulation call for an update of that memo.

Since March 1975 Volvo has successfully demonstrated an emission control system that—has enabled a four cylinder mid-sized car to meet the stringent statutory emission control standards set forth in the 1970 Clean Air Amendments, apparently without the loss of fuel economy. Their car met the standard using the California test procedure which is only slightly less rigorous than the Federal test procedure. Also since March 1975 Congress has enacted fuel economy legislation and discussed several bills to delay the imposition of the statutory emission levels (0.41 HC, 3.4 CO, 0.4 NO_x) beyond 1978. A bill was passed in the House and another in the Senate. A Conference Committee agreed to a compromise bill, but no bill obtained final approval. In all three versions of the bill the standards in effect in 1977 (1.5 HC, 15 CO, 2.0 NO_x) were to be continued through 1978. The auto manufacturers have planned the 1978 model production based on these continued 1977 standards.

VOLVO DEMONSTRATION

During the summer of 1976 Volvo qualified a car to meet the 1978 California standards (0.41 HC, 9.0 CO, 1.5 NO_x). This model was equipped with an advanced emission control system that has been discussed for a number of years, but never been demonstrated. This system, called Lambda-sond, enabled the car to meet the Federal statutory standard (0.41 HC, 3.4 CO, 0.4 NO_x) using the California test procedure. This striking demonstration has tempted some to recommend the adoption nationally of the standards in 1979 despite the limitations of the demonstration, which Volvo recognized.

In the Lambda-sond system the exhaust emissions are passed over a "three-way" catalyst which enables the unburned hydrocarbons (HC) and carbon monoxide (CO) to react with the oxides of nitrogen (NO_x) in the engine exhaust and thereby eliminates all three. The system, of course, requires a very accurate control of the emissions from the engine so that the amount of HC and CO in the exhaust will just balance chemically the amount of NO_x. This requires the control of the ratio of fuel to air over a wide range of operating conditions. The control is achieved by measuring the chemical composition* of the engine exhaust with a sensor and by feeding the information from the sensor back to the fuel control mechanism (fuel injectors in the Volvo case) in order to correct any imbalance. Very accurate control of the fuel/air mixture is required which means that the sensor must remain accurate for the life of the car. In addition, the special, three-way catalyst must retain its activity.

*Strictly the sensor determines the oxygen potential of the exhaust and does not measure the total composition.

The enormous potential of the three-way catalyst system has been recognized for a number of years, but until last year no one was confident enough to accept the risk involved in a commercial demonstration. Volvo did so.

But even Volvo recognized the limitations of the demonstration. In order to complete the 50,000 mile test, the demonstrated system required a change of exhaust gas sensors every 15,000 miles because the presently available sensors degrade. If a sensor becomes ineffective emissions go out of control, but the driver does not really notice a change in vehicle performance. There is no real penalty to the driver for operating with a bad sensor.

The engine used in the Volvo demonstration was an in-line, four cylinder engine equipped with fuel injection. An in-line engine needs only one sensor in the exhaust. A "V" engine needs two sensors, one in each bank, and requires that the two be balanced. To date the use of the Lambda-sond system in a V–6 engine has not produced results good enough to meet the statutory standards. The problem is more difficult if carburetor-equipped engines are used.

Volvo used a high loading of rhodium, which is the reduction portion of the three-way catalyst, to insure good performance; and rhodium is scarce. Volvo will only produce about 9000 cars for California in 1978. If the total U.S. auto production used the Lambda-sond system with high rhodium loadings there would be a serious question of rhodium supply.

There is some question concerning the fuel economy of cars equipped with the Lambda-sond control system. Data available from EPA testing indicates that the Lambda-sond equipped Volvo car that met the Federal statutory standards (0.41 HC, 3.4 CO, 0.4 NO_x) had slightly better fuel economy . . . 21 mpg . . . than the identical vehicle equipped with older catalyst technology . . . 20 mpg. But it has been argued, and with some merit, that the Volvo with the older catalyst had been designed very conservatively in order to assure compliance with California emission requirements and could actually have been designed for fuel economy in excess of the 20 mpg it achieved.

In spite of all these reservations and qualifications concerning the Volvo demonstration, the state-of-the-art has actually been improved concerning the three-way catalyst. The system is closer to wide-spread commercial realization than was apparent in March of 1975.

In consideration of this demonstration and of the current status of Federal fuel economy regulations, I believe that new emission regulations should be enacted as follows:

Year:	HC	CO	NO_x
1978	1.5	15	2.0
1979	1.5	15	2.0
1980	.41	9	2.0
1981	.41	9	2.0
1982 and beyond	.41	9	1.0*

* With EPA administrative discretion to raise this to 2.0 should air quality permit.

My reasons for recommending these standards are as follows:

THE YEARS 1978–79

It is essentially impossible for auto manufacturers to meet the statutory standards for 1978 models. Based on what seemed to be a Congressional consensus in 1976, production facilities have been planned based on the current 1977 model standards. It is unreasonable to think that statutory standards can be met for the 1978 models.

The decision concerning standards for 1979 models must be made very soon, before March or April, in order to allow motor vehicle manufacturers to prepare production facilities. If we are to approach lower emission levels and maintain good fuel economy in the future, then manufacturers ought to be given the opportunity to use the three-way catalyst system. This system requires extensive testing in order to insure reliability. Accordingly, I suggest that the standards for 1979 remain at the 1977 levels (1.5, 15, 2) in order to allow time for manufacturers to test and perfect reliable and more effective control systems for 1980 and beyond. I note that in addition to the Volvo cars to be sold in California two U.S. manufacturers have stated that they will put some three-way catalyst cars in customer hands in 1978 and in 1979.

It makes little sense to propose a one-year change between the proposed 1978 limits (1.5, 15, 2.0) and the proposed 1980 limits (.41, 9, 2.0). Little would be gained in terms of air quality and the manufacturers would be required to produce yet another system nationally . . . for just one year.

STANDARDS BEYOND 1979

It is reasonable to expect automobile manufacturers to produce substantial numbers of cleaner vehicles for the model years 1980 and beyond. More reliable Lambda-sond technology should become available. I have recommended standards for hydrocarbons, carbon monoxide, oxides of nitrogen based on my understanding of the air quality needs of the nation.

HYDROCARBONS—HC

It is increasingly evident that unburned hydrocarbon emissions are strongly implicated in oxidant (smog) formation. The control of hydrocarbons to the statutory level, .41 grams per mile, is justified especially in those areas where oxidant concentrations rise above minimum air quality limit. Many cities in the country now experience this condition and, accordng to the recent 300 Day Study of the Department of Transportation*, many cities will continue to exceed oxidant limits through the 1990s—even if HC standards are set at 0.41 grams. This calls attention to the additional need to address the emissions for stationary sources.

While on this subject I should remark that the technique for measuring hydrocarbons should be modified by EPA to reflect only reactive hydrocarbons, the non-methane portions. It makes no sense to treat methane as a harmful emission. It does not take part in oxidant formation.

CARBON MONOXIDE—CO

Extensive detailed calculations have been made** of the expected CO concentration in the U.S. cities for various assumed levels of CO emission control. It has been shown that air quality standards can be met throughout the country in 1990 and for a considerable period thereafter using an emission standard of 9 grams of carbon monoxide per mile, and that there would not be a significant rate of improvement between now and then based on lower emissions. The primary gains are to be realized by the replacement of older cars with newer, cleaner ones. Old, uncontrolled cars emit up to 80 grams of CO per mile.

I believe that a 9 gram per mile standard for CO in 1980 and beyond is acceptable, provided there is some assurance of compliance with this standard for vehicles in actual use. The EPA has recently called attention to the ease with which idle speed and mixture controls can be adjusted over a wide range. High CO levels at idle can result. Incidentally, tightening the CO standards to less than 9.0 would not cope with this problem.

The 9.0 emission limit for CO has an interesting interaction with fuel economy. Three-way catalyst cars have some difficulty meeting the 3.4 carbon monoxide standard, especially when they have small engines. During hard accelerations automobile engines require slightly richer mixtures, that is more fuel. This results in higher emissions of carbon monoxide from the engine and from the catalyst. This phenomenon is especially pronounced in small engines that are required to run at a higher fraction of their maximum power output during these accelerations. But it is the small engines that are being introduced in order to achieve better fuel economy. Accordingly, any standard tighter than 9.0 grams per mile would have an impact on the ability of automobile manufacturers to meet the fuel economy standards that have been imposed. And, from an air quality point of view the nation does not need a tighter standard.

OXIDES OF NITROGEN—NO_x

The situation with regard to emission control standards for NO_x is both critical and confused. The situation is critical because fuel economy is strongly affected by NO_x control and confused because of the complexity of the chemistry of smog formation and the uncertainties of atmospheric dynamics.

Tighter controls on NO_x emissions will mean reduced fuel economy. The relationship is well established, but magnitude varies with the technology used. With the exhaust gas recirculation technique presently being used losses of about 15% in fuel economy result when emission levels are tightened from 2.0 to 1.0 grams NO_x/mile. Use of exhaust gas recirculation to reduce NO_x to 0.4 grams per mile would produce much higher reductions in fuel efficiency if it were possible to achieve the 0.4 level at all in production. Estimates as high as 25% and 35% have been made.

The new three-way catalyst technology demonstrated by Volvo does provide a more satisfactory alternative. The dependence of fuel economy on NO_x emissions is not as critical as with exhaust gas recirculation, but a relationship still exists. A demand for 1.0 as compared with 2.0 NO_x would probably cost at least 5 and perhaps 10% in fuel economy plus some additional hardware costs.

While the exact figures concerning fuel economy penalty vary with the manufacturer and with the specific technology used, it is clear that the control of oxides of nitrogen costs us something in terms of fuel economy. The situation is thus critical.

On the question of health effects, EPA has established air quality standards for one of the oxides of nitrogen (NO_2) and for photochemical oxidant (smog). Smog is generated over a period of hours by a complex set of chemical reactions between hydrocarbons and oxides of nitrogen. The control issues are complicated because the air chemistry is not understood in a fundamental sense, although many important measurements and observations have been made. Some are paradoxical. It is observed, for example, that lower NO_x additions to the atmosphere may actually cause a more rapid formation of smog under certain conditions, such as those prevalent in Los Angeles.

In addition to the chemical complexity there is also an uncertainty concerning the role of stationary sources of NO_x. Automobiles are clearly not the only contributors to this problem. The 300 Day Study shows that it would be more cost effective to address the question of controlling the stationary sources. But, this is only true if one assumes that the oxides of nitrogen from the stationary sources (tall stacks) mix with the oxides of nitrogen emitted from cars. This, of course, depends on whether the plume from tall stacks moves skyward or moves toward the ground. Different atmospheric and meteorological conditions yield different movements. There is, to date, no clear-cut accepted answer to this problem. But, in spite of all these uncertainties, emission limits must be set.

In setting NO_x emission standards, one must adequately protect public health without unduly sacrificing fuel economy. In my judgment it is adequate to continue the required level at 2.0 grams NO_x per mile for the years 1980 and 1981, and to plan for a level of 1.0 grams per mile in 1982 in order to insure commercially available technology if it is needed. I believe that the Administrator of EPA should be empowered to raise this 1.0 gram per mile level in 1982 to levels not to exceed 2.0 grams per mile based on future evidence concerning the air quality needs of the nation considering both oxidant and NO_2 standards. The Administrator should be asked to hold hearings on this subject at least two years before the 1.0 standard goes into effect.

To promote further technological progress, I suggest that the level 0.4 in the original statutory requirements be set as a research goal and be approached through demonstration vehicles.

I assume that the law will not limit the right of the Administrator of EPA to grant waivers for more stringent control of NO_x emissions in localities where it is required, such as California. California may, in consideration of the problem in the Los Angeles Basin, require NO_x control even lower than 7.0 grams per mile.

INNOVATIVE ENGINES

The development of fuel efficient engines is extremely important to our accepted national objective of petroleum conservation. Accordingly, I believe that the Administrator of EPA should be asked to formulate a program of waivers for new technology. It might be reasonable to suggest that a waiver from 1.0 NO_x up to a maximum of 2.0 NO_x granted for innovative power trains that can produce fuel economy 25% higher than comparable vehicles, comparable vehicles being defined as vehicles of the same inertia-weight class powered by conventional, spark-ignited gasoline engines. Such a program should also recognize that some regions of the country have air quality problems that would preclude this waiver. But other portions of the nation may be able to save considerable amounts of fuel by taking advantage of newer technology.

[From the Boston Globe, Feb. 12, 1977]

A BREATHER FOR AUTOS

To its credit, the new Congress has been quick to take up one of the most tangled issues facing it in the current session—the revision of laws governing allowable pollution levels for 1978 and later model cars. The auto industry has said it cannot meet the standards, set by law in 1970, sooner than the 1980 model year. One of the problems for American manufacturers has been devising an antipollution system that will last the 50,000-mile "lifetime" of the car.

Last year Congress almost passed a one-year postponement of the stricter new standards. But the effort collapsed with the Oct. 1 adjournment for the election. An issue now is whether to continue postponing the deadline one year at a time, or to enact a two-year postponement to the 1980 model year. Designs for the 1978 models have been fixed for months—without meeting the legally binding standards—and Congress is virtually certain to allow at least a one-year delay.

Leonard Woodcock, president of the United Auto Workers, has lent invaluable support to the industry by joining them in the claim that manufacturers will not be able to reduce emissions in the 1979 models.

Woodcock's role has to be seen in the light of his union's interests, to be sure. Auto workers would pay the heaviest penalty if the auto companies had to shut down rather than violate the law. But Woodcock has long been a critic of the industry, has a history

---

**300 Day Study.

of social concern and is knowledgeable about technical problems confronting auto manufacturers in reducing pollution.

Sen. Edmund S. Muskie (D- Maine), author of the original legislation, has agreed to the one-year postponement but insists Congress should not relax the tighter requirements for 1979 models. If the industry and Woodcock are correct and the standards are also unmeetable for 1979, Congress will face another last-minute rush to change the law next year.

Sen. Muskie is not without a conflict of interest in the question. Because he wrote the initial legislation, now found to need revision, he has at least a psychological stake in keeping the postponement as short as possible.

The road to improved auto emissions has not been a smooth one, as anyone driving a car with the new control devices can attest. In the worst single case, it has been found that devices lowering hydrocarbon and carbon monoxide emissions produced larger and potentially dangerous amounts of sulphuric acid emissions.

Making judgments about what can be achieved has also been complicated by the isolated performance of some foreign cars. Volvo, for instance, has begun making a system meeting the stricter standards. But it functions for only 15,000 miles rather than the 50,000 miles required by the law.

The current hassle over the timing of new standards has at least forced the auto industry to set its own timetable for meeting stiffer standards on hydrocarbons and carbon monoxide. While there is still technical argument about both the achievable level and the timing of nitrous oxide controls, the existence of any agreement at all is a step forward that should be pursued.

Sen. Gary Hart (D-Colo.) is unquestionably right when he says that "only the pressure of the law is going to require automobile manufacturers to make the improvements the American people want." But even the law has to recognize the need for time in its implementation, especially when that law has been shown to be flawed.

PRESIDENT CARTER ENDORSES GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in yesterday's address before the United Nations, President Carter announced his intention to work for Senate ratification of the Genocide Convention. I cannot think of a more appropriate or welcome action.

In explaining his support for the Genocide Convention, the President cited a new and growing world concern for basic human rights and freedoms. It is his concern that the United States takes its rightful place as a leader in this movement. President Carter phrased the world situation in this way:

> I see a hopeful world, a world dominated by increasing demands for basic freedoms, for fundamental rights, for higher standards of human existence. We are eager to take part in the shaping of this world.

Our first step in taking part in this world movement toward human rights is the ratification of the Genocide Convention. For too long we have allowed ourselves to lag behind, to remain the only major nation in the world which has failed to condemn the horrible crime of genocide. Now is the time for us to correct the wrongs of the past. As President Carter stated, no member of the United Nations—

> * * * can avoid its responsibilities to review and to speak when torture or unwarranted deprivation of freedom occurs in any part of the world.

Mr. President, the task is at hand. We have the opportunity to place the United States firmly on the side of human rights. Our Nation's birthright demands that we act. Current events in Africa reemphasize the need for our action. And now President Carter has asked for our ratification of the Genocide Treaty.

Mr. President, if we are to honor the ideals on which this country was founded, if we are to support the new course President Carter has set this Nation upon, if we are to provide real meaning to the President's words at the United Nations yesterday, we must ratify the Genocide Convention.

I believe that the concern for people's basic right to life is a responsibility of our country. I echo President Carter's words:

> We in the United States accept this responsibility in the fullest and most constructive sense. Ours is a commitment, not just a political posture.

Let us honor this commitment by ratifying the Genocide Convention.

RETHINKING FREE TRADE

Mr. HEINZ. Mr. President, I want to bring to my colleagues' attention a recent article by H. Peter Gray in New Republic entitled "Rethinking Free Trade." This article is particularly timely because of the several major trade decisions facing the new administration this spring. President Carter has already declined to provide any substantive relief from imports for the mushroom industry, and he is currently considering a recommendation for tariff-rate quotas on footwear sent to him by the International Trade Commission. He will also soon be sent the ITC decision recommending higher tariffs on color television sets.

The fact that these cases are coming up now is no accident, and I expect to see more of them in the future. The United States is facing increasing competition from foreign countries, particularly those nations with exceptionally low labor costs, as development progresses throughout the world. This has serious implications not only for our balance of trade and our international economic relations, but also for the livelihoods of increasing numbers of American workers. It is ironic that the administration is urging the creation of thousands of public works jobs at the same time its decisions on trade cases may eliminate thousands of existing permanent jobs.

These trade problems are not going to go away, and a blind, ideological refusal to deal with them in a meaningful fashion will only make them worse in the future. The following article discusses some of these issues, explains why retraining—and adjustment assistance—is not an adequate remedy in many cases, and offers some other possible approaches that deserve closer consideration.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New Republic, Mar. 19, 1977]

RETHINKING FREE TRADE

(By Dr. H. Peter Gray)

Since the 1930s, it has become a hallmark of economic enlightenment and liberalism to advocate the complete elimination of tariffs and non-tariff barriers to free trade. The only qualification is that foreign nations are expected to reciprocate. Like any other policy, the free trade argument needs revising when economic conditions change, and refining as the target is approached. The world has greatly reduced barriers to international trade over the last quarter of a century. The doctrinaire approach to free trade overlooks the danger of wasted manpower, acquired skills and machines through unemployment and obsolescence. The Trade Act of 1974 incorporated safeguards for damaged industries. Safeguards are vital for some industries—textiles, color television, shoes and certain kinds of steel.

The analytic basis for the free-trade argument is a very simplified representation of the real world. It has two fundamental weaknesses. The theory assumes that displaced workers (and executives) can find gainful employment in another industry, and it pays no attention to the costs of adjustment and reallocation.

If workers displaced by imports are not able to find other jobs, the argument breaks down. Whether replacement jobs are available depends on the condition of the economy and on whether the displaced worker has a transferable skill. The better educated and more highly skilled the displaced worker, the easier it will be for that person to find another job. The skills used in the "old" industry have no value in the job market if they were unique to that industry, except to show a potential to absorb training. This surge of imports that use high proportions of low-skilled labor and displace our own low-skilled workers, comes from developing nations. There is no foreseeable end to the ability of such nations to supply goods using low-skilled workers. Worse yet, the cost of living in the United States for an unskilled worker is much higher so that there is no hope that a low-skilled worker in the United States can ever compete on a wage basis.

There is a surfeit of unskilled workers in the United States, as shown by the astronomical rates of teenage unemployment (18 percent, and as high as 60 percent for minority group members). The free-trade theory's assumption of available alternative employment is only valid if the labor market is tight, and if displaced worker can receive retraining that they are able to absorb. Unfortunately, the United States never has shown great commitment to or success with retraining programs. The history is one of oratory not of performance. Furthermore, the ability of an economy to absorb unskilled and low-skilled workers depends on the efficiency of the educational system and the technological trend in the nation. "Natural evolution" may reduce the demand for lesser-skilled workers quite apart from the impact of foreign competition. If the educational system does not increase people's ability to absorb training and then provide that training, lesser-skilled workers will become harder and harder to employ. The existence of a reserve army of low-skilled unemployed is not socially responsible, politically safe or economically efficient.

Imperfections in the labor market make it even harder for displaced workers to find new jobs. Lesser-skilled workers tend to be less mobile and less aware of opportunities elsewhere in the economy. In the apparel industry, which lost an estimated 310,000 jobs between 1961 and 1972, the typical displaced worker is a minority-group female with dependents to support. It is difficult to conceive of any workers more likely to be over-

whelmed by imperfections in the labor market. Of course if the economy as a whole is operating at significantly less than full capacity—if there is not an actual labor shortage—there is almost no likelihood that displaced workers will find alternative employment, except at the expense of some other unfortunate.

When lesser-skilled workers lose their jobs to foreign competition, three things can happen: the number of people drawing unemployment benefits and/or welfare can increase; the displaced workers can be hired in domestic industries not subject to foreign competition; or they can receive special training to make them employable in other internationally competitive industries.

Clearly it is inefficient for displaced workers to remain unemployed. The payment of a subsistence grant is not an adequate absolution of national responsibility. Payments may diminish the physical hardships but they do little or nothing to reduce the psychological costs that accompany unemployment in our society.

If there is already a surfeit of lesser-skilled people in the economy, special measures to facilitate employment of displaced workers will have to be inaugurated by the government. Presumably the costs of production will be raised by an increase in employment of lesser-skilled workers (or the firms would have undertaken the measures voluntarily). The increase in costs may require some sort of subsidy to be paid to the industries, or prices might be edged upward. But these expenditures presumably would be less than the alternative welfare doles would be.

Displaced workers can be trained up to higher skill levels and reabsorbed into the employable labor force. Such training is desirable in its own right, and does not depend upon the exposure of the lesser-skilled workers to unemployment because of enslavement to a doctrinaire policy of free trade. It is important to distinguish between giving displaced workers additional skills which do not require any greater capability to absorb training than those which have become worthless through the loss of the old job, and a general upgrading of skills. A requirement for the retraining of displaced workers has been included in the Trade Act of 1974 but such arrangements will attempt merely to replace one industry-specific skill with another of approximately equal "difficulty." A general upgrading of workers' skills is a much more difficult, ambitious and costly project and implies that displaced workers have not reached their potential. It is this latter kind of retraining that is likely to become necessary if foreign goods continue to supply ever more skill-intensive products to the United States.

Protecting vulnerable American industries will bring about retaliation by foreigners. It will also damage the growth of developing nations. The United States might agree to pay a "fine" in the form of compensation to exporting nations frustrated by the protection. This payment would clearly need its own set of safeguards, but it could be computed roughly to offset damage done by the frustrating of imports.

There is also a domestic cost. If the protection is instituted by a tariff the consumer pays more, and if by a subsidy to the industry the taxpayer is burdened. The rationale for such a payment is simply that this payment repairs the deficiencies of the market system in providing jobs for workers otherwise doomed to unemployment.

One final safeguard is needed against the protected industry itself. The purpose of the reunification of the free-trade doctrine is to preserve jobs for unskilled workers. It is vital that any protection does indeed result in the maximum number of jobs. The protected industry must agree, in advance, to a *quid pro quo*. Protection could allow the industry to raise prices and the union to raise wage rates. This is not to be tolerated. One possibility would be to restrict wage increases to a cost-of-living escalator as a condition of the protection, and to rely on competition within the protected industry (and a little regulatory oversight) to ensure that the firms do not impede the expansion of employment. Fortunately the two industries most needing protection (footwear and textiles) are dominated by small firms competing with each other.

Protecting the job opportunities of unskilled workers will be a social problem for many years. Protection from imports gives the nation a breathing space in which to think of solutions to this problem.

The other aspect of the problem is whether or not the state of the domestic economy should be built into the remedy automatically. Certainly the social costs of adjustment are magnified in a recession. If, as the Trade Act of 1974 allows, further negotiated tariff reductions are to be spread out over a period of years, there is an argument for interrupting the process when domestic unemployment rates exceed, say, five percent. The gradual approach involving as much as 15 years, will also ease the costs of adjustment as industries anticipate the effects of the scheduled easing of protection in all countries.

Two industries contribute greatly to the employment of less-skilled persons and stand in need of protection. Textiles have been protected by quotas under the Multi-Fiber Arrangement, but these measures are beginning to lose their effectiveness. Non-rubber footwear may receive protection shortly if President Carter accepts, by Easter Sunday, a recommendation to that effect by the International Trade Commission. The recommendation calls for protection over and above 1974 import rates for five years at a declining rate. With total unemployment levels in this country running at eight percent, it hardly seems wise to eliminate more unskilled from the ranks of the employed. Since tariff reductions from the Kennedy Round began in 1968, employment of unskilled and semi-skilled workers in the footwear manufacturing industry has declined by more than 60,000 persons. The rate of displacement by imports has been growing. There is a good argument for temporary protection. Only if we can make our economy fit the theoretical basis can the free trade argument be accepted without reservation.

FRANCES BOLTON

Mr. METZENBAUM. Mr. President, the death last week of Frances Bolton, Congresswoman from Ohio for 29 years, was a great loss for those who knew her both in Washington and in our home city of Cleveland.

Frances Bolton was a woman who committed herself early in life to humanitarian ideals, from which she never wavered during her 91 years. Her interests ranged from general health and nursing services, to all aspects of the African culture which she studied through extensive travel, to furthering the rights of women. She had a special interest in the preservation of national historical sites, and personally bought 400 acres of land across the Potomac to preserve the area around Washington's Mount Vernon estate from commercial encroachment.

Nursing and health care were her lifelong interests, perhaps as a result of her work early in this century in the tenement areas of Cleveland. She was faced herself with the possibility of becoming an invalid when she was struck with influenza during the great epidemic of 1919. Characteristically, she regained her health through personal discipline and yoga exercises.

It was because of her sponsorship of the Bolton Act that 124,000 women were in uniform under the U.S. Cadet Nurses Corps in World War II—and they received pay equal to that of male officers. She played an active role in the health field in the Cleveland area by serving on many hospital boards and health agencies, including the Metropolitan Hospital of Cleveland, University Hospitals in Cleveland, Meharry Medical College, and others. The Western Reserve College recognized her efforts in the field by naming the school nursing program in her honor.

Frances Bolton had a special talent for helping people both through her private and public actions. We will long remember what she contributed to individual men and women and for her commitment to mankind as a whole.

ALEX ROSE—A CONSUMMATE POLITICIAN

Mr. JAVITS. Mr. President, not long ago. members of the Liberal Party in the State of New York, and progressive Americans everywhere, lost a great political mentor with the death of Alex Rose. A dear friend and esteemed colleague of mine for many years, Alex Rose has been deeply and widely mourned.

I ask unanimous consent that the text of the sermon, preached at the Community Church of New York on January 16 of this year by Dr. Donald Szantho Harrington, senior minister of the Community Church of New York, in memoriam of Alex Rose of New York be printed in the RECORD.

There being no objection, the sermon was ordered to be printed in the RECORD, as follows:

ALEX ROSE AND THE FUTURE OF LIBERAL POLITICS

(By Dr. Donald Szantho Harrington)

I have something unusual for you this morning. I shall speak of the life and death three weeks ago, of my longtime friend and colleague, Alex Rose, a consummate politican in the best, benevolent sense of the word; a great benefactor of the common people, who never asked and rarely received the credit for what he accomplished, a great and good man.

I shall also speak of the Liberal Party as a progressive, political force, which his genius created and sustained, and prepared to survive his own demise, going on into the future.

I make no apology for the political overtones of this address. Politics is not a dirty word, though it has often been besmirched by the acts of particular politicians. It is derived from the word "polis", which means "the people". Politicians are by definition, and ought to be in fact, the servants of the people—not their rulers. This is what Alex Rose believed. It was the ideal to which he devoted his whole life. Whatever is germane to the lives and welfare of people cannot be foreign to religion. As Mahatma Ghandhi, who all his life combined the two, and was our age's model of the politician-saint, once said: "Anyone who thinks that religion has nothing to do with politics, doesn't know what religion is all about."

I do, in my personal and professional life, try to keep my religious and political careers and responsibilities separate, because I do believe in the separation of the institutions of church and state. But I believe equally strongly that everyone's religion should lead him to assume political responsibilities, and this will require him eventually to become active in the political party of his particular persuasion. The Liberal Party has been my vehicle for political participation, and more than any other, it has been the reflection or shadow of the intellect and moral purpose of Alex Rose.

SERMON

"Hello, Don!" I can hear his alive, urgent voice as it sounded so many times in my ear through the telephone, informing me of some recent development in the current, political situation, or sharing some nuance of strategy that he though we might follow to inform the public of what was going on behind the scenes, but which would affect everyone's well-being. It might be a plan he had dreamed up to make recalcitrant machine Democrats do what they ought, but had no intention of doing, by projecting some Liberal fait-accompli; or again, it might involve our Party's taking a stand on some great issue of the time, and thus shaming others into doing so. Whatever it was, Alex Rose was one of the great minds of our age, and, without question, its most brilliant and progressive political tactician. When he died three weeks ago at the age of seventy eight, all agreed it marked the end of an era. The end of an age—but not the end of his political influence, and by no means the end of the Liberal Party he had nurtured with his whole life as a progressive political force.

He was born Olesh Rols in Warsaw, Poland on October 15, 1898, son of a tanner and dealer in hides. He came to New York in 1913 at the age of fifteen, hoping to study medicine, but World War I cut off his father's support, so he took an Anglicized version on his name, Alex Rose, and went to work as a sewing machine operator in a millinery shop at a wage of six dollars a week. At the same time he became active in the Labor Zionist Movement, like Golda Meir and many other progressive American Jews, and enlisted in the Jewish Legion which fought under the British General, Viscount Allenby, to liberate Palestine from Turkish rule. Alex remained a great friend and benefactor of Israel all his life, and had the great pride and joy of seeing his daughter Karme, move to Israel, marry an Israeli and take Israeli citizenship.

He was a born leader, and moved rapidly up through the ranks of the Hatters, Cap and Millinery Workers Union, becoming its Vice President in 1927 and President in 1950. It was in the union, and especially the savage in-fighting against take-over by the Communists, that he learned and sharpened his political and organizational skills.

All his life he fought for progressive unionism, but never to the point of forgetting the general welfare. When union power begins to affect adversely the common good, he believed it should discipline itself with moderation of its demands, for otherwise it cannot long succeed or survive. Unions, he felt, whether private or municipal, should be careful not to push their employers to the wall financially. During the recent Recession, he repeatedly proposed that teachers and other municipal workers facing large lay-offs of thousands of members—usually the last employed which tended to be the minorities, that they all take a cut of one-fifth of both work and salary, and spread the work around for the duration so no one would need to be fired. Unfortunately, very few other labor leaders were willing to accept this kind of statesmanship. Alex Rose believed that Labor had a special responsibility to provide the public with an example of unselfish leadership and social conscience.

When one of his own employees faced bankruptcy, Alex persuaded his own union to buy the firm, and through improved management made it economically viable again, saving his member's jobs, he himself serving as Chairman of the Board.

He had little thought for himself. He lived simply, in the same Washington Heights apartment for thirty-five years, and never received more than twenty thousand dollars a year in salary, which he insisted on reducing to seventeen thousand five hundred during the recent Recession when, due to a flood of cheap imports, his union had some hard sledding.

After his return from the War, he married his beloved Elsie, who was his partner and support in every enterprise for fifty-six years of happily married life. One loved to hear the tenderness and pride with which she always referred to "My Alex."

It was just forty years ago, in 1936, that Alex Rose's career in politics began when he participated in the founding of the American Labor Party, to try to make an enlightened and newly strengthened labor movement a genuine force in America's political life. Those were the days of the so-called "united front" when many liberals hoped that not all Communists were automatically committed to dictatorship. But Alex, David Dubinsky and other liberals became more and more disillusioned with the Communist's take-over tactics, and in 1944 at the suggestion of a young teacher, Ben Davidson, broke away to form the Liberal Party of New York State. From that point on the American Labor Party steadily disintegrated, while the new Liberal Party under the leadership of labor men like Rose and Dubinsky, religious leaders like Reinhold Niebuhr, Israel Goldstein and John C. Bennett, educators like John Dewey, John L. Childs and William Heard Kilpatrick, LeRoy Bowman and Timothy Costello and many others grew from strength to strength. Especially significant was Alex Rose whose combined understanding of the election law, the public mood, and the political personalities and possibilities in each party made possible daring and imaginative initiatives which had a great deal to do with bringing forward and guiding to political success such great public servants as Governor and Senator Herbert Lehman, Senator Jacob K. Javits, Newbold Morris and Rudolph Halley, Robert F. Wagner, Averill Harriman, John F. Kennedy, Lyndon Johnson, John Lindsay and Hugh Carey. When the Democratic Party in New York State had all but abandoned the Truman candidacy for reelection, it was the Liberals that staged a huge election-eve rally at Madison Square Garden to help pull him through.

Over and over again, public servants like Harriman, Kennedy, Javits and Lindsay have been elected by the margin of the vote on the Liberal Party line. Though small in numbers, it has thus been truly a swing party, strong, united, disciplined and committed enough to be able over and over again to decide the issue by swinging its vote to one side or the other, and always for the purpose of getting better, more honorable government for the people of our city, state or nation. As we used to like to say, "The Liberal Party exists to keep the Republicans liberal and the Democrats honest!"

To me personally, Alex was both my warm, personal friend and mentor. Many others, of course, can say this, for he knew how to involve others in the things which he held to be important and dear. He had many extra heads, hands, arms and legs with which to deal with the recalcitrant political issues of our time, among them Governors and Presidents, and he did not hesitate to entrust heavy responsibilities to his friends. He was a hard man to say No to. Everything he was into seemed so right. Somehow, he could make each one feel that he was the indispensable one, without whose help the project could not go forward.

I have been singularly fortunate in my life in having had the friendship and sponsorship of a number of older men, who were to me both inspiration and example. My own father was the first, whom I immensely loved and respected. Although we are told by Freud that we are all supposed to reject, or be liberated from, our fathers, I must confess that I never felt the slightest need or desire to reject, or be liberated from, mine. He never bound me that way, and let me go so early, so carefully, so lovinglyy, that I wasn't even aware it was happening.

The second such man was Dr. Arthur E. Morgan, President of Antioch, my college, whose companionship in long rambles through Glen Helen in Yellow Springs, Ohio, first awoke fully both my intellect and moral idealism.

Third was Charles Lyttle, Professor of Church History at Meadville Theological School, whose encouragement led me to aim high for scholarship, and to win the year's study abroad which brought me my Vilma.

Fourth was Norman Thomas, the great Socialist orator, who kindled my Social idealism and aroused my passion to serve the poor and downtrodden, and build a truly just, democratic and peaceful social order.

Fifth, was John Haynes Holmes, my beloved Senior Colleague in the ministry of the Community Church, upon whose prophetic ministry I modelled my own, and with whom in twenty years of the most intimate working together I never had a serious quarrel.

Finally, there was Alex Rose, with whom I worked closely for more than twenty years, who revealed to me the subtleties of the political process and its enormous power for both good and evil. He showed me how to put my idealism most effectively to work, and how to translate good intentions into social realizations through the art of politics. He taught me to respect, not despise, the art of politics, by showing that it could be honorably and selflessly exercised for the good of the whole, and that there was no calling more productive of human well-being. He made me feel political participation not only as a high art and extreme mental and moral challenge, but as a democratic citizen's first and finest arena of responsibility.

I was close to Alex Rose by virtue of my position of Chairman of the Liberal Party of New York State for over ten years. I knew him intimately. We met regularly, talked on the telephone at times almost daily, and had the fullest confidence in each other.

Alex Rose was not only a powerful politician. He was an altogether remarkable human being. His political power stemmed almost entirely from his fine, human qualities. His genius structured and sustained, and his personal character defined, the Liberal Party, which was the chief instrument of his social idealism and high, moral purpose.

Alex was often called a "political boss," and it is quite understandable that many should have thought him that. But it was never an accurate or true description of him. True—he wielded immense authority with his associates, within his party, among his political colleagues—and in the eyes of his enemies—which he smiled at, for it was one of his weapons for influencing them to do what he thought they ought—the Alex Rose myth was something he cultivated, and made extraordinarily good use of—but he won the respect and loyalty of his colleagues by virtue of his political genius, his high principles and sterling character.

Alex was one of the most persuasive men I have ever known—but his case was always based upon reason, careful analysis, homely illustrations from past, political experience, and an innovative imagination. He carried in his head a detailed knowledge of political history and past party experience, but was

always the first to come up with a new approach, or to remind us that history never repeats itself exactly. He had a resilient, eternally young and hopeful attitude of mind.

Alex lived politics. It was his life passion. Year by year he became more and more insightful, skillful and effective until he had no peer. (Incidentally, we should remember that an Alex Rose is not made in a day, nor will he be replaced in a day).

He relished the hurly-burly of political maneuver. He made the matching of his purposes and his wits with those of his political antagonists a high art. He knew when to see a political friend or foe, and when not to. He knew when an interview should be on the record, and when it should not, when he should see someone alone, and when he should insist on having a witness. He understood the importance of words, and could summarize a complex political situation in a choice word or phrase, and knew how to drop casually, to a reporter as though it were of no importance, the phrase he would like to see in the headlines. A respected New York columnist told me, "He plays the press as a master organist his organ." Alex knew the paramount importance of the media, that in this age of media-mutuality, he who handles the media best gets the story out and wields the influence. He knew the greater importance of actions which signal more powerfully than words. He knew when to talk, and when not to. He could plead when absolutely necessary for the achievement of a higher purpose relating to the general good, but when his sense of justice or humanity or integrity was affronted, he could become icy cold with contempt, and I have seen with my own eyes some great political and governmental figures squirm before his moral confrontation.

Alex was not overawed by anyone, Mayors, or Governors, or Presidents, or Supreme Court Justices. He knew them all, and many of them held him not only in respect, but in a kind of awe. He had an unusual ability to assess and sift a particular political situation, weighing the requirements of the election law, the political personalities involved, their relationship to their own political parties and to ours, their personal strengths and weaknesses, the depth of their commitment to honest, independent, effective government. Along with this he had an acute sensitivity to the public mood, and was able to put this together into imaginative political proposals around which to rally his Liberal Party forces. All of this happened so easily, rapidly and spontaneously that it appeared intuitive, as though he were a political kind of computer.

Alex believed in the democratic process, in getting as many Party people as possible in on basic Party decisions. Though he was for many, many years, by unanimous Party consent, its manager, chief tactician and day-to-day negotiator, I never knew him to try to force his opinion on anyone, let alone a majority. Quite the contrary, time and again I have seen him back down, or reverse himself, when a majority of his colleagues saw things differently, most recently when he agreed to go along with the effort on the part of several of his top colleageus to get Bella Abzug to run for the Senate on the Liberal Party line, after her defeat in the Democratic Primary. He did not think the effort would succeed, and predicted she would not accept, but he agreed that the effort should be made—and it was. The decision for Senator Moynihan was made ultimately by an overwhelming majority of both our large Policy and then larger state committees.

Alex was meticulous in consulting his colleagues, and touching base with Party leaders, whenever any new situation arose, or whenever he had discussions with key political figures, calling me, as Party Chairman, to relate in detail all that had transpired, and asking whether I thought the situation required a meeting of the Party's Administrative or Policy Committees. Consultation with him was thorough, and at Policy Committee meetings he always recounted in detail exactly what had been said in his meetings with public and political personalities, explaining why he had spoken as he did, and asking our consideration and approval of what had transpired.

He considered public employment of party members, sometimes called "patronage" absolutely essential. "Why go to all this political trouble" he would ask, "if we are not to have liberal people in positions to influence policy decisions." But he insisted that Liberal Party appointees be able, dedicated, effective public servants.

He was an acute judge of human beings, and usually knew how to make good use of their best qualities for long range human advance.

Alex Rose's friendships were fabulous. He walked easily with the high and mighty, but cultivated the rank and file. His leadership of his Union was built on the dedicated loyalty of his lieutenants, who believed implicitly in what he was trying to do. Each Liberal Party associate was also a personal friend. I have not in my lifetime seen anything more beautiful than Alex's long friendship with David Dubinsky. Together they fought against union racketeering, and for clean, democratic politics. Dave helped provide the muscle and the common sense realism, Alex the imagination and political know-how. Together they were unbeatable. They could communicate assent with a glance, or dissent with a nod, and when discussing issues that were thorny and difficult, Dave often called him by a kind of pet name, a form of endearment, "L'Alex." Their loyalty to and friendship for each other and their common good government commitment has been and will always be an inspiration to all of us younger men.

I have been State Chairman of the Liberal Party now for over ten years, equally the record service of a predecessor, Professor John L. Childs. Never in all those years did Alex ever ever let me down. Once when a major supporter threatened to withdraw his very significant financial support because I was urging our Party to oppose the Vietnam War, Alex asked me if I thought the principle at stake was important enough to let all of that money go. And the influence that went with it! I told him I thought the principle was a matter of life and death, for our country and for our Party. Alex shrugged his shoulders in that very special way of his, and said "It is only money." He stood by me, his Chairman in good times and bad.

Many people have asked me across the years if I didn't resent so much attention being paid to Alex Rose, rather than to me, Donald Harrington, the Party Chairman. Frankly, I never could quite understand the sense of this question. Alex and I knew our respective roles. We never pretended they were otherwise to anyone. I was the Chairman, presiding over the Party Organization and its principle committees, representing it before the public. He was the chief tactician and negotiator, guiding us in our thinking-through of the successive electoral situations with which the Party was confronted. Never did he fail to consult me concerning some proposed initiative, nor to report on a significant conversation. Now what sense would it have made for me to try to be another Alex Rose, when we already had Alex doing the job so superbly And why should anyone have thought I would resent his being credited with what he was obviously doing? On the contrary, I was proud to be associated with, and to be able to work helpfully, with him, and I think he appreciated the contributions which I was able to make.

We, and other key members of the leadership, Ed Morrison, Ray Harding, Herbert Rose, Henry Foner and I think here especially of Ben Davidson, long time Party Secretary, and the rank and file of the Liberal Party Family have worked as a team. We have all understood the importance to our Party and its work that he should be our tactician. We all understood that his skill with the media was one of our greatest assets, and that he must be free to use it to the full. We all understood that in our unity of spirit, though never uniformity of viewpoint, was our strength as a Party, and that we should talk things through until we reached a reasonable consensus, which we usually did. It really didn't matter to any of us who got the credit.

So, the years went by, and great good was accomplished for the general welfare and the improvement of American politics, and New York City, New York State, our nation and our world will always be the better for it.

Many are wondering what will happen now? Can the Liberal Party survive without Alex Rose?

Alex would have reminded them that the Liberal Party has always been bigger than any single person. Its power has been in the ability of many people, dedicated to good government and social justice, to work together politically in harmony. Surely, he would say, they have learned something from our years together. Leaders come and go, but our Party will continue and flourish. We have many potential new leaders down in the ranks. They will come forward!

I'll give you a prediction, that the Liberal Party will not only survive, it will grow and spread beyond the bounds of New York State—because its voice, its principles, its methods and its influences are needed all across this land and world.

As we think of the future of Liberal politics in particular, and minority parties in general, there are a number of indications that bespeak a promising future for our kind of liberal politics.

One is the increasing prevalence of independent voters and voters who split their tickets.

Another is the decreasing dependence of candidates on political machines. Radio and TV are providing direct access of candidates to voters, and voters to the candidates. Government campaign financing will further free the candidates.

Then, all over the country today small groups of progressive or liberal-minded voters have been springing up spontaneously, working primarily on local issues, but quite apart from ties to either Republicans or Democrats. They are looking for an independent, liberal third force to associate with on national issues.

Finally, there has been an increasing dissatisfaction with the limited choice available in the two-party system—why not more than just two alternatives—many people ask.

For the past three decades, national election in Western Europe have consistently featured extremely high voter turnout in support of multi-party parliamentary democracy. Conversely, national elections in the United States have consistently demonstrated a proportionally decreasing voter turnout among those eligible, accompanied by a steadily increasing percentage of independent voters among those Americans who do trouble to register and to vote. These trends may indicate substantial public dissatisfaction with the limited "either-or" choice presented by our traditional two-party system.

By contrast the voters of New York State

had for some years a four-party system, with Democrats, Republicans, Conservatives and the Liberal Party.

Though small, the Liberal Party has a record lifespan for an independent third party, having maintained itself longer than any other in the country. The Liberal Party provides a rallying point for all shades of liberal opinion; it provides a voting line for liberal Democrats who may wish to vote for a Liberal-Party-endorsed Democrat, but who would never do so on the Democratic line. Liberal Party endorsements provide easy identification of liberal-minded Democrats and Republicans for their own party members, and help to build a liberal influence and presence in both of the old line majority parties.

A friend of mine once told me, "I've always been a Democrat, and just have to vote that ticket, but I always look for the Democrats you Liberals have endorsed."

There is considerable public awareness of the Liberal Party's two greatest electoral triumphs: one in 1960, when John F. Kennedy's margin on the Liberal ticket won him New York State and, thereby the Presidency of the United States; and the other in 1969, when New York City Mayor John V. Lindsay, running as an independent Liberal candidate, won re-election with more than one million votes. Fewer realize what an important part the Liberal Party played in Governor's Carey's coming to the fore, and almost no one realizes that all the contemporary statewide election victors in New York State were elected as Liberal nominees; the Governor, Lieutenant Governor, and State Comptroller as Democratic-Liberal nominees; the State Attorney General and the senior United States Senator as Republican-Liberal nominees, and, most recently, the junior United States Senator-elect Daniel P. Moynihan was a Democratic-Liberal nominee.

There is even less knowledge of the Liberal Party role concerning the New York State delegation in the United States House of Representatives. Seventeen of the 39 Congressmen from New York State elected this November were elected as coalition Democratic-Liberal nominees. Although, at first glance, seventeen of 39 might not seem so impressive, if the Democratic-Liberal Congressmen-elect were a separate state delegation in the United States House of Represntatives, they would constitute a House delegation larger than the entire state delegation of any of the 43 states. Put another way, the Democratic-Liberal delegation would be tied with the entire Michigan delegation, which also numbers seventeen Congressmen, for seventh largest delegation in the House of Representatives.

On the other side of the political spectrum, but also quite pertinent from a third-party point of view, the Conservative Party participated in the election of eleven Congressmen from New York State, nine coalition Republican-Conservative nominees and two coalition Democratic-Conservative nominees.

And all this does not include the scores of New York State legislators, New York City officials, and other local officials elsewhere in the state elected with the support of the Liberal Party or the Conservative Party. Indeed, one member of the New York City Council—Manhattan Councilman-at-Large Henry J. Stern—was elected exclusively as a nominee of the Liberal Party, and has been regarded by many as its most outstanding member.

So much for the scarcely-known impact of the Liberal Party, and also the Conservative Party, at the polls. But even less is generally know about what, exactly, the third parties stand for on issues.

For example, Carter-Mondale were coalition nominees of both the Democratic and Liberal Parties in New York State, yet little attention was given to the distinctive Liberal Party platform that differed substantially from the national Democratic platform. The Liberals, going far beyond the Democrats, demanded not just the Humphrey-Hawkins employment bill, but an ongoing full employment economy carefully g"ided by comprehensive national planning; not just the Kennedy-Corman national health insurance bill, but full, complete medical and hospital care as a right for all Americans; not just more routine housing bills, but a new federal policy reclassifying housing as a priority national utility, with support to match; sweeping tax reform, and federalization of welfare; greatly strengthened consumer protection, and greatly strengthened environmental protection; and so on. A special platform plank commended the Scandinavian welfare state as "an example to and a model for America and the world."

The Liberal Party also has taken stands on a whole galaxy of international issues. It was the first political party to call for an end to the Vietnam War. As befits a small party, the Liberals have championed the right of smaller nations to democracy and independent self-determination; this has meant not only reaffirmation of pioneering Liberal backing for Israel, but also vigorous defense of democracy in Chile, Portugal and Greece, and even support for Iceland in its "cold war" with Great Britain.

In light of this contribution by the Liberal Party on programs and at the polls, might not the State of New York, with its working four-party system, become a potential political model for the nation? The answer rests with the degree of sophistication of the electorate, which, in turn, depends in large measure upon the effectiveness of the communications media in highlighting and exploring significant public issues. When the voting public as a whole realizes that third parties can and do offer ongoing specific, realistic, constructive policy alternatives to the major parties—and supports their candidates accordingly—third parties will then be able to achieve their full, useful potential in developing, offering, and promoting comprehensive, dynamic alternative programs within the American democratic system.

Out of this may come a spreading of the Party into other states beyond New York.

At the last meeting of the State Committee of the Liberal Party, it was voted that the leadership should explore the possibility of its spreading to other states. Across the years many individuals have written from outside New York asking if they could start a similar group there. Perhaps the time has come.

In any case, I can assure you that the Liberal Party is not going to collapse with Alex Rose's death, but will go on, in his memory and spirit, to accomplish the great ends of good government for which he gave his life. Already its Policy Committee has met and unanimously asked me, as Party Chairman, to take up the responsibilities he has laid down. I can do so only because I am surrounded by men and women trained by him in every aspect of political struggle, and tried and tested over many years, all of whom have pledged me their loyal and dedicated support. We shall not fail.

Right now we face one of our most difficult tasks, to find a candidate for Mayor who is bright enough and tough-minded enough to save this city from destruction. It won't be easy, but working together and with our many friends, I do believe we'll find a way.

So now, to Alex Rose, old friend, beloved comrade. father, mentor, example, we say good night and goodbye. But we say goodmorrow for the upright politics he lived to forward, and we know that his spirit will never be far from us in the difficult, challenging days that lie ahead.

And so we say, good night, Alex Rose, gallant leader, heroic pioneer. And goodmorrow to those great ideas and ideals for which we fought together side by side across the years.

FOOD RESERVES AND THE FARM BILL

Mr. HUMPHREY. Mr. President, I wish to share with my colleagues the recent testimony of Mr. Warren P. Henegar of the Bread for the World group and the testimony of Bishop James S. Rausch, general secretary of the U.S. Catholic Conference, on new farm legislation.

Bread for the World was begun by a number of religious groups, and it is directed toward dealing with hunger on a worldwide basis.

The testimony of Mr. Henegar is largely devoted to the concern that the new farm bill should include provision for the establishment of an on-farm grain reserve as well as an emergency reserve to assist the world's most needy nations.

The testimony of Bishop Rausch emphasizes the moral and religious considerations involved in food policy and legislation. He points out the need to balance the interests of the farmer, the consumer, food importers and the developing countries in establishing food policy.

He also cites the severe strain which many developing countries faced during the 1972–74 period as food supplies became tight and prices escalated.

The U.S. Catholic Conference also, in this testimony, indicates its support for a grain reserve as a part of U.S. agricultural policy.

The testimony points out the sharp increases in food prices as a result of shortages during the 1971–74 period. Bishop Rausch also indicates his belief that a grain reserve would be of major assistance to the developing countries in avoiding major shifts in supply availabilities as well as price changes.

The testimony also argues that a grain reserve would help protect American farmers from wild price fluctuations. An example of this volatility was the swing in prices for wheat from $1.86 per bushel up to almost $6 per bushel and then back down to $2.77.

I am delighted that these groups have come forth to testify on our pending farm legislation and that they have taken the time to develop detailed positions on these issues. I am aware of the intensive efforts which these groups have put into working with both farm and consumer groups in developing their legislative recommendations. I am also encouraged that they have looked on food as a moral issue in these deliberations.

Mr. President, I ask unanimous consent that these two statements be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF WARREN P. HENEGAR

Mr. Chairman and distinguisfned members of the committee: My name is Warren P. Henegar, and I am here representing Bread for the World. I am a member of its board

of directors and a farmer from Monroe County, Indiana. I presently manage several farms that produce corn, soybeans and cattle.

As you know, Bread for the World is a three-year-old Christian citizens' movement whose members are active in every congressional district throughout the country. Last year Bread for the World played a key role in the passage by the Senate and House of Right to Food resolutions.

Much of Bread for the World's strength comes from having in its membership a high proportion of parish pastors and lay leaders who are able, through their congregations, to build public support for morally sound policies. Bread for the World also counts among its members a large number of farmers who have helped to shape our positions on agricultural issues.

In formulating its positions on such issues, Bread for the World has sought approaches that are technically sound, economically workable, and fair to farmers and consumers alike. Our position on grain reserves, for example, was worked out after extensive consultation with farmers, agricultural economists and development specialists.

Among the various issues taken up in the 1977 omnibus farm bill, we are especially interested in improving the food stamp program and extending coverage to those who need to be on the program, but are not; and in revision of the PL 480 food assistance program. We would like to submit written statements on these two issues at a later date.

Today, however, we will limit our testimony to an issue that does not appear in the bill: a domestic grain reserve program and the need for U.S. participation in an internationally coordinated system of national reserves.

Put simply, Bread for the World believes that with increased supplies of grain worldwide, now is the time for the Senate Committee on Agriculture to provide leadership in establishing a grain reserve program. Congress itself in the International Development and Food Assistance Act of 1975 encouraged the President to seek an international reserve agreement. And one of three basic recommendations to emerge from the 1974 World Food Conference was the establishment of a food reserve program. But here we are in 1977 and still no action has been taken on the reserve issue.

In testimony already presented to this committee, a variety of farm organizations have spoken of the need to do something about their price-depressing grain surpluses. The present moment should not be allowed to pass without this committee assuming leadership in establishing a grain reserve tailored both to manage the present supply, and to meet basic food needs in those inevitable food-short years to come. Should it choose to act on the reserve issue, the Committee will find itself supported by a growing portion of the farm community, consumer organizations, humanitarian groups concerned with international development, and the U.S. religious community.

Any effective grain reserve system must meet two requirements. First, it must insure that adequate stocks of grain are available for emergency situations arising from crop shortfalls, natural disasters or other calamities. Second, it must protect both farmers and consumers—especially poverty-stricken consumers—from the effects of rapid and extreme fluctuations in the price of grain. Prices should not be allowed to go so high that they put hungry people out of the market, nor should they be allowed to fall so low that farmers are denied a fair return on their production.

While the implications of reserves for the world's poor are obvious, the less obvious implications for farms in both developed and developing nations should not be overlooked. A system of carefully managed reserves and more stable prices would give all farmers the opportunity to plan their investments. Such reserves offer insurance against depressed prices that put many small U.S. family farmers out of business. At the same time a good reserve program would assure developing nation farmers that large quantities of cheap grain and unnecessary food assistance from the rich nations will not end up on their markets during times of worldwide grain surplus. Such "cheap grain" has, in the past, depressed the prices that developing nation farmers have received for their own crops, and has discouraged them from producing. Those farmers, too, must play a crucial part in helping the world meet its food needs in the years ahead.

Bread for the World recognizes the needs of U.S. farmers and consumers, as well as hungry people abroad, and has attempted to design a reserve proposal that benefits them all. The reserve explicitly meets farmer demand that there be normal market movement within a fairly wide price band, restricting reserve intervention to exceptional instances of price fluctuation. It would put most ownership and control of grain reserve stocks where they belong—in the hands of farmers. And it would associate reserve support and release prices with recent market behavior so as to keep the system market-oriented and prevent either the build-up of undesirable surpluses or the introduction of artificially low support prices. Bread for the World's reserve proposal also includes provision for emergency relief stocks.

I have attached our reserve proposal. Let me identify and briefly describe its essential features.

MARKET OPERATION

A reserve should not obscure the natural operation of the grain market. Ordinary market operations signal producers and consumers to shift production and consumption patterns. Thus, farmers should have the opportunity to profit from increased demand. But they should not be undercut during occasional periods of worldwide overproduction. Consumers, on the other hand, should be protected from spiraling prices, pernicious speculation, and hoarding that accompany occasional periods of undersupply. The solution is for market mechanisms to be complemented by reasonable support and release prices to eliminate the "wild fluctuations" in price that President Carter deplored in his recent radio conversation with the nation.

FARMER OWNERSHIP OF RESERVES

Reserve stocks should be held by farmers so that they can benefit from the storage payments. Farmer ownership would also do much to allay fears that reserves would be used to artificially depress prices. The cost of holding reserves should not fall on the farmer but on the government. This could be done through the existing loan programs of the Commodity Credit Corporation (CCC). Loans could extend up to three years beyond the initial period. Farmers should be offered a premium loan rate for grain put into extended loan (reseal) in exchange for a commitment to release these holdings in stages, at predefined price levels. Bread for the World has suggested that the government should hold a portion of any reserve. Under our proposal two-thirds of a 25 million ton reserve would be held by the farmer and one-third would be under government ownership, but stored primarily on the farm.

A PRICE CORRIDOR

One function of the reserve would be to keep market prices within well-defined limits. Reserves would be drawn from the market or released to it, to dampen only the most extreme fluctuations in prices. At all other times normal market operation would prevail with prices allowed to move in a 4 percent price band—20 percent above and 20 percent below an average of recent prices.

RELATING SUPPORT/RELEASE PRICES TO MARKET HISTORY

Loan rates set without respect to market behavior run the risk of undermining any reserve proposal and the long-term stability of the farm economy. Loan rates set too low, in addition to ruining many farmers, will not allow the accumulation of sufficient stocks to make the reserve program workable. On the other hand, loan rates that are too high will inevitably generate excessive stocks and depress prices. Similarly, release prices that don't reflect recent market developments run the risk of robbing farmers of fair profits, if they are set too low, or of being so high that they place millions of hungry people in grave jeopardy.

EMERGENCY RESERVE

Bread for the World's proposal also provides for an emergency reserve of 10 million tons. This supply would be made available to the world's most needy nations at subsidized prices when the market price of grain rose to a predetermined upper limit that seriously undermined their purchasing ability, or as outright grants in crisis situations. The emergency reserve would be insulated from the market to insure that adequate supplies were available to poor countries facing extreme food shortages.

Bread for the World is prepared to support legislation that includes these essential elements of a workable reserve. We have had discussions with committee staff, and we are engaged in an extensive educational effort on the need for reserves and the essentials of a just plan. We expect this effort to reach a great many people across the country, and to result in the development of substantial consensus on the issue.

The opportunity for historic progress has seldom been better. The United States and the world need and expect a reserve, and look to this committee for leadership in taking the first step toward an internationally-coordinated reserve.

TESTIMONY BY BISHOP JAMES S. RAUSCH

I am Bishop James S. Rausch, General Secretary of the United States Catholic Confertion agency of the Catholic Bishops and which represents the concerns of the Church on a broad range of policy issues.

First, Mr. Chairman, I wish to thank you and the other members of the Committee for affording me this opportunity to register the views of the U.S.C.C. on the question of a U.S. grain reserve. As you may know, Mr. Chairman, the U.S.C.C. in previous Congressional testimony has taken a position strongly in favor of the establishment of such a reserve. We continue to hold to this view. We believe a grain reserve is a necessary policy instrument to help assure people's basic right to food. In my testimony, I propose to address the issue of a grain reserve in the context of (1) the moral-religious principles involved, and (2) the domestic and international dimensions of U.S. food policy.

The perspective from which I propose to develop my presentation is the 1972–74 food crisis. Food shortages and spiraling food costs during that period imposed severe hardships on millions of low-income American consumers and denied essential foodstuffs to many more millions of malnourished and starving people in the developing world. Everyone is agreed that this is an experience that should not be repeated in the future. Yet, there is a growing consensus in the current literature that world food production and prices will be subject to even more ex-

treme fluctuations in the future than in the past.

I. MORAL-RELIGIOUS CONSIDERATION

The U.S. Catholic Conference believes it is essential that the United States as one of the world's largest food producers and the dominant food exporter take the lead in adopting agricultural policies which will help alleviate, if not avoid, the damaging effects of increased food supply instability. Other countries should be encouraged to follow our lead.

In a world of growing dependence on U.S. food supplies, U.S. agricultural policy must take into account our international as well as domestic interests. These international interests must extend beyond such traditional foreign policy objectives as maximizing export earnings and using food to further our perceived political and strategic goals. They must also take account the religious perspective of the uniqueness of food and the moral assessment of our relationship to the hungry in an interdependent world.

The uniqueness of food lies in the biological need people have for it and the impossibility of either substituting for, or postponing this need. The control of food is not the same as the controlling of oil or other natural resources. While there is some moral responsibility toward the international community today in controlling any vital resource, we believe a unique moral responsibility rests on those controlling the production and distribution of much of the world's food supply. Food is not just an important commodity, it is also a sacred trust which derives from its direct connection with life. The U.S. food policy requires the weighing and careful balancing of four main interest groups: (1) the U.S. farmer; (2) the U.S. consumer; (3) traditional food importers; and (4) the developing countries dependent on U.S. food assistance.

All but the latter have either a voice or vote in U.S. food policy or bargaining power and leverage and are, therefore, able at least in some measure to protect their interests. It is the needy people in the food deficit countries who have the least influence on U.S. agricultural policy and yet are most vulnerable to the food shortages and spiraling prices which characterized the 1972–1974 world food crisis.

We argue for a U.S. food policy which shows a greater sense of moral responsibility for the interests and needs of the hungry and starving in the developing world. It is our view we should use the category of social justice to define our responsibilities toward the hungry.

To say we have an obligation in justice to the hungry means determining their claim upon our resources. The claim the hungry make upon us in justice is made by the common humanity they share with us. Social Justice, understood in the context of international interdependence, affirms the responsibility of the international community to protect and preserve the common humanity we share. It is that humanity which defines the boundaries of the international community. If the threat to that humanity is hunger, then those who have the power to determine the allocation of food supply are those upon whom the prime responsibility for achieving minimum justice for the hungry rests. We do not bear the responsibility for other resources in the way we do for food. The way we exercise our responsibilities in justice for food can set a precedent for others. If the rules governing access to resources are not set by some standards of justice, an interdependent international system can become a war of all against all. It is in our moral and political interest to raise the standard of justice as the criterion for determining allocation of vital resources in an interdependent world.

II. DOMESTIC AND INTERNATIONAL DIMENSIONS OF U.S. GRAIN RESERVE

The U.S. Catholic Conference strongly supports the creation of a nationally-held grain reserve over and above normal working stocks as an instrument of U.S. agricultural policy. We share the views of most experts that such a reserve is necessary to minimize the adverse impacts on producers and consumers of periodic world crop shortages and surplus to be expected in the future.

In periods of shortage such a reserve would protect the American consumer against the rapid run-up of food prices such as occurred in 1971–74 when nearly 40 percent of the increase in the consumer price index increase was attributable to food. It also would help insure that commercial export demands as well as humanitarian needs are adequately met at reasonable prices without resort to export embargoes or drastic cutbacks in PL 480 shipments.

A grain reserve is particularly important for the future protection of the developing countries who shouldered much of the burden of the 1972–74 shortages. The developing countries take almost one-half of the world's grain imports. The tripling of grain prices between 1972 and 1974 imposed almost as severe financial burdens and in some cases even more severe hardships on many developing countries as the concurrent rise in petroleum prices. As a result, the financial resources of many developing countries have been strained close to the breaking point. For them, a repetition of the 1972–74 experience any time in the next five years or so would be disastrous. In addition to substantially higher prices for their commercial grain imports the neediest developing countries had to absorb a drastic cutback in food aid. In FY 1974, PL 480 shipments were reduced to approximately one-third the 1972–73 average at a cost of great human suffering and loss of lives. All of this could have been avoided or substantially mitigated if the United States and other major grain exporters had been maintaining adequate grain reserves.

A grain reserve would help protect American farmers from the damaging effects of wild fluctuations in grain prices. Between 1972 and the first quarter of 1977 the price of U.S. wheat went from $1.86 to almost $6.00 a bushel and then back to $2.77. This sort of boom and bust cycle can only impose severe hardships on growers.

Ideally, we believe a U.S. grain reserve should be part of an internationally coordinated system of nationally held stocks providing for an equitable sharing of the financial burdens by both importers and exporters. Such a world system was unanimously endorsed at the World Food Conference in 1974. Ten months later, Secretary of State Kissinger in his September 1975 address before the Seventh Special Session of the UN General Assembly proposed a world reserve for food security of at least 30 million tons of wheat and rice to deal with potential shortfalls. And, again, the International Development and Food Assistance Act of 1975 called on the President to seek international agreement for a system of food reserves to meet food shortage emergencies and to provide against unexpected shortfalls in food production. But, except for some desultory discussions in various international forums, nothing has come of those proposals.

We recognize negotiation of a multilateral grain reserves scheme is apt to prove difficult and time consuming. We believe the question is of sufficient importance and urgency, however, for the U.S. government to make a major diplomatic initiative to get serious negotiations underway as soon as possible. In the meantime, we strongly urge that the United States act without further delay to establish a national reserve which can be integrated into a multilateral arrangement if it can be negotiated. Favorable grain crops here and abroad in 1976 and 1977 provide the first real opportunity since the 1972–74 crisis to begin to build such a reserve.

We do not propose to discuss here the various technical, procedural and managerial problems involved in setting up and operating a grain reserve system on which a considerable body of expert opinion now exists. Suffice it to say, there is a substantial agreement among experts that a grain reserve would not only be a useful tool of U.S. agricultural policy but is also practical.

The general principles governing the operation of a grain reserve are fairly simple. Grain would be acquired when prices are weak and approaching support levels. Sales would be made from the reserve only in terms of relative supply shortage when prices were substantially above acquisition costs so as to safeguard the interests of the farmer and offer him sufficient incentive to maintain adequate levels of production to cover both domestic and international needs including humanitarian food. A certain portion of the reserve might be segregated for the purpose of meeting emergency situations such as famines and shortfalls in availabilities to meet PL 480 requirements. Prices and procedures for acquiring and disposing of reserves should be determined by the government and announced well in advance of each crop season so farmers can shape their planting plans accordingly. In the event a multilateral scheme eventually is negotiated, it will be necesary to closely coordinate national policies regarding such acquisitions and sales if the arrangement so as to accomplish its intended objectives.

OPTOMETRIC MEDICARE STUDY

Mr. DOLE. Mr. President, I have been informed by the Department of Health, Education, and Welfare that they have officially filed their optometric medicare final report with the Congress as mandated by Public Law 94–182. The document is 134 pages long and I wish to call our colleagues' attention to the fact that this is an excellent working document on the profession of optometry which should, once and for all, demonstrate that optometrists should be fully included under the medicare law.

First, I compliment the profession of optometry for permitting itself to be studied on an interdisciplinary basis. This type of introspection shows a great maturity on the part of the profession of optometry and they are to be complimented for their openness and candidness to have the public examine their profession educational level and their scope of practice.

The Department of Health, Education, and Welfare is to be complimented for putting together an outstanding group of consultants including three practicing optometrists, three practicing ophthalmologists, an academician, and two knowledgeable consumers. In addition, as I understand it, there were over 200 professional people in government who had a hand in the final document that has been presented to Congress.

Theodore Cooper, M.D., former Assistant Secretary for Health should be complimented on his fair and expeditious manner in handling this study. Under his

direction, the study was undertaken by the Health Resources Administration, headed by Kenneth Endicott, M.D., Dan Whiteside, D.D.S., and Mr. Tom Hatch—both of the Bureau of Health Manpower, should be especially singled out for their dedication to being responsive to the congressional mandate on this subject. The many other HEW staff professionals who have authored chapters in this study should also be complimented on a very thorough, factual, and analytical study of the independent primary care profession of optometry.

Mr. President, I hope this report will be the basis of immediate legislative enactment correcting the inequities to medicare recipients for covered eye care services presently being denied reimbursement when rendered by a practicing optometrist, but covered when rendered by an opthalmologist. There can be no question about the injustice to our senior citizens and the profession of optometry and I believe because Congress mandated this study, we now must do our part to correct the problems identified and adopt the recommendations of the Health Resources Administration.

THE PREGNANCY EPIDEMIC

Mr. HATFIELD. Mr. President, I have become increasingly distressed by an attitude toward abortion that has been gaining in popularity since the 1973 Supreme Court decision permitting abortions. This attitude is one that denies the relevance to the issue of any moral arguments and that advocates aborting fetuses as a method of birth control and a cure for many societal problems.

This attitude, surely, is a sad one. Let us be clear in our reasoning. The increase in the demand for abortions does not result from healthy trends in our society, but is due to the fact that there is a pregnancy epidemic occurring among those members of the society least prepared and able to bear and raise children—unwed teenagers.

It is possible to understand the motives behind a proabortion stand that is based on a humanitarian concern to spare the child and the unwed teenage mother further problems. I do not agree with this stand, but it is possible to understand it. However, it is the cavalier attitude that encourages abortion and views abortion as a goal, that distresses me. At best, abortion should be viewed as a disagreeable pallative. It is not a cure and we should not rely upon it to get rid of the deadly disease that lies behind its increasing use.

Those who support abortion must not view its free, unimpeded use as their goal. Instead, the objective of us all must be the eradication of the teenage-out-of-wedlock pregnancy epidemic.

For those opposed to abortion, the banning of abortions must not be the goal either. Instead, our goal must be to banish the type of environment that is causing the epidemic and that causes women to decide that the world is not a fit place for their children.

Rev. Jesse Jackson has addressed this matter in a recent article in the Washington Post. He states that abortion must be viewed as another horrible symptom rather than a cure to the societal disease, and then examines one of the causes of the disease—sexually suggestive popular music. I encourage our social scientists, religious leaders and opinion-setters to focus on other possible causes in an effort to responsibly do battle with those causes.

I ask unanimous consent that Reverend Jackson's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE PREGNANCY EPIDEMIC

(By Jesse Jackson)

The deadliest poisons are colorless, odorless and tasteless toxins with the power to penetrate anywhere, undetected. No effective way exists to develop resistance against such invisible poisons. Traditional safeguards are ineffective, and to rely on them blindly can be a fatal mistake.

And so it is today, when parents look to traditional institutions either as sources of help or as scapegoats in their frustrating battles to reach or save the minds of their children. Home, school, church and synagogue are no longer strong enough to save children, because their combined power cannot match or overcome the other forces that also shape children's lives and attitudes. Foremost among these is the power of the media.

Consider only one potent media influence on children that parents generally are insensitive or deaf to: the radio. Those parents who do become aware of their children's addiction to radio and the music it broadcasts deal with it by ordering the volume turned down. But loud or soft, the beat goes on and its message comes through.

In the days when popular music first began flirting with sexually suggestive lyrics, program directors dropped the offending songs once they realized what was going on; some even bleeped or muddied the suggestions. But now the songs are sexually directive with explicit instructions, and with radios amplifying their messages.

Do you know what songs radios are beaming into the ears of 14-, 15-, and 16-year-olds, and their 4-, 5-, and 6-year old brothers and sisters? There have been "Shake Your Booty," "Ain't That a Bitch," "I Want to Do it to You All Night Long," "Let's Spend the Night Together," "I Want to Do Something Freaky to You," "It's Alright to Make Love on the First Night," "Squeeze Box," and "Love to Love You, Baby," the short version of which, Time magazine said, features the singer, Donna Summer, having 22 orgasms.

These present-day heroines and heroes of the young use their art, through the medium of radio, to transmit a moral tone and an ethical content that, at the least, encourages their listeners, our children, into premature heat. The pervasiveness of radio and pop music is undeniable. Wherever young people go, their radios are with them, from waking to sleeping, playing through the hours. Are our children its audience or its victims?

This year, our nation is in the midst of a teenage pregnancy epidemic: babies having babies. This year, more than one of every 10 of this country's 15- to 19-year-old girls will be pregnant—and so will 30,000 more 10- to 14-year-old girls. Only a third—or less—of these million-plus child-mothers will conceive in wedlock. Where do you suppose they have been tuned while developing their attitudes about love and love-making?

The victims of the pregnancy epidemic aren't just our children, but their children, too. Children they really don't want, children they don't know how to care for, children they lack the maturity to care for—or love—intelligently. Because they may foresee this, more than a fourth of the teenage girls who will get pregnant this year will have abortions. That's a step we should see as another horrifying symptom, rather than as a cure.

Of those teenagers who will bear their children, nine of 10 will take their babies home. They will take them to homes where, because their mothers are immature, unprepared, too poorly educated to find meaningful employment, these children of children will experience enormous family insecurity and, all too often, be condemned to lives of material and mental poverty, physical and psychic deprivation.

All this defies other trends in American life. For more than a decade, the overall birthrate has been dropping—but not among 15- to 17-year-olds. Not only is pregnancy increasing among younger girls, so is the proportion of them who conceive their children out of wedlock. The birthrate for unmarried 18- and 19-year-olds is now higher than that of unmarried women 20 to 24 years old—a reversal of traditional patterns.

What ideals of love and attitudes about love-making are these young women and their lovers tuning into?

Can anyone doubt that the teenager's constant, transistorized companion doesn't influence him? Does anyone doubt that music heard on the radio doesn't motivate millions of teenagers to spend millions to buy the records the radio stations play—and some they don't, like the 16-minute version of Donna Summers' "Love To Love You, Baby"? Can anyone doubt that radio and other media exercise very real power in directing our children's lives?

If the media are to have power over the minds of children, then they must accept responsibility for the directions they provide. The public has a responsibility to see it's done. Educators have a responsibility, too. And so, too, do the heroes and heroines of the young. It may be too late to save some of our children, but it's not too late to save the children of the children.

It still amazes me that so many of abortion's enlightened proponents only focus on the consequences of decadence, not on causes. Their concern is panicked reaction to immediate impact, not with the roots of a problem for which their panacea is abortion.

Isn't it logical that teaching too little, too late, about sex and failing to teach anything about moral responsibilities has produced too many ignorant and irresponsible young men and women?

We can't wait to see who might be willing to take responsibility. Abortion might prevent the arrival of our children's children, but it won't save our children. We—all of us—need to realize and communicate that we cannot and will not allow our public airwaves to transmit society's lowest and most debased values to our youngest and most impressionable citizens.

NATIONAL EMPLOY THE OLDER WORKER WEEK

Mr. CHURCH. Mr. President, today many ill-founded assumptions exist about the desirability or feasibiilty of hiring older workers.

The net impact is that many workers in their 40's, 50's, and 60's are discovering that advancing age is a serious employment barrier.

Yet, these individuals have much to offer employers.

They are less likely to be absent from work than younger persons.

They usually have more on-the-job experience.

Their productivity compares very favorably with younger persons.

Independent studies also reveal that older persons usually perform as well on the job as their young counterparts, and in some cases noticeably better.

Quite clearly, educational efforts are needed to inform the public—as well as public and private employers—about the true capabilities of middle-aged and older workers.

This takes on added meaning because this week is National Employ the Older Worker Week.

President Carter has already issued a proclamation, calling upon Government officials, labor, business, and other groups to make the American public aware of the value of hiring older men and women.

If appropriately implemented, this action can lead to a more favorable climate for the employment of mature workers.

The need is compelling because middle-aged and older workers have been especially hard hit by the 1974–75 recession and its aftermath.

The latest figures from the Census Bureal reveal that poverty among persons 45 or older increased by 500,000 from 1974 to 1975, the sharpest rise in history.

More than 7 million middle-aged and older Americans have incomes below the poverty line. Another 3.7 million persons 45 or older were marginally poor, having an income slightly above the poverty line but below 125 percent of the poverty threshold.

All totaled, almost 10.8 million middle-aged and older persons—or nearly 17 percent of the 45-plus population—live in official poverty or very close to it.

If poverty is to be appreciably reduced for older and younger Americans, it is essential that our Nation develop policies to maximize job opportunities for all Americans.

It is also essential that we work to eliminate negative stereotypes which may discourage employers from hiring older or younger applicants.

President Carter's proclamation declaring the week of March 13 as National Employ the Older Worker Week is a constructive step in advancing toward this goal.

Mr. President, I ask unanimous consent that this proclamation be printed in the RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

[Presidential Documents]

PROCLAMATION 4487—NATIONAL EMPLOY THE OLDER WORKER WEEK, 1977

(By the President of the United States of America)

A PROCLAMATION

Our prosperity as a nation rests on our productivity as workers. Our happiness as individuals begins with our ability to find useful, rewarding jobs.

That is why I feel it so important that jobs be available for our people able to perform them—people in every region, of every religion and color, and of every age. Time and again in our history we have benefitted from the skill and dedication of our older workers. But too often prejudices and stereotypes—not limitations of ability—have kept older Americans from fulfilling their full potential at work.

The law now recognizes our special responsibility to assure older workers an equal chance for jobs and promotions. Many private groups and organizations are now working to improve prospects for older workers. The efforts deserve our vigorous support.

To encourage and support educational efforts designed to make employers more aware of the advantages of hiring older workers, the Congress, by joint resolution approved April 21, 1976 (90 Stat. 396), has requested the President to issue a proclamation designating the week beginning March 13, 1977, as National Employ the Older Worker Week.

Now, therefore, I, Jimmy Carter, President of the United States of America, do hereby designate the week beginning March 13, 1977, as National Employ the Older Worker Week. I call upon State and local officials, as well as labor, business, veterans, farm, religious, scientific, professional and other groups, to join with older workers in making the American people aware of the value of employing older men and women. I urge all Americans to observe this week with appropriate ceremonies, activities and programs designed to promote employment opportunities for older workers.

In witness whereof, I have hereunto set my hand this 14th day of February, in the year of our Lord, nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and first.

JIMMY CARTER.

A SOVIET SCHOLAR'S ASSESSMENT OF FINANCIAL WOES OF UNITED STATES AND ALLIES

Mr. HELMS. Mr. President, I recently noticed a reference to an article published in the Russian magazine, Ekonomicheskaya Gazeta, a publication of the U.S.S.R. Academy of Sciences Institute of Economics.

I asked the Library of Congress to supply a translation of this article which was written by Ye. Bukhvald and appeared in the December 6, 1976, edition.

Last year, in a dissent from the Banking Committee's report on the International Monetary Fund bill, I said that continued creation of liquidity in the world marketplace will only lead to more inflation: domestic and international.

It is my view that such inflation will cause and has caused great damage to the West and has crippled not only the economies of our allies, but it also has weakened our alliances. It has escalated the cost of defense, and it has encouraged added state intervention in the economies of the United States and our allies.

The Ekonomicheskaya Gazeta predictably attributes the West's financial ills to "objective contradictions" although it makes an interesting assessment of the breakdown of the Bretton Woods monetary system, and the monetary chaos we have witnessed since 1973.

In fact, of course, the "source of the crisis" does not lie in the "nature of the capitalist economy"; it lies in the unwillingness of Congress to stand up to the myriad of pressure groups who advocate programs and policies that result in inflation.

It is too seldom that we have an opportunity to review the opinions expressed in important Soviet journals.

Mr. President, I ask unanimous consent that the article to which I have referred, entitled "Role of Gold in Capitalist Currency Crisis Examined," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ROLE OF GOLD IN CAPITALIST CURRENCY CRISIS EXAMINED

Moscow Ekonomicheskaya Gazeta in Russian No 50 signed to press 6 Dec 76 p 22 LD.

[Article by Candidate of Economic Sciences Ye. Bukhvald, scientific assistant of the USSR Academy of Sciences Institute of Economics: "Gold and the Currency Crisis"]

[Text] The contemporary stage of the crisis of capitalism's currency and financial system is connected with the change in the role of gold as its basis. Considerable changes have taken place in recent years in this sphere. The collapse of the international currency system based on the principles of the gold-convertibility standard (known as the "Bretton Woods system"), and also the appreciable activation of plans for the so-called "demonetization" of gold, that is, the removal of its functions as a monetary commodity and as the basic international reserve medium and medium for payments, attest, in particular, to these changes.

BASIC TRENDS

The evolution of gold's economic role is taking place against a background of the deepening of capitalism's general crisis and the growth of interimperialist contradictions. "Such characteristic features of the present serious crisis," the final document of the June 1976 Berlin conference of European communist and workers parties notes, "as chronic inflation, the crisis of the currency system, the increasing underloading of production capacities, and the unemployment of millions of working people, stand out particularly sharply."

The reasons for this lie in the objective contradictions of the capitalist economic system, the strengthening of the state-monopoly regulation of the economy in the interests of big capital, and the militarization of the economy. As a result, a sharp increase in nonproductive state consumption—and above all military consumption—of goods and services has been noted in recent years. Thus, in the United States in 1975 the volume of this consumption was $340 billion as against $38 billion in 1950. Direct military spending is steadily increasing; more than $100 billion is being appropriated in the United States for these purposes in fiscal 1977.

The growth of the scale of state consumption and financing in the capitalist economy is based, as a rule, on the practice of so-called "deficit financing," that is, budget expenditure systematically exceeds income. For example, over a period of 25 years (the fiscal years 1951–1975) the total U.S. federal budget deficit amounted to $190 billion.

The chronic imbalance of the capitalist countries' finances is leading to an excessive outflow of credit exchange assets [kreditnyye sredstva obrashcheniya], which serves as one of the main sources of inflation and of the depreciation of money. The exacerbation of inflationary processes is directly linked with the growth of the monopolies' profits through the raising of prices, and through an offensive against the vital interests of the working people.

The gold basis of capitalist currencies to a certain degree hindered the growth of the monopolies' super-profits insofar as it restricted the scope for "deficit financing" and price manipulations. Thus, the interests of monopoly capital prompted a restructuring of capitalism's money-credit and currency system. The process of supplanting gold with credit exchange assets has now led to a position where gold has been totally removed from domestic circulation, state and private gold reserves have lost their classic functions

as a monetary reserve in the domestic monetary mechanism, the currencies of capitalist countries have become nonconvertible into gold and, as far as the majority of these currencies is concerned, they have no gold backing at all.

GOLD AND DOLLARS

After World War II, U.S. monopoly capital, relying on U.S. economic might, strove to insure for the dollar the status of gold-equivalent as an international reserve medium and as a medium for payments, which is characteristic of the system of the gold-covertibility standard and, in fact, of the system of the gold-dollar standard.

In those years the stability of the dollar's position as an international currency rested on two basic factors: on the relative stability of its purchasing power, and also on the possibility for a converting dollar accumulations into gold at a fixed price of $35 per troy ounce (31.1 grams).

The situation in the international currency system has now changed radically. Whereas in 1949 the United States' gold and dollar reserves were 2.8 times greater then its short-term obligations abroad, in the middle of 1976 the U.S. reserves stood at $18 billion (of which $11.6 billion were in gold) in contrast to a short-term debt in excess of $130 billion, including about $85 billion dollars owed to the central banks and currency organs of other capitalist states. The simultaneous application for the conversion of these foreign dollars credits into gold would have meant total bankruptcy for the United States as a debtor. However, this possibility has now been excluded. In August 1971, the United States arbitrarily broke the link between gold and the dollar. The world gold-convertibility standard has transformed into something fictitious.

The present economic crisis which began in 1973 exacerbated even further the currency disorders in the capitalist world. The devaluation of a whole series of currencies, the unprecedented fall in the exchange rate of the pound sterling, and the acute worsening of the currency contradictions between the United States, the Common Market, and Japan attest to this. Inflation and the instability of currency exchange rates are intensified even further by periodic "currency fevers" which arise as a result of the monopolies' speculative machinations.

In recent years, during numerous discussions of the questions of the role of gold, leading capitalist countries, opposing the immediate "demonetization" of gold which the United States was seeking, have nevertheless agreed to hand over the functions of a world currency to so-called "paper gold" or "special drawing rights" (SDR)—a sort of international credit money issued by the IMF.

The collapse of the system of the gold-convertibility standard convincingly showed the impossibility of replacing gold with any national currency, even if it is one based on considerable economic potential. SDRs are more stable, having the nature of international credit money, although the possibility of using these rights as a real alternative to metal-backed money are extremely limited.

THE ILLUSIONS OF "DEMONETIZATION" AND REALITY

Bourgeois ideologists are attempting to depict the trends towards the replacement of gold's credit exchange assets as a process of "demonetization." The untenability of these attempts is obvious. In the epoch of state-monopoly relations, capitalism continues to mean commodity production, as a consequence of which the role of gold in the capitalist economy, and especially in the currency-financial sphere, remains extremely considerable.

Whereas a trend has developed in the channels of domestic circulation toward the replacement of gold with paper money and mainly credit exchange assets, in the sphere of external settlements gold itself usually operates in its natural form as a world currency. Gold's function as a reserve purchasing medium, and also as a universal embodiment of public wealth providing a hedge against inflationary depreciations for accumulations of currency, still persists even under contemporary conditions.

At the present time, a kind of "tetragon" of reserve media form the basis of the international currency system: gold, foreign currency, reserve positions (that is right to obtain unconditional loans) in the IMF and, finally SDRs.

International financial statistical data show that the proportion of reserve media which have their basis in the form of international credit is still small in the total liquid assets of the industrially developed capitalist countries—about 15 percent, including SDRs accounting for 7 percent. And if all the capitalist and developing countries that are members of the IMF are considered, the share of SDRs in the official reserves will be even lower—about 5 percent. Moreover, the use of SDRs is basically restricted to a narrow sphere of interstate settlements and, in connection with this, they are not capable of preventing either the processes of depreciation or sharp fluctuations in the exchange rates of capitalist currencies. But the main part of the reserves consists of liquid assets of the "lowest order"—foreign currencies (two-thirds of which are held in U.S. dollars). However, these currency deposits are convertible neither into gold nor into SDRs.

Under these conditions, the stability of the international turnover of trade and payments presupposes that those participating in it possess definite accumulations of gold. The aspiration of the majority of capitalist states to make active use of their gold reserves in international accounting and credit operations attests to this.

Thus, what is taking place is not the "demonetization" of gold but the modification of its functions in the capitalist economy. One of the most important aspects of this process is that the deepening of the instability and inflationary nature of capitalism's currency system is even further enhancing the role of gold as a real world currency, and is intensifying its function as a reserve purchasing medium, and as a guarantee for international obligations.

While trying to "elbow" gold out of its economic mechanisms, the capitalist economy still needs it as a stabilizing element. The source of the crisis of the present currency system lies not in gold or any other components of the system, but in the unstable and contradictory nature of the entire capitalist economy as a whole, and no attempts at "demonetization" are capable of creating conditions for overcoming this crisis.

LIFE FROM THE LABS: WHO WILL CONTROL THE NEW TECHNOLOGY?

Mr. NELSON. Mr. President, revolutionary advances in biology have brought us to the point where the very nature of life on this planet can be changed by man's intervention. That it can be changed for the better by wise application of these new scientific and technological advances is very likely. But there is also the grave danger that unforeseen and possibly irrevocable damage can be done if this activity is allowed to proceed recklessly.

There are now before both Houses of the Congress bills that would regulate the conduct of the so-called DNA recombinant or gene transplant research. In due course, we will be asked to debate and vote on this issue. It is imperative that each of us understands the basic nature of the problem confronting us. An article in the March issue of the Progressive is an excellent overview by the distinguished science writer, Judith Randal.

Mr. President, I ask unanimous consent to print the text of Judith Randal's article, "Life From the Labs: Who Will Control the New Technology?" in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

LIFE FROM THE LABS: WHO WILL CONTROL THE NEW TECHNOLOGY?

(By Judith Randal) *

As recently as five years ago, almost anyone who suggested that the species barrier could be broken much more easily and at far less cost than it took to split the atom would probably have been regarded as a science fiction buff at best, and more probably as a nut.

Today this is no longer fantasy. At the very time, ironically, when thousands of species are threatened by man or already extinct, the tools that will cause entirely unrelated species to exchange hereditary material have become a reality. What now confronts us is the problem of weighing the potential benefits of this new technology against the potential risks—without sacrificing the freedom of scientific inquiry or endangering the world on a previously unimagined scale.

Interspecies hybrids are nothing new, but the issue of such unions—the mule is an example—have always been distinguished by an inability to reproduce. Moreover, those forms of life—bacteria and blue-green algae—which do not have distinct cell nuclei and those which do, have always been autonomous biological kingdoms whose boundaries could not be crossed. With the discovery of enzymes that will fit ordinary bacteria with the genes of any plant, animal, insect, or virus a scientist may choose, and with the evidence that generation after generation of germs will then continue to express the characteristics conveyed by the transplants, such distinctions are fading fast.

As they fade, we suddenly face the prospect that man will be moving genes back and forth across boundaries that many millions of years of evolution have set in place. That prospect now engages the scientific community in a furious debate—one of which most Americans are still unaware, while the rest wonder which biologists to believe.

The dilemma of balancing scientific risks and benefits is, of course, a familiar one. In the case of nuclear energy, both the risks and the benefits are at least familiar and more or less quantifiable. And when physicists have created new elements, they have done so with the knowledge that their behavior will be highly predictable. By contrast, even the experts can only guess what will happen when germs are provided with exotic genetic material and what trade-off this new technology will require. And whereas radiation gradually decays, novel microbes might multiply indefinitely in a hospitable environment.

Last June, the National Institutes of Health (NIH) published voluntary guidelines which, in effect, sort proposed genetic experiments according to their estimated risk and then define those which can be safely performed under specified conditions and those which are potentially so hazardous

---

*Judith Randal covers the health sciences for the New York Daily News and writes a nationally syndicated newspaper column.

that they should be deferred pending further developments, or completely avoided.

Some biologists, including Nobel laureates David Baltimore and James Dewey Watson of the Massachusetts Institute of Technology and the Cold Spring Harbor Laboratory on Long Island, respectively, are satisfied that the NIH guidelines provide adequate safeguards against the escape into our midst of bacteria that might prove to be drug-resistant. There are others, within and without the Nobel ranks, who think such an "Andromeda Strain" scenario is overblown, and who protest that the NIH has imposed needless limitations on scientific inquiry.

But there are still others—and they, too, include a Nobelist, Professor George Wald of Harvard—who are not at all convinced. They point out that accidents have happened under the best-regulated scientific circumstances, and they would, therefore, have the work go forward only in highly secure facilities and sparsely populated places—if at all.

The bacteria that receive gene transplants are called DNA recombinants. DNA, or deoxyribonucleic acid, is the molecule of heredity (except for some viruses). In the course of the experiments, segments of the DNA of two or more species are annealed. The novel micro-organisms created in this process offer insights into biological mechanisms that are not otherwise easily obtained, thus arousing the scientific curiosity of those who long to unravel the mysteries of cancer and other forms of serious disease. If, indeed, these organisms could be counted on to remain laboratory curiosities—and if reputations and money were not riding on them—there would be little reason to give gene-juggled microbes a second thought.

But this is not the case. In at least one university biology department, opposition to the experiments is already construed as an attempt to block scientific progress. Graduate students who balk at using the technique may find it hard to earn a degree or to find a post at the laboratory of their choice. At the same time, both academia and industry have correctly perceived that programming bacteria to turn out quantities of valuable chemicals and drugs is the stuff of which fortunes may soon be made. Today's fairly modest research project could be the basis of tomorrow's big business deal.

Last October, for example, Dr. Herbert Boyer of the University of California, San Francisco, was a leader of two research groups that reported they had successfully used recombinant technology to induce the production of beta galactosidase, a milk-digesting protein, in *Escherichia coli*, a species of bacteria whose usual habitat is the human or animal intestine. In this case, the protein was one that *E. coli* are capable of producing anyway. But Boyer was quick to point out that "we've gone out of the area of basic science into the area of practical application" and to predict that bacteria could be induced to become factories for the manufacture of insulin and other medications and chemicals.

What is important here is that the University of California and the California Institute of Technology, which was also represented on the Boyer team, lost no time in applying for patents on the technique. This means that, while the work was done with NIH funding and therefore adhered to the NIH guidelines, the income generated by it in the future could free both institutions—or for that matter any institution in a like position—from such constraint.

Universities, it is true, might be reluctant to incur the displeasure of the NIH. And an NIH regulation (which has never been used) would permit the agency to withhold funding other projects should a grantee or contractor defy the recombinant guidelines. Nonetheless, the NIH might well be reluctant to discipline the research community. And as universities become more pressed for funds, they are being driven to engage in projects that may become ethically dubious, though financially rewarding.

To be fair, there probably would have been no safety guidelines had it not been for the scientists themselves. In mid-1974, eleven prominent molecular biologists—Baltimore and Watson among them—called for and obtained a two-year moratorium on what seemed to be the riskiest gene grafts. It would seem, then, that since scientists initiated and designed the guidelines, they would also have a strong stake in complying with them.

But moral considerations do not necessarily prevail—especially when a recent Federation of American Scientists survey disclosed that 10 per cent of those responding thought the guidelines needlessly strict, and when compliance is entirely voluntary.

Under the NIH guidelines, laboratories engaged in the least potentially dangerous studies are designated P–1 (P standing for precautionary). Those somewhat up the line of potential risk are called P–2, and so on. P–4 laboratories have the most elaborate precautions to prevent the contamination of personnel or the escape of bacteria into the environment, and are the only facilities where the potentially most hazardous experiments are sanctioned.

Laboratories at Fort Detrick, Maryland, built for the Pentagon's now-abandoned germ warfare program and now used by the National Cancer Institute, house a P–4 facility. And the multi-million dollar lunar-receiving laboratory at the Johnson Space Center in Houston, designed for the isolation and containment of those "moon germs" that never materialized, would also qualify as P–4. So does the laboratory on Plum Island, off the eastern tip of Long Island, which the Department of Agriculture maintains for the study of hoof-and-mouth disease.

E. coli bacteria are the focus of most of the experiments conducted to date because this species of germ is the most thoroughly studied, and therefore the best understood. Many scientists would feel more comfortable working with a species that does not infect man, though considerable steps have been taken to disarm *E. coli*.

A special strain, K–12, is used; as far as is known, K–12 will not take up residence in people. And enfeebled substrains of K–12 have been developed that are dependent on an array of special requirements—the presence of certain nutrients, ultraviolet light, and extreme temperatures, for instance—in order to survive or reproduce. The theory is that the needs of such enfeebled strains can be supplied only in the laboratory. One scientist has aptly described the weaknesses that have been bred into the K–12 substrains as "messiah genes."

All this sounds reassuring—more than the facts may warrant. The behavior of bacteria is unpredictable, and the estimates of risk are necessarily crude. And the enzymes that permit scientists to transplant genes from one species to another do not act directly on the bacterial recipients, but on go-betweens. This multiplies the possibilities that something may go wrong.

These go-betweens are viruses known as phages, which naturally infect germs, or tiny, free-floating circlets of hereditary material called plasmids, which do the same. Some scientists worry about what might happen if gene-shuffled phages or plasmids came into contact with bacteria that—unlike the enfeebled K–12 substraints—had not been designed to commit suicide in the event of their escape to the outside world.

Exchanges of plasmids, in particular, are known to occur in nature between strains and even between species of bacteria. Proponents of generic research generally argue that if it happens in nature, there is probably nothing to fear. Critics are not so sure; their concern is that if sufficiently large numbers of these deviants were rapidly introduced, the situation could get out of hand.

Dr. Stanley Falkow, a microbiologist at the University of Washington in Seattle and an expert on *E. coli*, has questioned the wisdom of introducing certain plasmids even into enfeebled strains of K–12. On the basis of studies he has conducted on calves, he has advised the NIH Recombinant DNA Advisory Committee that "it may not be too far-fetched to suggest that some DNA recombinant molecules could profoundly affect the ability of this *E. coli* strain to survive and multiply in the gastrointestinal tract." Another of Falkow's worries is that a recombinant might somehow acquire the ability to reproduce in water, and so pose a massive environmental threat. Whatever the present hazards of *E. coli*—and it already causes most urniary tract infections and is dangerous to many who are chronically ill—it cannot ordinarily multiply in the presence of oxygen.

These concerns aside, the chemicals that form the basis of the new technology are, in principle, precision instruments that cut specific segments of DNA from one type of cell to be transplanted into others. When they are prepared by sophisticated scientists experienced in recombinant experimentation, restriction enzymes are exactly that. However, some researchers rely instead on commercial suppliers whose enzymes may or may not behave predictability. Such variability contributes to the inherent risk.

At present, anyone can buy restriction enzymes off the shelf or by mail from such suppliers as Miles Laboratories, and there is nothing to prevent the amateur from dabbling in the technology, nor is there any point in licensing the production of restriction enzymes, since anyone who knows anything about biochemistry can concoct his own from readily available ingredients.

A few years ago, a Massachusetts Institute of Technology undergraduate, having read published reports, demonstrated on paper that he knew how to build an atom bomb. Since DNA recombinant work requires only a meager investment in equipment and can be carried out in limited space, a similarly resourceful high school student could conceivably collect the necessary materials and then simply turn the experimental brew loose on the general environment.

DNA recombinants, like radiation, would not make their presence quickly known to the senses should they escape. They might well prove impossible to trace. Geiger counters will detect radiation; an equivalent device for detecting bacteria has not been invented yet.

Other possible hazards in the process are even more troubling. A Government interagency committee formed by White House directive "to review Federal policy on the conduct of research involving new forms of life" reports that the National Science Foundation, the Energy Research and Development Administration, and the Department of Defense have agreed to observe the NIH guidelines and that the Agriculture Department has indicated its probable willingness to go along. But neither the Occupational Health and Safety Administration, the Center for Disease Control, nor the Environmental Protection Agency—all of which might logically be involved—has assumed any oversight responsibilities for recipients of research grants or contracts, and the NIH, too, has demurred. Such loopholes raise the possibility of reckless mischief.

Furthermore, no one knows how much research is in progress. There is reason to wonder whether the Central Intelligence Agency or its equivalents abroad might not secretly carry out experiments their governments offi-

cially decried. And there is, as in nuclear science, the possibility of exploitation by lunatics or terrorists.

There is also the inevitability of exploitation by U.S. private industry. The Pharmaceutical Manufacturers Association, the trade group to which the largest drug firms belong, for example, has told the Senate health subcommittee that it generally agrees with the NIH guidelines, but that its members will want to make larger quantities of DNA recombinants than is permitted under the rules that apply to academic researchers.

Meanwhile, seven of these firms—Miles Laboratories, Eli Lilly, Hoffman-LaRoche, Merck Sharpe and Dohme, Abbott Laboratories, Upjohn, and Pfizer—are already at work with recombinants or are gearing up. There are other such firms that do not belong to the PMA; because they are generally smaller and less visible, they are perhaps even more likely to cut corners in striking out on their own.

The drug industry is only one of many that has sniffed potential profits in this new technology. While the public interest may dictate full disclosure about recombinant research, private enterprise operates on the principle that if the costs of bringing experimental findings to commercial realization are to justify the investment, trade secrets must be kept.

Thus, at a Commerce Department meeting last November at which several large firms were represented, the consensus was that the private sector should publicly register its projects, but let it go at that. While nuclear reactors must be licensed before they are built, any corporation wishing to build a containment facility for microbes can simply go ahead with no questions asked. In fact, should it decide to perform recombinant experiments at even the P–3 or P–4 level without proper safeguards, it could do that, too.

Dr. Donald Cape, who heads a biologically oriented California firm called Cetus and who attended the Commerce Department meeting, said later that there was agreement that "the registry would discourage underground or fly-by-night operations because anybody who decided to go into this field would have to stand up and be identified." But Cape obviously had some misgivings, since he also wondered aloud whether this type of enterprise should be in the profit-making sector at all.

Cetus is now doing nothing with recombinants and, according to Cape, is not in a rush to enter the field: "If we go into the business at all, we'll start off with the safe biological containment kinds of things." But the company numbers among its senior consultants molecular biologist Joshua Lederberg, a Stanford University Nobel Prize winner, who is on record as believing the NIH guidelines are too strict.

Lederberg is not the only academic to find himself in a somewhat ambiguous position. One of the most eloquent critics of the entire recombinant movement is Professor Robert Sinsheimer, chairman of the biology division at California Institute of Technology, who regards the NIH guidelines as "sorely inadequate." Yet people at Cal Tech are engaged in this work, and the institution, which already has a P–2 laboratory, is building a P–3 facility. Sinsheimer says he would not want to be associated with an institution where a department chairman had veto power over his subordinates. And he doubts the public would benefit if the experiments were halted at Cal Tech while they proliferated elsewhere. As he sees it, this would be as meaningless as having a nation unilaterally disarm.

Even if we were to ignore or resolve the danger of catastrophic accident, the emerging genetic technology would raise formidable and frightening problems—many of them similar to, but much more acute than, those already posed by other scientific developments. The production and promotion of antibotics, and their consequent overuse, has already led to the existence of drug-resistant germs. Now it is being suggested that bacteria can be programmed to manufacture antimicrobials more cheaply. It is not difficult to envision a new surge of highly promoted drugs—and a new health hazard.

General Electric has applied for patents on a technique which will use plasmids to confer on one strain of pseudomanas bacteria some genes endowing it with the capacity to digest most, if not all, of the various hydrocarbons that constitute crude oil. The new species could obviously prove a godsend for clearing up oil spills. But what would happen if it found its way into petroleum storage tanks, pipelines, or the wing tanks of a commercial jet aircraft in flight? And what will be the impact on the ocean environment itself? No one knows.

After our experience with antibiotics, and many other scientific and technological "advances," we have surely learned that the remedies we devise often create new and acute ailments. An urgent question must, therefore, be asked: Can't at least some of what seems attainable through DNA recombinants be achieved by other, safer means? Perhaps the short-run cost of such alternatives might be higher, but the long-run savings might be immense.

Few people, unfortunately, are even aware that such questions must be raised. But some rearguard actions are being fought. Harvard University, for example, is eager to remodel a floor of its forty-year old biology building into a P–3 (moderate risk) recombinant research facility, and it has received the approval of the NIH and the promise of some $285,000 of the agency's money. Work has already begun. But some members of Harvard's biology department—notably George Wald and Ruth Hubbard—are convinced that the insect-ridden structure, which by the University's own admission is also subject to floods, is no place for such an endeavor.

When their objections caught the ear of Cambridge's mayor, Albert E. Velluci, and the Cambridge City Council, a classic town-and-gown dispute ensued. Hearings were held, and last July a three-month "good faith" moratorium (which has since been extended) was imposed on P–3 and P–4 experiments at both Harvard and the Massachusetts Institute of Technology.

A citizens' review board appointed at the time has been looking into the situation. Chaired by a former mayor who owns a heating oil firm, the four men and four women—whose occupations range from nurse, social worker, physician, and structural engineer to professor of urban policy and community activists—recommended in January that the experimentation be permitted to resume. But in the belief that "a predominantly lay citizen group can face a technical scientific matter of general and deep public concern, educate itself appropriately to the task, and reach a fair decision," the panel also agreed that the NIH guidelines do not go for enough, and made further safety recommendations of its own. Among these is a proposed city ordinance that would automatically declare any research not in strict conformity to safety requirements to be a public health hazard.

The Cambridge review board obviously arrived at a political compromise. But its report made an essential point: "Knowledge, whether for its own sake or for its potential benefits to humankind, cannot serve as a justification for introducing risks to the public unless an informed citizenry is willing to accept those risks."

But not every town can be expected to react like Cambridge, and there are limitations to the local-option approach. Scientists, like industries, can readily move on if they don't like what they find in one place. Having already complied with a self-imposed moratorium, recombinant proponents are not likely to stand still indefinitely for what they regard as undue interference. They are, in general, an impatient lot, further pressed by what they feel is a need to make up for lost time in the face of competition from abroad.

Scientists of many nations are eager to participate in recombinant research, and some are already doing so with far less disclosure than there has been here. Britain's Official Secrets Act means, for example, that we may know less about what has been going on in British labs than we do about what has been happening in ours. Further, if U.S. firms cannot experiment at home, nothing can stop them from going abroad.

The new genetic technology is seductive—not only because it is cheap, fast, easy, and potentially lucrative, but also because it is intellectually appealing and holds out the promise of impressive benefits in spite of the admitted risks. The opportunity has probably passed, if it ever existed, to impose a total ban on the work—and any such ban would be breached. If there is one nightmare that biologists on all sides of the issue share, it is that Federal legislation might be drawn so inflexibly that it would impede both the progress and the safety of the research.

How, then, will the inevitable compromises be drawn? By making the research unpatentable? By insisting that all experiments be conducted in regional Federal facilities which industry would have to support in order to qualify for profits from the discoveries? By establishing an intricate system of licensure and environmental monitoring?

It is difficult to make even an educated guess. But it is clear that whatever is to be done must have the careful and immediate attention of scientists, and of the rest of us. A population explosion among microbes can occur in a matter of days, or even hours.

LABOR PROBLEMS IN THE BEEF INDUSTRY

Mr. CURTIS. Mr. President, the Amalgamated Meat Cutters and Butchers Workmen of North America have struck seven beef packing plants in three States—Nebraska, Iowa, and Missouri.
